PROPOSED OPERATING PROCEDURES

PK Document Control

PROPOSED USER GUIDE

Find controlled records. Prepare requests.
Review approvals. Complete physical handoffs.

Planned user procedures, screen illustrations,
and expected outcomes for nine request scenarios.

26 OCTOBER 2026 · PROPOSAL · REVISION 02

Your route through the workspace

01

GET ORIENTED

Sign in and account security
Overview and navigation
Find records and inspect details

02

REQUEST AND REVIEW

All nine request actions
Save Draft → Submit → decision
Return, reject, dispatch, and accept

03

CONTROL AND ADMINISTER

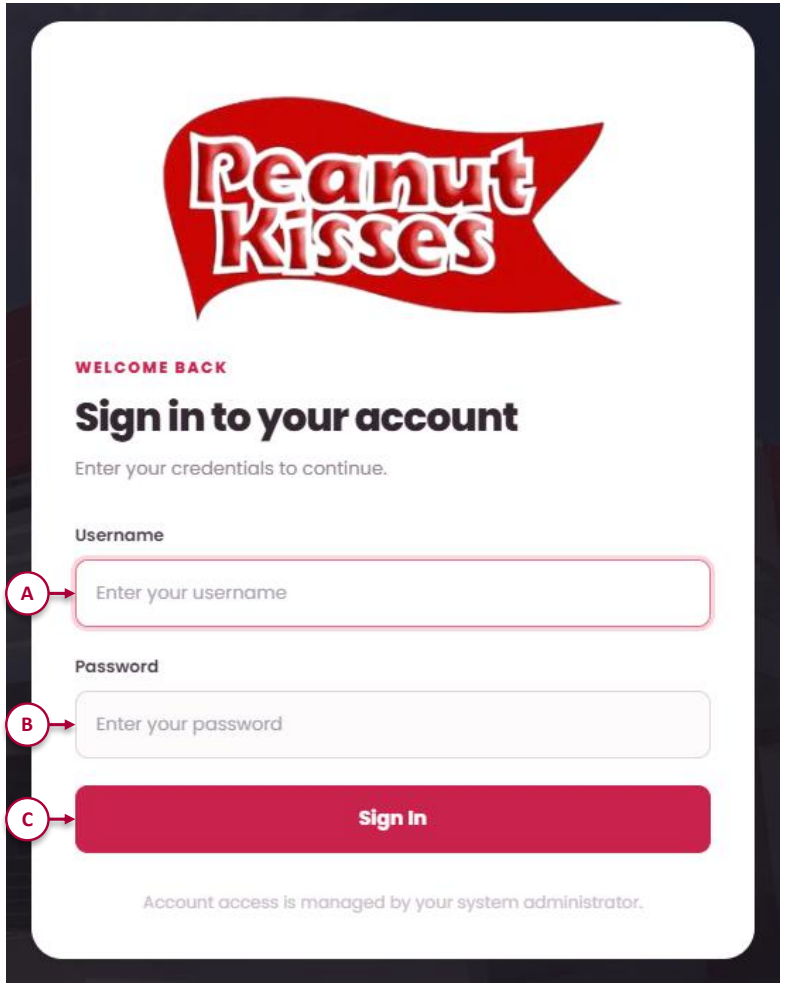

Direct documents and assignments
Places, users, roles, and workflows
Audit events and recovery tools

These procedures describe intended operation. Letters match the screen markers; short arrows identify controls. Numbered steps describe actions. Available actions will depend on permissions and the active workflow step.

People, records, dates and transactions in the screen illustrations are sample data.

System access and responsibilities

ON THIS SCREEN

A Username

B Password

C Sign In

WHAT TO DO

01 Open the address supplied by your system administrator and use your own account.

02 Hardcopy Documents tracks physical records; Softcopy Documents provides controlled electronic records and files.

03 Use My Requests for approval proposals and My Tasks for assigned approvals or physical handoffs.

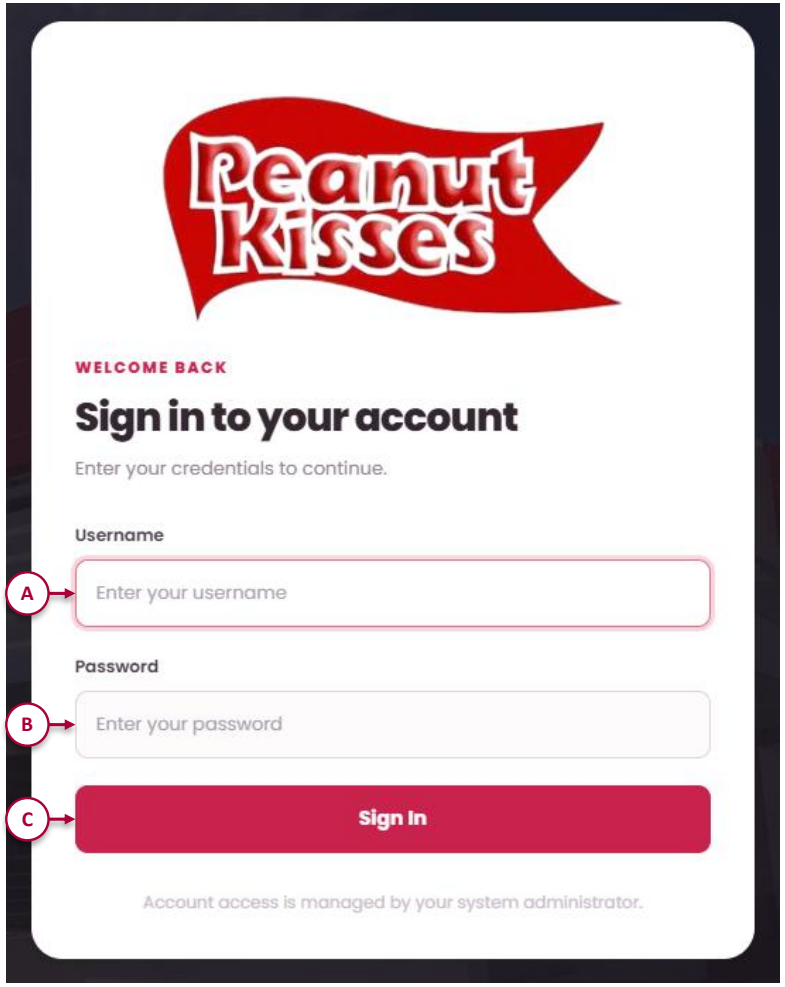

04 Document controllers and administrators receive extra management menus when permitted.

05 Ask the administrator when a needed menu, action, or record is unavailable.

Permissions and document access will determine the menus, records, request actions, and file buttons available to each user.

Sign in and change your password

ON THIS SCREEN

A Username

B Password

C Sign In

WHAT TO DO

01 Enter Username and Password, then select Sign In.

02 For a temporary password, complete Current or temporary password, New password, and Confirm new password.

03 Choose more than 8 characters, up to 72 bytes; select Set permanent password.

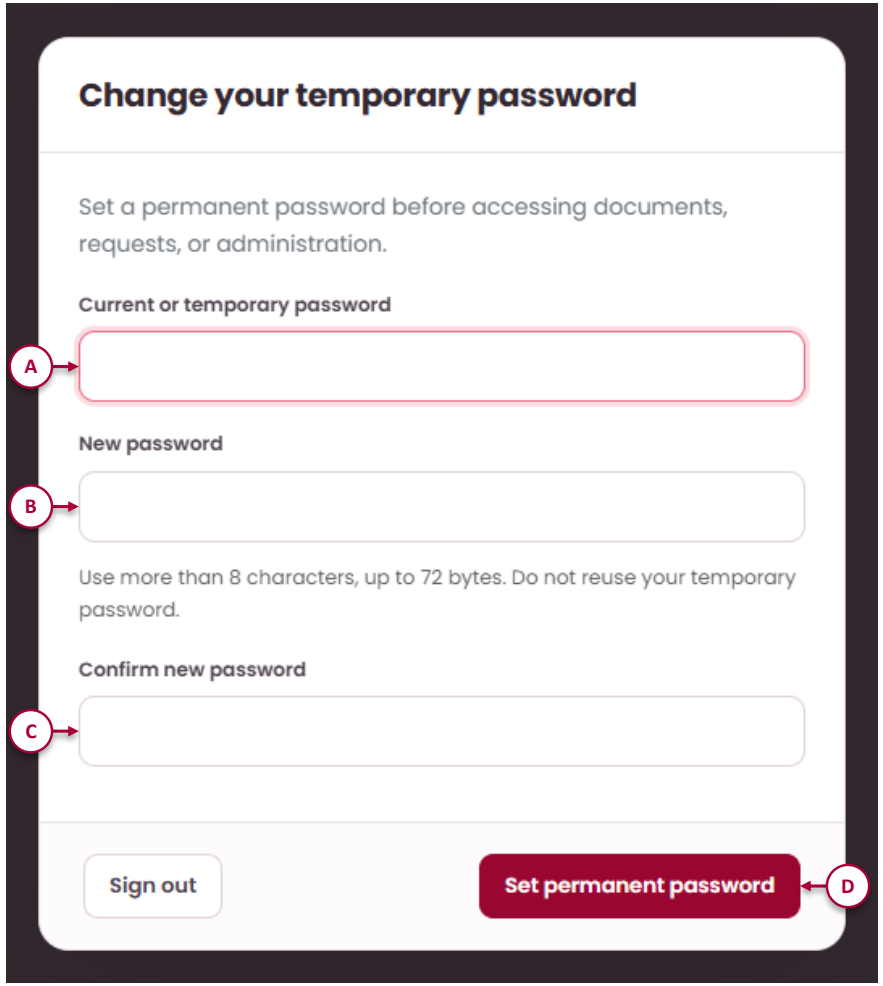

04 Later, open your name → Change Password, complete the fields, then Update Password → Confirm.

05 Open your name → Sign Out → Confirm to finish your session.

If Invalid username or password appears, recheck the credentials. After too many failed attempts, wait before trying again or contact the administrator.

Set your permanent password

ON THIS SCREEN

A Enter temporary password

B Enter permanent password

C Confirm permanent password

D Set permanent password

WHAT TO DO

01 For a new or reset account, enter the Current or temporary password.

02 Enter a New password with more than 8 characters, up to 72 bytes.

03 Repeat it in Confirm new password, then select Set permanent password.

The system will require this step before allowing access to the workspace.

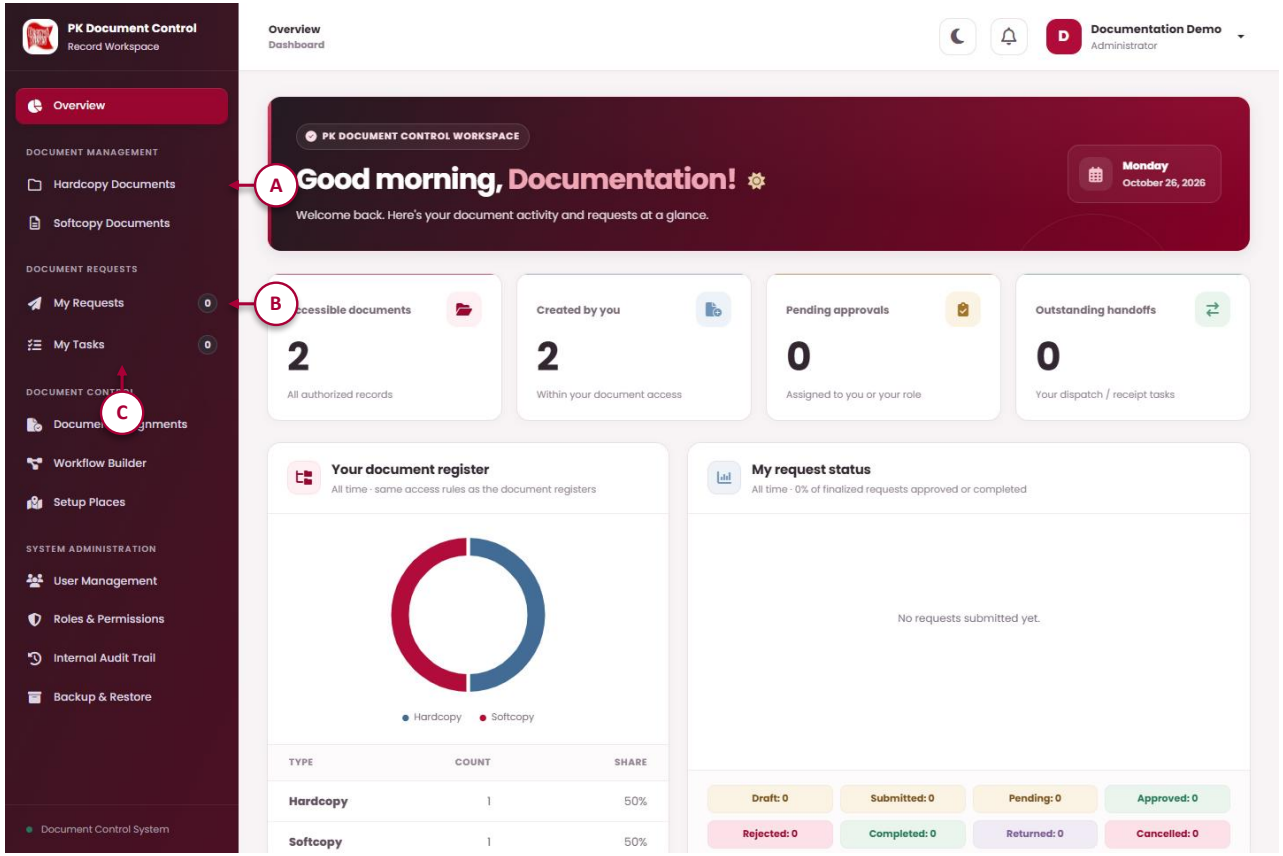

Overview and main navigation

ON THIS SCREEN

A **Open physical documents**

B **Start and track requests**

C **Review assigned work**

WHAT TO DO

01 Select Overview for your dashboard. On narrow screens, use Toggle navigation to show the sidebar.

02 Check Accessible documents and Created by you for counts within your document access.

03 Check Pending approvals and Outstanding handoffs for work assigned to you or your roles.

04 Read Your document register and My request status to see document and request distributions.

05 Use the left navigation for documents, My Requests, My Tasks, and permitted management pages; use the bell for Notifications.

Dashboard numbers will reflect the signed-in user's authorized records and assigned work.

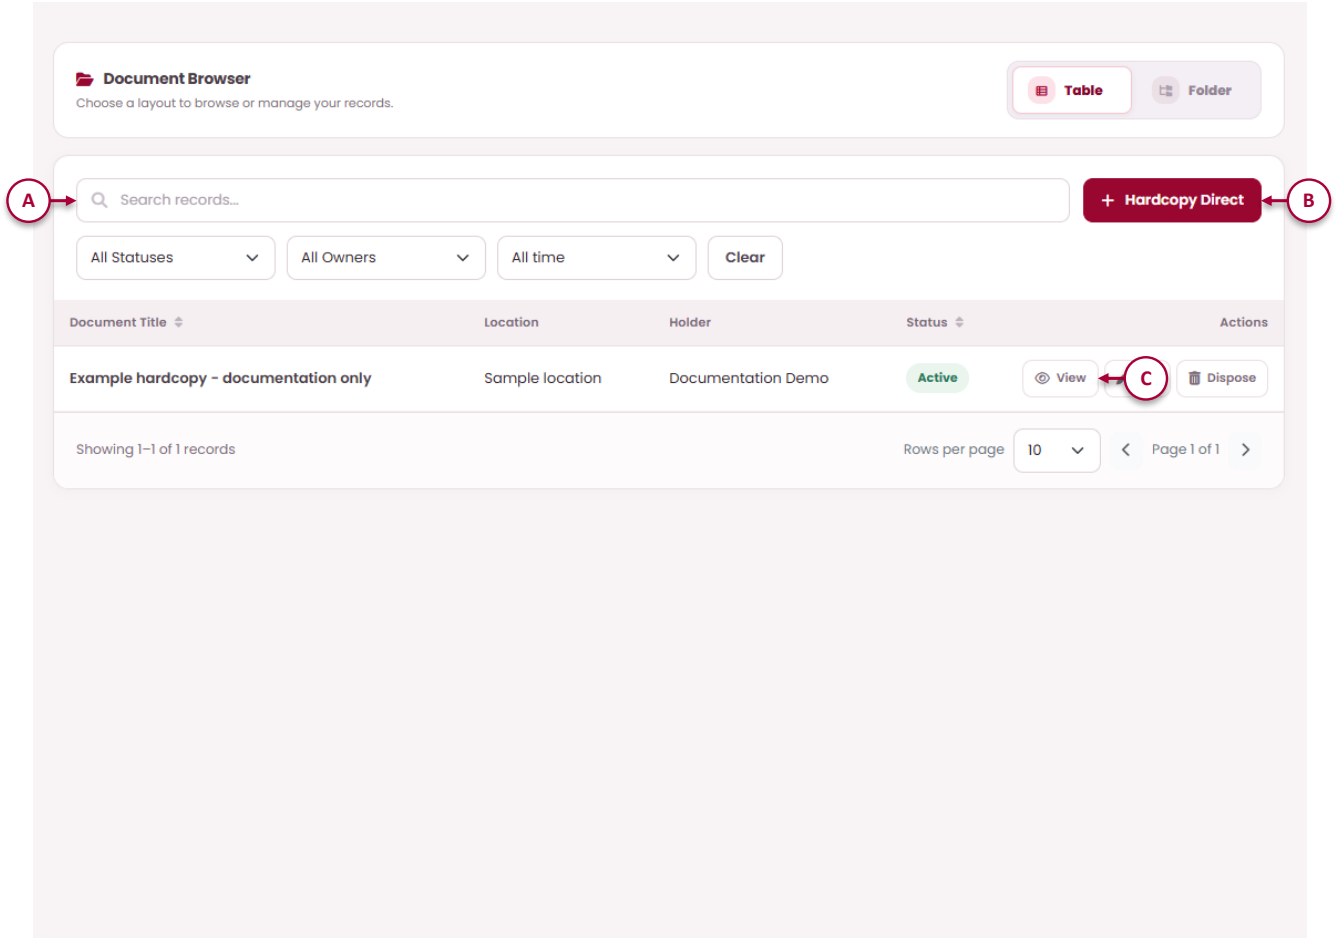

Find and inspect document records

ON THIS SCREEN

A Search by document details

B Authorized direct entry

C Open document details

WHAT TO DO

01 Open Hardcopy Documents or Softcopy Documents and choose Table or Folder.

02 Use Search records, status, owner, and date filters. Select Clear to remove filters.

03 Expand hardcopy Area → Specific → optional Asset → Location, or softcopy category folders. Use breadcrumbs and All Documents to change scope.

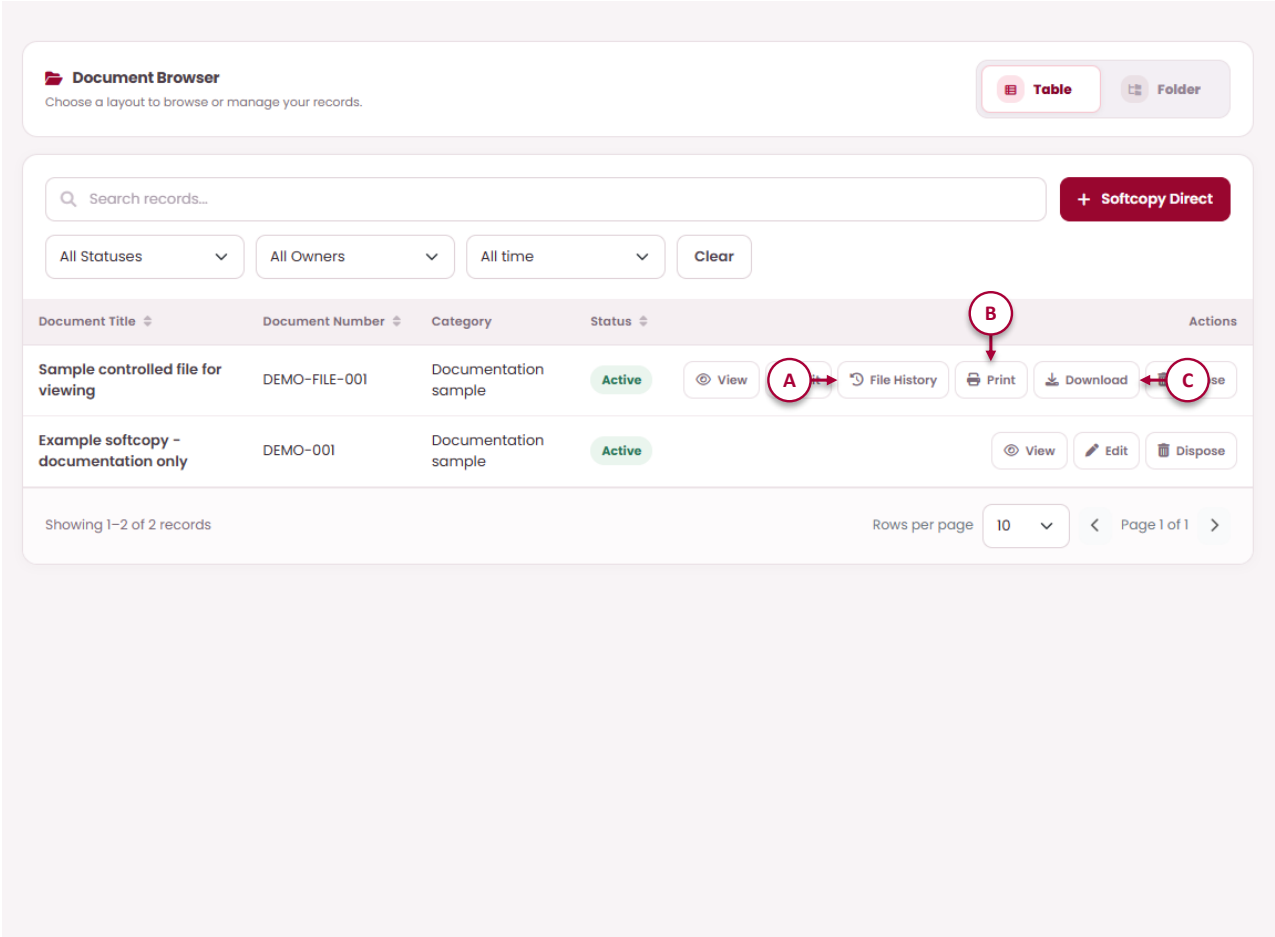

04 Open a document title or View action for full details, related requests, approval history, and applicable file or transfer history.

05 Use Rows per page, page arrows, and Recent / A–Z / Z–A ordering to browse long lists.

The proposed hardcopy register will show Document Title, Location, Holder, and Status. The softcopy register will show Document Title, Document Number, Category, and Status.

