Get help with common problems 53

Start here

For: All users

Overview and the role-based navigation menu.

A Document workspaces

B Account menu

C Hardcopy Documents

AFTER THIS

You know where to start and what to check after each action.

KEEP IN MIND

Your roles and permissions determine which menus, records and actions you can use. Saving a request draft does not change a document, its holder, its access or its status.

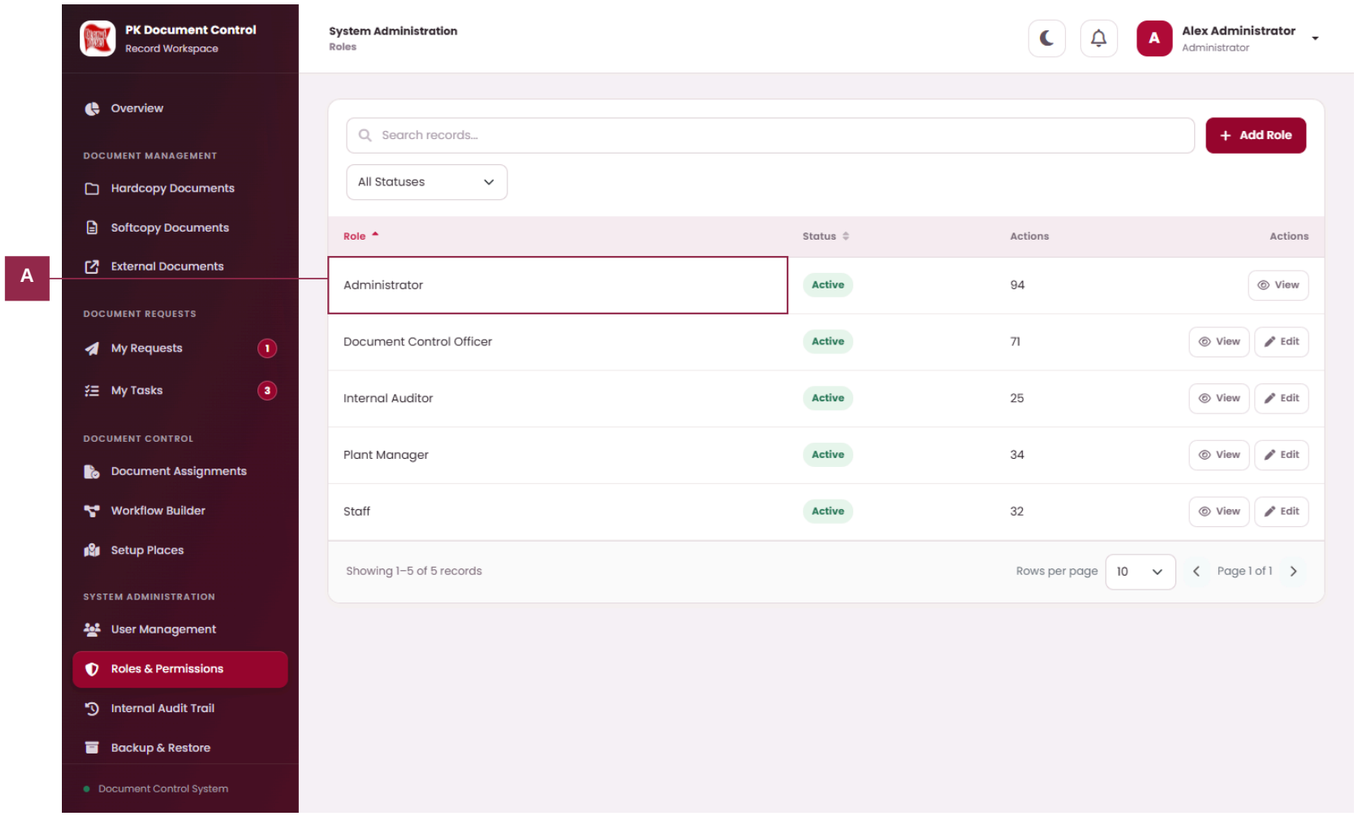

FOLLOW THESE STEPS

1. Use Hardcopy Documents for paper records and Softcopy Documents for approved electronic files.
2. Use External Documents for documents received from outside the organization.
3. Use My Requests to ask for a change. Use My Tasks to review assigned requests or record a physical handoff.
4. With the required permission, you can add or change documents directly in their document lists.
5. Read each result message. Select Got it to close it, then check the record or request status.

Who does what

For: All users

The five standard roles and their permissions.

A Administrator

AFTER THIS

Each person uses their own account and works within their access.

KEEP IN MIND

These are the standard duties. Administrators can change permissions or add roles.
Primary role and Assigned roles work together. You can decide a task only when it is assigned to you or one of your roles.
Download Locked Files lets a role download and open locked approved files. Administrator has it; an Administrator can grant it to other roles, such as Document Control Officer, in Roles & Permissions.

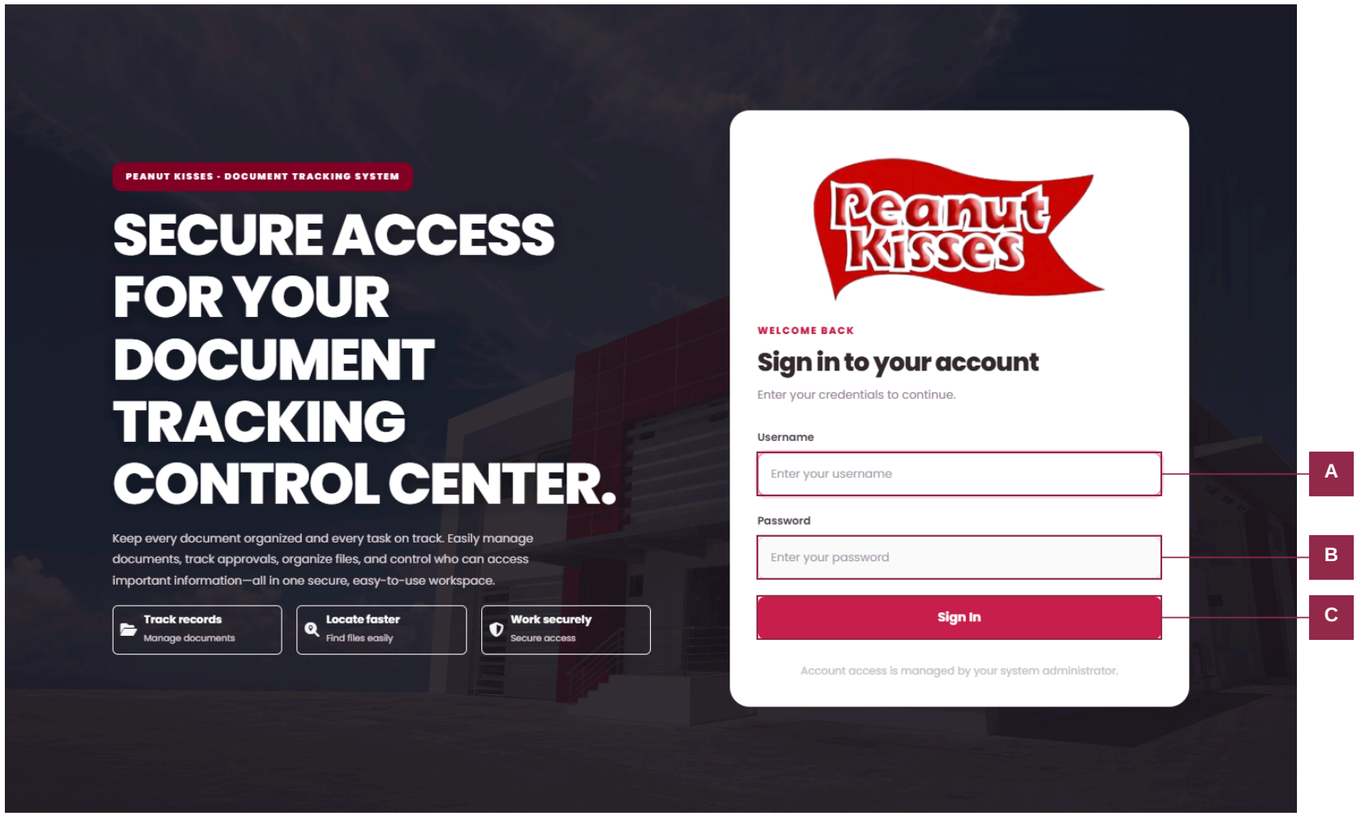

FOLLOW THESE STEPS

1. Administrator manages accounts, permissions, approval processes, setup records, audit and backups.
2. Document Control Officer manages documents, assignments, storage places, categories and document control records.
3. Plant Manager reviews assigned requests and uses the document access granted to their account.
4. Internal Auditor reviews documents, histories and audit records within their access.
5. Staff uses assigned or shared documents and submits requests within their access.

Sign in and set your password

For: All users

Sign in using your own account.

A Username **B** Password **C** Sign In

AFTER THIS

You can open the menus available to your account.

KEEP IN MIND

Contact the Administrator if you forget your password or your account is disabled. After repeated failed sign-ins, wait before trying again or ask the Administrator for help. If a message says your password is too long, shorten it and try again.

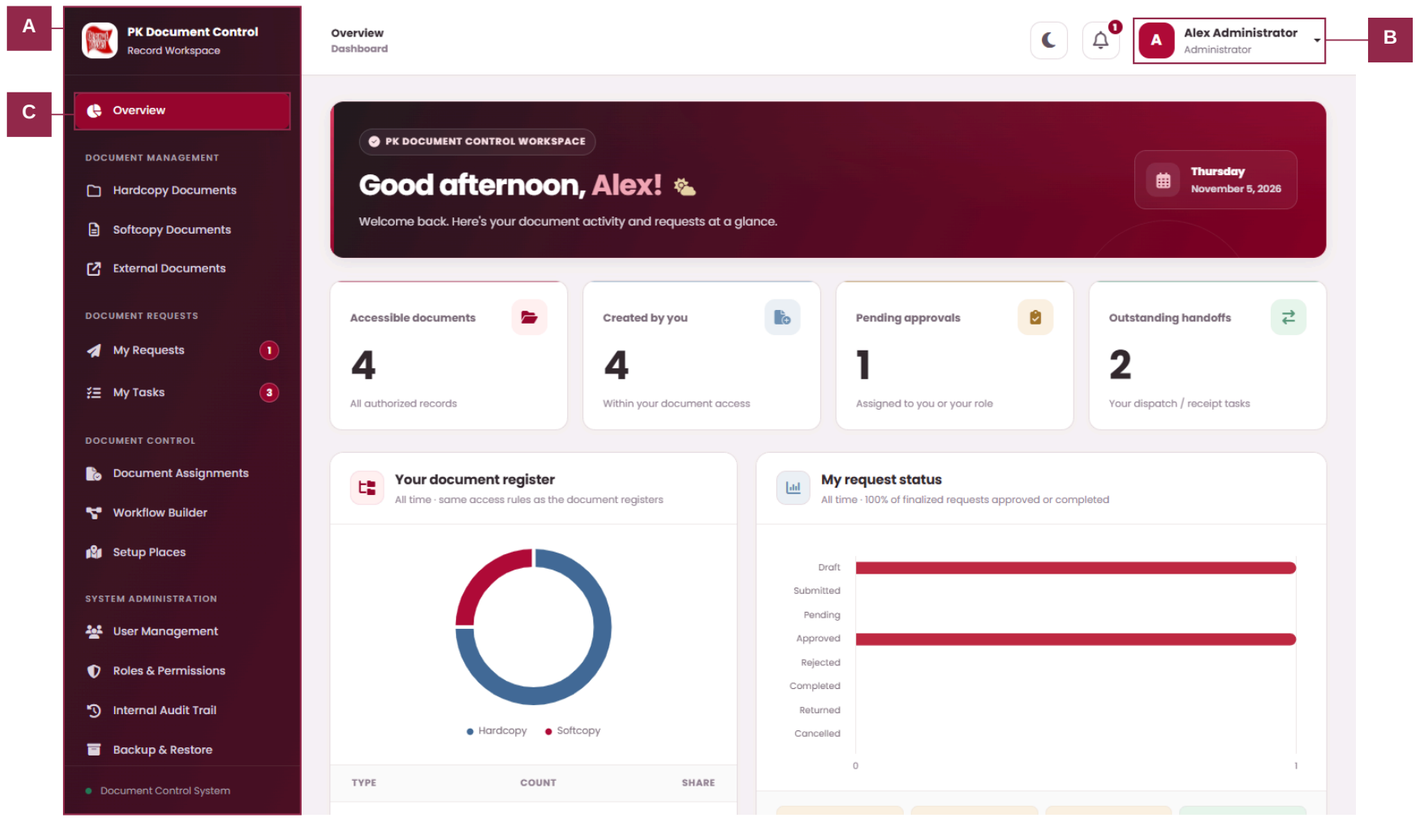

FOLLOW THESE STEPS

1. Enter Username and Password, then select Sign In.
2. If Change your temporary password appears, enter Current or temporary password, New password and Confirm new password.
3. Choose a different password with at least 9 characters. Select Set permanent password.
4. To change it later, open your account name and choose Change Password. Complete the fields, then select Update Password and Confirm.
5. When finished, open your account name, select Sign Out and confirm.

Find your way around

For: All users

Overview and the role-based navigation menu.

A Document workspaces **B** Account menu **C** Overview

AFTER THIS

You can find the page for the work you need to do.

KEEP IN MIND

If a menu or action is missing, your account may not have the required permission. On a narrow screen, use the menu button to show or hide the sidebar.

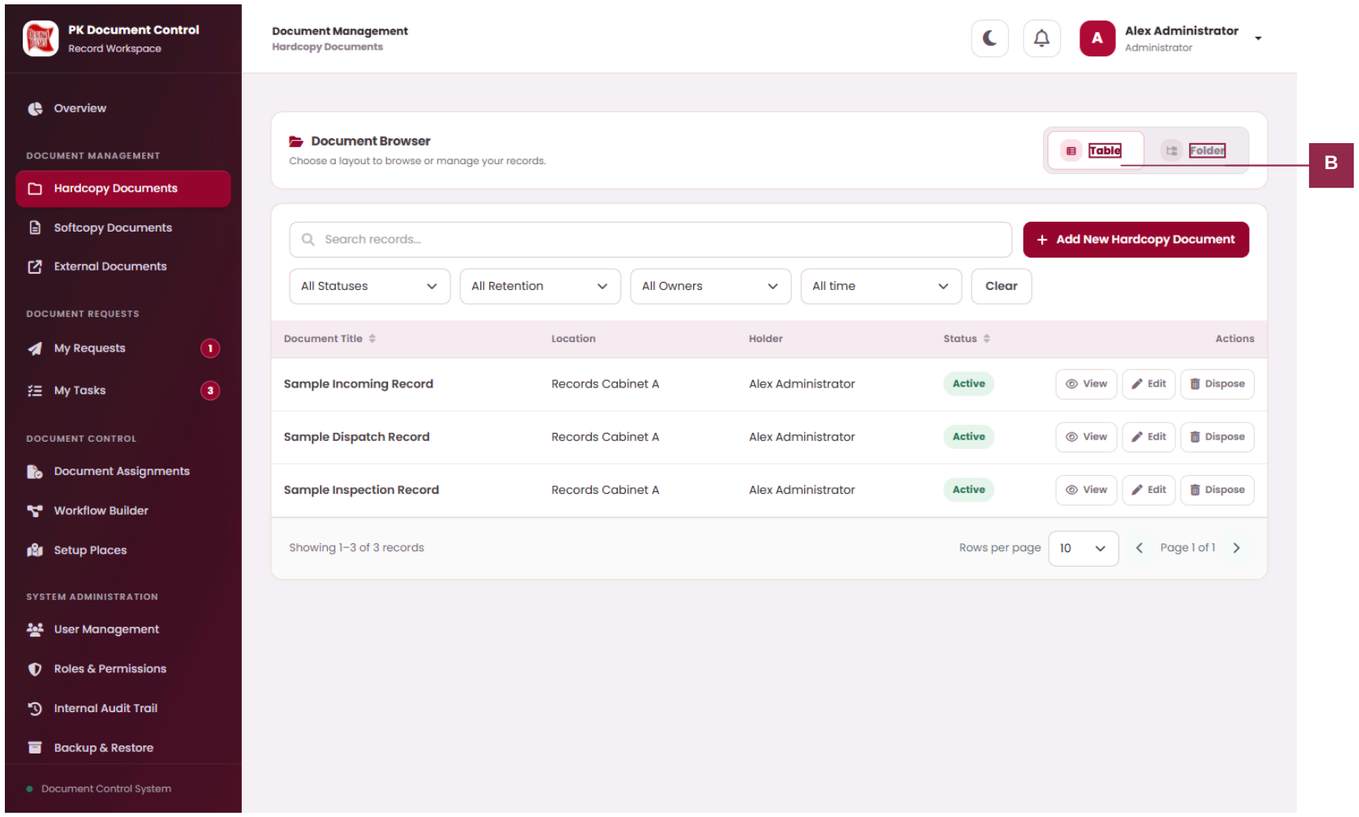

FOLLOW THESE STEPS

1. Open Overview to see your totals and recent activity.
2. Under Document Management, choose Hardcopy Documents, Softcopy Documents or External Documents.
3. Open My Requests to start or follow a request. Open My Tasks for work assigned to you.
4. Document controllers with permission use Document Assignments and Master Data.
5. Administrators also use User Management, Roles & Permissions, Workflow Builder and Backup & Restore.

