PK DOCUMENT TRACKING SYSTEM - PROPOSED DATA FLOW DIAGRAM
DOCUMENT REQUESTS AND CONTROL

LEGEND / REQUEST ACTIONS

CREATE SOFTCOPY
REVISE SOFTCOPY
CANCEL SOFTCOPY
CREATE HARDCOPY
UPDATE HARDCOPY
GRANT ACCESS
ASSIGN DOCUMENT
TRANSFER HARDCOPY
DISPOSE HARDCOPY

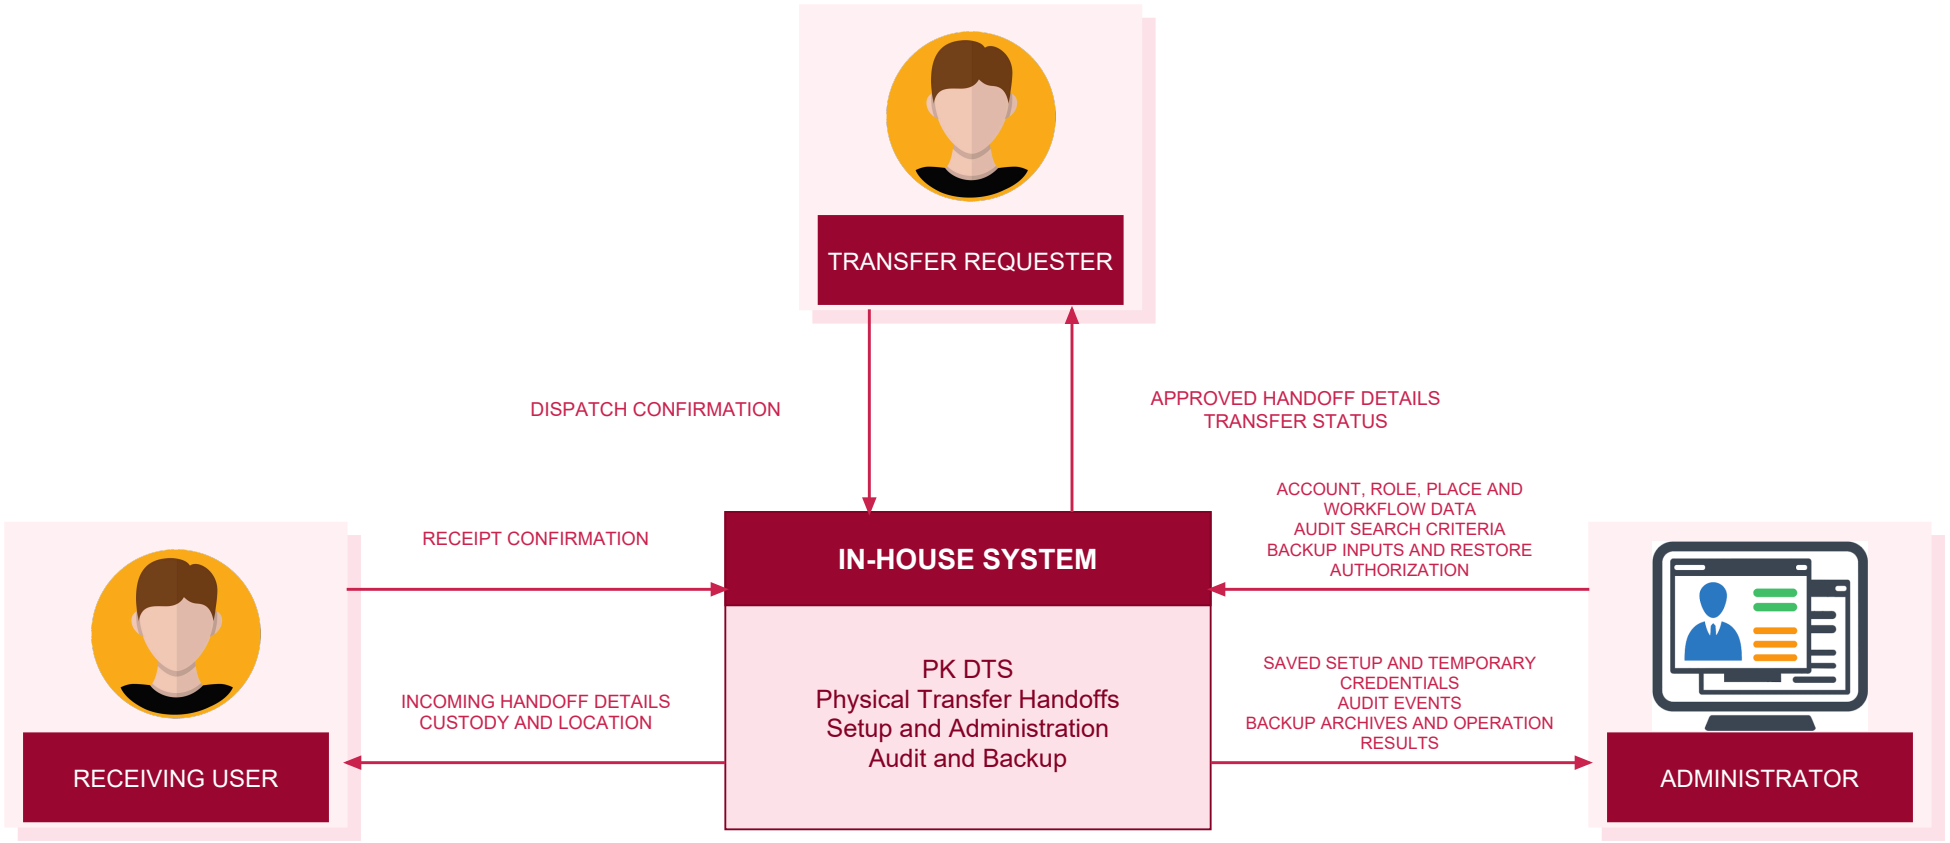

OPERATING RULES

Roles describe responsibilities and may overlap. Sign-in and any required temporary-password setup will precede protected modules; access will follow permissions.

Access and assignment requests will apply to the requester. Direct document changes and assignments will require separate permissions.

The published route will select approvers. Return will reopen the previous approval step; first-step Return will send the request to its requester. Reading an alert will not record a decision.

PK DOCUMENT TRACKING SYSTEM - PROPOSED DATA FLOW DIAGRAM
PHYSICAL HANDOFFS AND ADMINISTRATION

LEGEND

DISPATCH: requester confirmation of physical release
ACCEPT: recipient confirmation of physical receipt
BACKUP INPUTS: operation selection or imported archive

OPERATING RULES

Only the transfer requester will dispatch; only the designated recipient will accept. Acceptance will update the holder and location.

Physical paper will move between people outside PK DTS. Arrows show handoff data rather than paper movement.

Administration will follow module permissions. Backup and restore will require completed configuration and readiness checks.