Open, download and print controlled files

ON THIS SCREEN

A Open File History

B Open print preview

C Download approved file

WHAT TO DO

01 Open Softcopy Documents and find the permitted active record.

02 Select File History to inspect its available revision files.

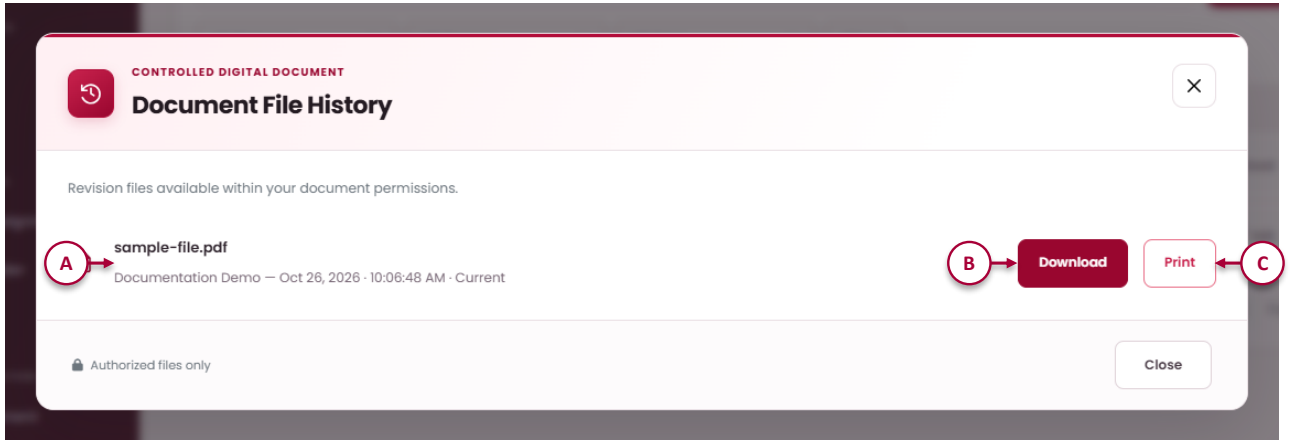

03 Select Download for an authorized copy of the current approved file.

04 Select Print to open the controlled print preview.

Available file actions depend on your permissions and document access.

Inspect Document File History

ON THIS SCREEN

A Identify current revision

B Download revision file

C Print revision file

WHAT TO DO

01 Open File History on the intended softcopy record.

02 Read the revision details and identify the current file.

03 Use available Download or Print actions for files within your access.

04 Select Close to return to the document register.

Historical revision metadata can remain after retired file bytes are cleaned up.

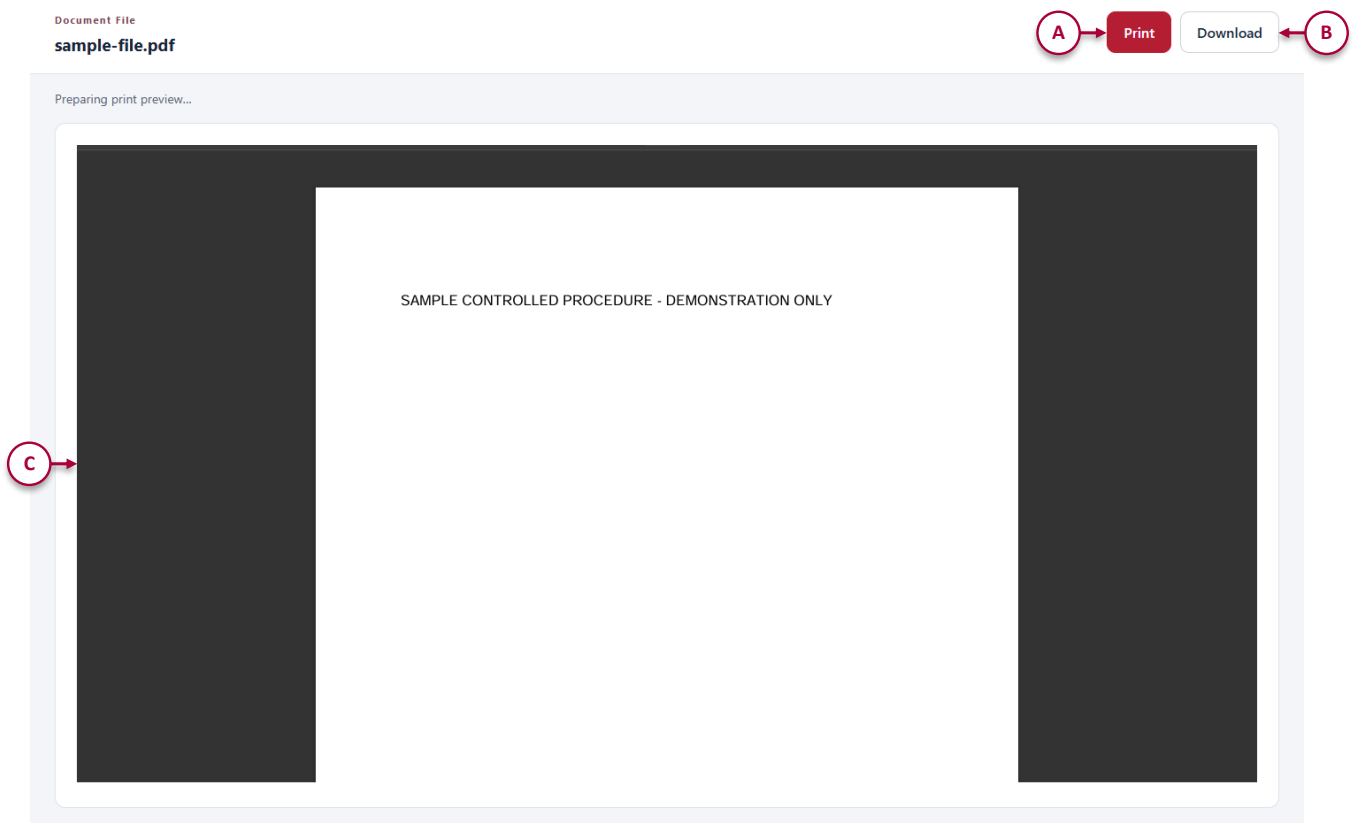

Use the controlled print preview

ON THIS SCREEN

A Print this controlled file

B Download the approved file

C Review the file preview

WHAT TO DO

01 Open Print from the authorized document file action.

02 Wait for the PDF, image or text preview to prepare.

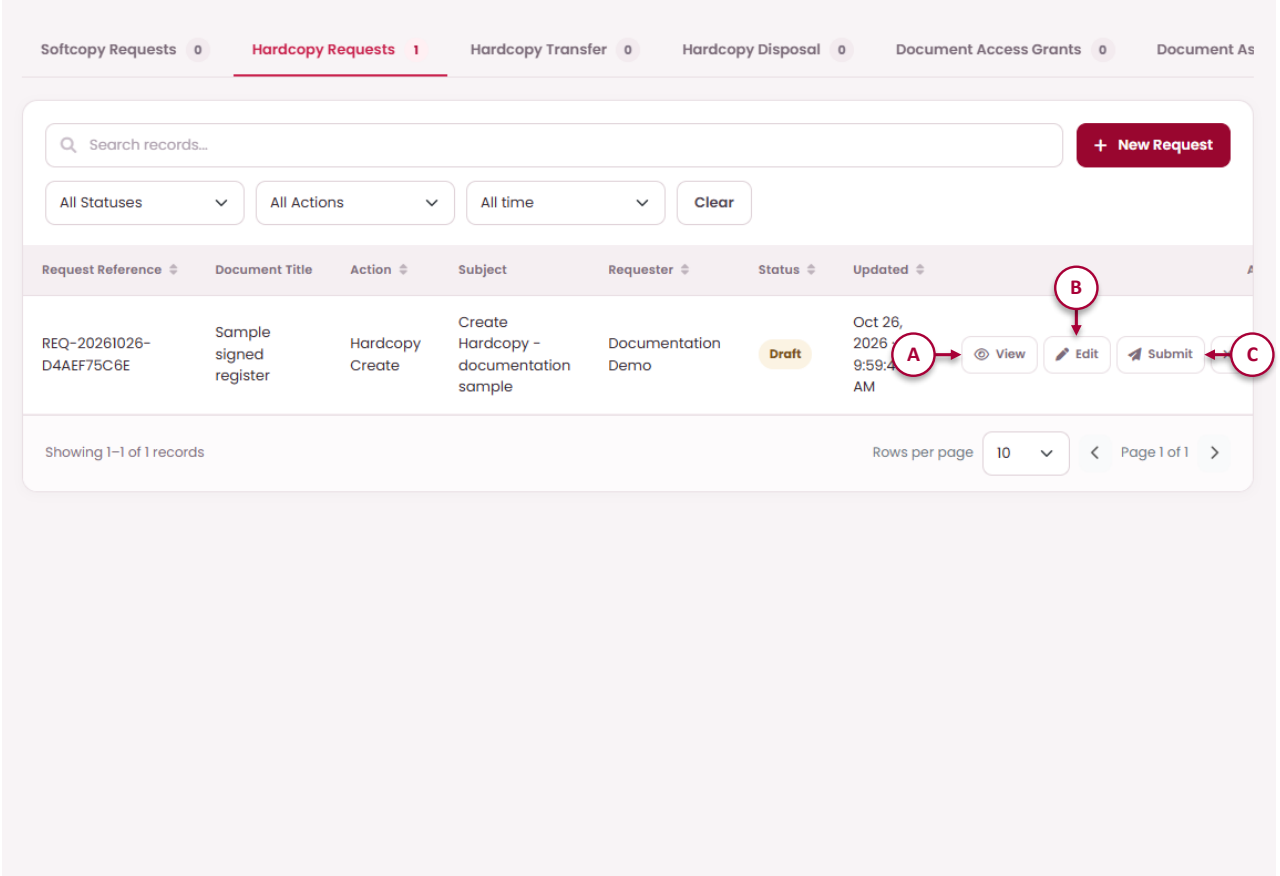

03 Select Print when ready, then complete your browser's print dialog.

04 Use Download when you need a permitted local copy.

Office files use the downloaded file and an installed Office application for printing.

Save, submit, and track requests

ON THIS SCREEN

A View draft details

B Edit before submitting

C Submit for approval

WHAT TO DO

01 Choose the appropriate My Requests tab and select New Request; complete the action-specific fields.

02 Save Draft → Confirm records the proposal. Open View to inspect metadata, any attachment, and its approval timeline.

03 Select Submit → Confirm when ready. Submitted means the published approval workflow has started.

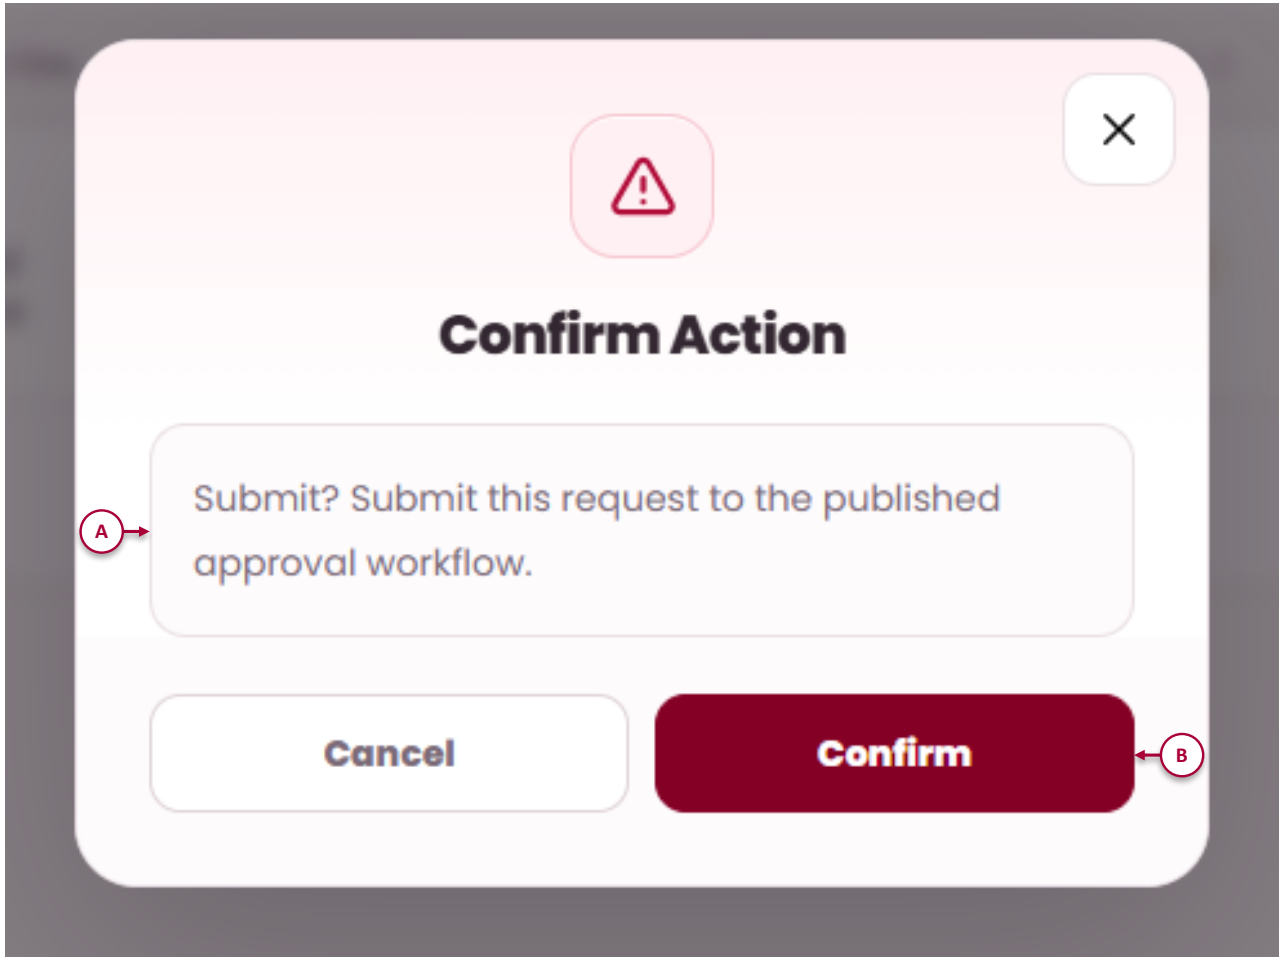

04 For a request Returned to you, read the remarks, Edit, save, and Submit again.

05 Cancel an unwanted Draft. Delete is permanent and is offered only for your cancelled, never-submitted draft.

Request filters will include Draft, Submitted, Completed, Approved, Rejected, Returned, and Cancelled. An Approved transfer will still require the physical handoff steps.

Submit a checked draft

ON THIS SCREEN

A Review the submission

B Confirm to start approval

WHAT TO DO

01 Save Draft records your proposal without starting approval.

02 Back in the request list, select Submit for the intended draft.

03 Read the request confirmation and select Confirm to start the approval workflow.

04 Check the request becomes Submitted, then inspect its Approval Process Timeline.

Submit uses the shared Confirm dialog; it does not ask for an approval remark.

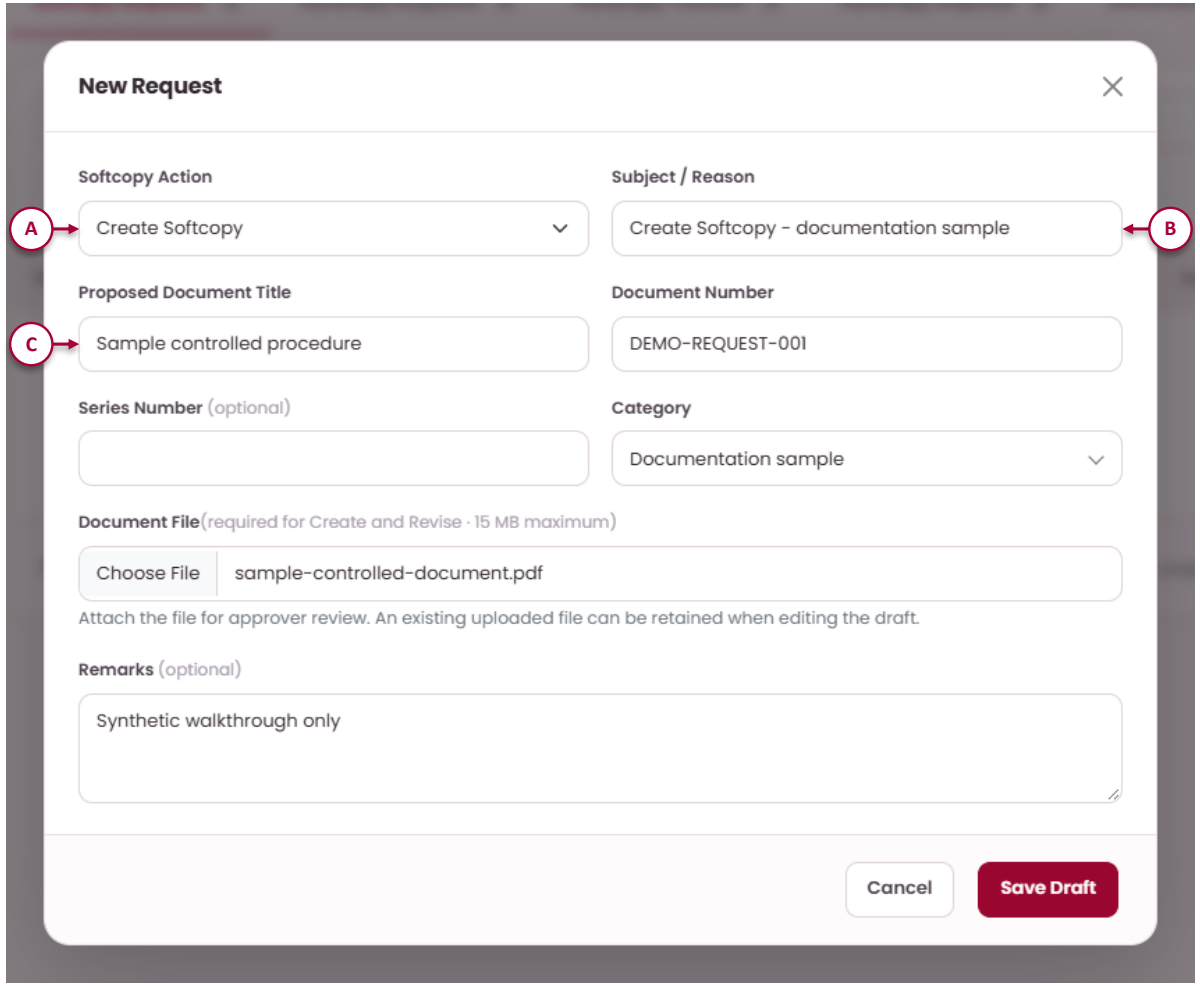

Sample 01 · Create Softcopy

ON THIS SCREEN

A **Choose Create Softcopy**

B **State the reason**

C **Enter the sample title**

EXAMPLE DATA

Subject / Reason: Create Softcopy - documentation sample

Proposed Document Title: Sample controlled procedure

Document Number: DEMO-REQUEST-001

WHAT TO DO

01 Open My Requests → Softcopy and select New Request.

02 Choose Create Softcopy and enter Subject / Reason.

03 Enter the proposed title, Document Number, optional Series Number, and Category.

04 Attach the Document File, add Remarks if needed, and select Save Draft.

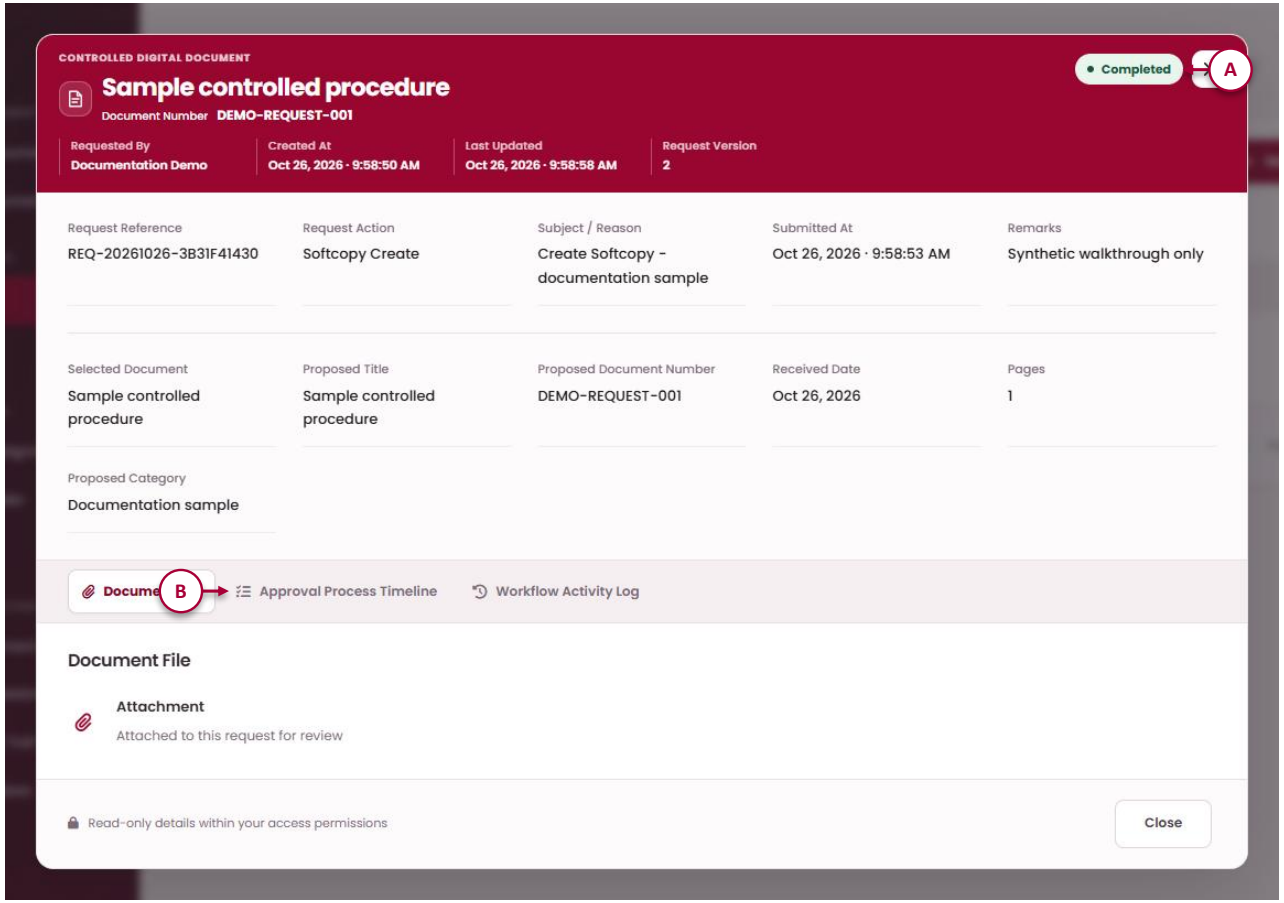

Save Draft first. Submit only after checking the document, fields and attachment.