Find and view a document

For: All users with document access

Search, filter, and inspect records in the document register.

A Table

B Folder

AFTER THIS

You can read the document records available to your account.

KEEP IN MIND

Hardcopy folders follow Area, Specific, optional Asset, then Location. Softcopy and External folders use separate categories.
If a document seems missing, clear the filters and return to All Documents.

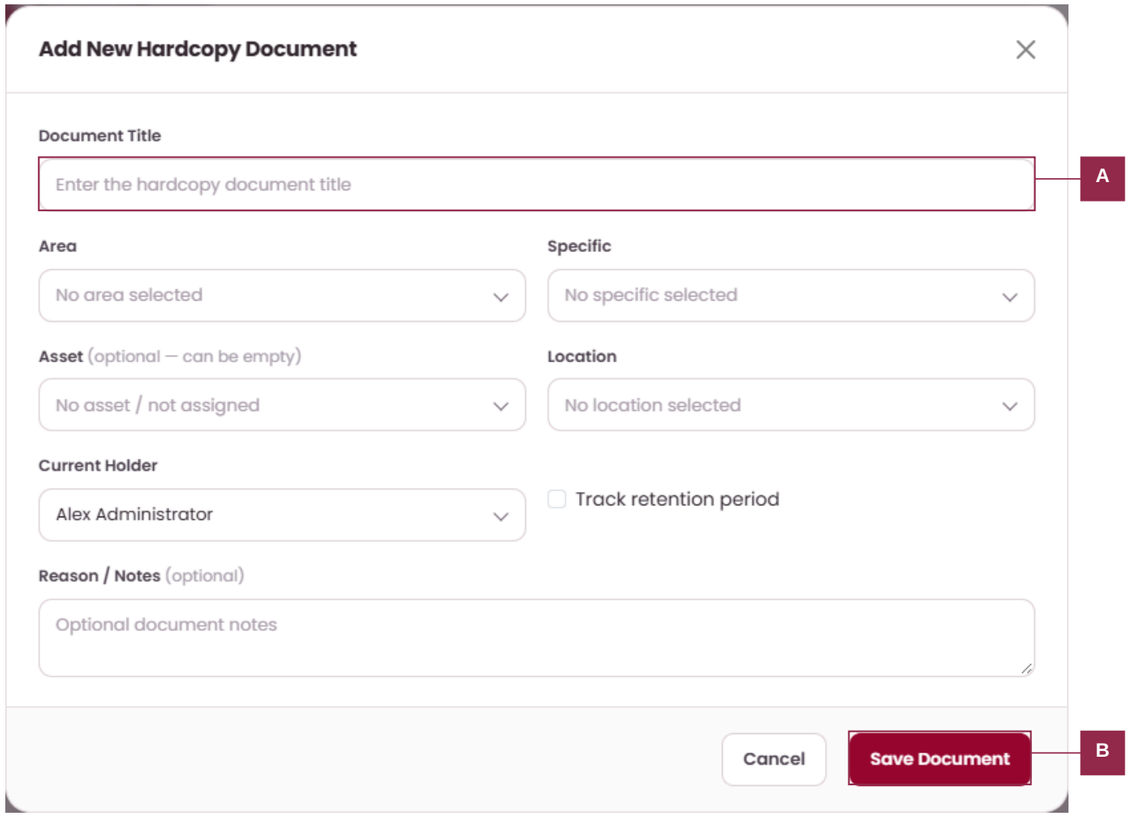

FOLLOW THESE STEPS

1. Open the document list you need and choose Table or Folder.
2. Search by title or reference. Narrow the results with the available filters.
3. In Folder view, expand a storage place or category. Use the folder links or path above the list to move between folders.
4. Select a title or View to read the full record. Use Previous, Next or the page controls for more results.

Register a hardcopy

For: Administrator or authorized holder / document controller

Register a hardcopy directly.

A Document title

B Save

AFTER THIS

The Active record appears immediately with its holder and storage place.

KEEP IN MIND

Choose a Location that belongs to the selected storage places. Asset is optional. Register hardcopies here. New hardcopy creation requests are unavailable.

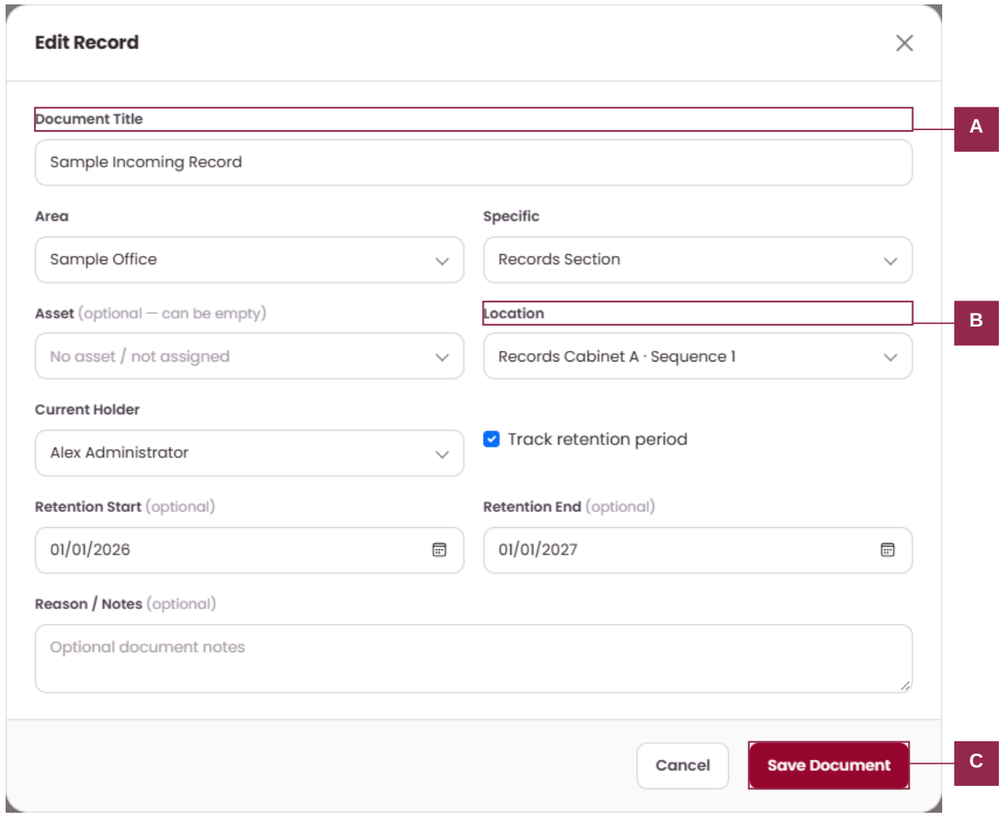

FOLLOW THESE STEPS

1. Open Hardcopy Documents and select Add New Hardcopy Document.
2. Enter Document Title. Choose Area, Specific, optional Asset and Location.
3. Check Current Holder. Administrators can choose an active user; other users register themselves as holder.
4. If needed, turn on Track retention period and enter Retention Start and Retention End. Add optional Reason / Notes.
5. Select Save Document, check the confirmation and select Confirm.

Update a hardcopy record

For: Administrator or authorized current holder

Update an existing hardcopy record.

A Document Title

B Location

C Save Document

FOLLOW THESE STEPS

1. Open Hardcopy Documents, find the Active record and open View Details.
2. Select Edit. Update Document Title, storage choices or retention settings as needed.
3. Check Current Holder and any retention dates.
4. Select Save Document and Confirm. Reopen View Details to check the saved changes.

AFTER THIS

Your permitted changes take effect immediately.

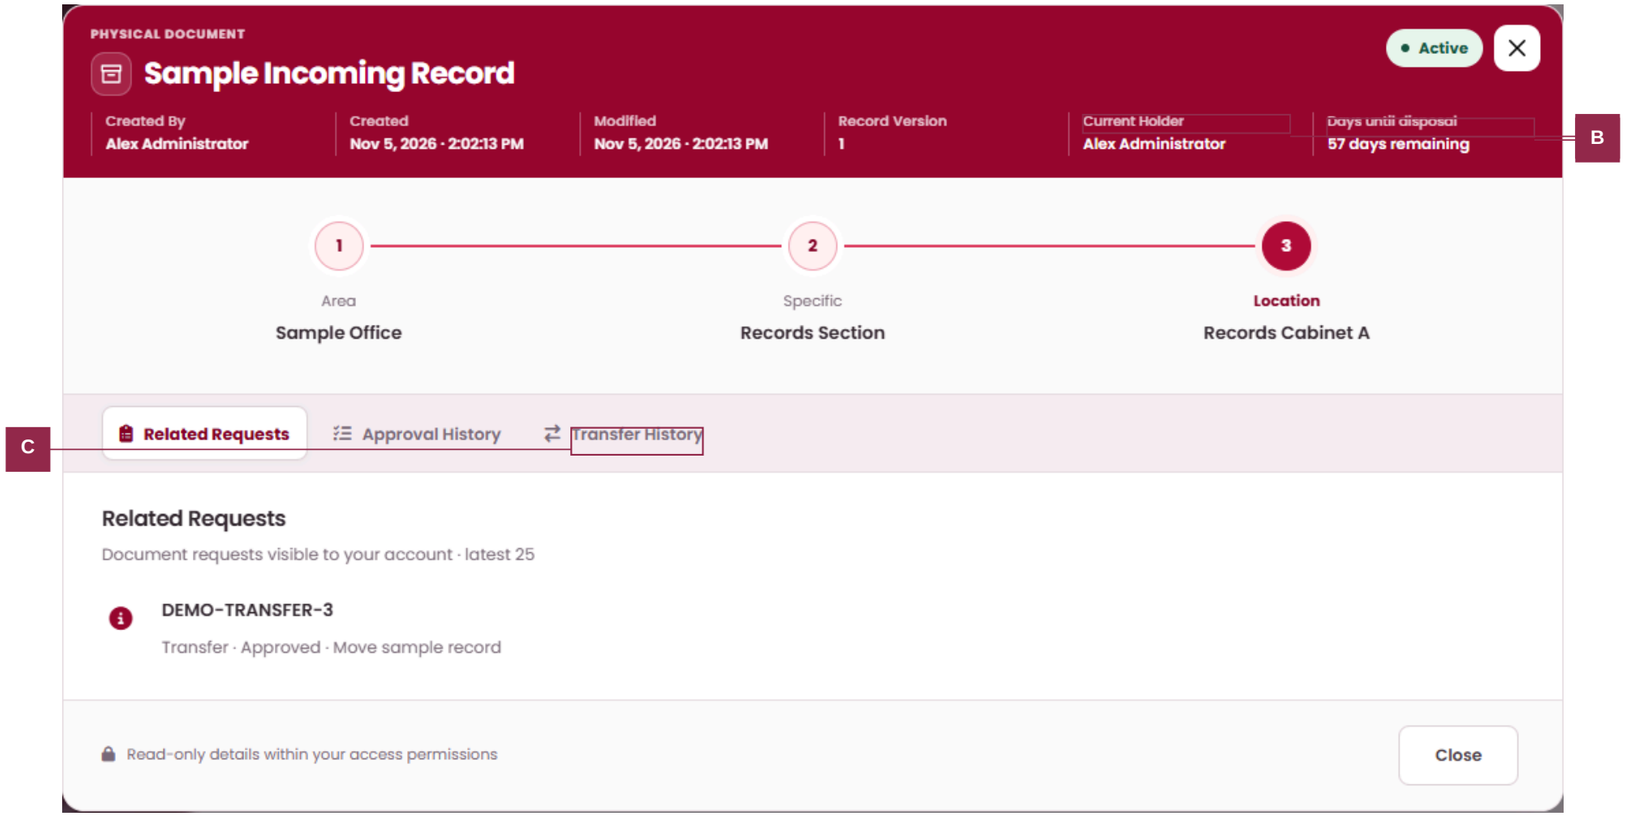

KEEP IN MIND

Use a Hardcopy Transfer Request when the physical handoff needs approval.
New hardcopy update requests are unavailable. If someone else changed the record, refresh and check it again.
Reason / Notes is saved during registration only. Changing it during Edit does not save a new note.

Check who holds a hardcopy

For: Hardcopy users and document controllers

Inspect storage, custody, and history in View Details.

A Current Holder **B** Days until disposal **C** Transfer History

FOLLOW THESE STEPS

1. Find the record in Hardcopy Documents and open View Details.
2. Check Holder and the full Area, Specific, Asset and Location details.
3. Review Related Requests, approval history and transfer history when available.
4. Before collecting or releasing the original, confirm the holder and any unfinished transfer.

AFTER THIS

You know who holds the original and where it should be stored.

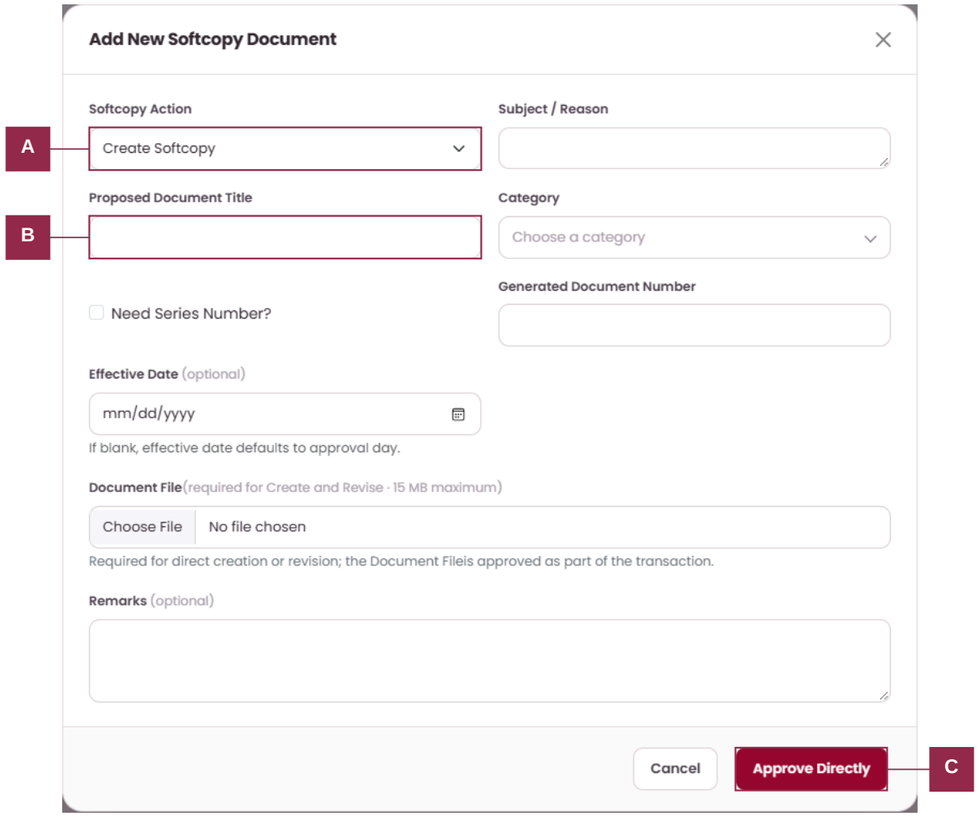

KEEP IN MIND

Transfer approval alone does not change the holder or location. The recipient must Accept the handoff.
Assignment changes the holder without recording a physical handoff.