Sample 01 · Create Softcopy — expected outcome

ON THIS SCREEN

A Completed request

B Open approval timeline

EXPECTED: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

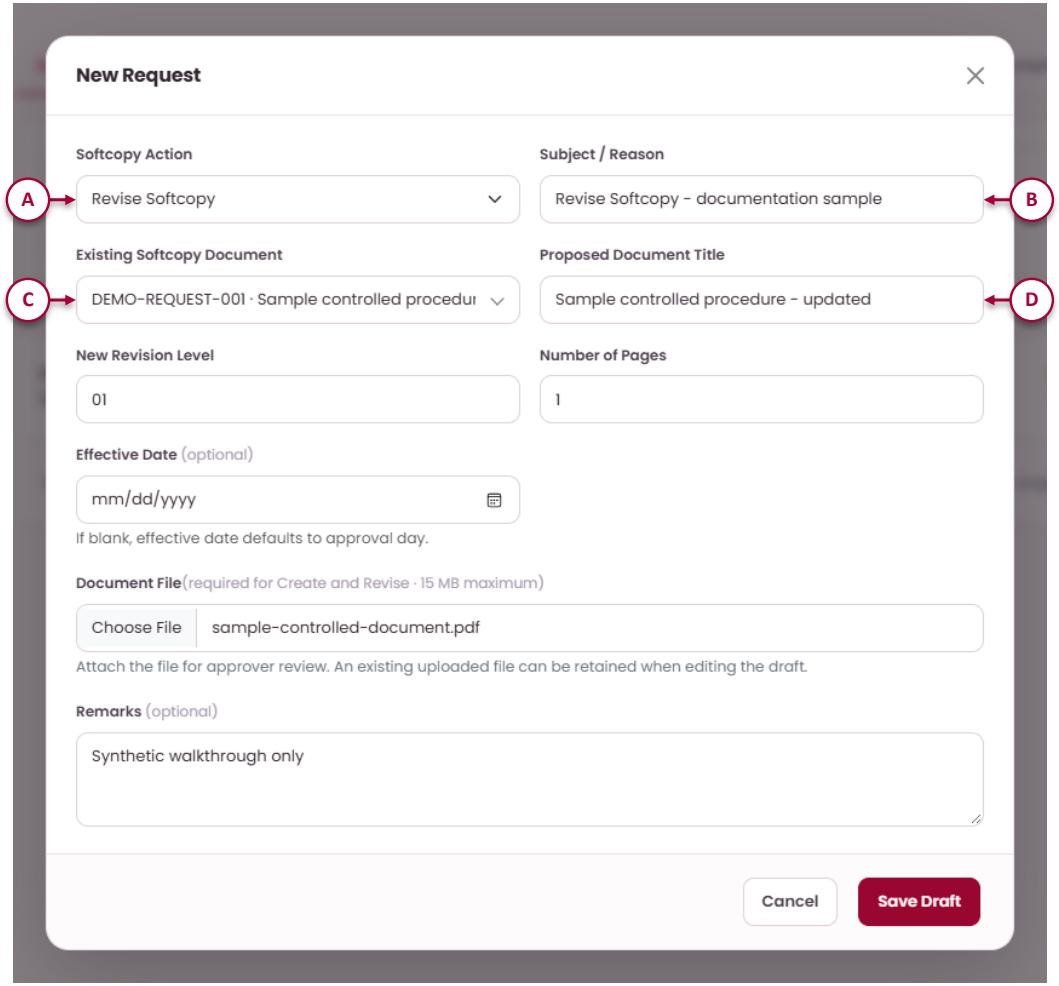

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 After final approval, the new controlled softcopy will appear in Softcopy Documents. Expected status: Completed.

The illustration shows the expected state for this sample scenario.

Sample 02 · Revise Softcopy

ON THIS SCREEN

A Choose Revise Softcopy

B State the reason

C Select existing document

D Enter the sample title

EXAMPLE DATA

Subject / Reason: Revise Softcopy - documentation sample

Proposed Document Title: Sample controlled procedure - updated

New Revision Level: 01

WHAT TO DO

01 Open My Requests → Softcopy and select New Request.

02 Choose Revise Softcopy and select the Existing Softcopy Document.

03 Check the proposed title; enter New Revision Level and Number of Pages.

04 Choose an optional Effective Date, attach the revised file, then Save Draft.

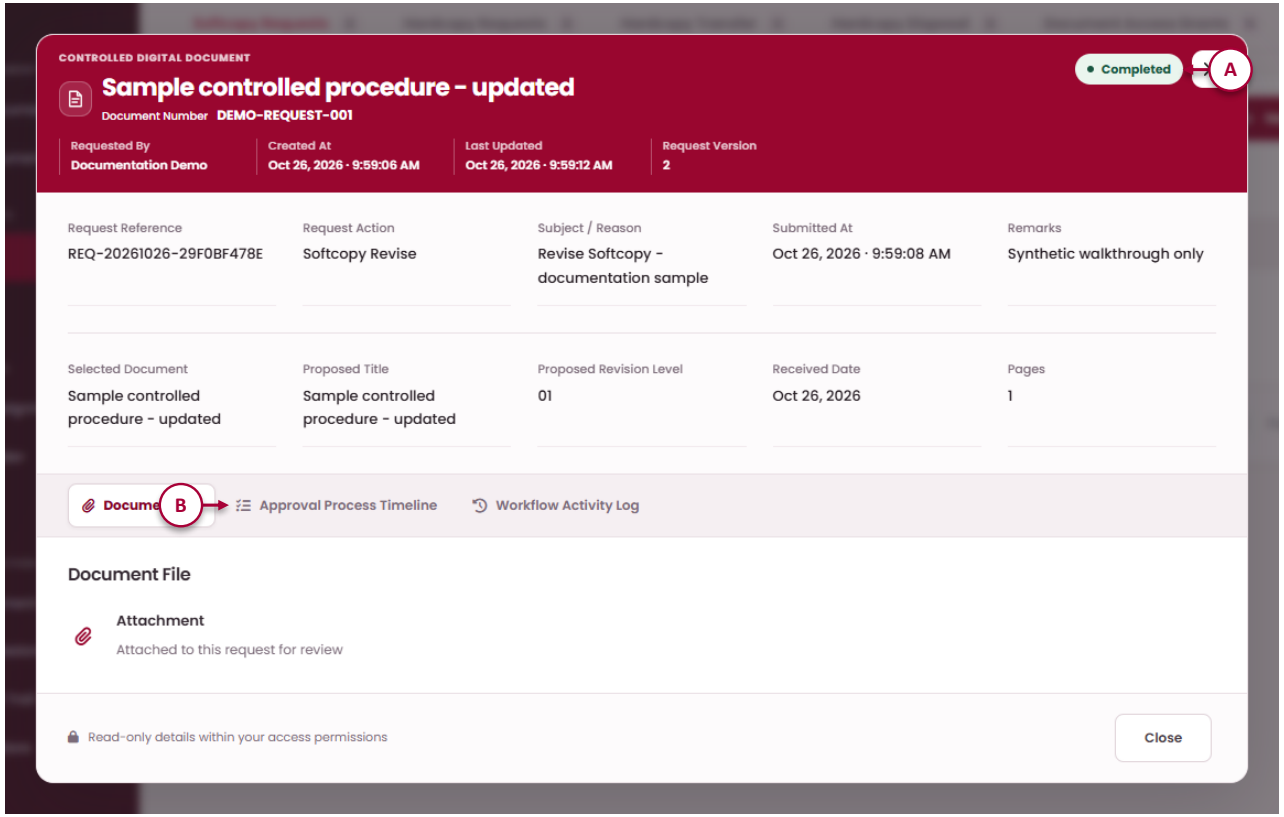

Save Draft first. Submit only after checking the document, fields and attachment.

Sample 02 · Revise Softcopy — expected outcome

ON THIS SCREEN

A Completed request

B Open approval timeline

EXPECTED: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The approved revision will become the current controlled file; check the revision and File History. Expected status: Completed.

The illustration shows the expected state for this sample scenario.

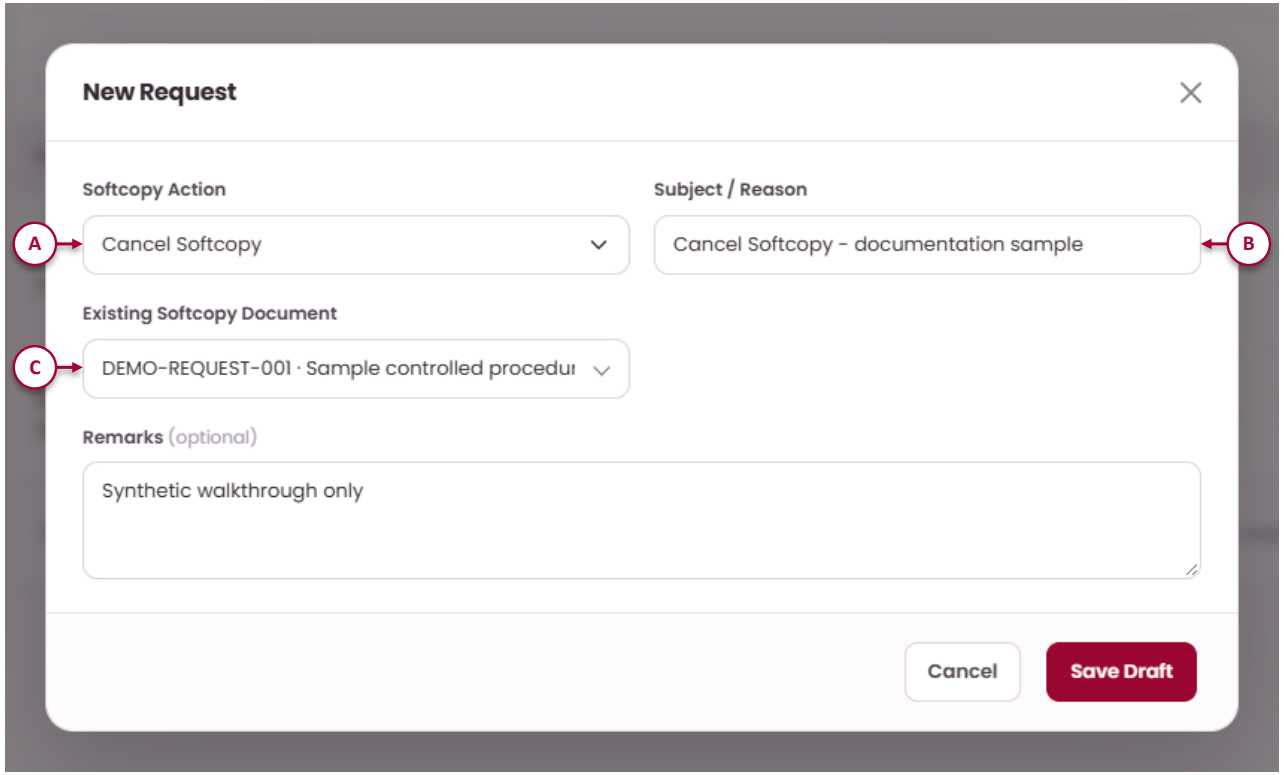

Sample 03 · Cancel Softcopy

ON THIS SCREEN

A **Choose Cancel Softcopy**

B **State the reason**

C **Select existing document**

EXAMPLE DATA

Subject / Reason: Cancel Softcopy - documentation sample

Existing Softcopy Document: Sample controlled procedure - updated

WHAT TO DO

01 Open My Requests → Softcopy and select New Request.

02 Choose Cancel Softcopy and select the Existing Softcopy Document.

03 Enter Subject / Reason and any Remarks explaining the cancellation.

04 Save Draft, check the selected record, and submit the proposal.

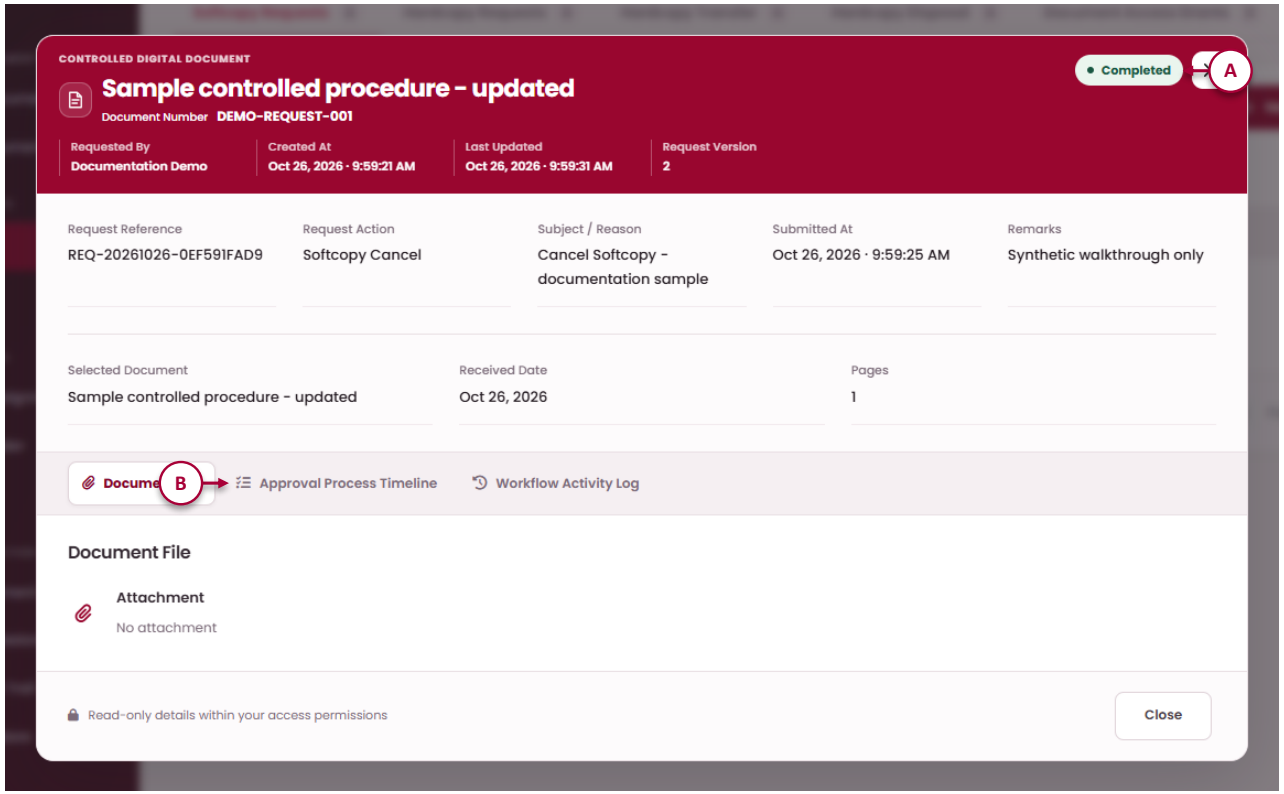

Save Draft first. Submit only after checking the document, fields and attachment.

Sample 03 · Cancel Softcopy — expected outcome

ON THIS SCREEN

A **Completed request**

B **Open approval timeline**

EXPECTED: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 Final approval will cancel the controlled softcopy; use the Cancelled status filter to inspect it. Expected status: Completed.

The illustration shows the expected state for this sample scenario.

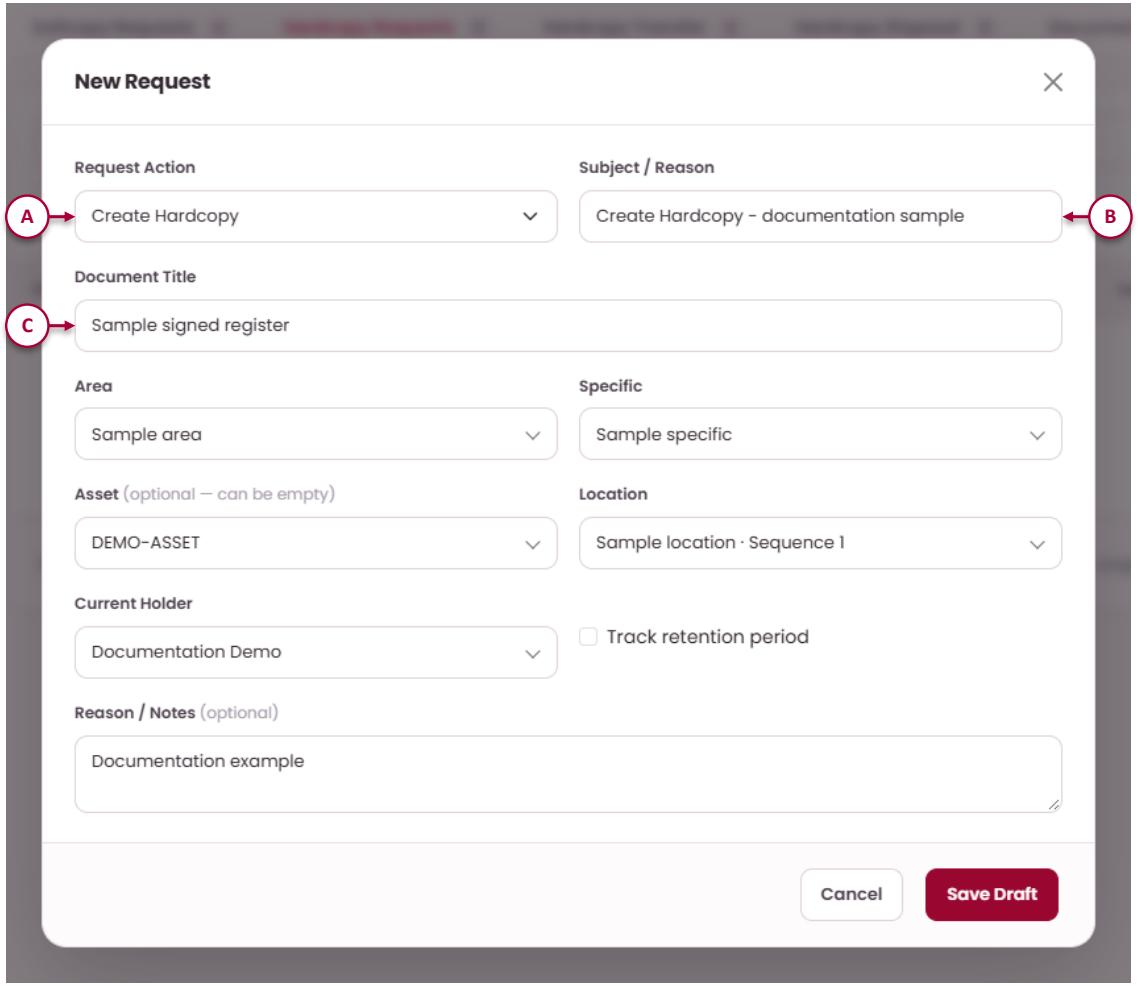

Sample 04 · Create Hardcopy

ON THIS SCREEN

A Choose Create Hardcopy

B State the reason

C Enter the sample title

EXAMPLE DATA

Subject / Reason: Create Hardcopy - documentation sample

Document Title: Sample signed register

WHAT TO DO

01 Open My Requests → Hardcopy and select New Request.

02 Choose Create Hardcopy and enter Subject / Reason and Document Title.

03 Select Area, Specific, optional Asset, Location, and check Current Holder.

04 Optionally enable retention monitoring, then enter both Start and End dates (End on/after Start). Add notes and Save Draft.

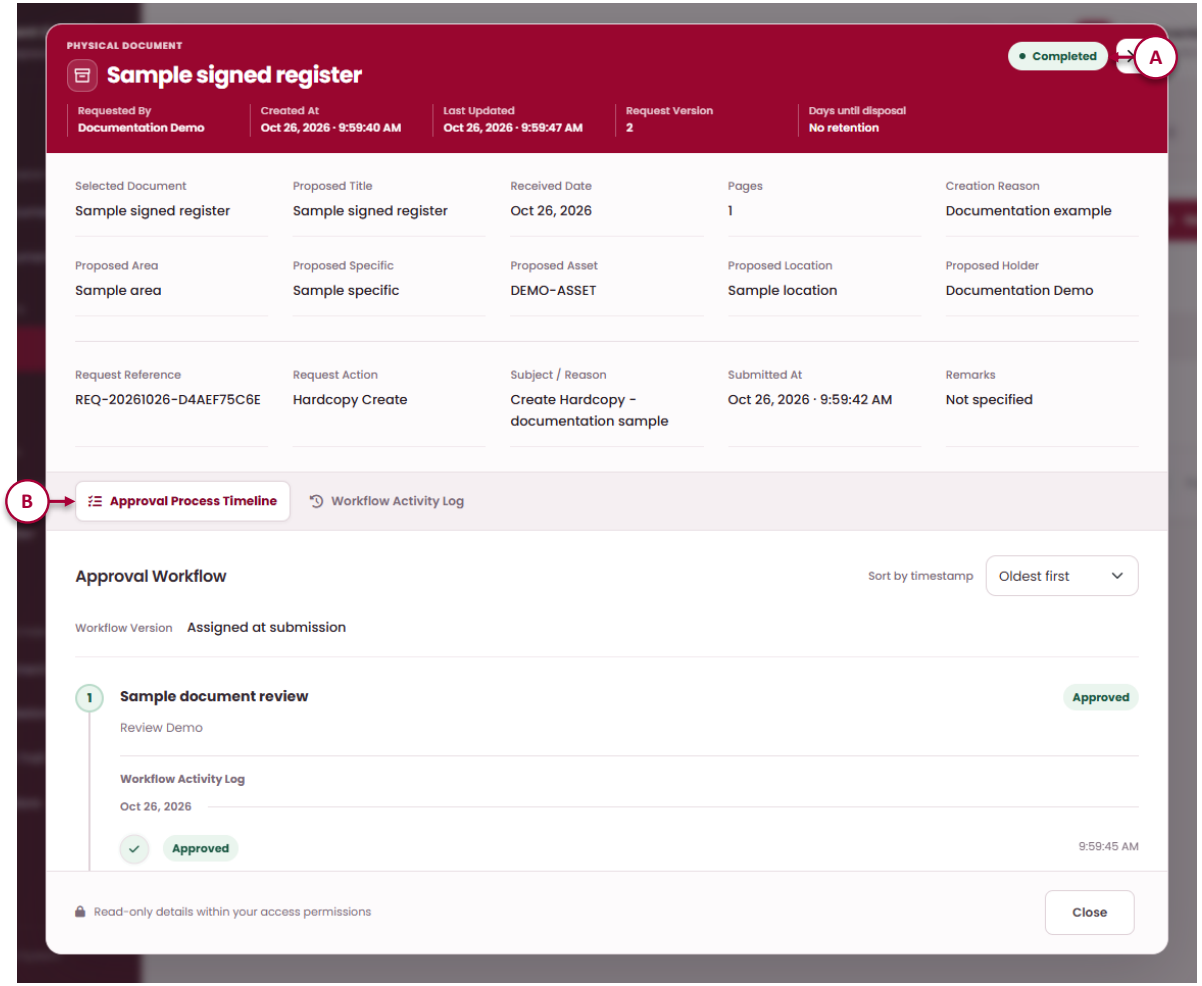

Save Draft first. Submit only after checking the document, fields and attachment.

Sample 04 · Create Hardcopy — expected outcome

ON THIS SCREEN

A Completed request

B Open approval timeline

EXPECTED: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The new hardcopy will appear with its approved storage hierarchy and holder. Expected status: Completed.

The illustration shows the expected state for this sample scenario.

Sample 05 · Update Hardcopy

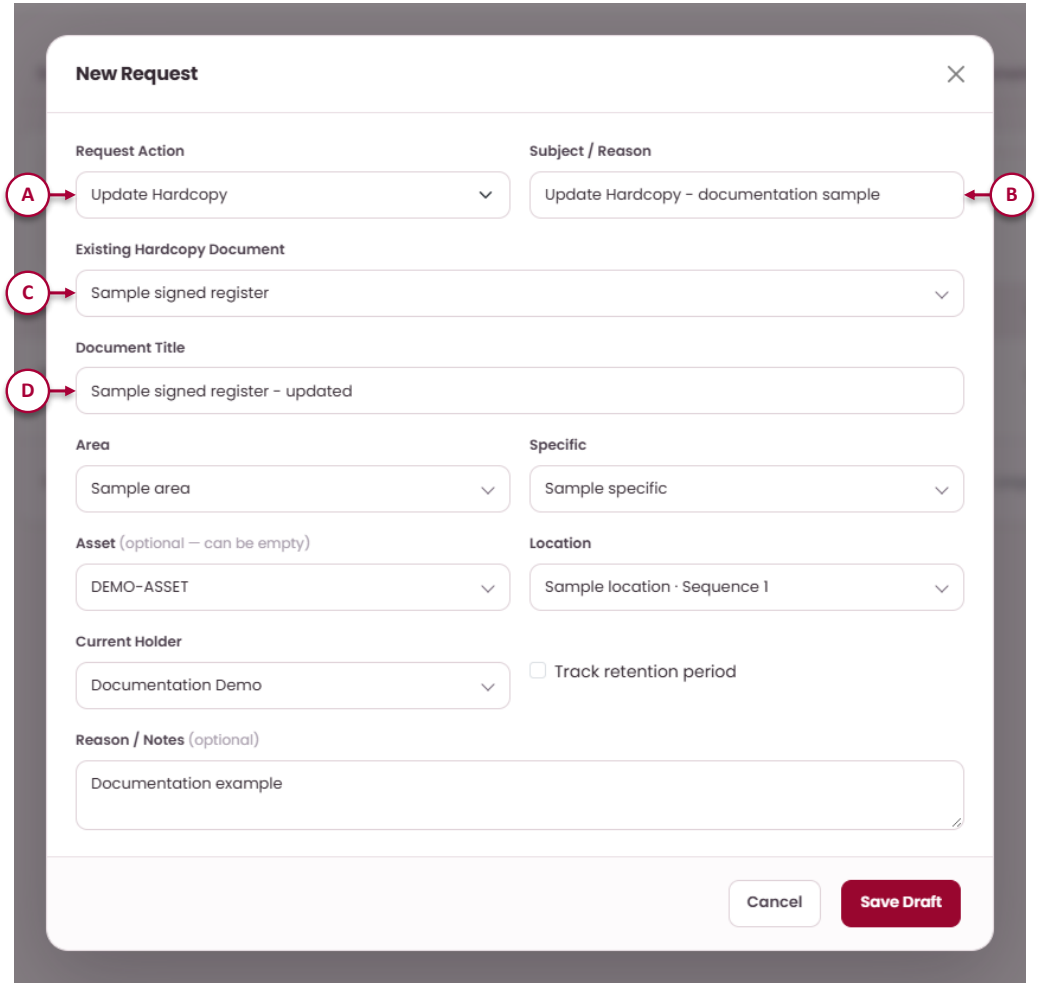

ON THIS SCREEN

A **Choose Update Hardcopy**

B **State the reason**

C **Select existing document**

D **Enter the sample title**

EXAMPLE DATA

Subject / Reason: Update Hardcopy - documentation sample

Document Title: Sample signed register - updated

WHAT TO DO

01 Open My Requests → Hardcopy and select New Request.

02 Choose Update Hardcopy and select the Existing Hardcopy Document.

03 Check Document Title, Area, Specific, optional Asset, Location, and Current Holder.

04 Update the intended metadata or retention information, then Save Draft.

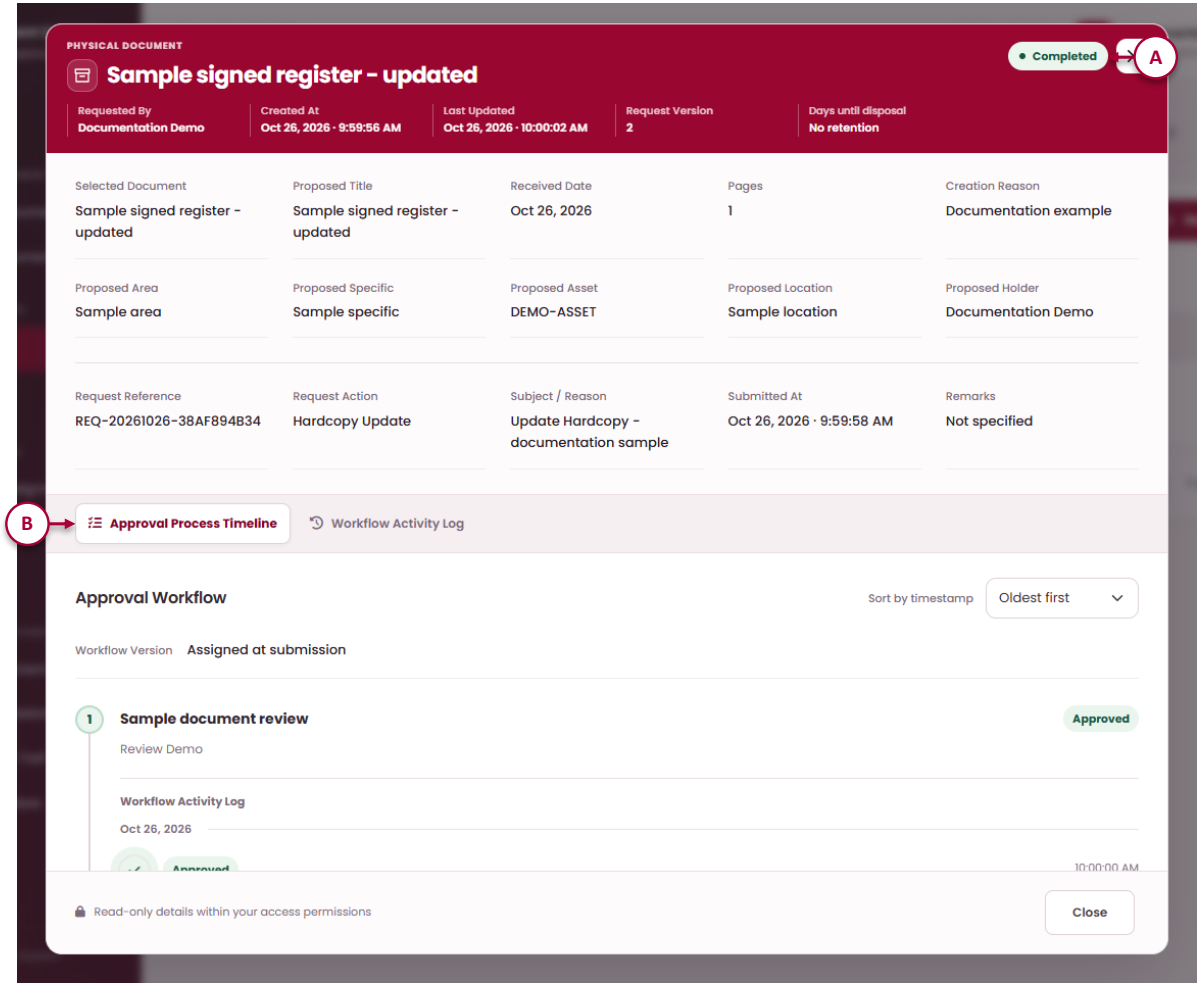

Save Draft first. Submit only after checking the document, fields and attachment.

Sample 05 · Update Hardcopy — expected outcome

ON THIS SCREEN

A Completed request

B Open approval timeline

EXPECTED: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 Final approval will apply the hardcopy metadata; inspect the changed storage or retention fields. Expected status: Completed.

The illustration shows the expected state for this sample scenario.

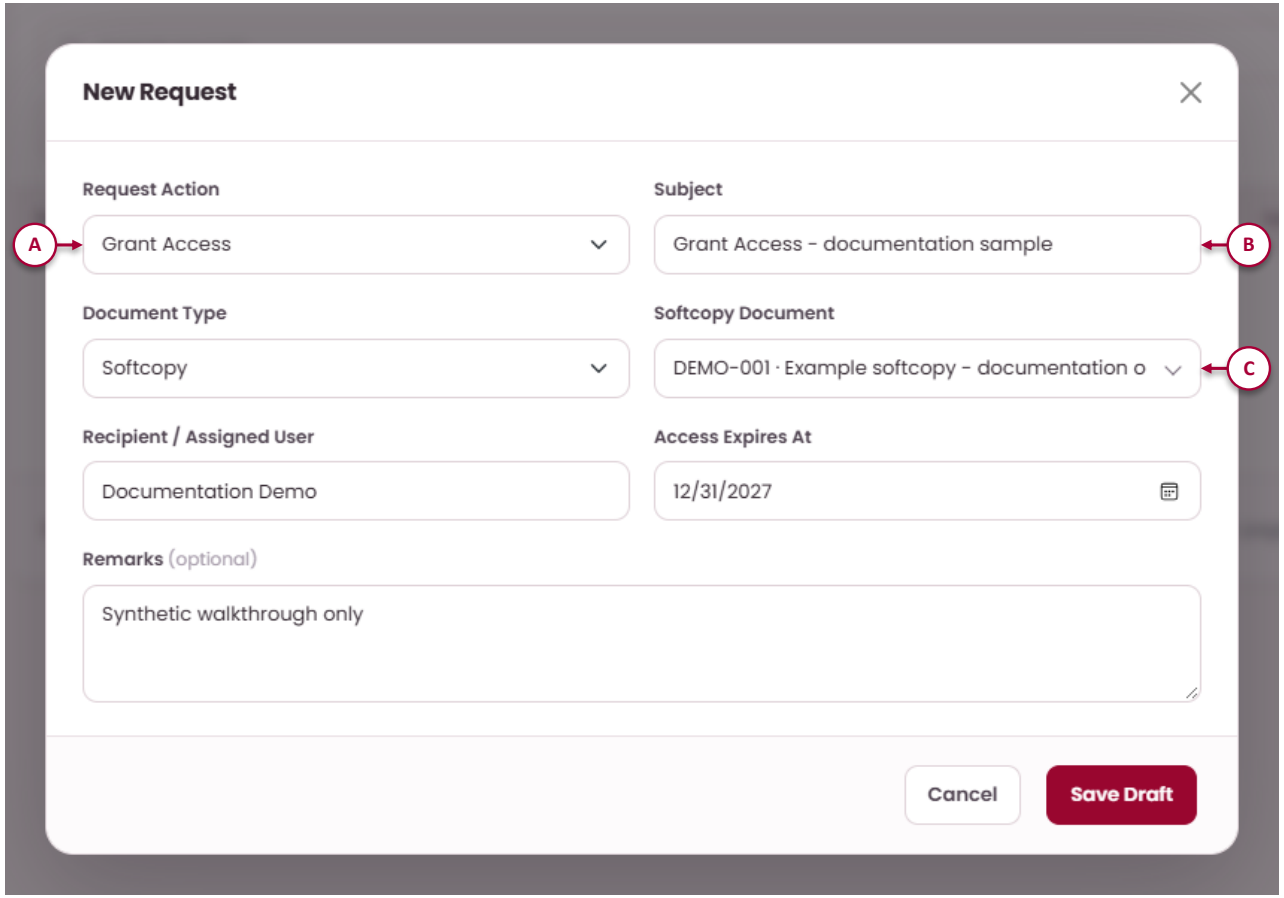

Sample 06 · Grant Access

ON THIS SCREEN

A **Choose Grant Access**

B **State the reason**

C **Select existing document**

EXAMPLE DATA

Access Expires At: 2027-12-31

Selected document: Example softcopy - documentation only

Subject: Grant Access - documentation sample

WHAT TO DO

01 Open My Requests → Document Access Grants and select New Request.

02 Enter Subject in the Document Access Grant form.

03 Choose Document Type, select the document, and check your read-only Recipient field.

04 Set Access Expires At after today, allowing time for approval; add optional Remarks, then Save Draft.

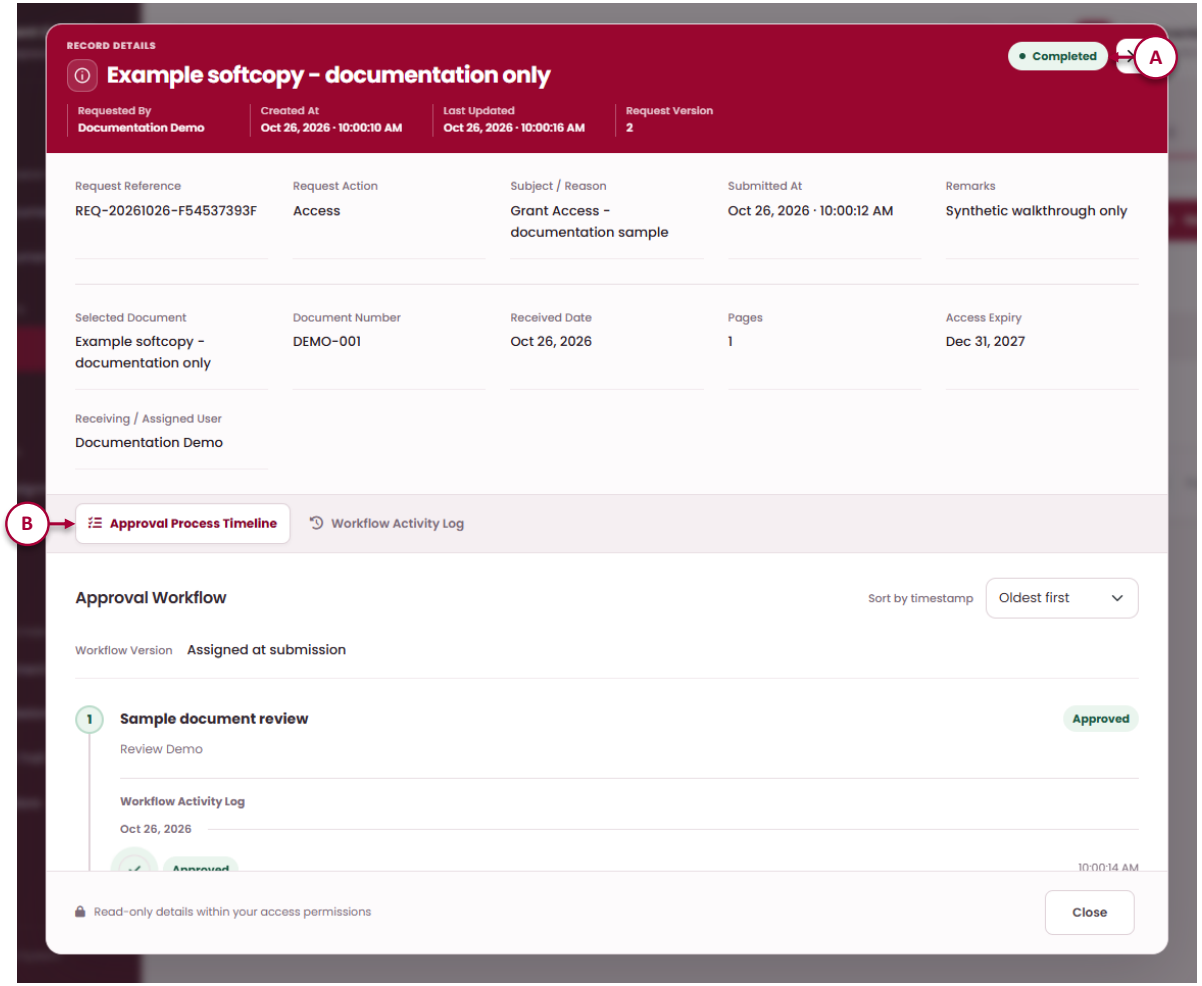

Save Draft first. Submit only after checking the document, fields and attachment.

Sample 06 · Grant Access — expected outcome

ON THIS SCREEN

A Completed request

B Open approval timeline

EXPECTED: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The approved grant will give the signed-in recipient access to the selected document until expiry. Expected status: Completed.

The illustration shows the expected state for this sample scenario.

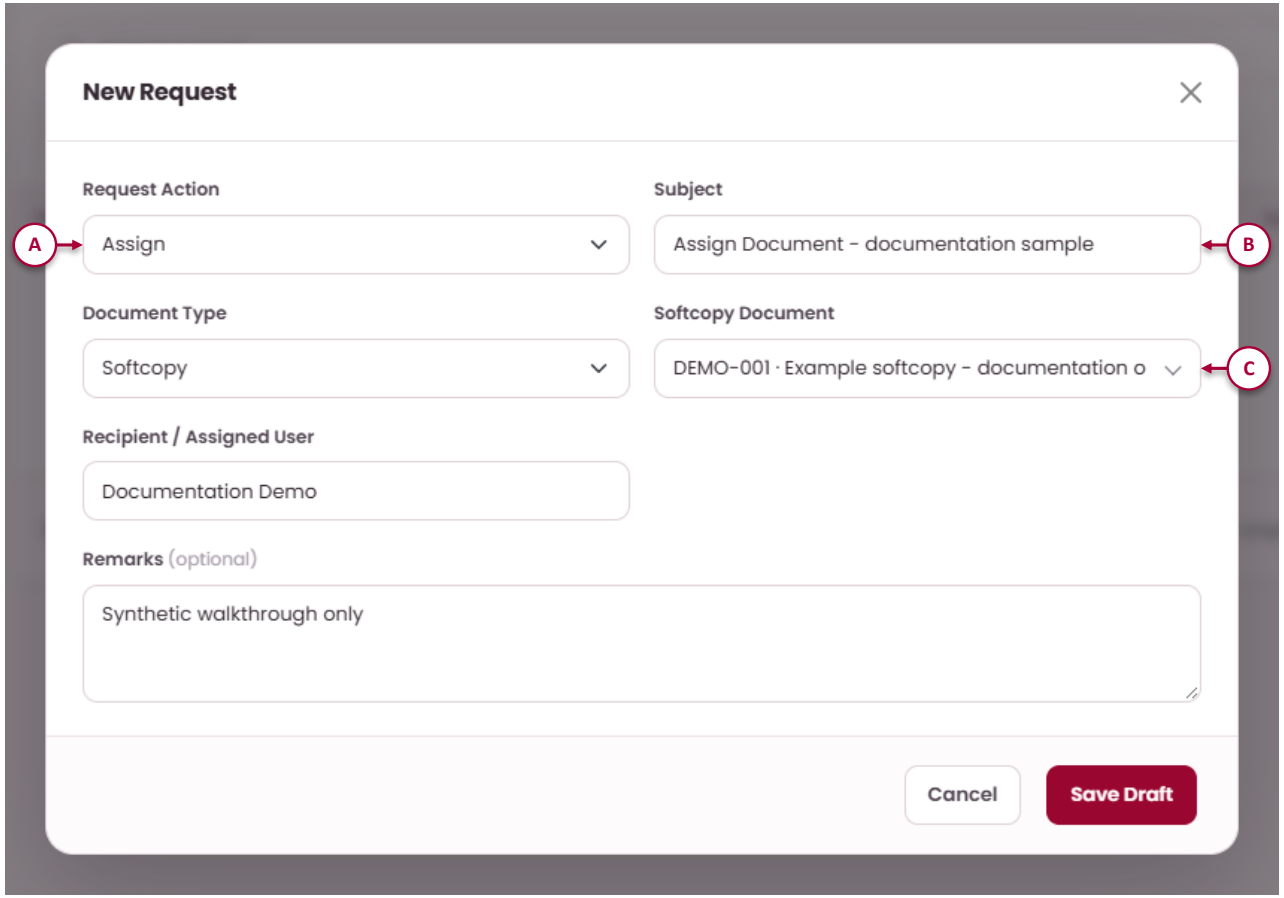

Sample 07 · Assign Document

ON THIS SCREEN

A **Choose Assign Document**

B **State the reason**

C **Select existing document**

EXAMPLE DATA

Selected document: Example softcopy - documentation only

Subject: Assign Document - documentation sample

WHAT TO DO

01 Open My Requests → Document Assignments and select New Request.

02 Choose Document Assignments and enter Subject.

03 Choose Document Type and select the document to be assigned to you.

04 Check your read-only Recipient / Assigned User, add optional Remarks, then Save Draft.

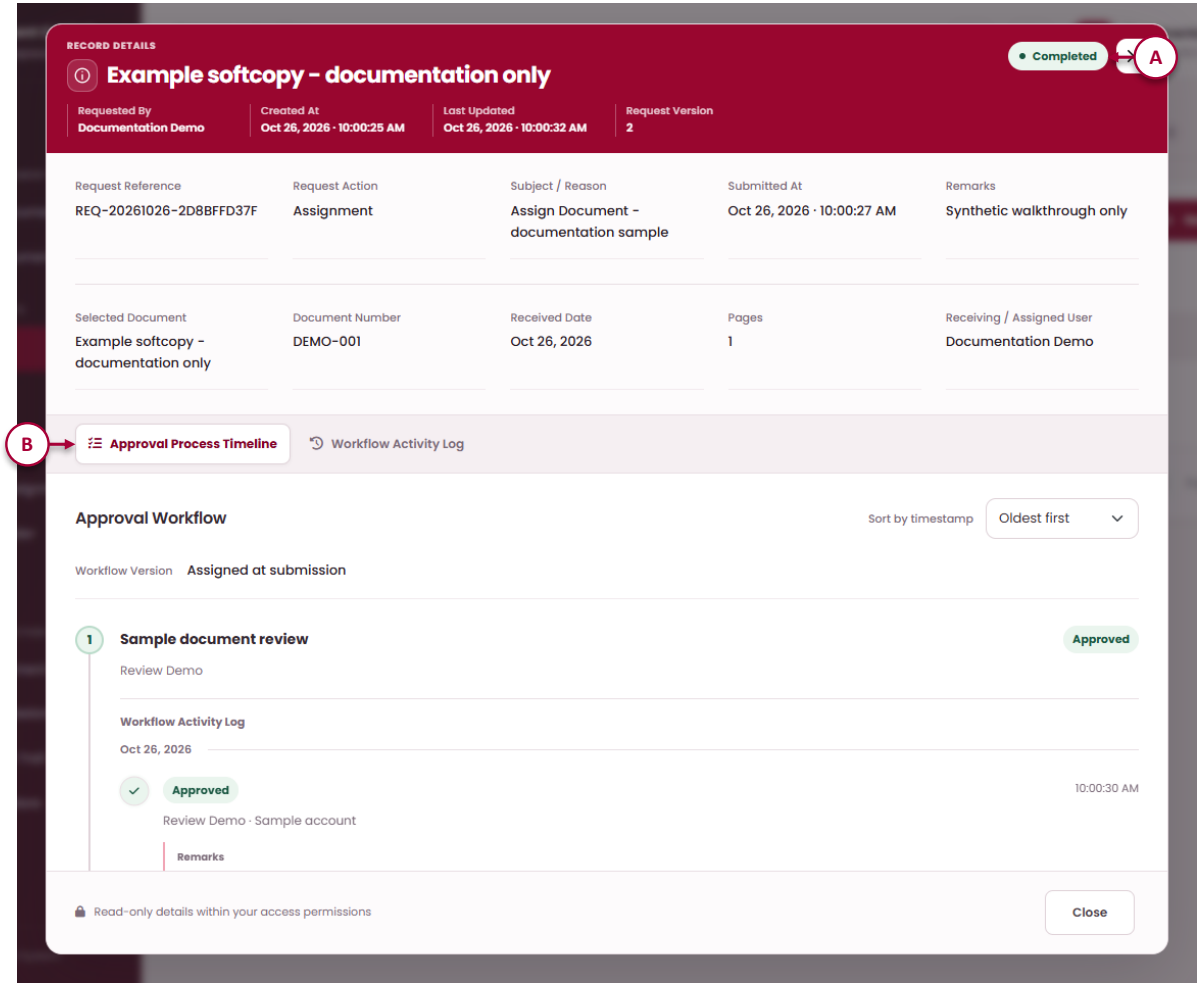

Save Draft first. Submit only after checking the document, fields and attachment.