Create a softcopy directly

For: Administrator or authorized document controller

Create a controlled softcopy directly.

A Action **B** Document title **C** Save

AFTER THIS

The Active softcopy and its approved file are ready immediately at revision 00.

KEEP IN MIND

The displayed document number is a preview. The final number is assigned when the action completes.
Document File is required. A blank Effective Date uses the approval date.

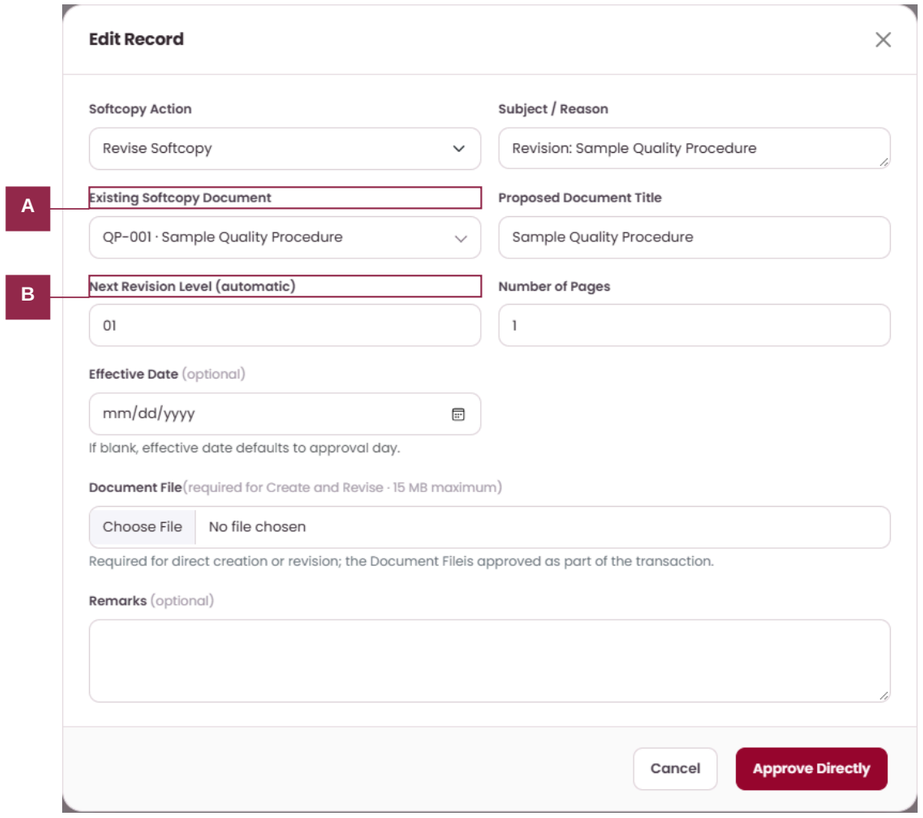

FOLLOW THESE STEPS

1. Open Softcopy Documents and select Add New Softcopy Document. Set Softcopy Action to Create Softcopy.
2. Enter Subject / Reason and Proposed Document Title. Choose Category and check Generated Document Number.
3. To reuse a number with a new series, follow Use document and series numbers.
4. Attach Document File. Add Effective Date and Remarks if needed.
5. Select Approve Directly and Confirm. Check the success message and the new record.

Revise a softcopy directly

For: Administrator or authorized document controller

Create a direct revision of the selected softcopy.

A Existing Softcopy Document

B Next Revision Level (automatic)

AFTER THIS

The replacement file is current immediately. The revision level increases automatically.

KEEP IN MIND

The document keeps its number, series and category.
Earlier revisions remain in the history you can view. Their files are not available as the current approved copy.

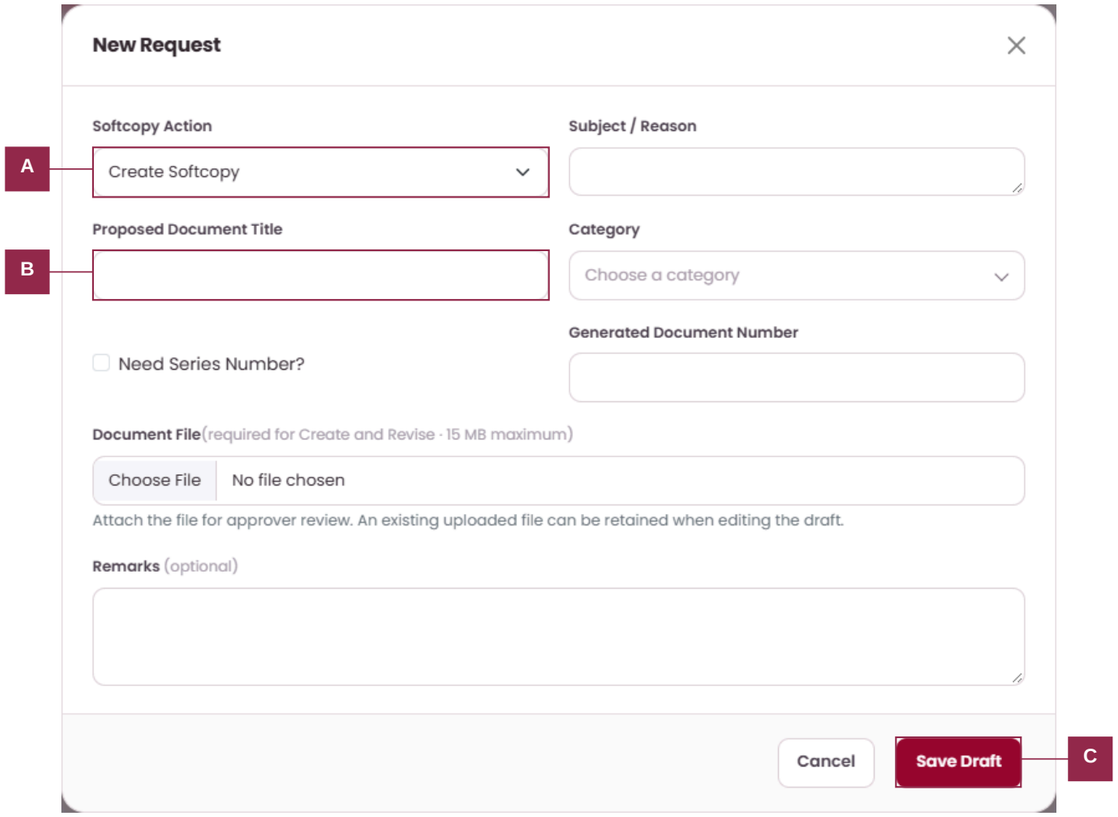

FOLLOW THESE STEPS

1. Open Softcopy Documents, find the Active document and select Edit.
2. Check Existing Softcopy Document and the next revision level.
3. Enter Subject / Reason, Proposed Document Title and Number of Pages. Add Effective Date and Remarks if needed.
4. Attach the replacement Document File. Select Approve Directly and Confirm.
5. Reopen the record and check the current revision and file.

Request a new softcopy

For: Authorized requesters

Prepare a softcopy create request.

A Action **B** Document title **C** Save

FOLLOW THESE STEPS

1. Open My Requests, choose Softcopy Request and select New Request.
2. Choose Create Softcopy. Enter Subject / Reason and Proposed Document Title, then choose Category.
3. Check Generated Document Number. To reuse a number with a new series, select Need Series Number?.
4. Attach Document File and add optional Remarks. Select Save Draft and Confirm.
5. Check View Details, including the file preview on its Document File tab. Select Submit, Continue and Confirm.

AFTER THIS

Final approval creates the Active softcopy and its approved file at revision 00.

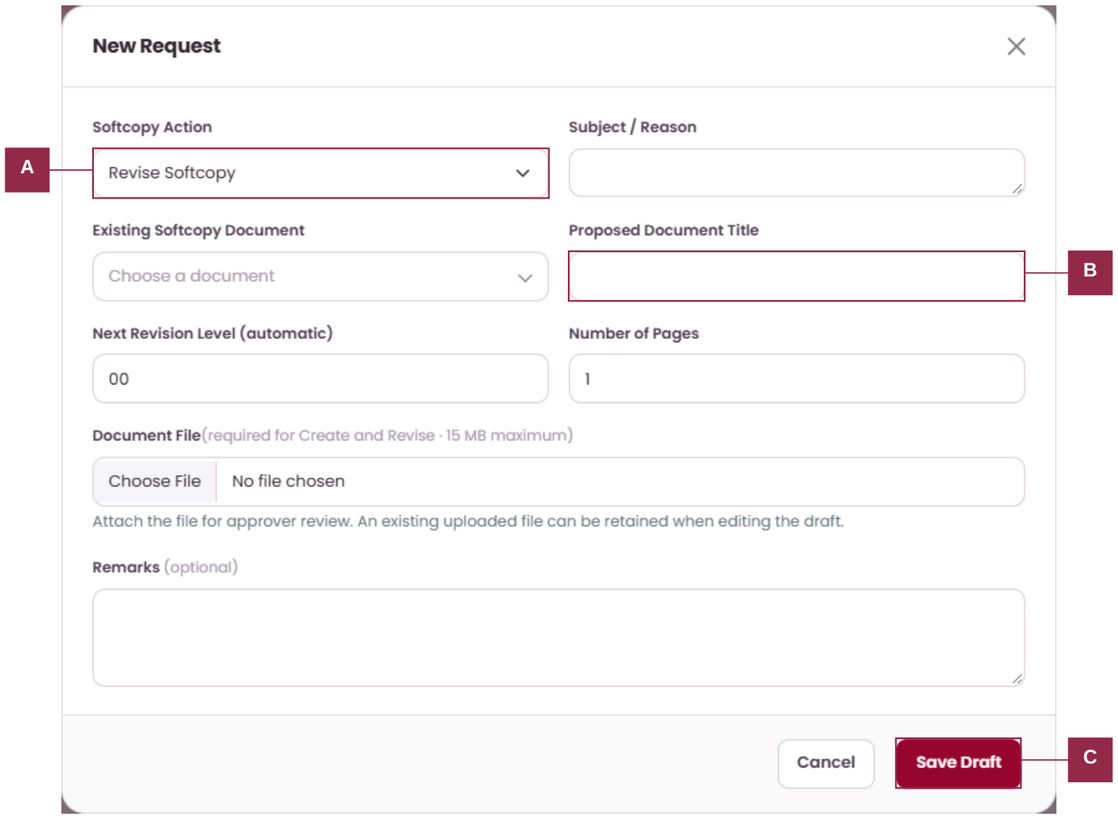

KEEP IN MIND

Attach a file before submission. This request form has no Effective Date field. The final document number is assigned at final approval and may differ from the preview.

Request a softcopy revision

For: Authorized requesters with access to the document

Prepare a softcopy revise request.

A Action

B Document title

C Save

AFTER THIS

Final approval makes the replacement file current and increases the revision level.

KEEP IN MIND

When editing a draft, keep its attachment or upload a replacement. Softcopy cancellation requests are unavailable. Ask an authorized controller if the document needs disposal.

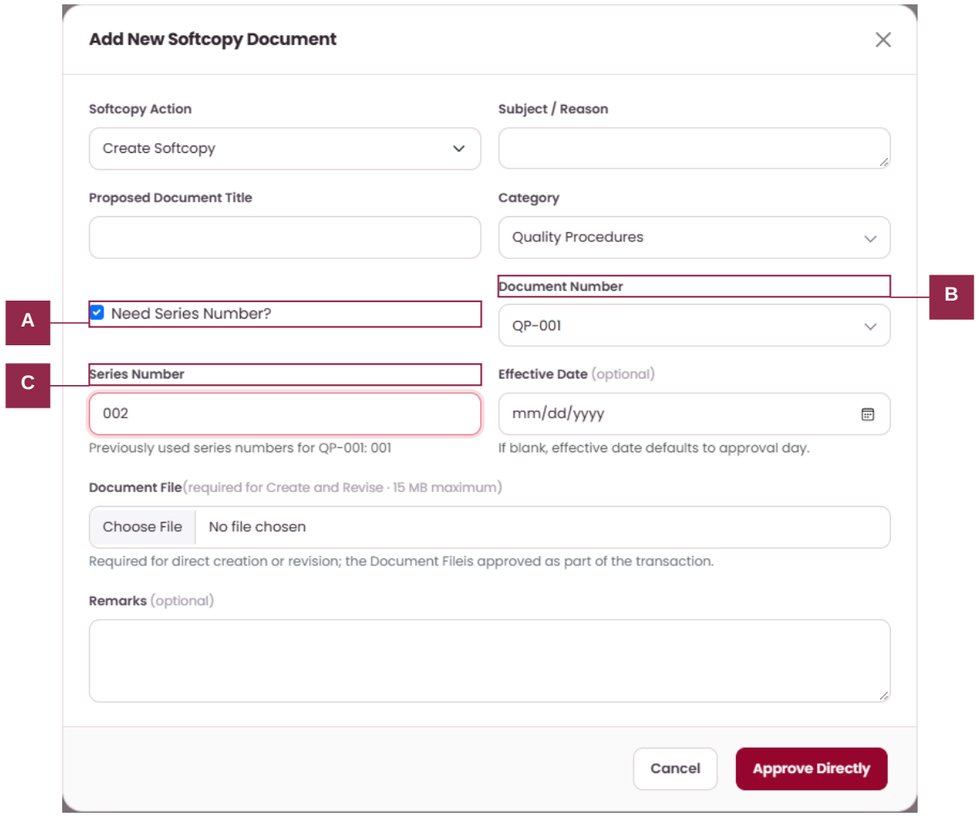

FOLLOW THESE STEPS

1. Open My Requests, choose Softcopy Request and select New Request.
2. Choose Revise Softcopy and select Existing Softcopy Document.
3. Check Proposed Document Title and the next revision level. Enter Subject / Reason and Number of Pages.
4. Attach the replacement Document File and add optional Remarks. Select Save Draft and Confirm.
5. Check the file preview on the Document File tab of View Details, then select Submit, Continue and Confirm.

Use document and series numbers

For: Softcopy creators and requesters

The selected category controls the generated document number.

A Need Series Number?

B Document Number

C Series Number

AFTER THIS

The record gets a new category number or an existing number with a unique series.

KEEP IN MIND

Each Document No. stores its own series pattern after first approval. Future series increment automatically; revisions keep their series.
If the preview is blank or no number is available, ask the controller to check the category.

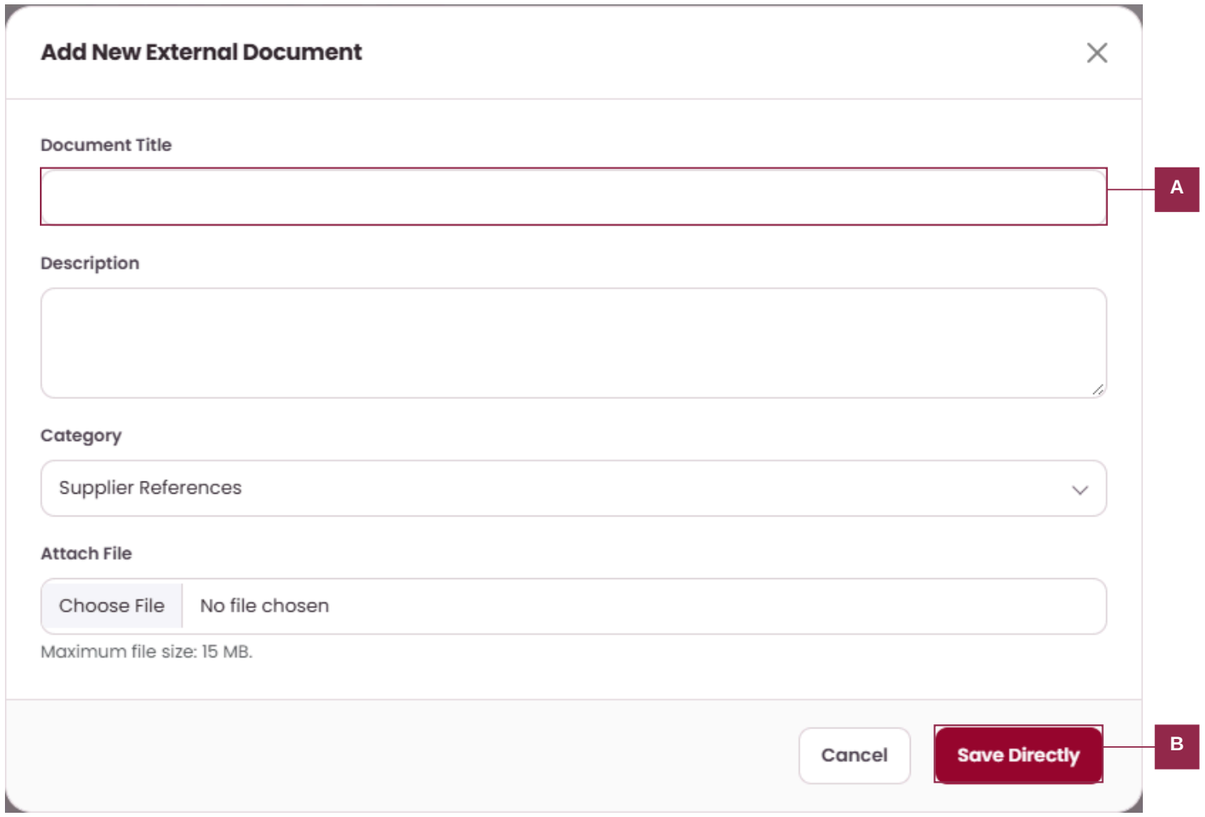

FOLLOW THESE STEPS

1. For a new document, choose a Document Number Pattern category (not a Folder) and leave Need Series Number? unchecked.
2. Check Generated Document Number. The category Code Pattern sets its prefix and sequence.
3. For the first series, check Need Series Number?, select an existing Document No. and enter a one-time Series No. Code Pattern.
4. Preview the preceding Series No. and the new Generated Series No. For sample-series-002, the original becomes sample-series-001 and the new record sample-series-002.
5. Finish the direct creation or request steps.

Register an external document directly

For: Administrator or authorized document controller

Register an external document directly.

A Document title

B Save

FOLLOW THESE STEPS

1. Open External Documents and select Add New External Document.
2. Enter Document Title, choose Category and add an optional Description.
3. Select Attach Files and choose up to 20 PDF or image files (15 MB per file).
4. Select Save Directly and Confirm.
5. Find the new record and select View to check its details and current attachments.

AFTER THIS

The Active external document and its approved attachments are ready immediately at revision 00.

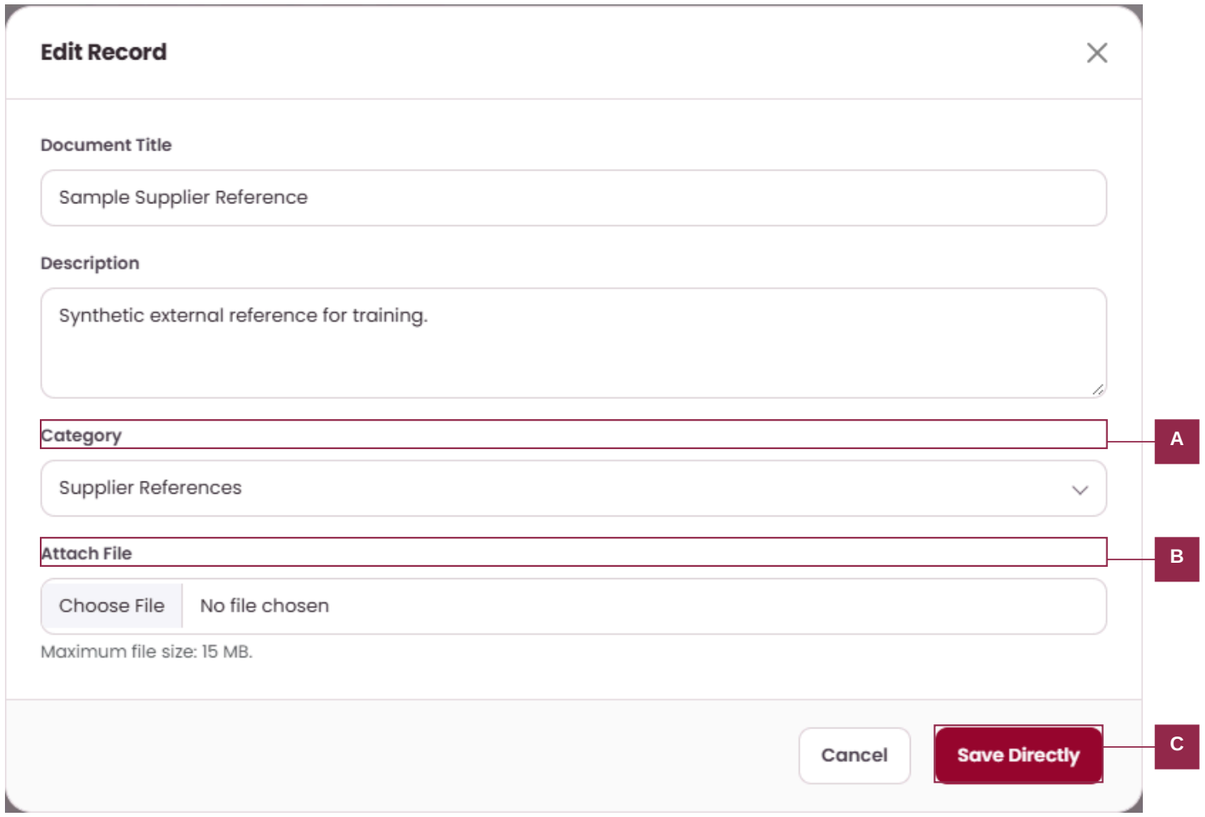

KEEP IN MIND

Every later revision needs at least one replacement attachment.
External documents have their own categories and no retention fields.

Revise an external document directly

For: Administrator or authorized document controller

Revise an existing external document.

A Category

B Attach File

C Save Directly

AFTER THIS

The details and current attachments change immediately. The revision level increases automatically.

KEEP IN MIND

You can revise only an Active external document you have permission to manage. Download gives you each current approved attachment.
Earlier revision records and files remain stored, but External Documents has no separate File History action.

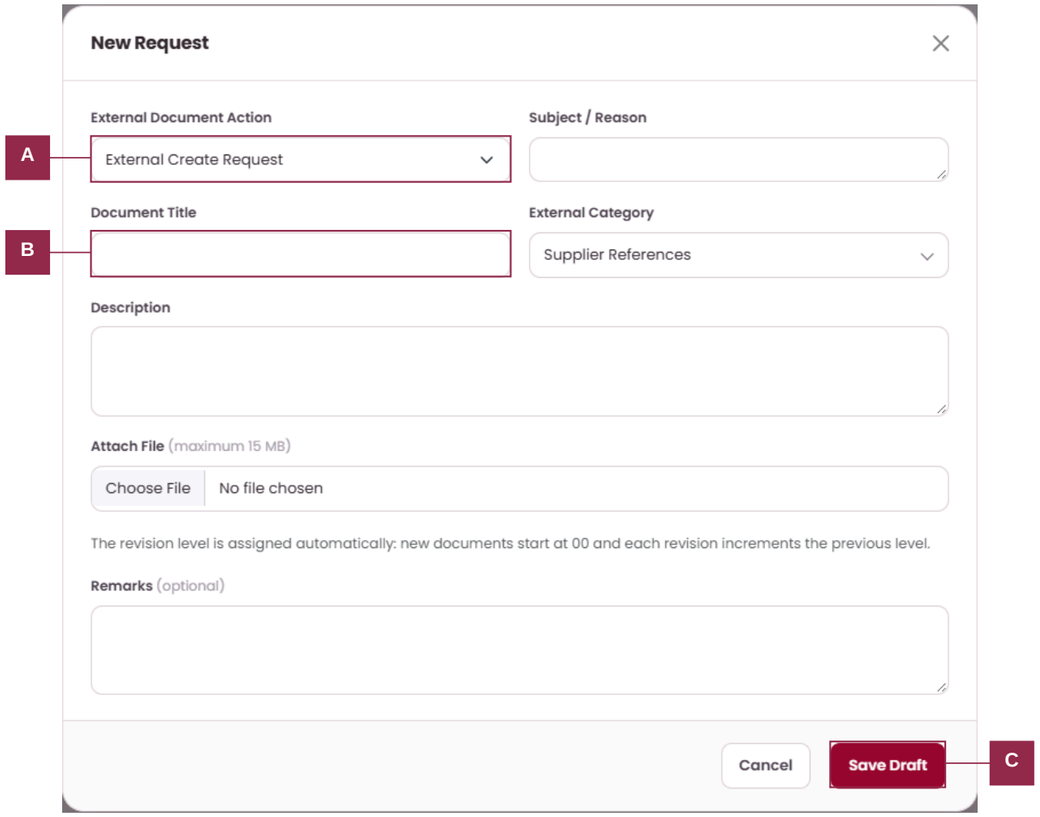

FOLLOW THESE STEPS

1. Open External Documents, find the Active document and select Edit.
2. Check or update Document Title, Description and Category.
3. Select Attach Files and choose up to 20 replacement PDF or image files (15 MB per file).
4. Select Save Directly and Confirm.
5. Select View to check the document details in the header and inspect current attachments. Use Download when permitted.

Request a new external document

For: Authorized requesters

Prepare an external document create request.

A Action **B** Document title **C** Save

AFTER THIS

Final approval registers the Active external document and its approved attachments at revision 00.

KEEP IN MIND

External Categories are separate from Softcopy Categories.
Attach at least one file before submission. External documents have no retention dates.

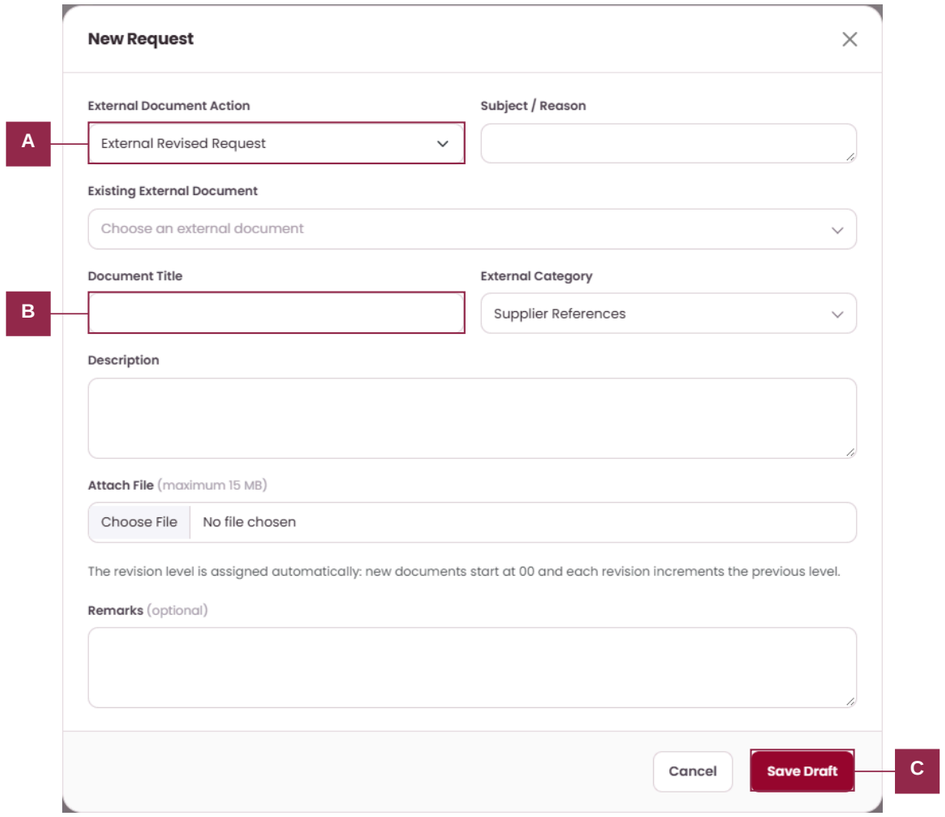

FOLLOW THESE STEPS

1. Open My Requests, choose External Document Request and select New Request.
2. Set External Document Action to External Create Request. Enter Subject / Reason.
3. Enter Document Title, choose External Category and add an optional Description.
4. Select Attach Files and choose up to 20 PDF or image files (15 MB each). Add optional Remarks, then Save Draft and Confirm.
5. Check View Details and review each attachment. Select Submit, Continue and Confirm.

Request an external document revision

For: Authorized requesters with access to the document

Prepare an external document revise request.

A Action **B** Document title **C** Save

AFTER THIS

Final approval updates the external document and makes its next revision current.

KEEP IN MIND

Choose an Active external document available to your account.
When editing a draft, existing attachments are kept; newly selected files are added to them.

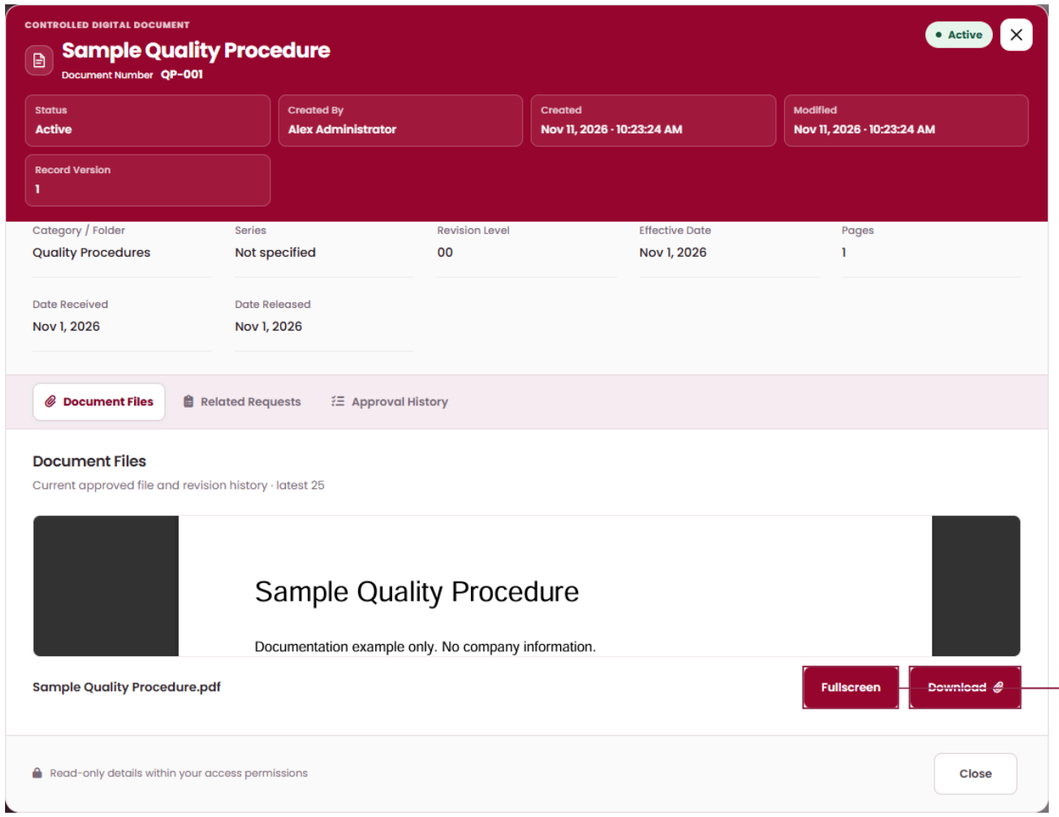

FOLLOW THESE STEPS

1. Open My Requests, choose External Document Request and select New Request.
2. Choose External Revised Request and select Existing External Document.
3. Enter Subject / Reason. Check or update Document Title, External Category and Description.
4. Attach at least one replacement file (up to 20), add optional Remarks, then Save Draft and Confirm.
5. Review each attachment, then select Submit, Continue and Confirm.