Sample 07 · Assign Document — expected outcome

ON THIS SCREEN

A Completed request

B Open approval timeline

EXPECTED: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

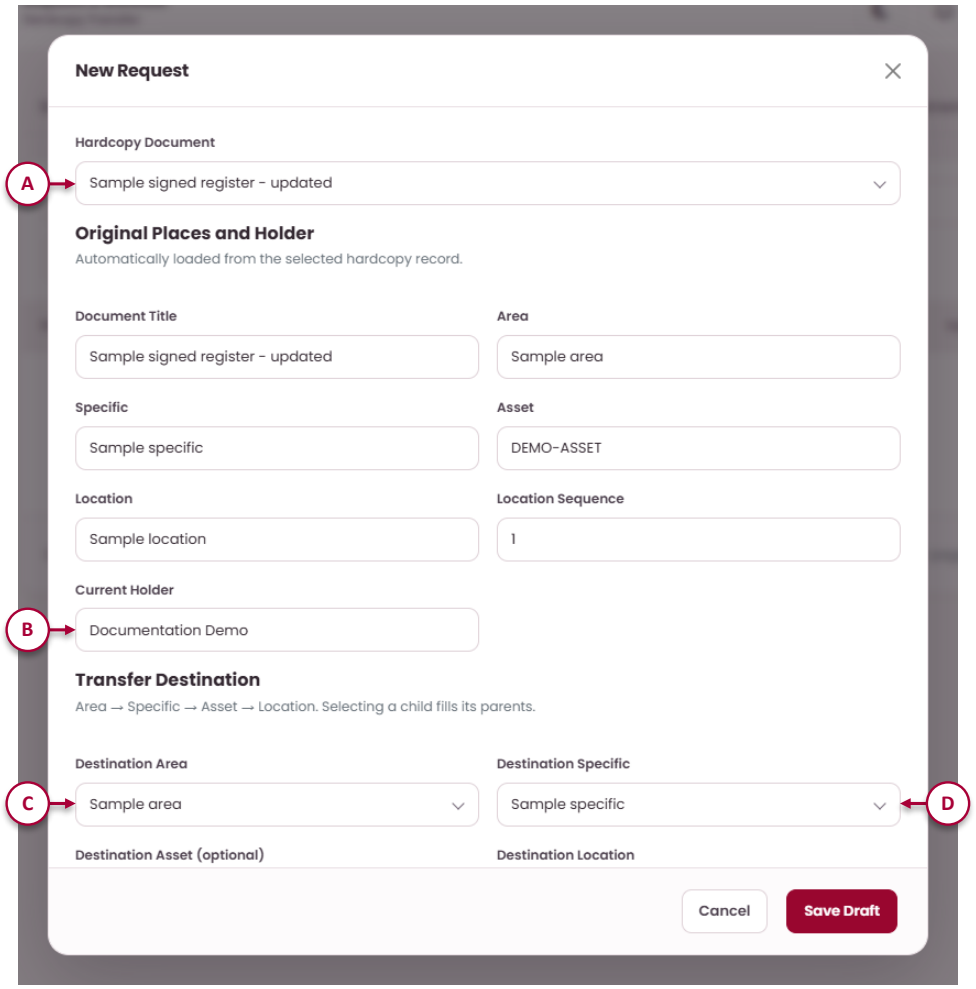

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The approved assignment will apply to the selected document and signed-in recipient. Expected status: Completed.

The illustration shows the expected state for this sample scenario.

Sample 08 · Transfer Hardcopy

ON THIS SCREEN

A Select hardcopy document

B Check original holder

C Choose destination area

D Choose destination specific

EXAMPLE DATA

Location: Sample receiving location

Hardcopy Document: Sample signed register - updated

Receiving User: Receiver Demo

Request Subject: Transfer Hardcopy - documentation sample

WHAT TO DO

01 Open My Requests → Hardcopy Transfer and select New Request.

02 Select the Hardcopy Document and check Original Places and Holder.

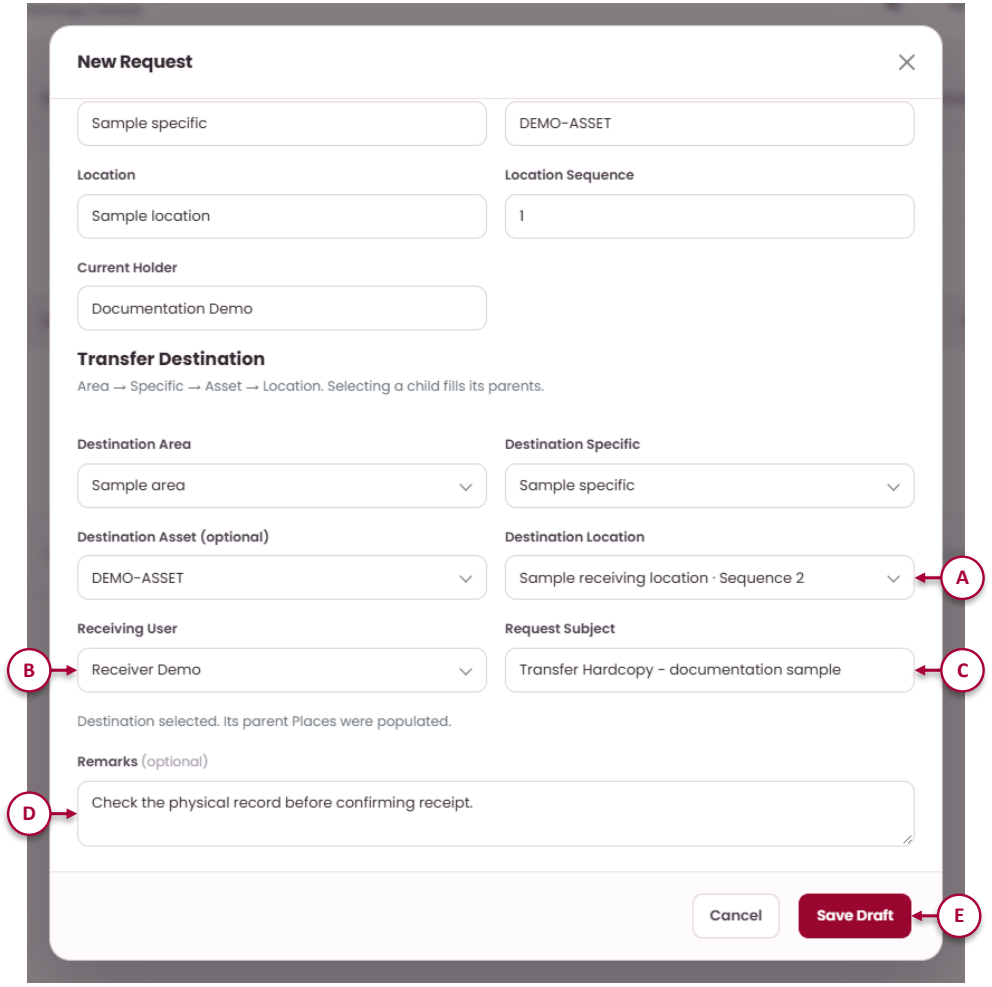

03 Choose the destination hierarchy and Receiving User; destination must differ from the original.

04 Enter Request Subject and optional Remarks, then Save Draft.

Save Draft first. Submit only after checking the document, fields and attachment.

Sample 08 · Transfer destination and recipient

ON THIS SCREEN

A Choose Destination Location

B Choose Receiving User

C Enter Request Subject

D Add optional Remarks

E Save Draft

WHAT TO DO

01 Scroll down within the New Request form to the destination fields.

02 Select the destination hierarchy and Receiving User; the destination must differ from the original.

03 Enter Request Subject and any Remarks, then select Save Draft.

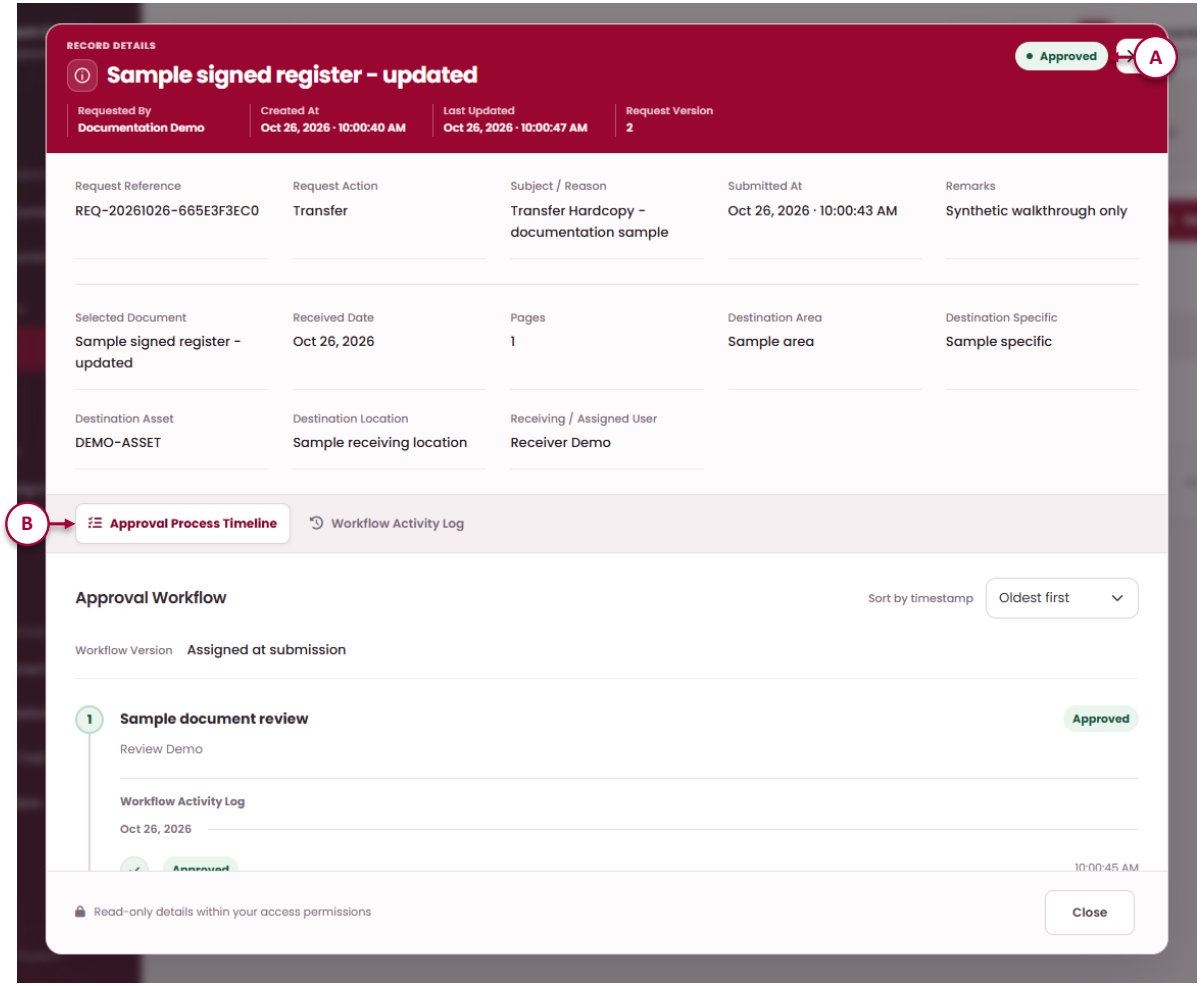

Approval will authorize the handoff. Dispatch and receipt will be recorded separately.

Sample 08 · Transfer Hardcopy — expected outcome

ON THIS SCREEN

A Approved request

B Open approval timeline

EXPECTED: APPROVED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 Approval will create the handoff work. Complete Dispatch and recipient Accept to record physical receipt. Expected status: Approved.

The illustration shows the expected state for this sample scenario.

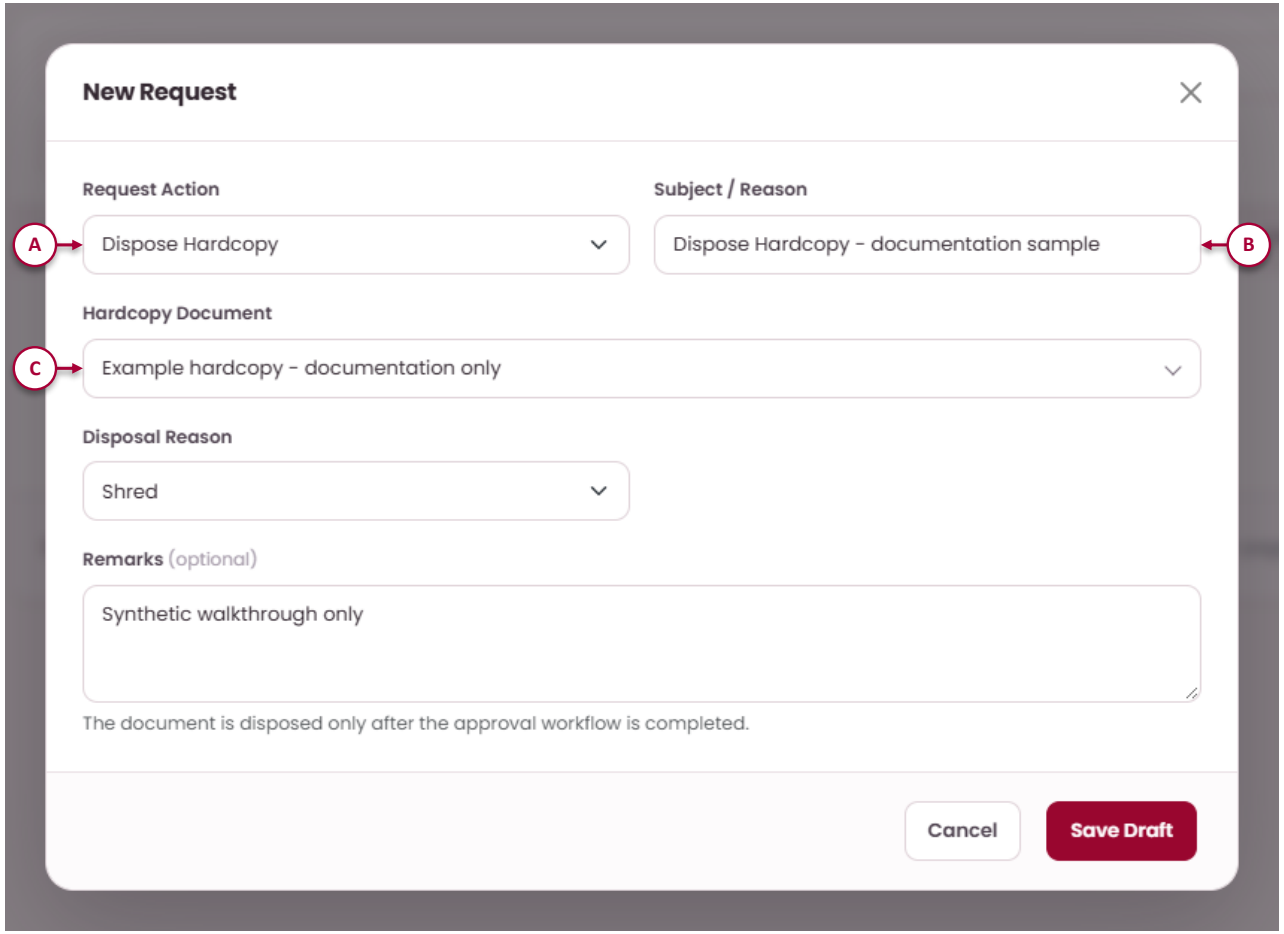

Sample 09 · Dispose Hardcopy

ON THIS SCREEN

A **Choose Dispose Hardcopy**

B **State the reason**

C **Select existing document**

EXAMPLE DATA

Subject / Reason: Dispose Hardcopy - documentation sample

Disposal Reason: Shred

Hardcopy Document: Example hardcopy - documentation only

WHAT TO DO

01 Open My Requests → Hardcopy Disposal and select New Request.

02 Choose Hardcopy Disposal, enter Subject / Reason, and select the document.

03 Choose Disposal Reason: Shred, Scratch, or Other. Complete Other Reason if selected.

04 Add optional Remarks, Save Draft, then review and submit the proposal.

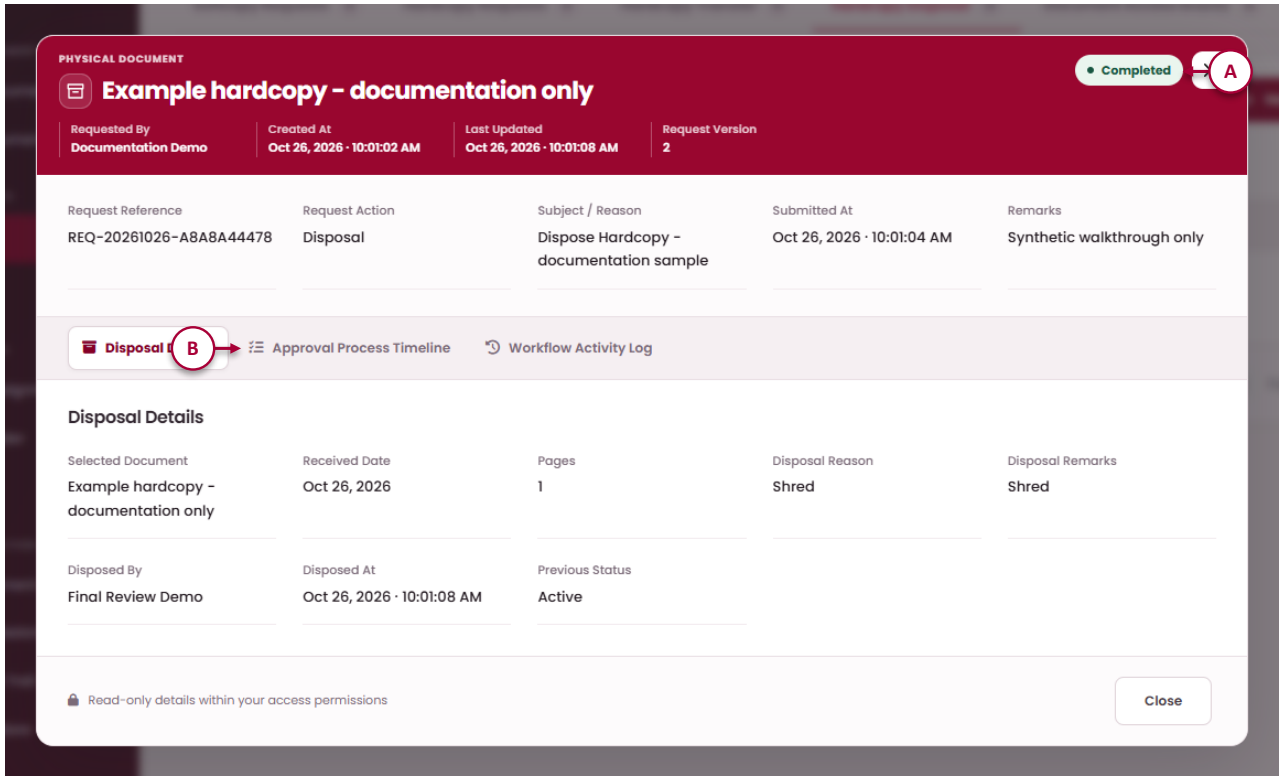

Save Draft first. Submit only after checking the document, fields and attachment.

Sample 09 · Dispose Hardcopy — expected outcome

ON THIS SCREEN

A Completed request

B Open approval timeline

EXPECTED: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

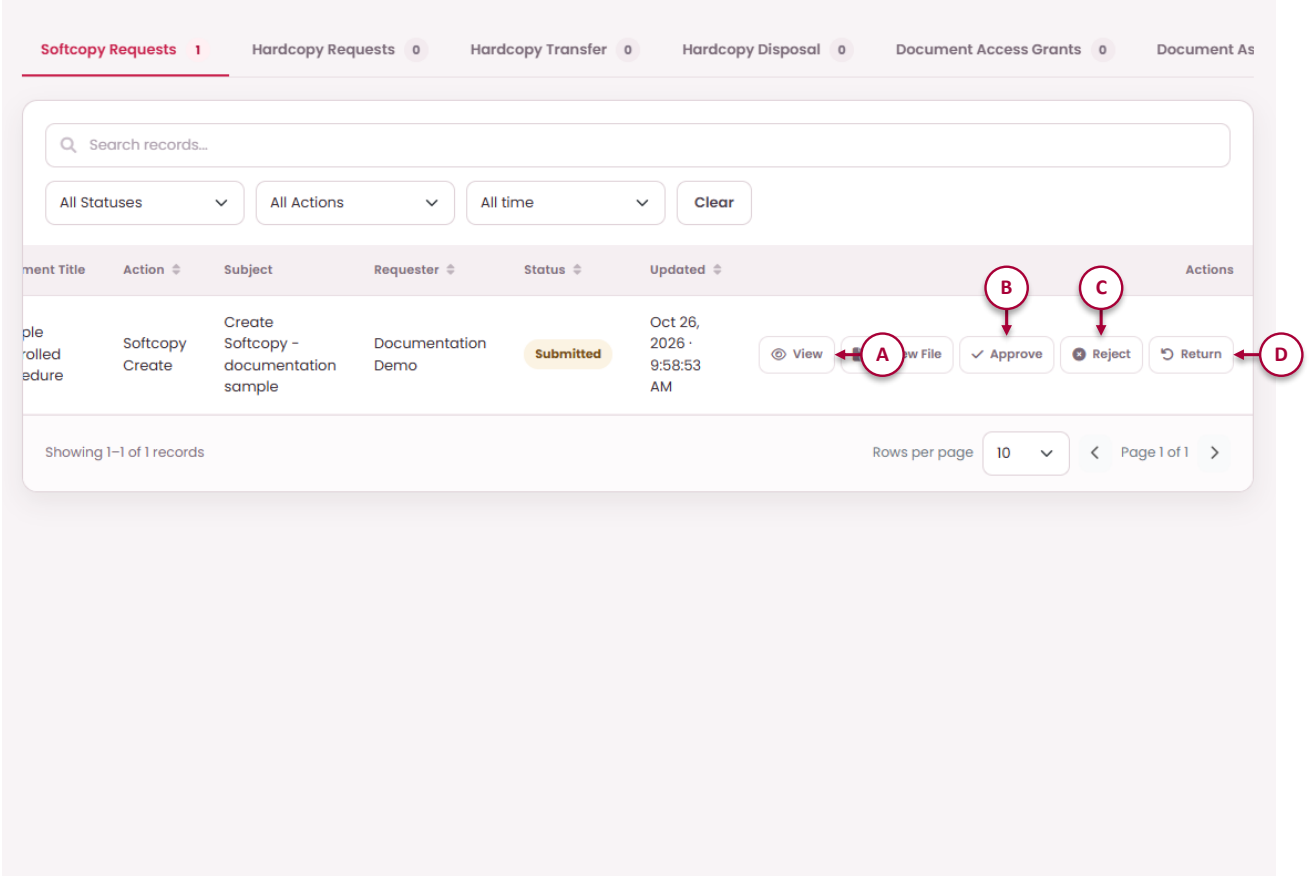

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The record will become Disposed; inspect Disposal Details and the selected reason in the register. Expected status: Completed.