Preview, download and view file history

For: Users with the required file permissions

Preview the current file in View Details. Download appears when the file is unlocked.

A Fullscreen

B Download

AFTER THIS

You can read the current approved file, and download it when it is unlocked or you hold Download Locked Files access.

KEEP IN MIND

External documents take up to 20 PDF or image files per upload, 15 MB each.
Normal downloads exclude files of superseded, disposed and cancelled documents.
A locked file is read-only: it can be previewed, but Download needs Download Locked Files access.
The first Word or Excel preview takes a few seconds to convert.

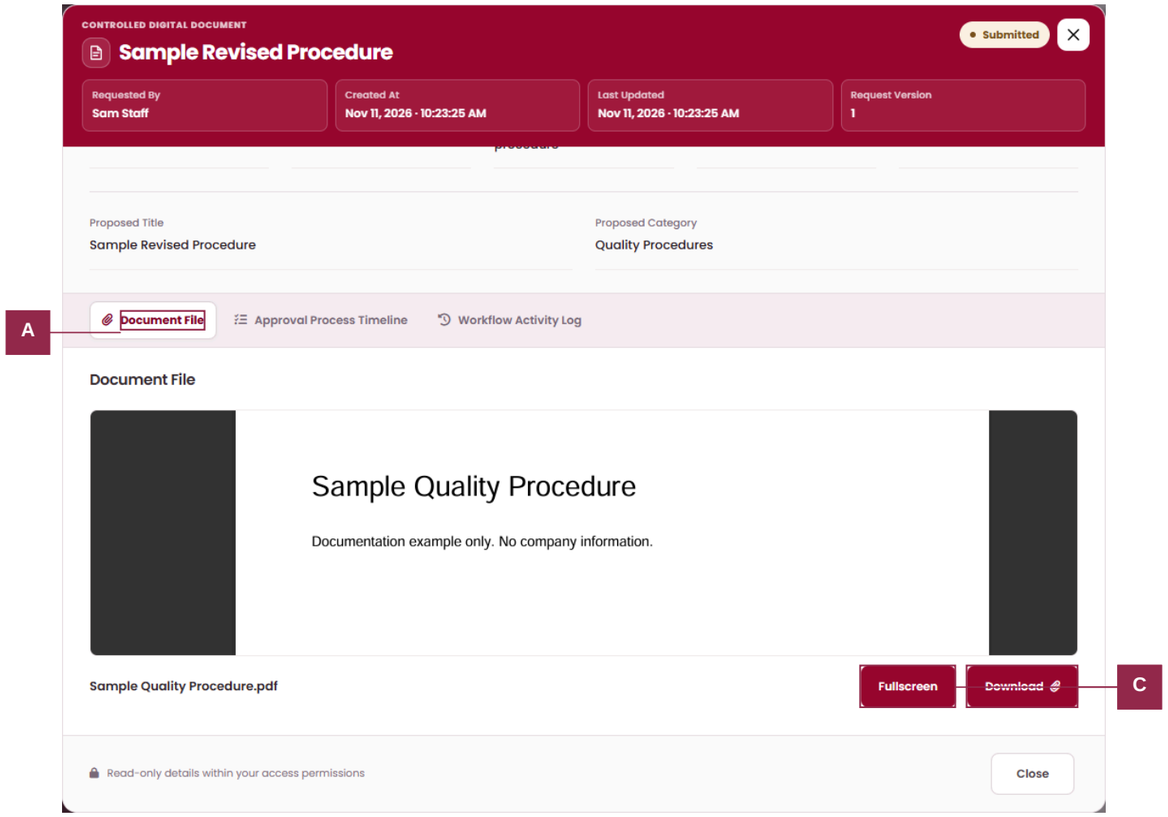

FOLLOW THESE STEPS

1. Open Softcopy Documents, find the Active document, select View and open the Document Files tab to preview the current file.
2. Word and Excel files are shown as a PDF made by LibreOffice. The file you uploaded is kept unchanged.
3. Select Fullscreen to enlarge the preview. If the file is not locked, you can also select Download.
4. For Word or Excel, Download Original saves the uploaded file and Download PDF saves the converted copy.
5. Use File History or Document Files for revision details. Open View on an external document to preview its PDF or image attachments.

Preview a request attachment

For: Requester or the currently assigned approver

Open the Document File tab in View Details to preview the proposed attachment before deciding.

A Document File **B** Fullscreen **C** Download

AFTER THIS

You can check the proposed file before submission or approval.

KEEP IN MIND

Only the requester and the currently assigned approver can preview a request attachment, while the request is a draft, returned or submitted.
Previewing does not change the system file. To correct a file, the requester must attach the revised file.
Request attachments are for preview and download only; there is no Print action.

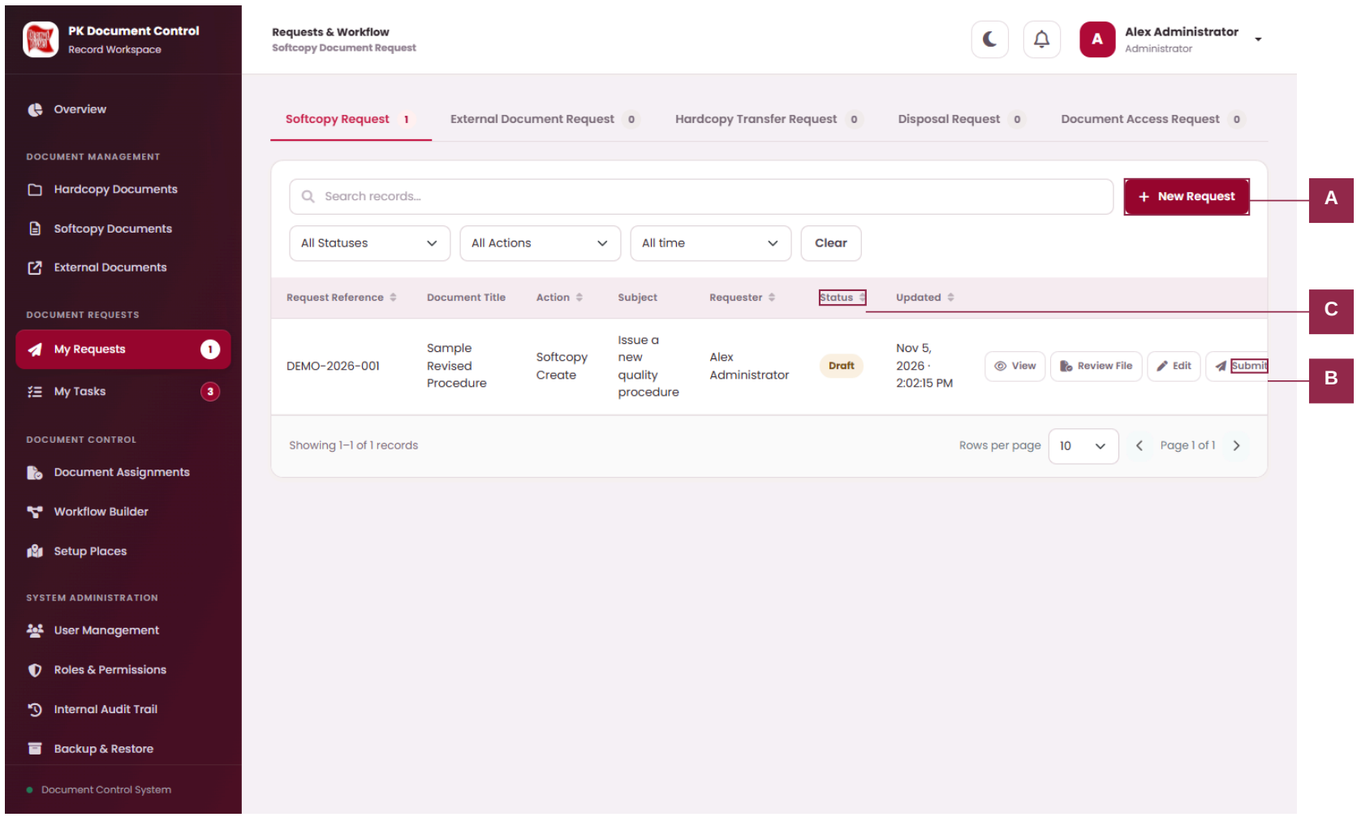

FOLLOW THESE STEPS

1. Find the softcopy or external request in My Requests or My Tasks and select View.
2. Open the Document File tab to read the proposed PDF, image, text, Word or Excel file in the browser.
3. Select Fullscreen to enlarge it. Word and Excel files appear as a PDF.
4. Download Original or Download PDF appears only if the file is not locked or you hold Download Locked Files access.
5. Return to the request to update the proposal or record your decision.

Save, submit and track a request

For: Authorized requesters

A saved draft remains in My Requests until submitted.

A New Request **B** Submit **C** Status

AFTER THIS

The request shows its progress from Draft to Submitted and its final outcome.

KEEP IN MIND

You cannot edit or cancel a Submitted request. Rejected requests are closed. Most final approvals produce Completed. A transfer still needs Dispatch and Accept. A Returned request keeps its original approval process when resubmitted.

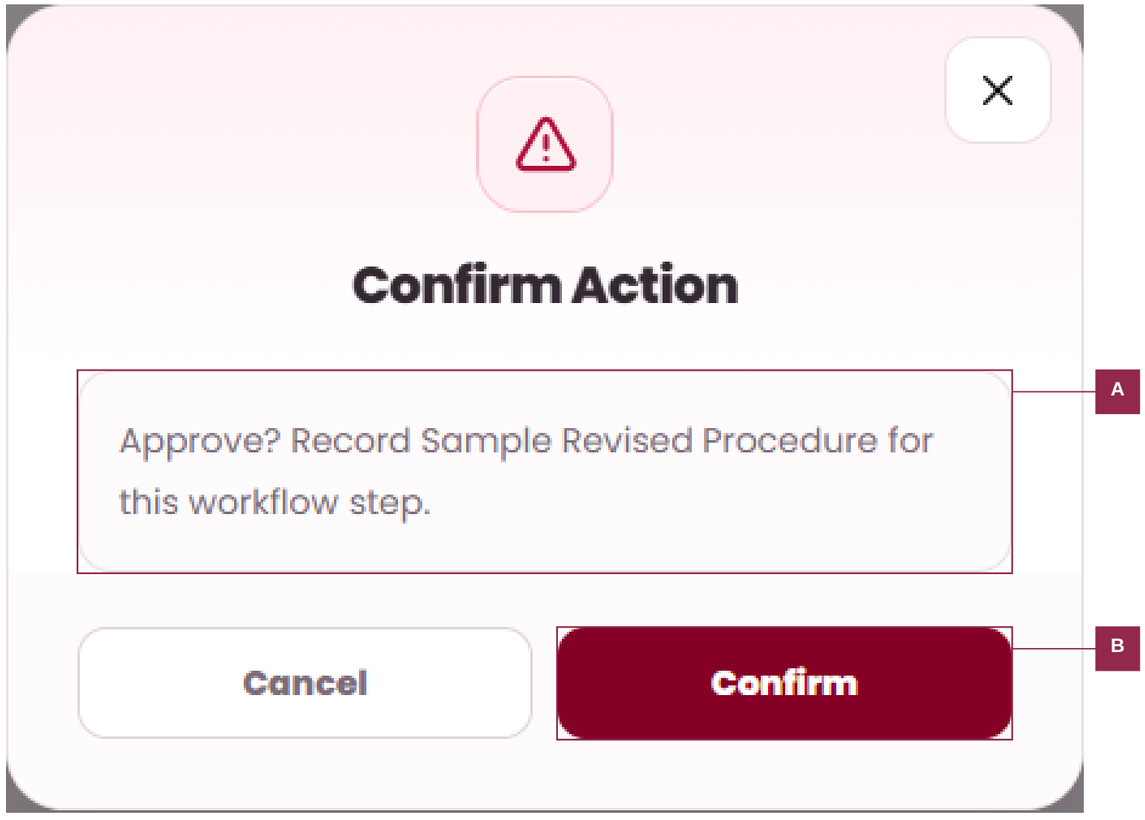

FOLLOW THESE STEPS

1. Complete the New Request form. Select Save Draft and Confirm.
2. Check View Details. Use Edit to change your Draft or Returned request.
3. Select Submit, Continue and Confirm to send it for approval.
4. Follow Status, Approval Process Timeline and Workflow Activity Log. Correct and resubmit a Returned request.
5. Cancel an unwanted Draft. If Delete appears on its Cancelled record, confirm to permanently remove that never-submitted draft.

Approve, return or reject a request

For: Assigned approvers, including requesters asked to confirm

Review the selected approval decision before confirming.

A Approval decision

B Confirm

AFTER THIS

Approve moves the request forward; Return sends it back for review; Reject closes it.

KEEP IN MIND

At the first step, Return sends the request to its requester for correction.
At a later step, Return sends it to the previous approver. Its status stays Submitted.
The approval process assigns each task and may include a Requester account confirmation step.
A Locked badge in Approval Process Timeline and Workflow Activity Log marks the approval that locked the attached file. Until then that step shows Locks file on approval.

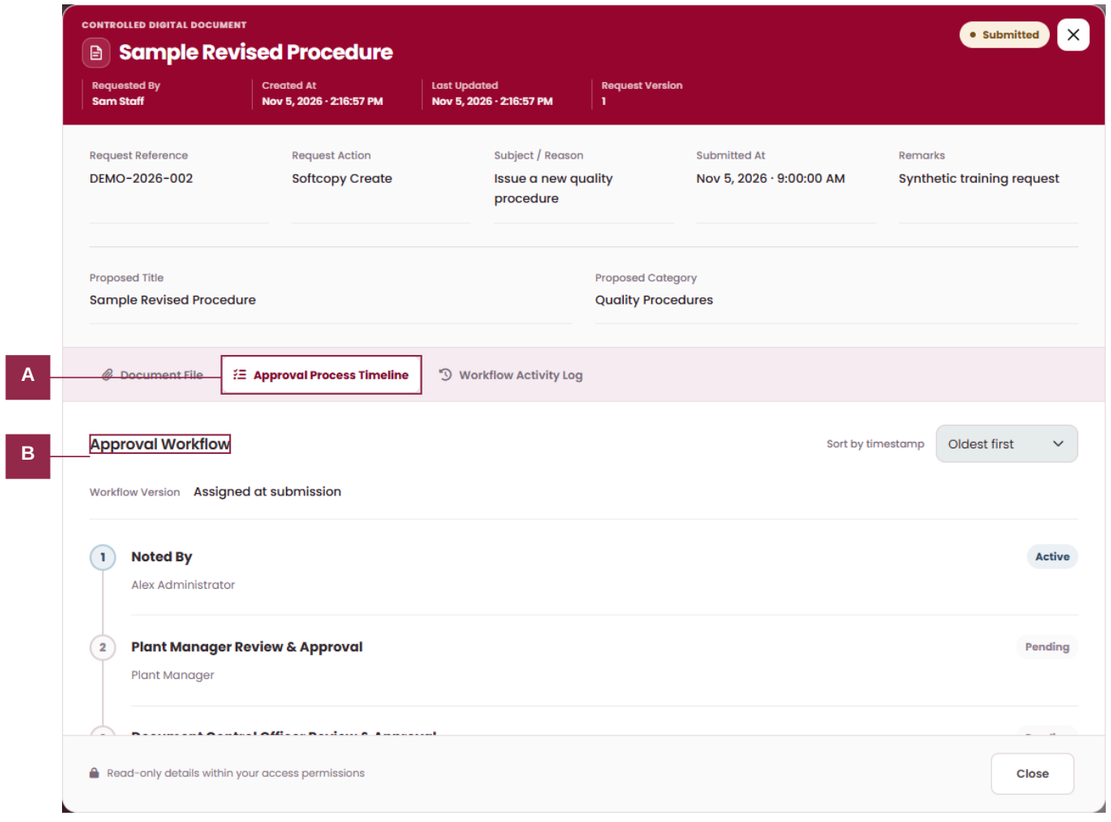

FOLLOW THESE STEPS

1. Open My Tasks and choose the request tab.
2. Open View Details. Check the proposal, Approval Process Timeline and Workflow Activity Log.
3. For softcopy or external creation and revision, open View Details and check the Document File preview before deciding.
4. Choose Approve, Return or Reject. Add an optional Remark, then select Continue and Confirm.
5. Check the result and the next task or request status.

Know who reviews each request

For: Requesters and assigned approvers

Inspect the assigned route and the status of each approval step.

A Approval Process Timeline

B Approval steps

AFTER THIS

You can see whose review or confirmation is needed next.

KEEP IN MIND

These routes reflect the local review on 5 November 2026. Authorized administrators can change routes for future submissions.
Submitted and Returned requests keep their original route, even if the default route changes.
Requester confirmation is an approval task in My Tasks. Transfer Dispatch and Accept are separate steps.

FOLLOW THESE STEPS

1. Softcopy and External Create or Revise: Requester's leader, then Plant Manager, then Document Control Officer.
2. Hardcopy Transfer and Document Access: Plant Manager, then Document Control Officer, then Requester confirmation.
3. Document Assignment: Plant Manager, then Document Control Officer, then Requester's leader.
4. Disposal: Plant Manager, then Document Control Officer, then Requester confirmation.
5. Check Approval Process Timeline for the next reviewer. Administrators can check the published route in Workflow Builder.

Softcopy creation: approve, return or reject

Default workflow example: Softcopy Request (Create Softcopy). Each assigned reviewer can Approve, Return or Reject.

ASSIGNED OPERATORS / APPROVAL ORDER

Requester

Prepare the proposal and Submit.

Document Control Officer

Document Control Officer Review & Approval

At each review: read the proposal, approval history and the file preview in View Details when available. Choose an action, add remarks if needed and Confirm.

Approve

Requester's leader approves

Plant Manager reviews next.

Plant Manager approves

Document Control Officer reviews next.

Document Control Officer approves

Create the Active record and file at revision 00. Status: Completed.

Return

Requester's leader returns

Requester corrects and resubmits. Status: Returned until resubmission.

Plant Manager returns

Requester's leader reviews again. Status stays Submitted.

Document Control Officer returns

Plant Manager reviews again. Status stays Submitted.

Reject

Any assigned operator rejects

Status: Rejected. The approval route ends.

Proposed change

Not applied. No new document is created.

Requester checks the result

Read the decision and remarks. This request cannot be resubmitted.

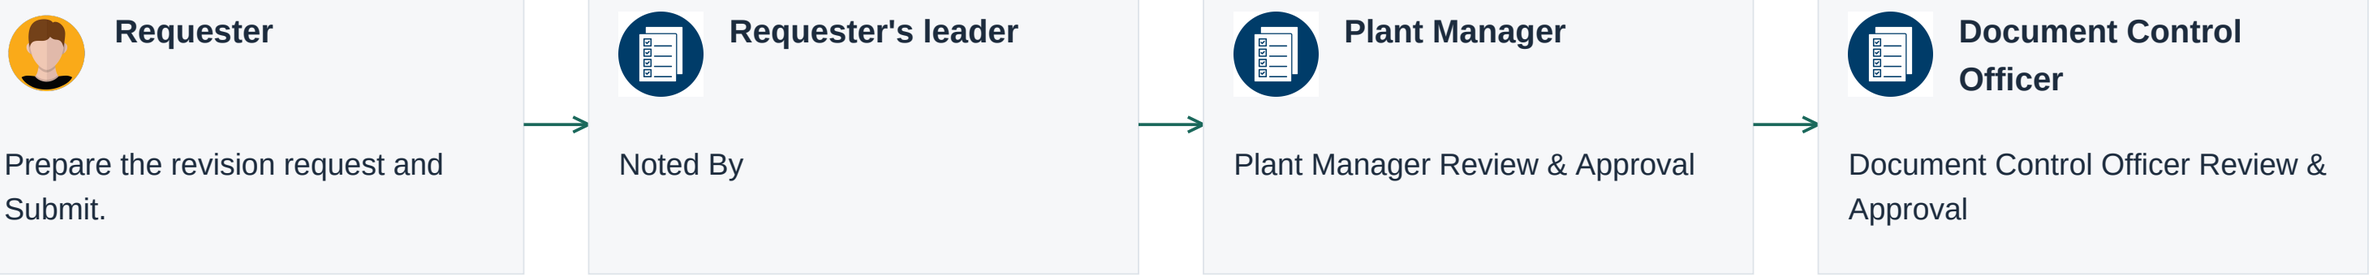

This sample uses the supplied default. Check your Approval Process Timeline. Resubmission keeps the original route.

Only the assigned user or role can decide; Administrator status gives no bypass.

Softcopy revision: approve, return or reject

Default workflow example: Softcopy Request (Revise Softcopy). Each assigned reviewer can Approve, Return or Reject.

ASSIGNED OPERATORS / APPROVAL ORDER

At each review: read the proposal, approval history and the file preview in View Details when available. Choose an action, add remarks if needed and Confirm.

Approve

Requester's leader approves

Plant Manager reviews next.

Plant Manager approves

Document Control Officer reviews next.

Document Control Officer approves

Publish the next revision and replacement file. Status: Completed.

Return

Requester's leader returns

Requester corrects and resubmits. Status: Returned until resubmission.

Plant Manager returns

Requester's leader reviews again. Status stays Submitted.

Document Control Officer returns

Plant Manager reviews again. Status stays Submitted.

Reject

Any assigned operator rejects

Status: Rejected. The approval route ends.

Proposed change

Not applied. The current approved file and revision stay unchanged.

Requester checks the result

Read the decision and remarks. This request cannot be resubmitted.

This sample uses the supplied default. Check your Approval Process Timeline. Resubmission keeps the original route.

Revision keeps the document number, category and series. The approved replacement becomes the current file.

External creation: approve, return or reject

Default workflow example: External Document Request (External Create Request). Each reviewer can Approve, Return or Reject.

ASSIGNED OPERATORS / APPROVAL ORDER

Requester

Prepare the external creation request and Submit.

Requester corrects and resubmits. Status: Returned until resubmission.

Document Control Officer returns

Plant Manager reviews again. Status stays Submitted.

Requester returns

Document Control Officer reviews again. Status stays Submitted.

Reject

Any assigned operator rejects

Status: Rejected. The approval route ends.

Proposed change

No handoff is created. The current holder and location stay unchanged.

Requester checks the result

Read the decision and remarks. This request cannot be resubmitted.

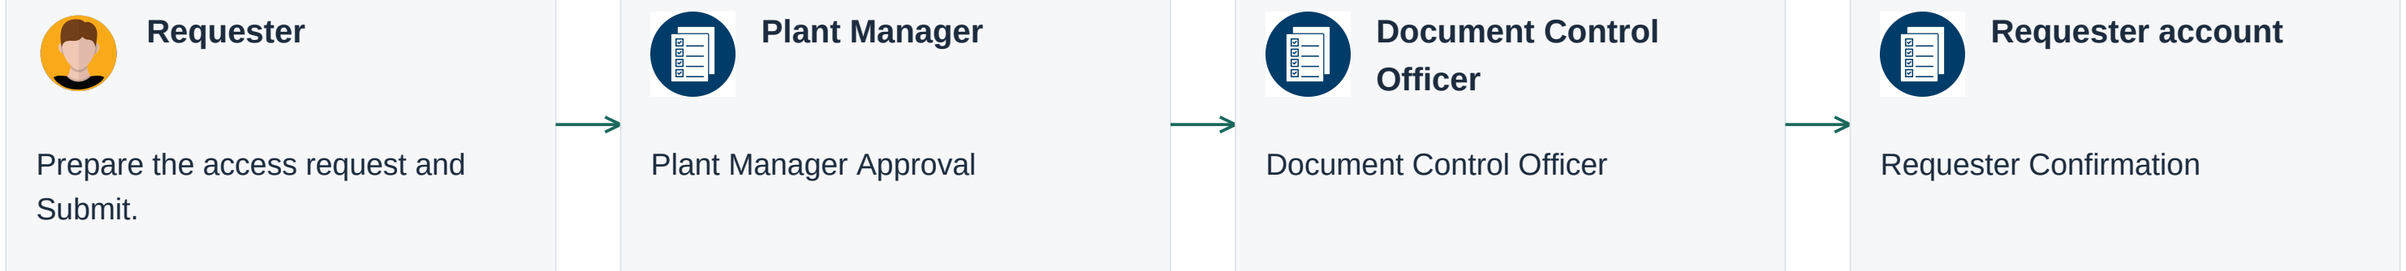

This sample uses the supplied default. Check your Approval Process Timeline. Resubmission keeps the original route.

Only the requester can Dispatch; only the named receiver can Accept. Holder and location change after Accept.

Document access: approve, return or reject

Default workflow example: Document Access Request. The requester completes the final Requester Confirmation step.

ASSIGNED OPERATORS / APPROVAL ORDER

At each review: read the proposal, approval history and the file preview in View Details when available. Choose an action, add remarks if needed and Confirm.

Approve

Plant Manager approves

Document Control Officer reviews next.

Document Control Officer approves

Requester reviews next.

Requester approves

Grant access through the approved expiry. Status: Completed.

Return

Plant Manager returns

Requester corrects and resubmits. Status: Returned until resubmission.

Document Control Officer returns

Plant Manager reviews again. Status stays Submitted.

Requester returns

Document Control Officer reviews again. Status stays Submitted.

Reject

Any assigned operator rejects

Status: Rejected. The approval route ends.

Proposed change

No new access is granted. Existing permissions stay unchanged.

Requester checks the result

Read the decision and remarks. This request cannot be resubmitted.

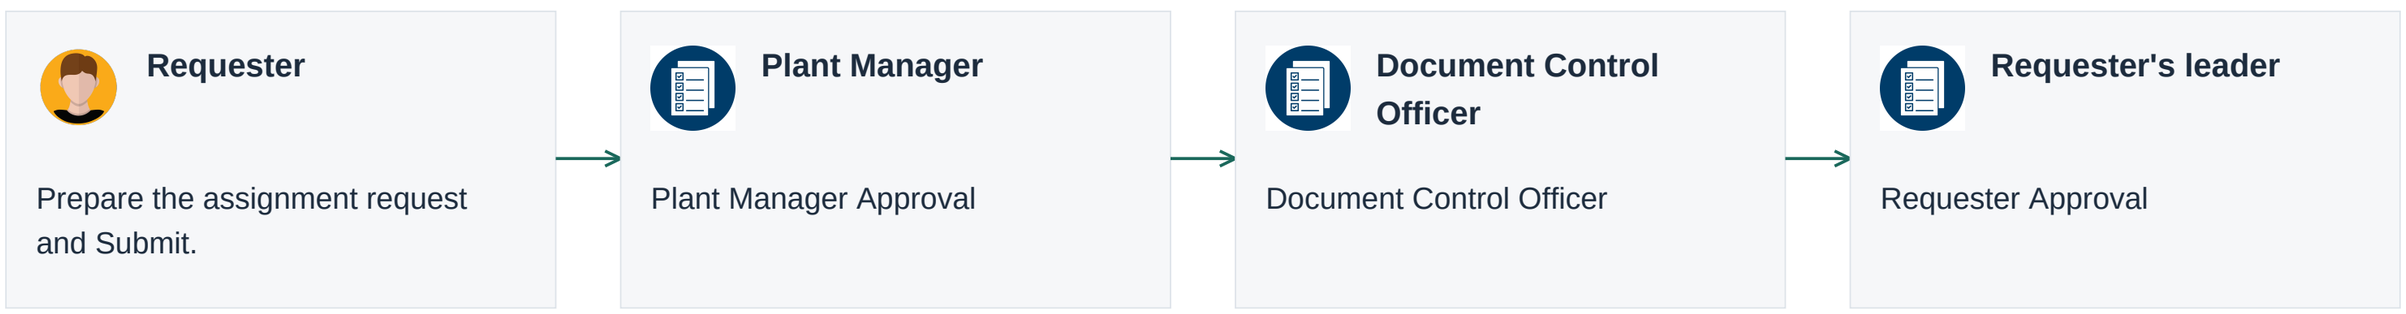

This sample uses the supplied default. Check your Approval Process Timeline. Resubmission keeps the original route.

Access is for the requester. The expiry must still be valid at final approval; document holder and location stay unchanged.

Document assignment: approve, return or reject

Default workflow example: Document Assignment Request. The final Requester Approval step is assigned to the requester's leader.

ASSIGNED OPERATORS / APPROVAL ORDER

At each review: read the proposal, approval history and the file preview in View Details when available. Choose an action, add remarks if needed and Confirm.

Approve

Plant Manager approves

Document Control Officer reviews next.

Document Control Officer approves

Requester's leader reviews next.

Requester's leader approves

Assign the softcopy or hardcopy to the requester. Status: Completed.

Return

Plant Manager returns

Requester corrects and resubmits. Status: Returned until resubmission.

Document Control Officer returns

Plant Manager reviews again. Status stays Submitted.

Requester's leader returns

Document Control Officer reviews again. Status stays Submitted.

Reject

Any assigned operator rejects

Status: Rejected. The approval route ends.

Proposed change

No new assignment or hardcopy holder change is applied.

Requester checks the result

Read the decision and remarks. This request cannot be resubmitted.

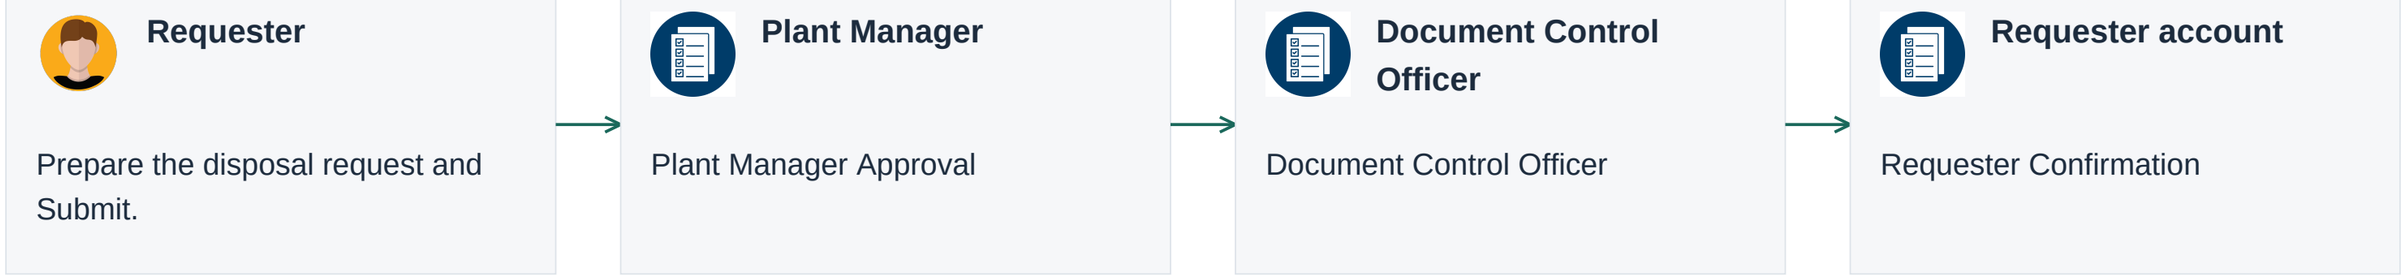

This sample uses the supplied default. Check your Approval Process Timeline. Resubmission keeps the original route.

Softcopy assignment adds the requester as assignee. Hardcopy assignment changes the holder, keeps Location and records no physical handoff.

Disposal request: approve, return or reject

Default workflow example: Disposal Request. The requester completes the final Requester Confirmation step.

ASSIGNED OPERATORS / APPROVAL ORDER

At each review: read the proposal, approval history and the file preview in View Details when available. Choose an action, add remarks if needed and Confirm.

Approve

Plant Manager approves

Document Control Officer reviews next.

Document Control Officer approves

Requester reviews next.

Requester approves

Mark the document Disposed and record it. Request status: Completed.

Return

Plant Manager returns

Requester corrects and resubmits. Status: Returned until resubmission.

Document Control Officer returns

Plant Manager reviews again. Status stays Submitted.

Requester returns

Document Control Officer reviews again. Status stays Submitted.

Reject

Any assigned operator rejects

Status: Rejected. The approval route ends.