The illustration shows the expected state for this sample scenario.

Review and decide approval tasks

ON THIS SCREEN

A Read request details

B Approve this step

C Reject this request

D Return for correction

WHAT TO DO

01 Open My Tasks, choose a category, and open the assigned request's View details.

02 Read the proposal, Approval Process Timeline, and Workflow Activity Log; use Review File for an attached softcopy.

03 Choose Approve → Confirm to move the current step forward.

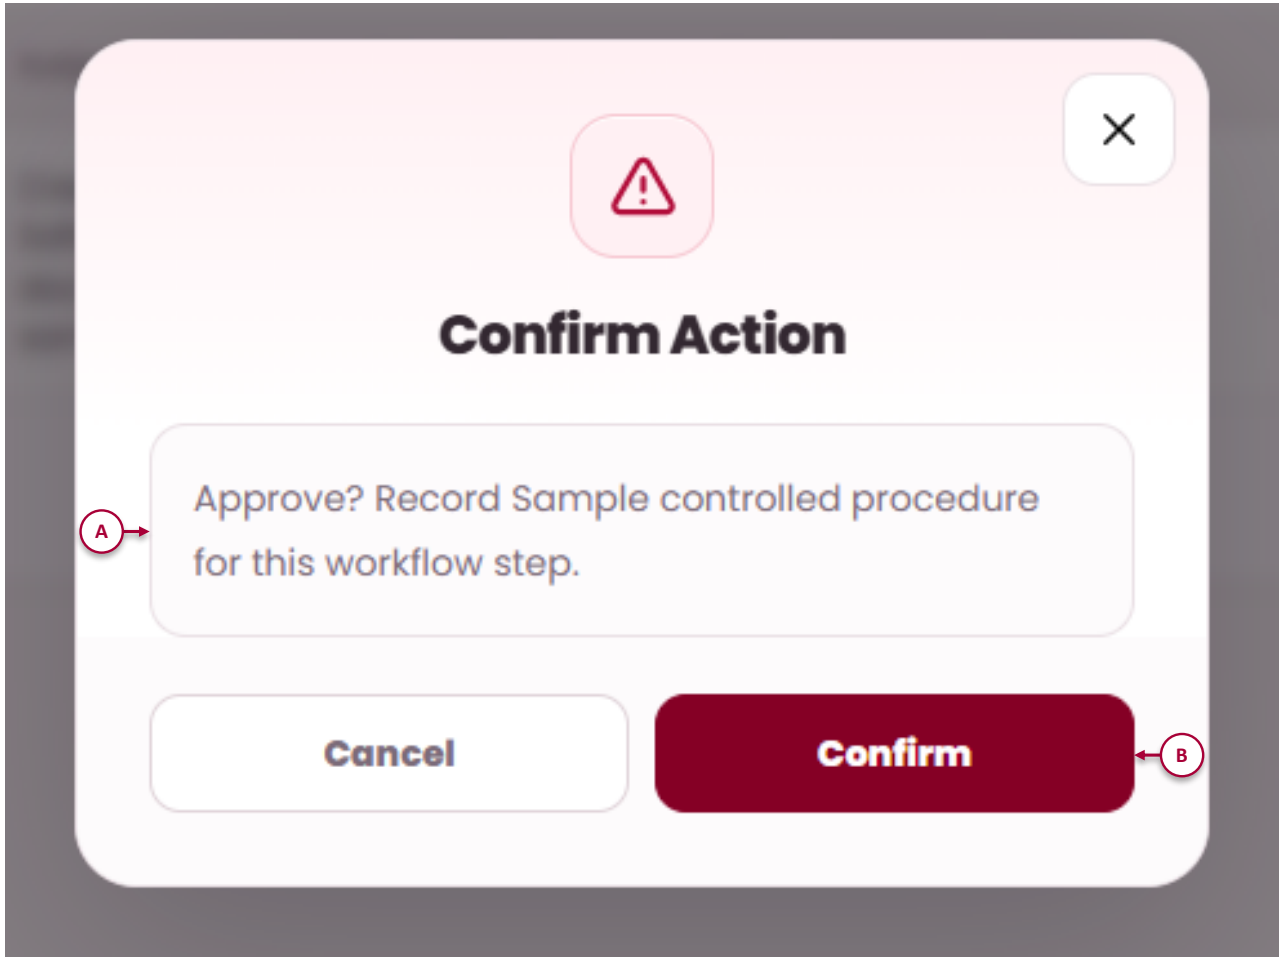

04 Choose Return or Reject, enter an optional Remark, then Continue to record the decision.

05 Inspect the updated timeline. Return at step one sends to the requester; later-step Return reactivates the previous approver.

Only the currently assigned approver, or an authorized member of the assigned role, may decide.

Approve the active workflow step

ON THIS SCREEN

A Check the approval action

B Confirm this step approval

WHAT TO DO

01 Open the assigned request in My Tasks and inspect the proposal and file.

02 Select Approve for the active task.

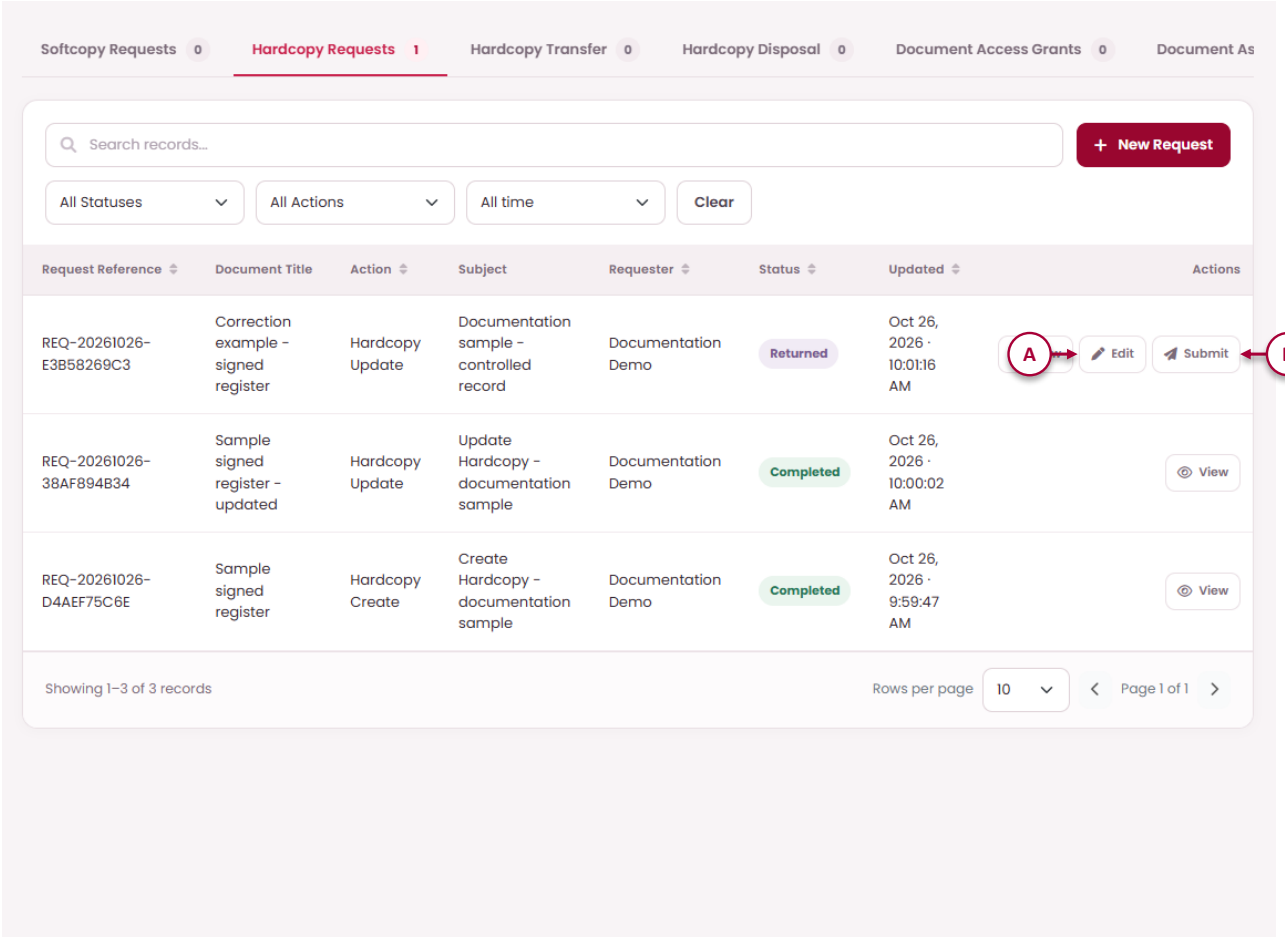

03 Read the shared confirmation and select Confirm.

04 Check the next step or completed result in the Approval Process Timeline.

Approve uses Confirm directly. It does not open a remark form.

Return from the first approval step

ON THIS SCREEN

A **Edit returned request**

B **Resubmit after correction**

WHAT TO DO

01 At the first active step, select Return.

02 Enter an optional Remark explaining what needs attention.

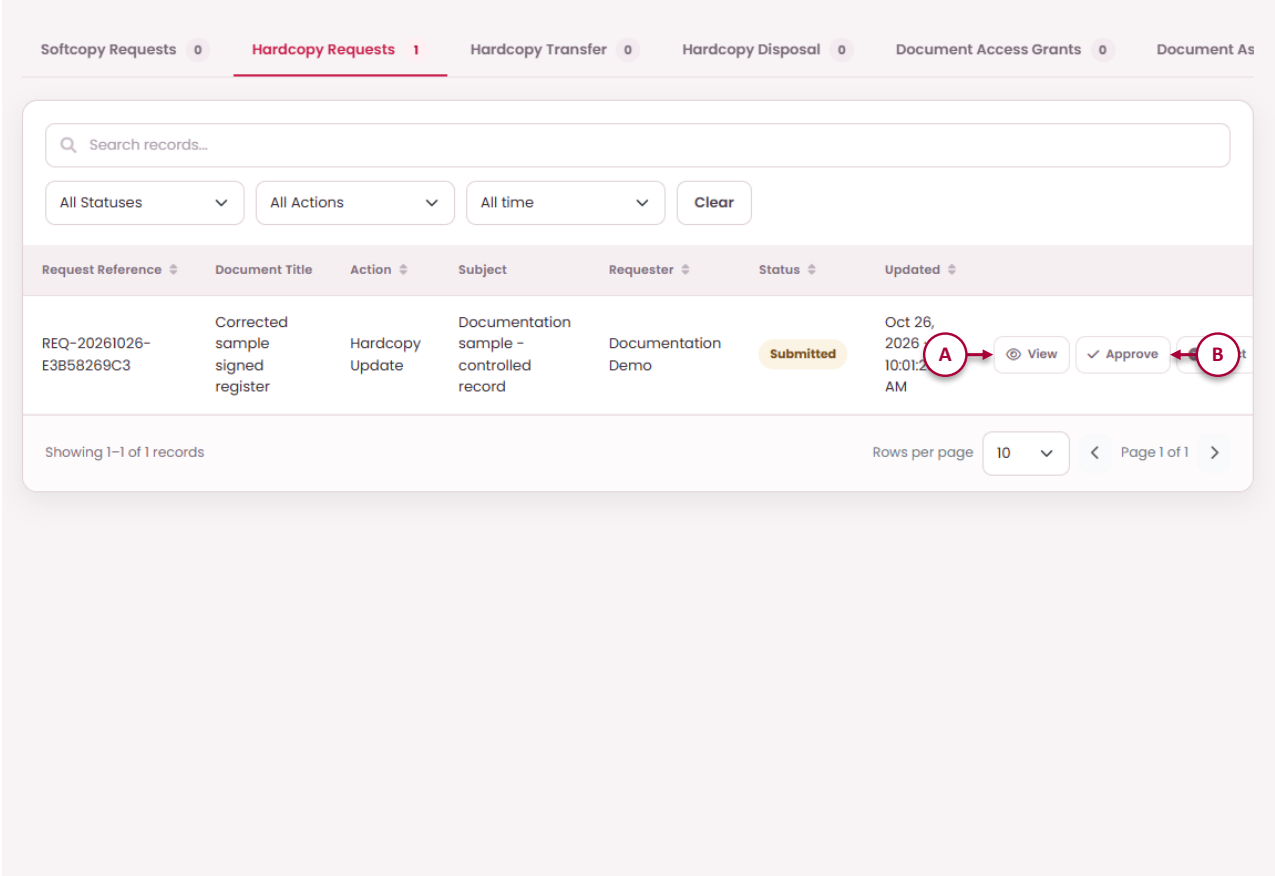

03 Select Continue. This records the Return decision.

04 The request becomes Returned to its requester, who may edit, save, and resubmit it.

Continue in the Return dialog is the confirmation; no second Confirm dialog follows.

Return from a later approval step

ON THIS SCREEN

A View return history

B Reopened approval step

WHAT TO DO

01 Select Return when an earlier review needs to be reconsidered.

02 Add an optional Remark and select Continue.

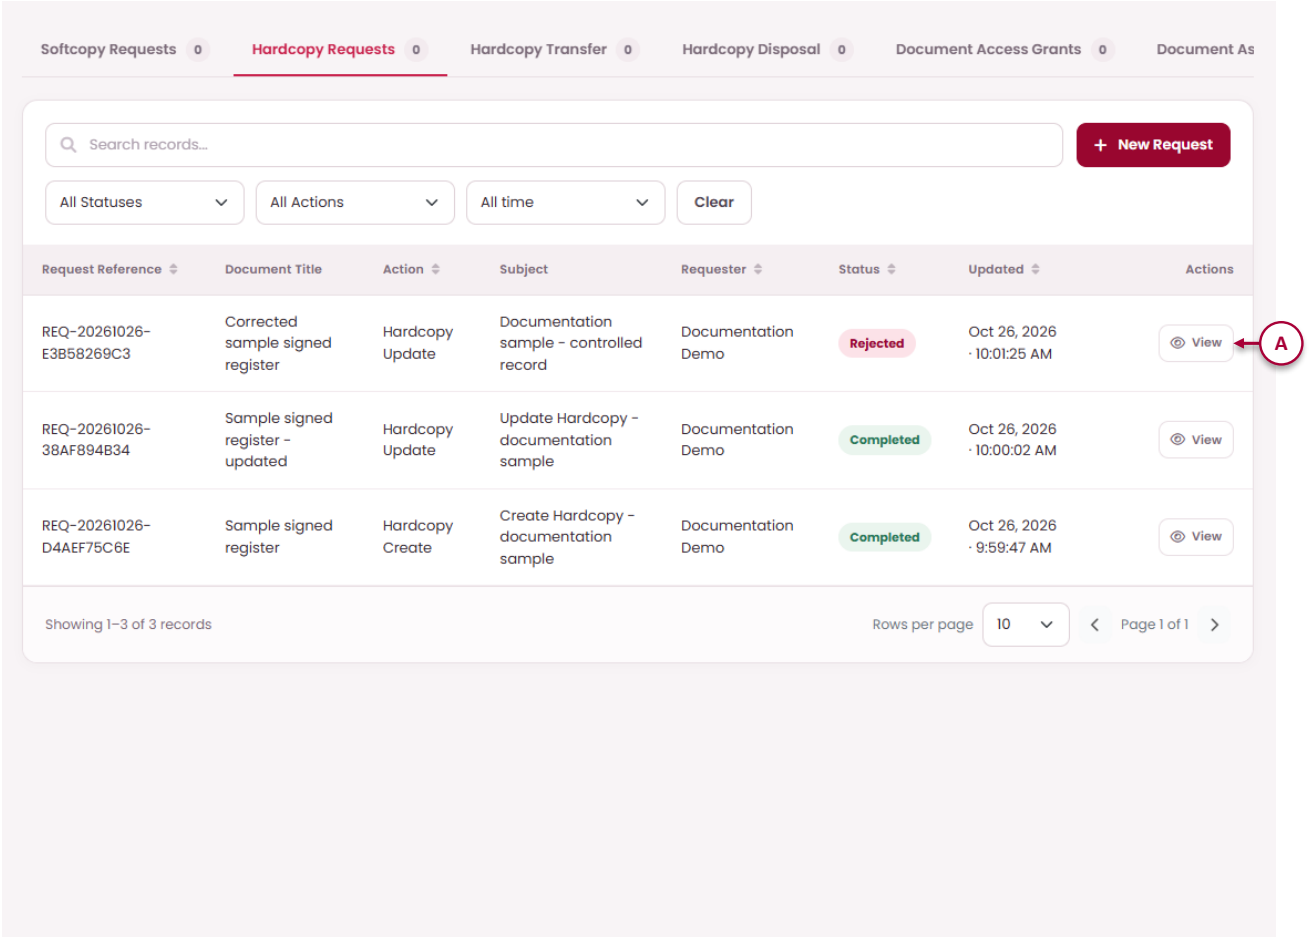

03 The immediately previous approver becomes active again.

04 After that approver approves again, the request returns to the step that returned it.

A later-step Return keeps the request Submitted; it does not send an editable draft to the requester.

Reject a proposal

ON THIS SCREEN

A **Rejected request remains in history**

WHAT TO DO

01 Review the proposal and choose Reject when it should stop.

02 Enter an optional Remark that explains the decision.

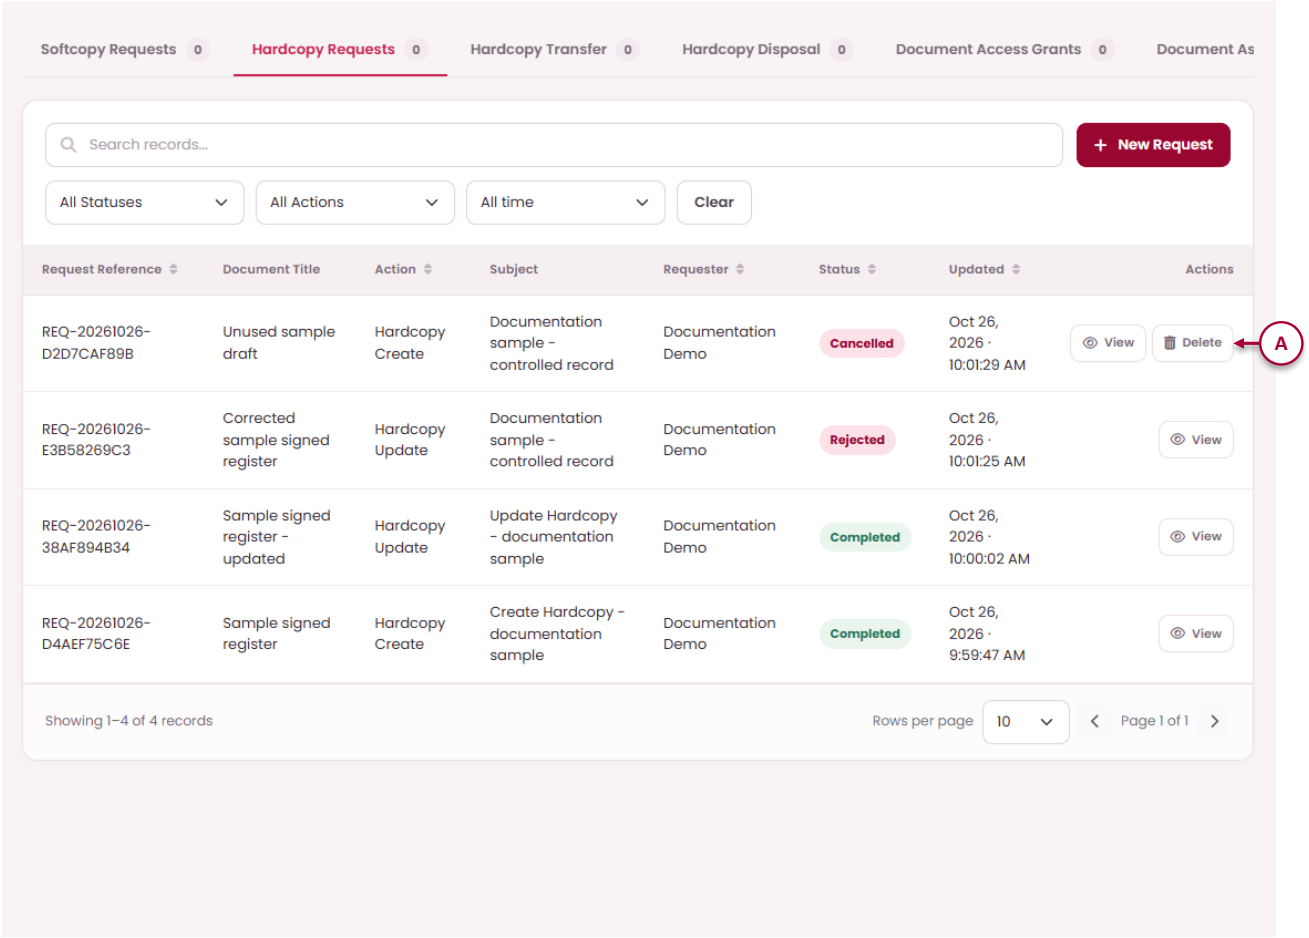

03 Select Continue to record the rejection.

04 Check Rejected in the request status and read the decision in the activity log.

Rejected proposals are not completed document changes and are not editable returned drafts.

Cancel and, when eligible, remove a draft

ON THIS SCREEN

A **Delete eligible cancelled draft**

WHAT TO DO

01 Open your own Draft in My Requests and select Cancel.

02 Confirm the cancellation and check the Cancelled status.

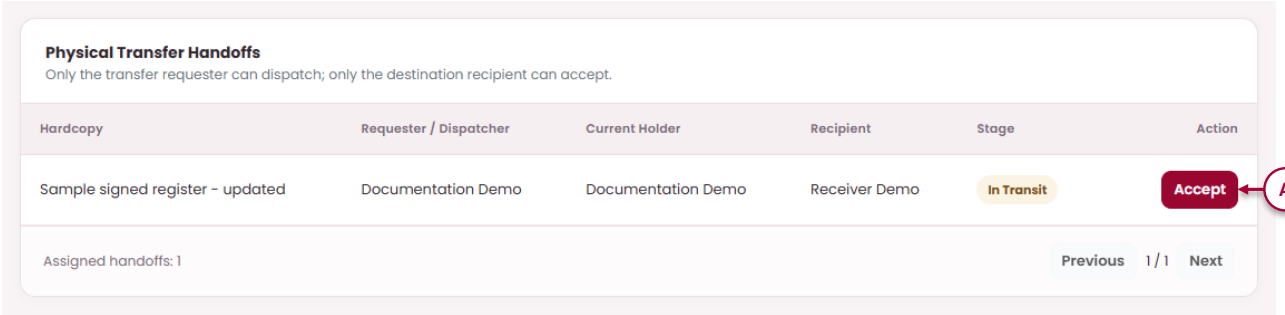

03 If Delete is offered, check that this is the draft you intend to remove permanently.

04 Select Delete and confirm. Only your cancelled, never-submitted draft is eligible.

Permanent draft deletion cannot be undone. It is not an operation on an approved document.