Proposed change

No disposal is applied. The document stays unchanged.

Requester checks the result

Read the decision and remarks. This request cannot be resubmitted.

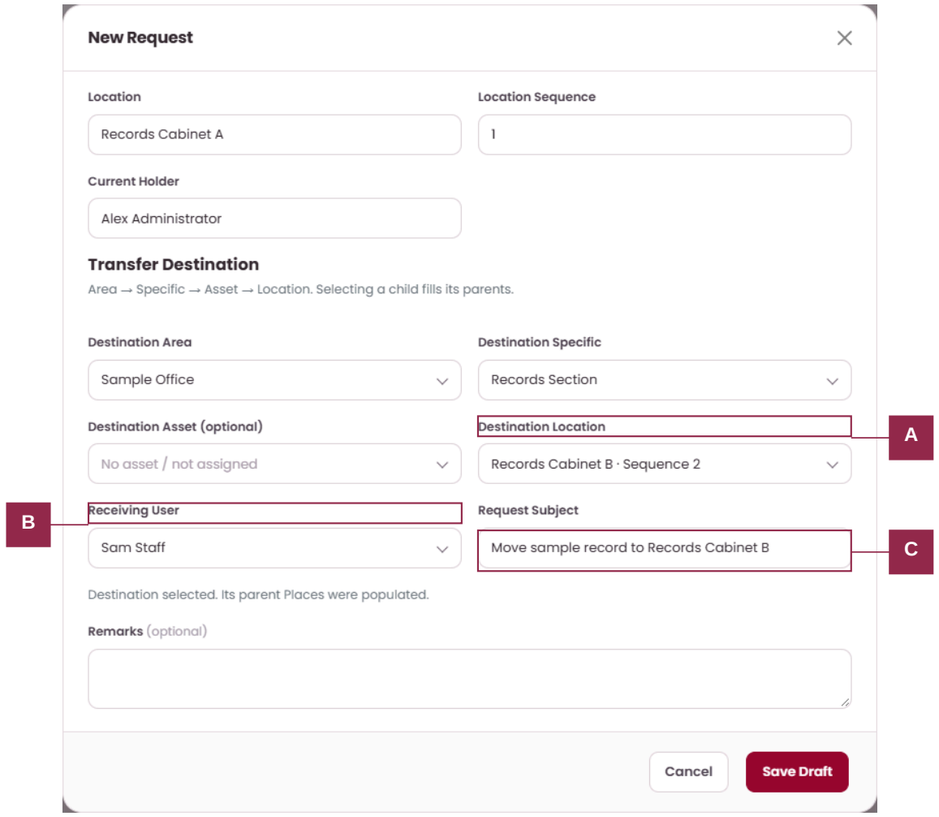

This sample uses the supplied default. Check your Approval Process Timeline. Resubmission keeps the original route.

Disposal requests cover Hardcopy and External Documents. Hardcopy disposal clears Location; active document grants are revoked.

Request a hardcopy transfer

For: Authorized hardcopy requesters

Choose the destination, receiving user and request subject before saving the draft.

A Destination Location

B Receiving User

C Request Subject

AFTER THIS

Final approval marks the handoff For Transfer. The requester can then Dispatch it.

KEEP IN MIND

Choose a different active destination with matching storage choices.
The holder and location stay unchanged until the named recipient accepts the document.
Another submitted access, assignment or transfer request for you and this document may block submission.

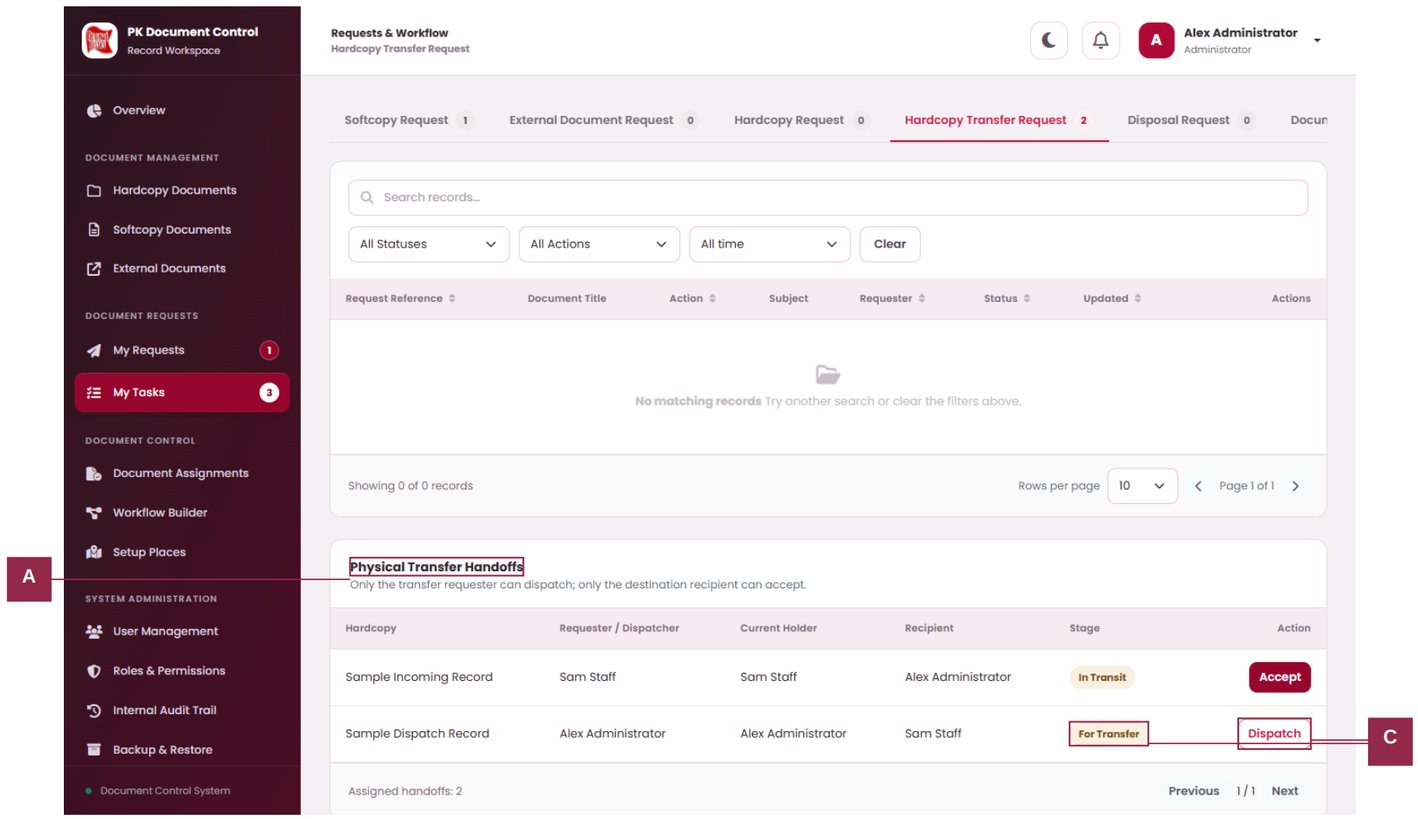

FOLLOW THESE STEPS

1. Open My Requests, choose Hardcopy Transfer Request and select New Request.
2. Choose Hardcopy Document. Check Original Places and Holder.
3. Choose Destination Area, Specific, optional Asset and Location. Select Receiving User.
4. Enter Request Subject and optional Remarks. Select Save Draft and Confirm.
5. Check the proposal, then select Submit, Continue and Confirm.

Dispatch an approved hardcopy

For: The original transfer requester

The requester dispatches an approved physical transfer.

A Physical Transfer Handoffs **B** For Transfer **C** Dispatch

AFTER THIS

Dispatch is recorded. The named recipient can confirm receipt.

KEEP IN MIND

Only the original requester can Dispatch. Being the holder alone does not allow it. Dispatch does not change the recorded holder or location.

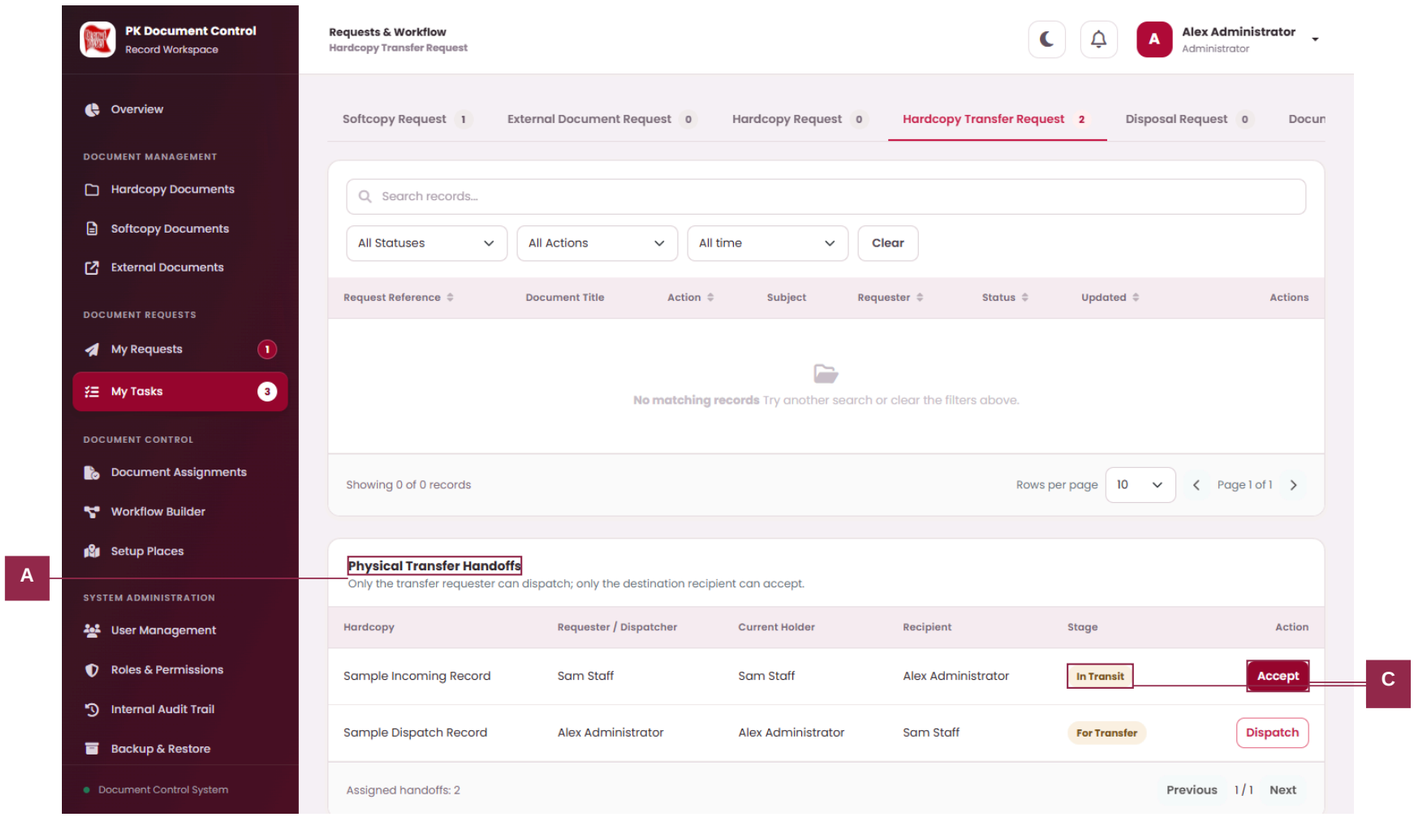

FOLLOW THESE STEPS

1. After final approval, open My Tasks and choose Hardcopy Transfer Request.
2. Find the document under Physical Transfer Handoffs. Check that its stage is For Transfer.
3. Confirm the recipient and arrange the physical release.
4. Select Dispatch, Continue and Confirm.
5. Check that the stage is now In Transit.

Accept a transferred hardcopy

For: The selected Receiving User

The destination recipient accepts the received hardcopy.

A Physical Transfer Handoffs **B** In Transit **C** Accept

AFTER THIS

The handoff is Accepted and the request is Completed. The holder and location now match the approved transfer.

KEEP IN MIND

Only the named recipient can Accept. Tell the controller if the holder, active location or destination no longer matches.
The previous holder's personal access grants end when this handoff changes the holder.

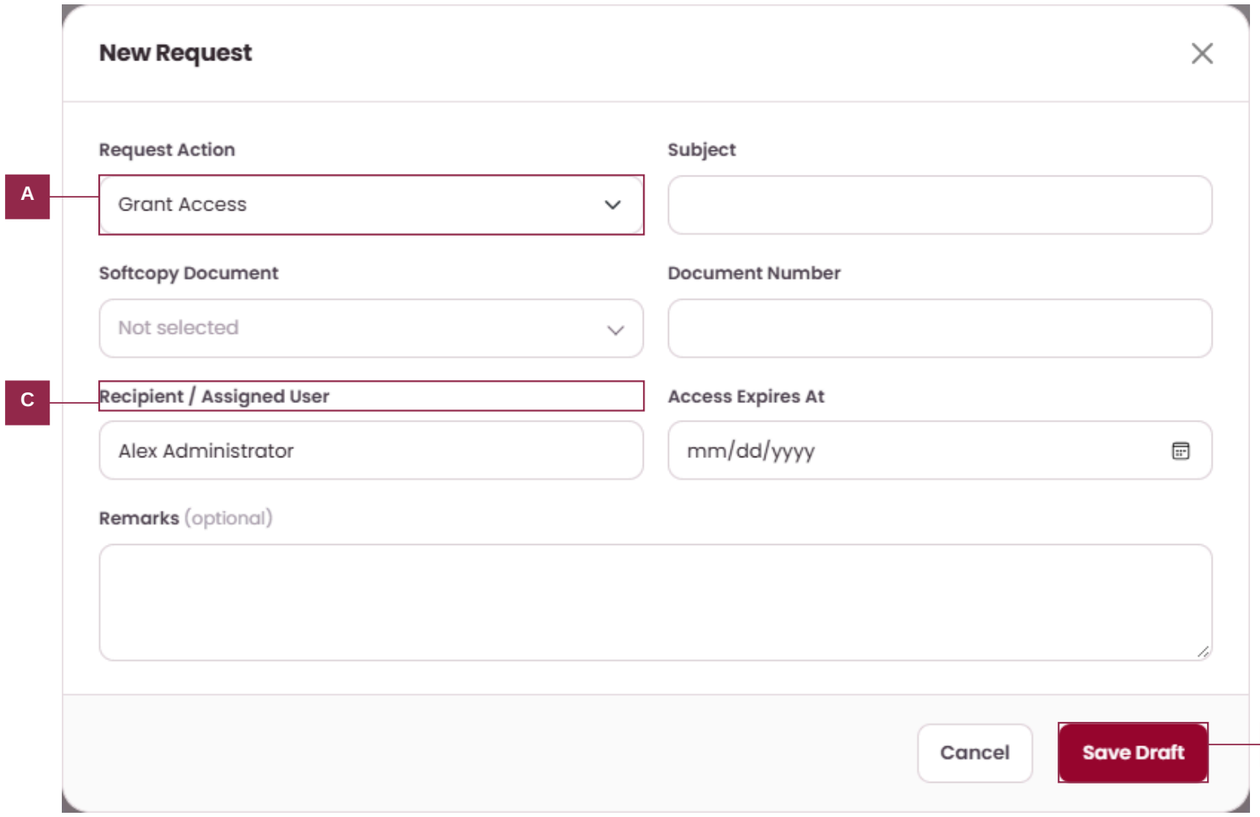

FOLLOW THESE STEPS

1. Receive the physical document. Check that it matches the approved transfer.
2. Open My Tasks and choose Hardcopy Transfer Request. Find the In Transit item under Physical Transfer Handoffs.
3. Check the document and approved destination.
4. Select Accept, Continue and Confirm.
5. Open Hardcopy Documents and check the new holder and location.

Request or renew document access

For: Authorized requesters

Prepare the request and save it as a draft.