Dispatch and accept the physical hardcopy

ON THIS SCREEN

A Accept physical handoff

WHAT TO DO

01 Open My Tasks → Hardcopy Transfer and find Physical Transfer Handoffs.

02 Check the document, requester, current holder, recipient, and stage.

03 The requester selects Dispatch at physical release, then Confirm.

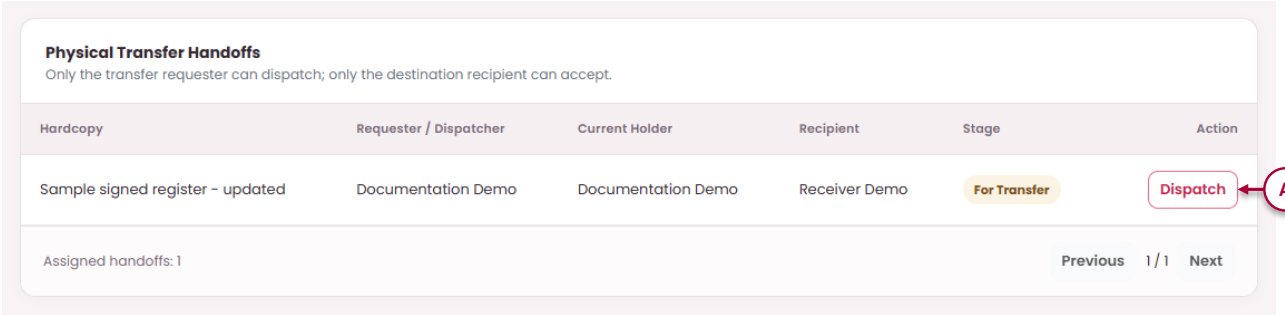

04 After physical receipt, the recipient selects Accept for the In Transit handoff, then Confirm.

05 Inspect the updated holder, location, and Transfer History in Hardcopy Documents.

Only the transfer requester can dispatch. Only the destination recipient can accept.

Record physical dispatch

ON THIS SCREEN

A Dispatch physical handoff

WHAT TO DO

01 After approval, open My Tasks → Hardcopy Transfer.

02 The requester locates the intended Physical Transfer Handoff.

03 Select Dispatch at physical release, then select Confirm.

04 Check that the handoff awaits the receiving user's acceptance.

Only the transfer requester can dispatch.

Verify the received hardcopy

ON THIS SCREEN

A Verify receiving location

B Verify receiving holder

WHAT TO DO

01 The receiving user opens the in-transit handoff.

02 After checking the physical record, select Accept → Confirm.

03 Inspect the updated holder and location in Hardcopy Documents.

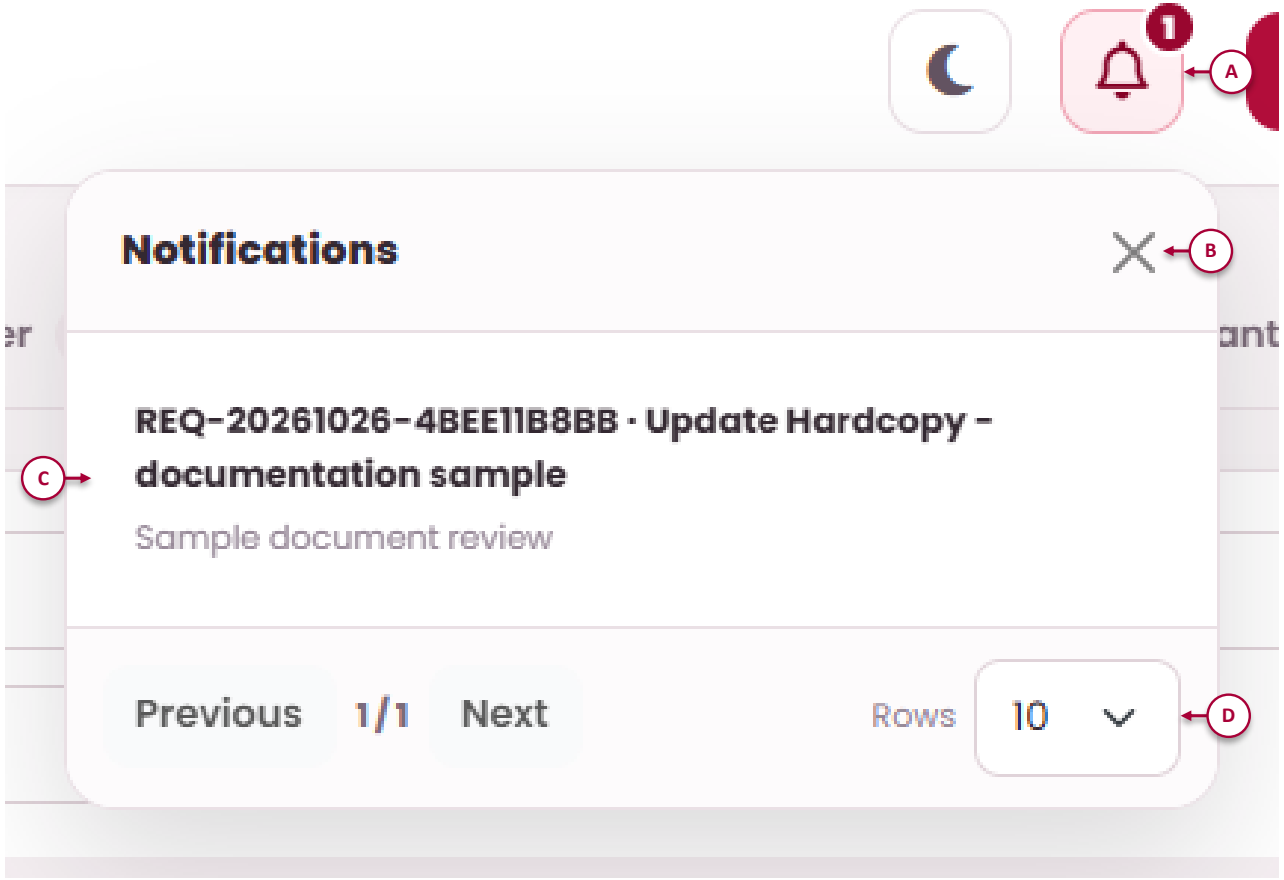

04 Use Transfer History when confirming the recorded handoff.

The receiving user's acceptance completes physical receipt and updates custody.

Read notifications and approval reminders

ON THIS SCREEN

- **A** Open Notifications
- **B** Close Notifications
- **C** Open pending approval task
- **D** Choose rows per page

WHAT TO DO

01 Open the bell to read Notifications and their Request Reference, title, and approval label.

02 Select an entry to mark that notification read and open the matching My Tasks list.

03 Use Previous, Next, and Rows for additional notification pages.

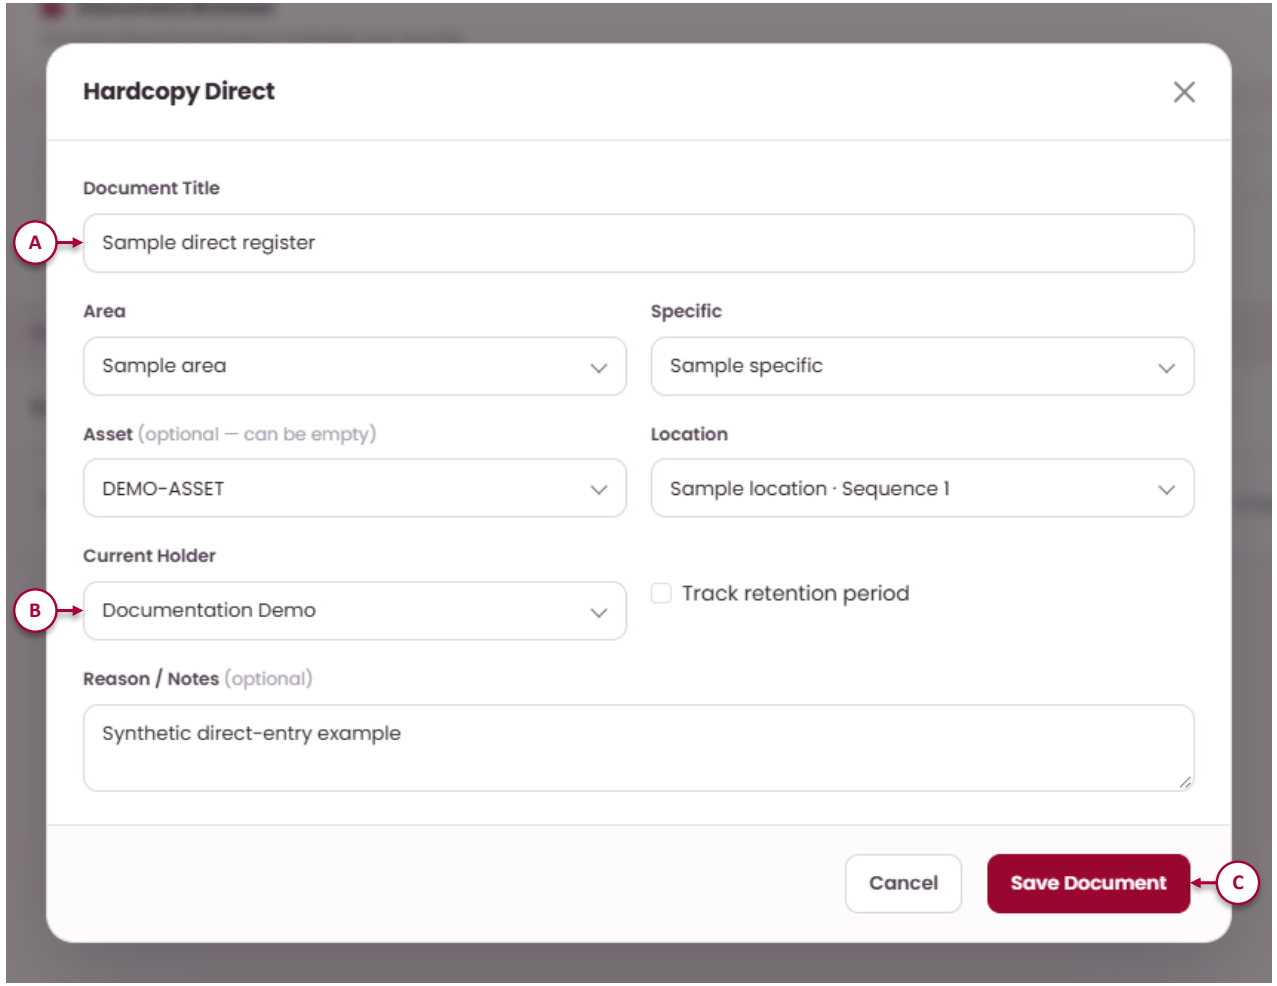

04 If Approval needed appears, inspect its new-task links or select Got it.

05 Use My Tasks to record the actual decision or handoff; reading a notice does not approve it.

Selecting an entry will acknowledge that notification. Opening the panel alone will leave unread entries unacknowledged.

Apply authorized direct document actions

ON THIS SCREEN

A Enter the sample title

B Choose Current Holder

C Save Document and confirm

WHAT TO DO

01 Open the permitted document register. Direct actions require the corresponding direct permission.

02 For a hardcopy, select Hardcopy Direct and complete title, storage hierarchy, holder, and optional retention or notes.

03 Select Save Document → Confirm, then inspect the saved record.

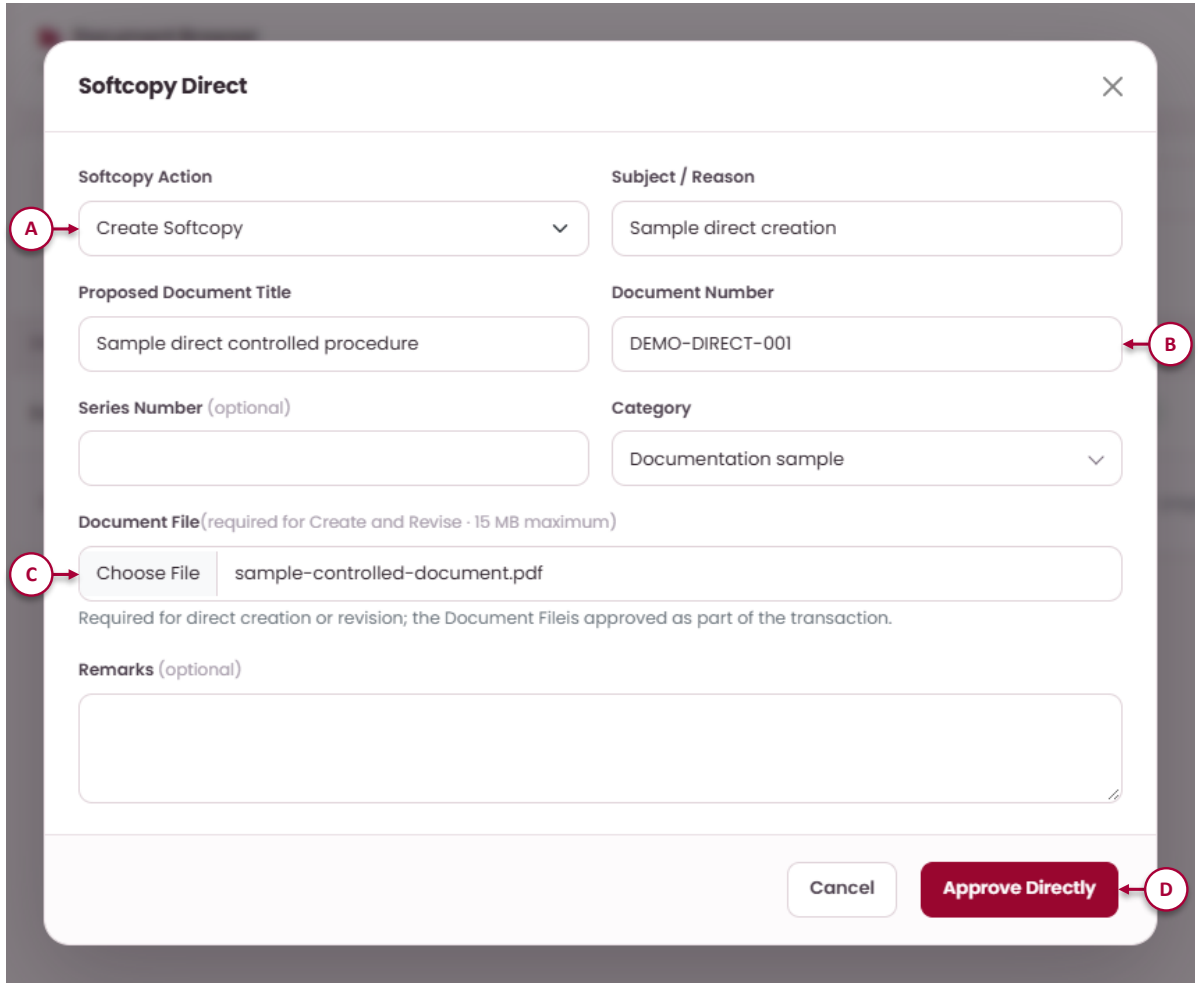

04 For a softcopy, choose Softcopy Direct, select the action, and complete the visible fields; Create and Revise require a file.

05 Select Approve Directly → Confirm. Edit an active record or use Dispose with a disposal reason only when those actions are permitted.

An authorized direct softcopy action will be approved and applied immediately. Use My Requests when approval through the workflow is required.

Apply a direct softcopy action

ON THIS SCREEN

A Create, Revise or Cancel directly

B Use a unique document number

C Attach the controlled file

D Approve Directly and confirm

WHAT TO DO

01 Open Softcopy Documents and select Softcopy Direct.

02 Choose Create Softcopy, Revise Softcopy, or Cancel Softcopy.

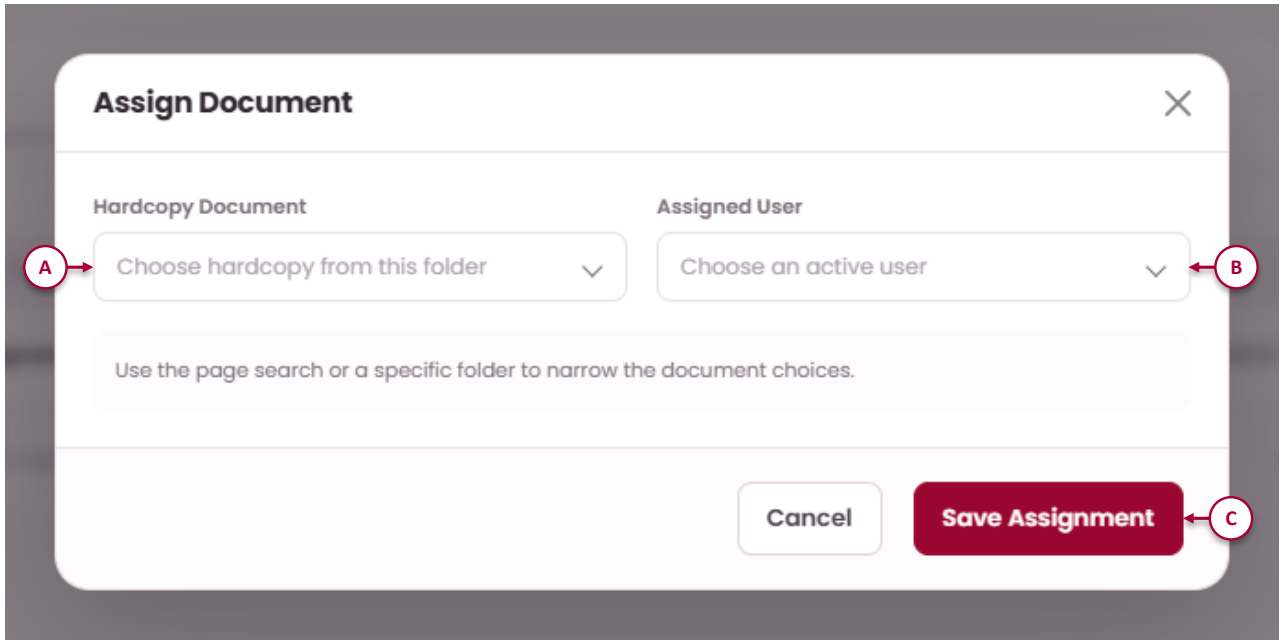

03 Complete the action-specific fields and attach a file for Create or Revise.

04 Select Approve Directly, then Confirm. Inspect the resulting record.

Direct actions require the appropriate permission and apply the change immediately.

Assign documents directly to users

ON THIS SCREEN

A Choose document

B Choose active user

C Save Assignment

WHAT TO DO

01 Open Document Assignments and choose Hardcopy / Places or Softcopy / Categories.

02 Select Assign Document, choose the document and Assigned User, then Save Assignment → Confirm.

03 Use Edit to select an Assigned User. Hardcopy replaces Current Holder; softcopy adds the selected user and retains earlier assignees.

04 For a bulk hardcopy assignment, select Location and Assigned User, then Assign All → Confirm. Complete active transfers first.

05 For softcopies, select Category / Subcategory and Assigned User, then Assign All → Confirm; subcategories are included.

Hardcopy assignment will change Current Holder immediately. Softcopy assignment will retain earlier assignees. Assign All will be limited to 2,000 active records.

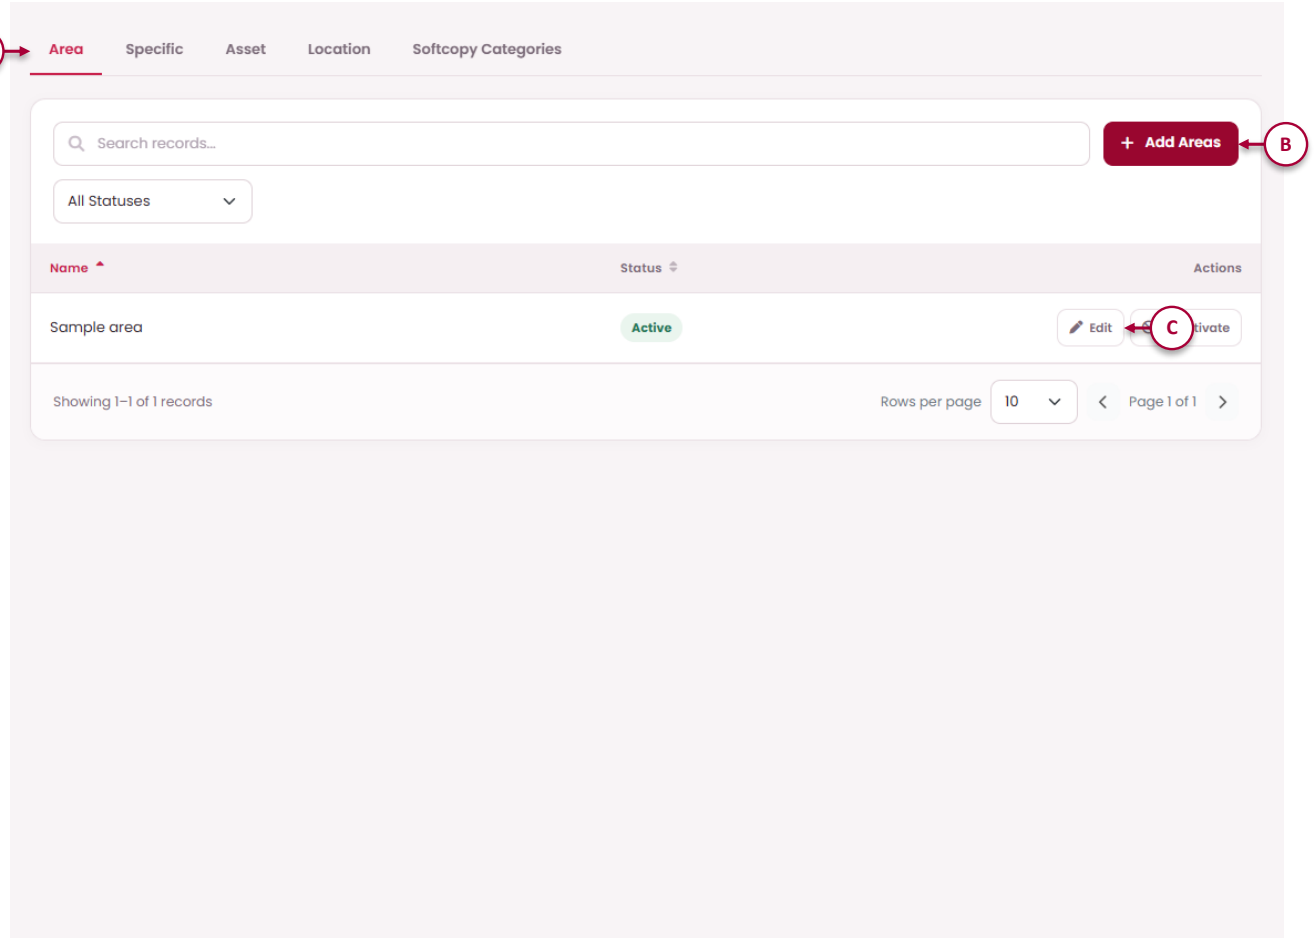

Maintain places and softcopy categories

ON THIS SCREEN

A **Choose a setup tab**

B **Add reference record**

C **Edit reference record**

WHAT TO DO

01 Open Setup Places and choose Area, Specific, Asset, Location, or Softcopy Categories.

02 Use Add or Edit. Maintain Area → Specific → optional Asset before selecting Location.

03 For Location, enter Location Name, Area, Specific, optional Asset Number, and optional Sequence or Archive Date.

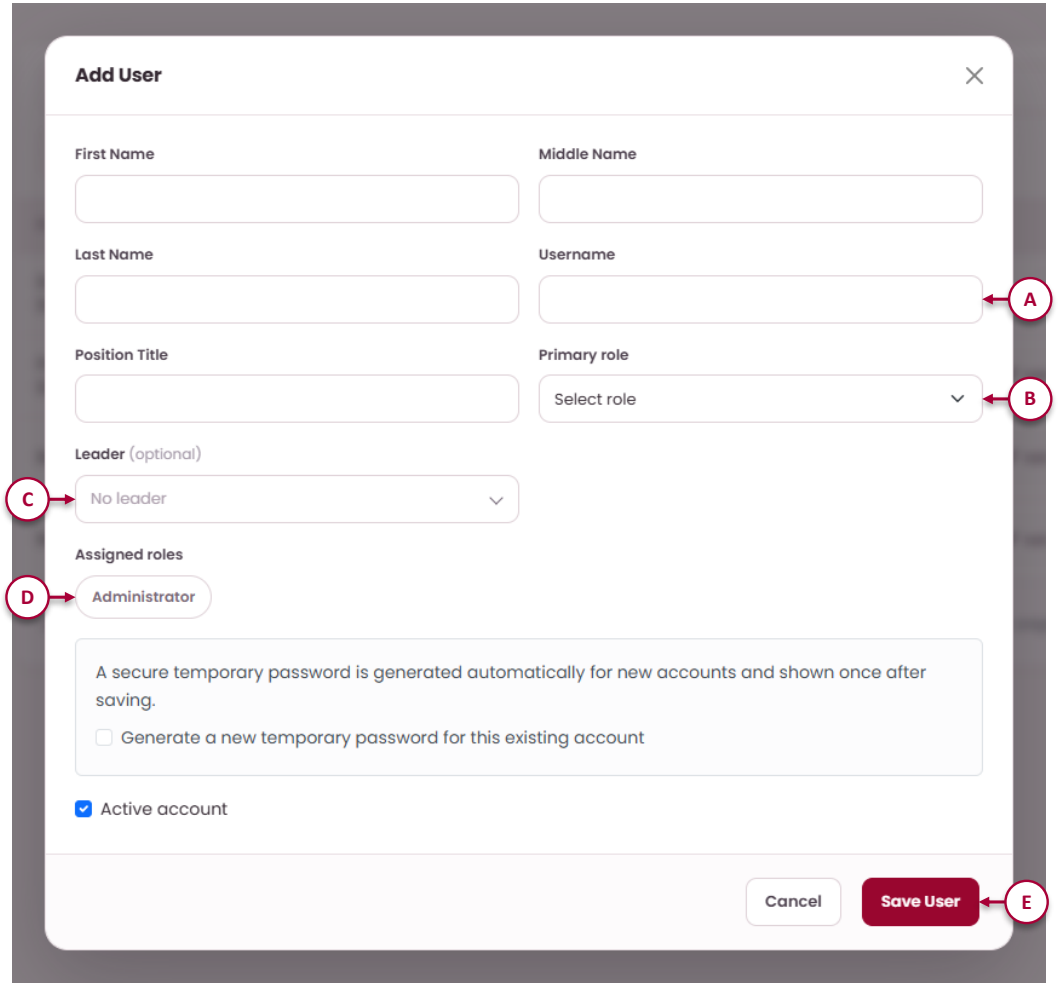

04 For Softcopy Categories, enter Name, Folder, optional Description, and Parent for a subcategory.

05 Check Active, then Save Record → Confirm. Deactivate an unused reference item to preserve its historical links.

Only tabs and actions permitted for the signed-in account will be shown.

Create and maintain user accounts

ON THIS SCREEN

- **A** Choose unique username
- **B** Choose primary role
- **C** Choose optional leader
- **D** Choose assigned roles
- **E** Save User

WHAT TO DO

01 Open User Management and select Add User or Edit an existing eligible account.

02 Complete First Name, optional Middle Name, Last Name, Username, and Position Title.

03 Choose Primary role and Assigned roles; select an optional Leader when the workflow needs one.

04 Check Active account, then Save User → Confirm. New-account credentials appear once; share privately with the owner.

05 Use Generate a new temporary password for a reset, Deactivate to disable an eligible account, or Assigned Documents to inspect assignments.

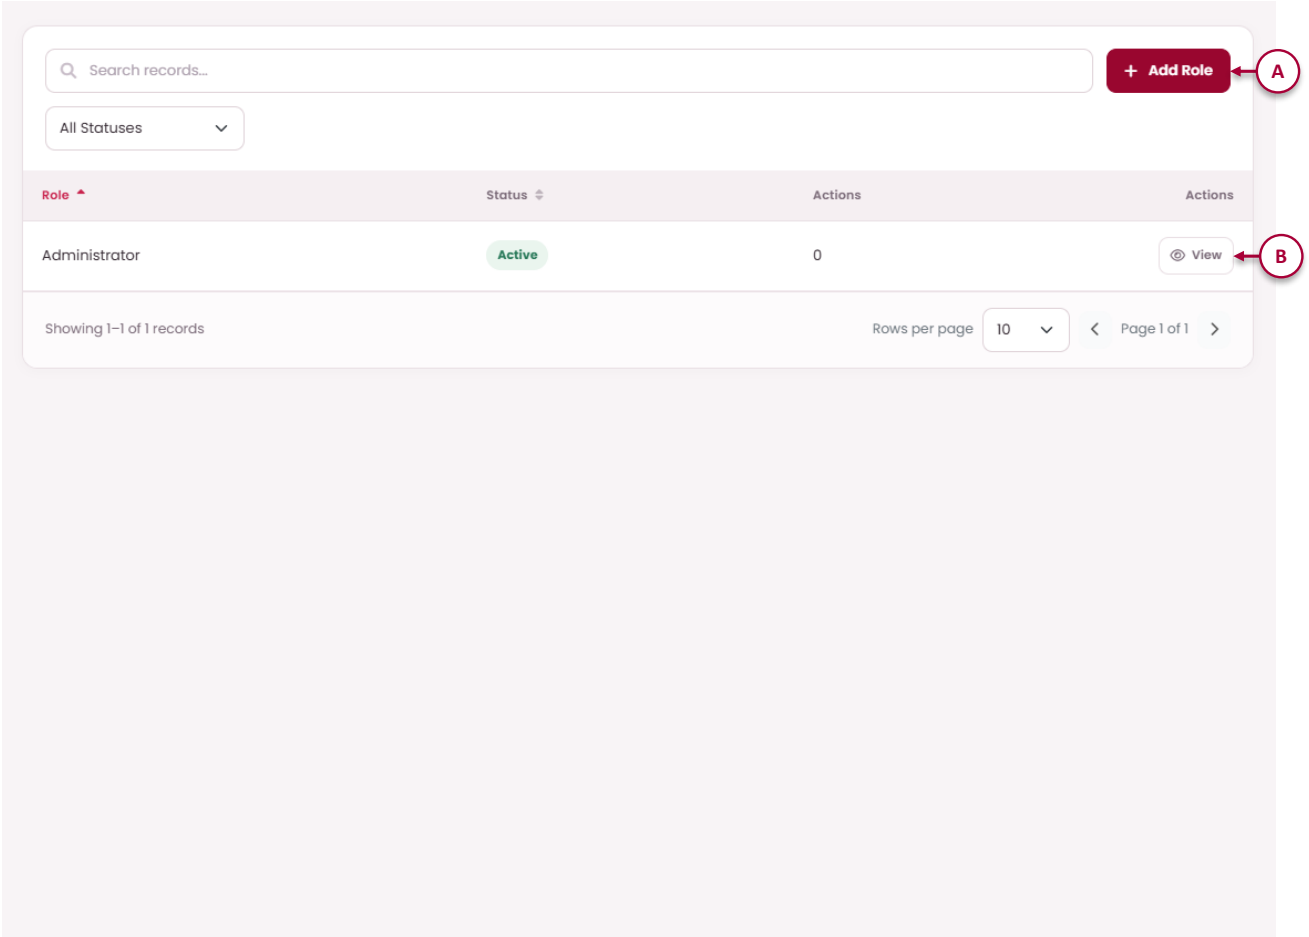

A temporary password will be displayed once after saving. The user will be required to replace it before accessing protected modules.

Maintain roles and permissions

ON THIS SCREEN

A Add Role

B View role permissions

WHAT TO DO

01 Open Roles & Permissions; search or filter to find the role.

02 Select Add Role or Edit and enter Role Name; check Active role as appropriate.

03 Under Module Permissions, select only the actions needed for this role.

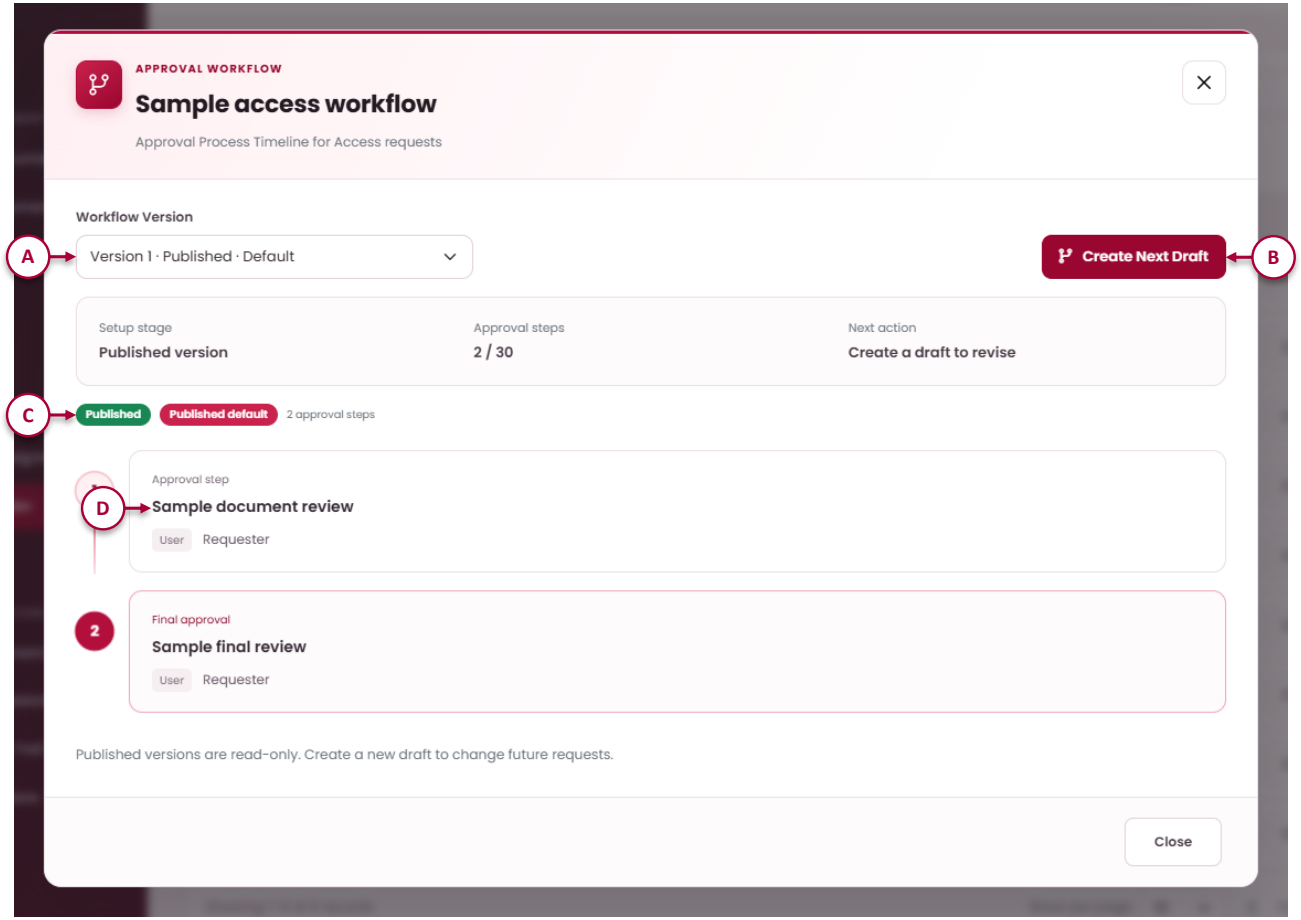

04 Select Save Role → Confirm, then assign the role to users in User Management.

05 Use Deactivate or permanent Remove only when offered for an unused role, and read the confirmation carefully.

Permissions will control both visible menus and individual actions such as direct changes, requests, downloads, and printing.

Configure and publish approval workflows

ON THIS SCREEN

- **A** Choose workflow version
- **B** Create Next Draft
- **C** Check published default
- **D** Review approval step

WHAT TO DO

01 Open Workflow Builder, find the Request Type, and open Steps. Use Workflow Version to inspect the route.

02 Select Start First Draft or Create Next Draft; published versions are read-only.

03 Add Approval Step, enter its name, and select a role, specific user, Requester's leader, or Requester account; Save Step → Confirm.

04 Edit, move, or remove draft steps until the order is correct, then Validate & Publish → Confirm.

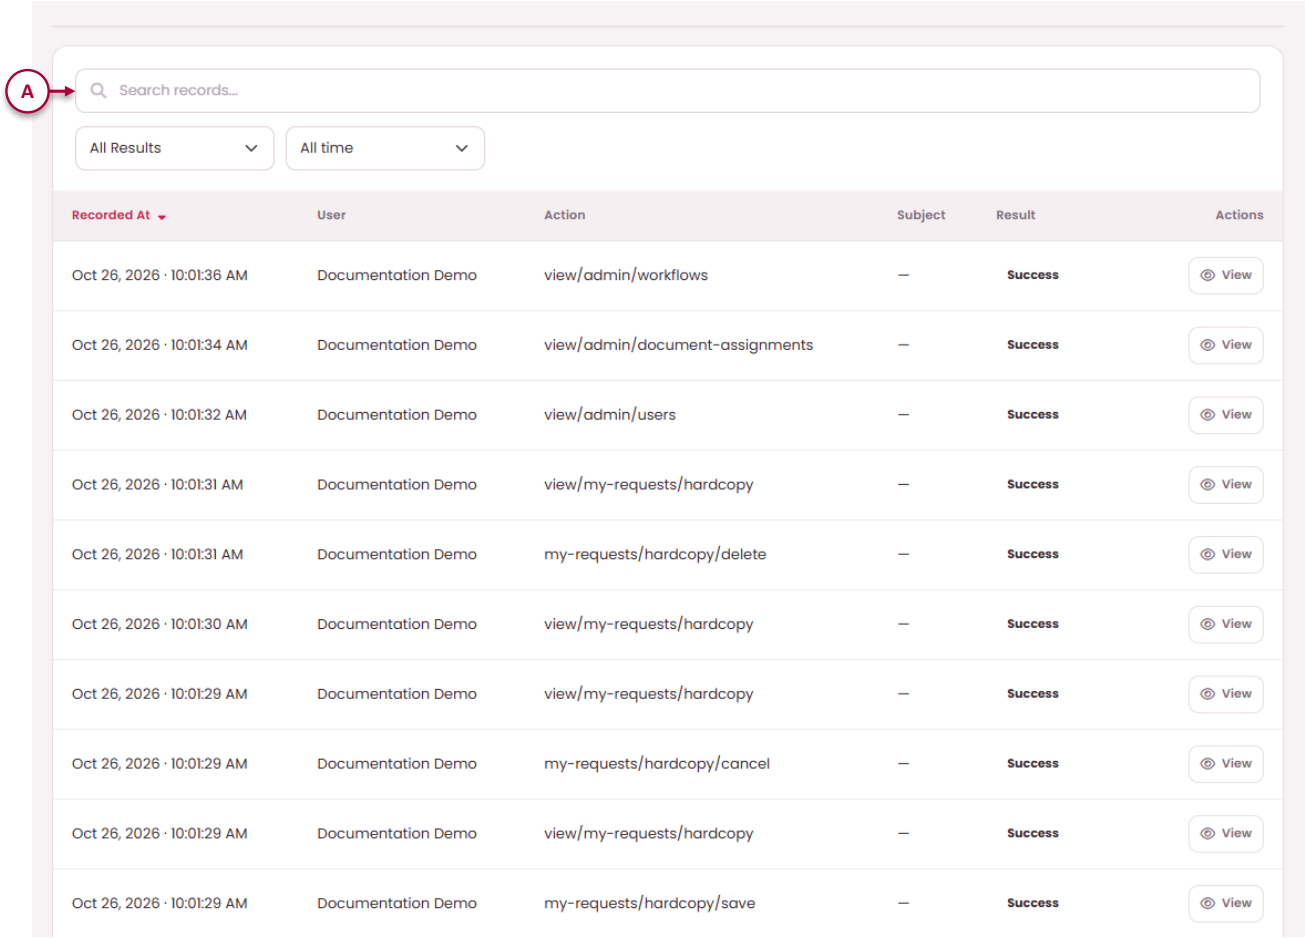

05 Check the published default. Future requests will use it; previously submitted requests will retain their original approval timeline.

A workflow will support up to 30 approval steps and will require an approval route before publication.

Inspect the Internal Audit Trail

ON THIS SCREEN

A Search audit events

WHAT TO DO

01 Open Internal Audit Trail and search for the relevant user, action, or subject.

02 Filter All Results, Success, or Failed and choose the required date period.

03 Read Recorded At, User, Action, Subject, and Result.

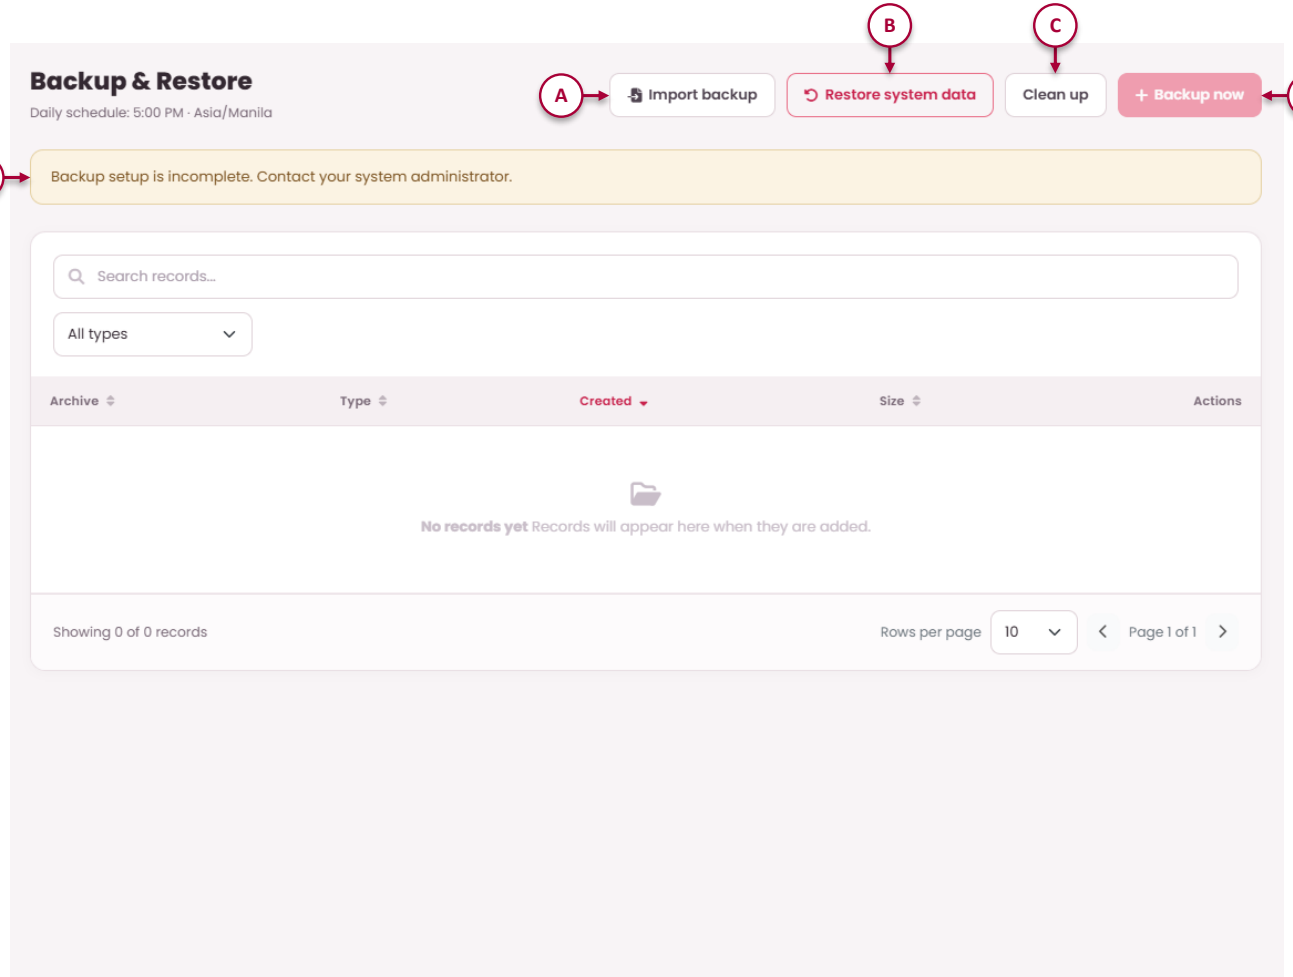

04 Open View for Audit Event details, including User ID and recorded Details; select Close when finished.

05 For document-specific evidence, also inspect its Approval History, Related Requests, or Transfer History.

The proposed audit page will provide read-only inspection of events, without edit or delete operations.

Back up, import, and restore system data

ON THIS SCREEN

A Import backup

B Restore system data

C Clean up archives

D Backup now when ready

E Check backup readiness

WHAT TO DO

01 Open Backup & Restore and check readiness. The example shows incomplete setup, disabled Backup now, and an empty archive list.

02 Have the administrator complete configuration and readiness checks before using backup or restore. The planned daily schedule is 5:00 PM, Asia/Manila.

03 After setup, select Backup now then Confirm. Check the resulting archive; Download or Import backup will require a ready setup and permission.

04 To restore when ready, choose Backup to restore, enter Your password and RESTORE, then Restore selected backup then Confirm. A recovery backup will be created first.

05 Use Clean up then Confirm for backup and log archives older than three months. Check archive dates after backup runs.