A Action

B Save

C Recipient / Assigned User

FOLLOW THESE STEPS

1. Open My Requests, choose Document Access Request and select New Request.
2. Choose Document Type: Softcopy or Hardcopy. Select the document and enter Subject.
3. Check that Recipient / Assigned User is your account. Set Access Expires At to a date after today.
4. Add optional Remarks. Select Save Draft and Confirm, then Submit, Continue and Confirm.
5. After completion, reopen the document list. To extend access, submit a new request with a later expiry date.

AFTER THIS

Final approval gives your account access through the selected expiry date.

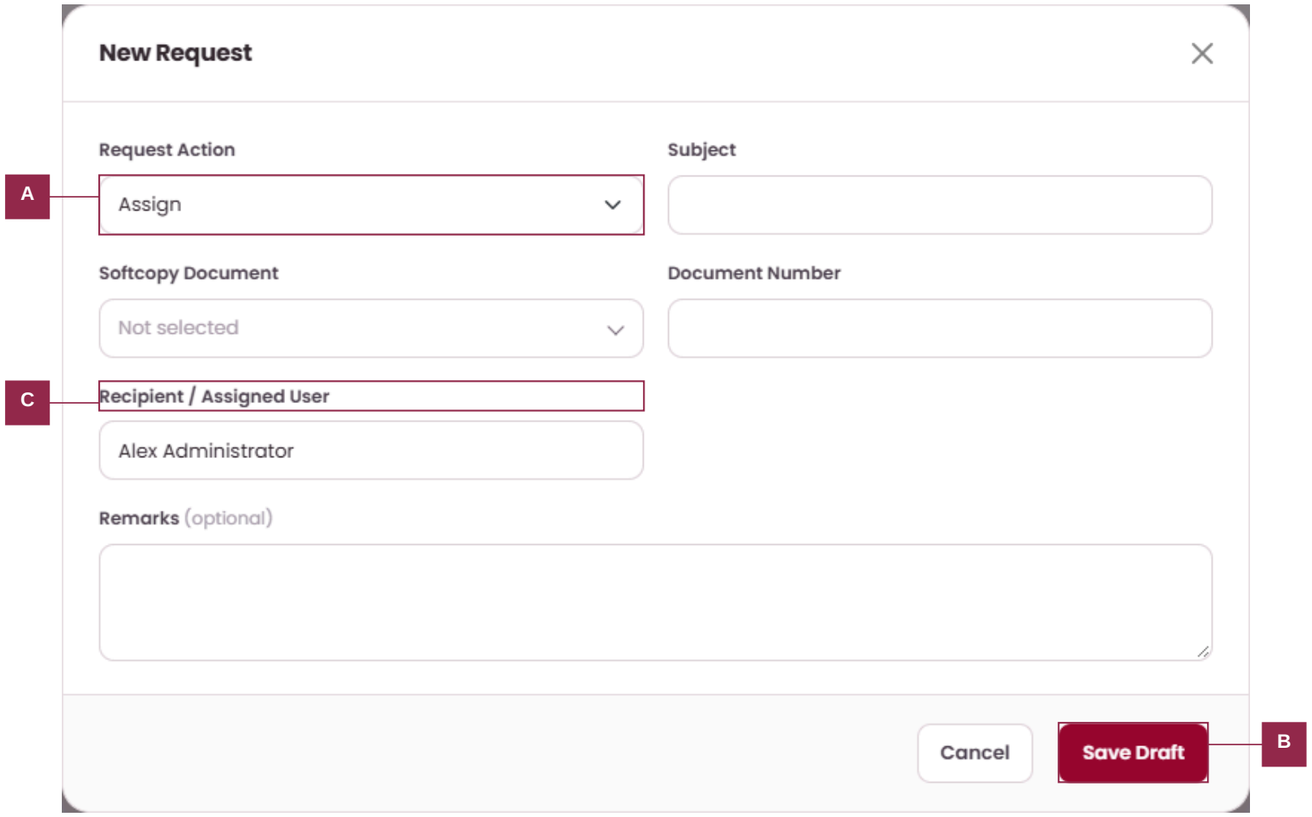

KEEP IN MIND

Access is for you. It does not change the holder or move the document.
Download and print need separate permissions. This request does not cover external documents.
An unfinished related request for you and the same document may block submission.

Request a document assignment

For: Authorized requesters

Prepare the request and save it as a draft.

A Action **B** Save **C** Recipient / Assigned User

FOLLOW THESE STEPS

1. Open My Requests, choose Document Assignment Request and select New Request.
2. Choose Document Type: Softcopy or Hardcopy, then select the document.
3. Enter Subject. Check that Recipient / Assigned User is your account.
4. Add optional Remarks. Select Save Draft and Confirm, then Submit, Continue and Confirm.
5. After completion, check the document's holder or assignment.

AFTER THIS

Final approval assigns the document to you. For hardcopies, the holder changes and the location stays the same.

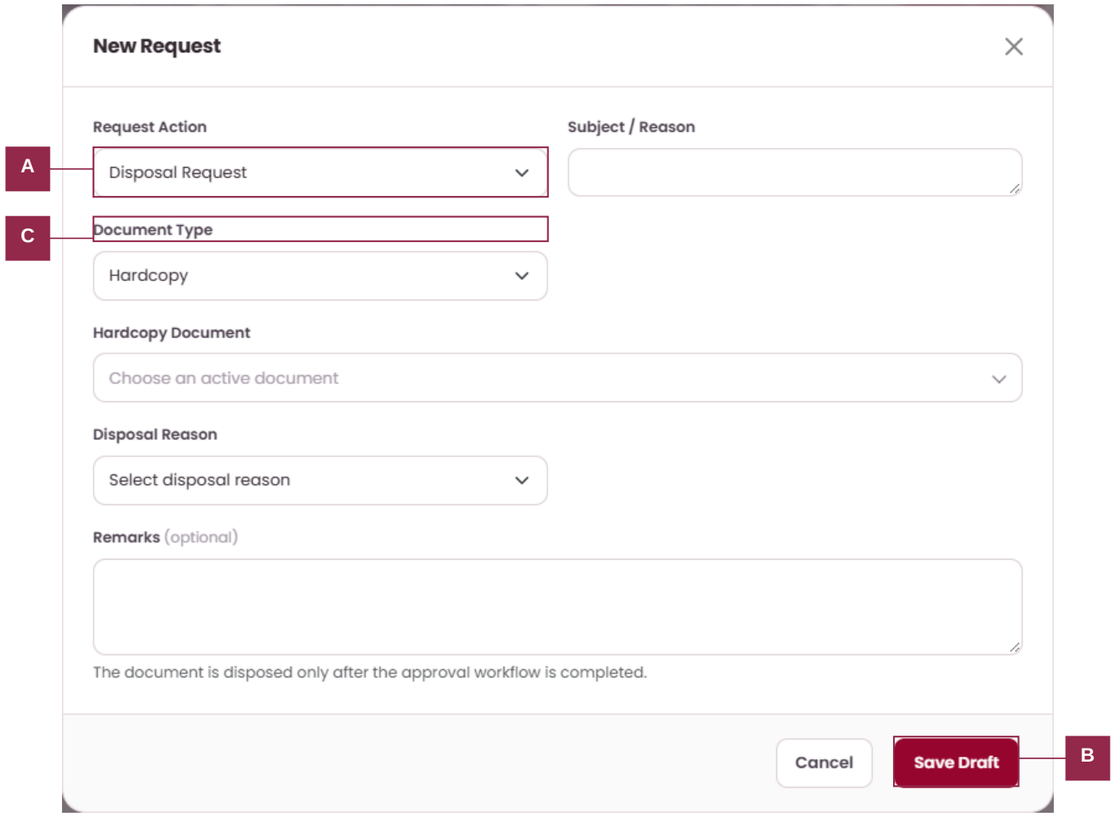

KEEP IN MIND

Softcopy assignment adds or reactivates your assignment. Other assignees stay assigned.
Use a transfer request when physical movement and receipt must be recorded.
This request does not cover external documents.

Request hardcopy or external disposal

For: Authorized requesters

Prepare the request and save it as a draft.

A Action **B** Save **C** Document Type

AFTER THIS

Final approval marks the document Disposed and records the disposal details.

KEEP IN MIND

Other Reason is required for Other and can contain up to 250 characters.
For softcopies, an authorized controller uses direct Dispose. There is no softcopy disposal request.
Retention alerts do not submit or approve disposal.

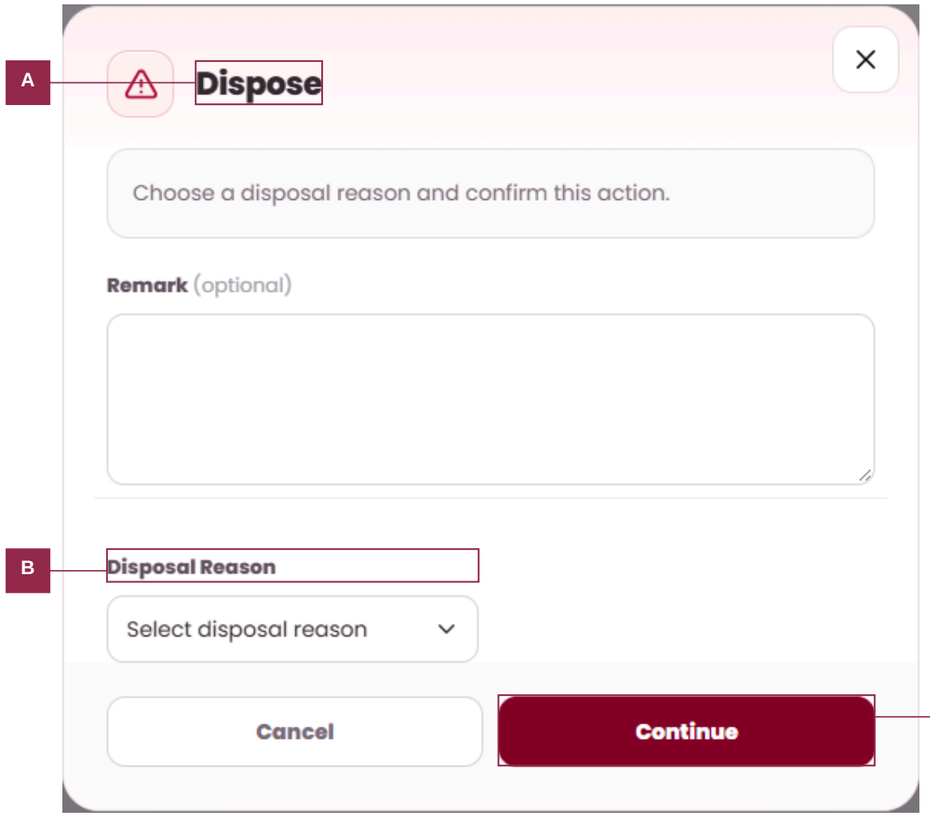

FOLLOW THESE STEPS

1. Open My Requests, choose Disposal Request and select New Request.
2. Enter Subject / Reason. Choose Document Type: Hardcopy or External Document.
3. Select the Active document and check its details in the document list.
4. Choose Disposal Reason: Shred, Scratch or Other. For Other, enter Other Reason. Add optional Remarks.
5. Select Save Draft and Confirm, then Submit, Continue and Confirm. After completion, find the record with the Disposed filter.

Dispose of a document directly

For: Administrator or authorized document controller

Choose the disposal reason before confirming.

A Dispose **B** Disposal Reason **C** Continue

AFTER THIS

The record becomes Disposed immediately and its disposal history is saved.

KEEP IN MIND

You need direct action and disposal permissions, plus access to manage the document. Normal download actions are unavailable for disposed softcopy and external files. Also follow your organization's physical disposal procedure.

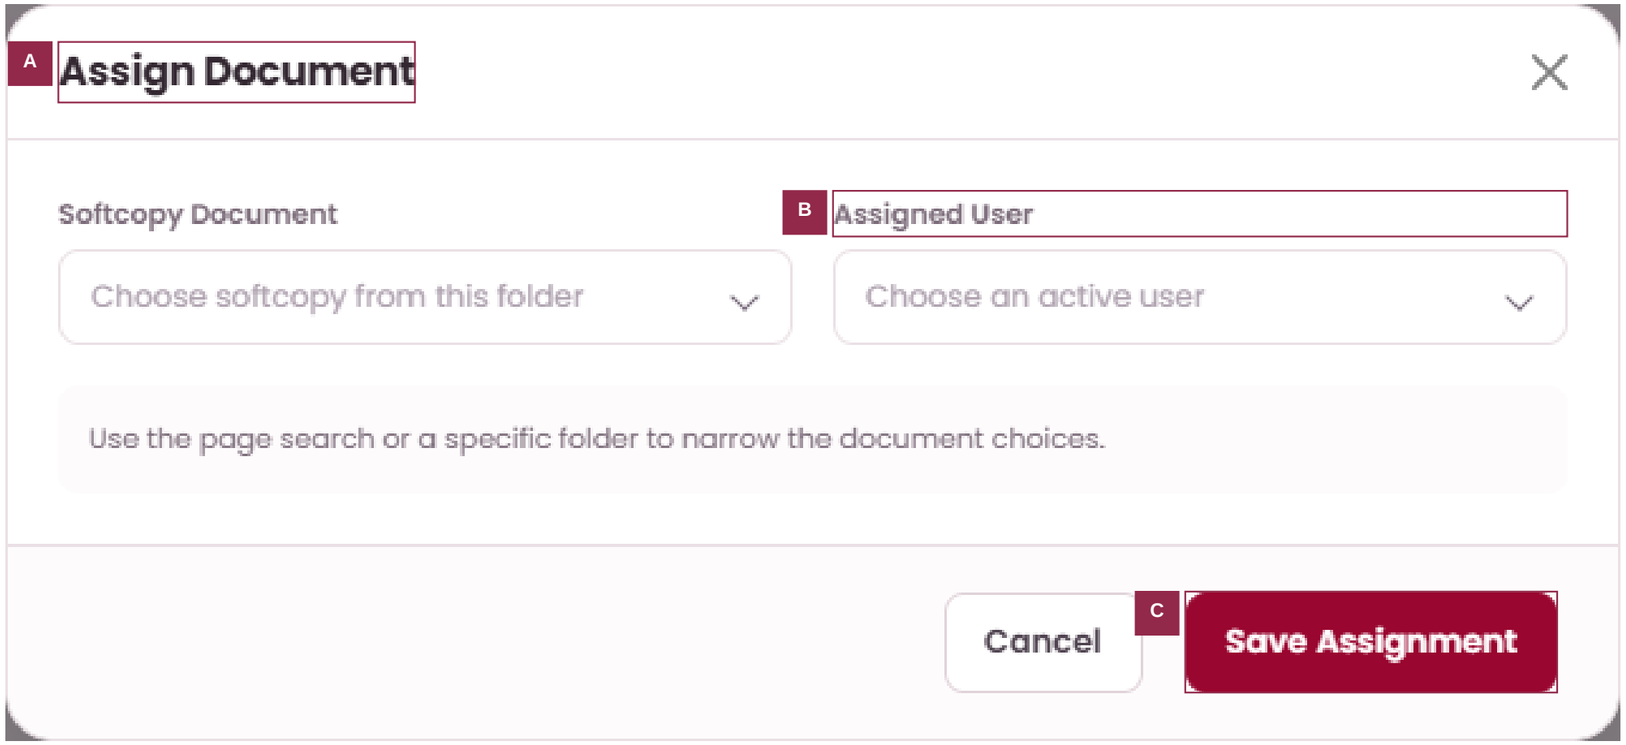

FOLLOW THESE STEPS

1. Open Hardcopy Documents, Softcopy Documents or External Documents. Check the Active record.
2. Select Dispose on the correct document.
3. Choose Disposal Reason: Shred, Scratch or Other. For Other, enter Other Reason.
4. Check the document and reason, then select Continue and Confirm.
5. Use the Disposed filter to find the record and check the result.

Assign documents directly

For: Administrator or authorized document controller

Manage direct document assignments.

A Assign Document **B** Assigned User **C** Save Assignment

AFTER THIS

Hardcopy assignment changes the holder. Softcopy assignment adds the user and keeps other active assignees.

KEEP IN MIND

Assign All includes softcopy subcategories or Active hardcopies at the selected Location.
Finish For Transfer or In Transit handoffs before assigning those hardcopies.
Assignment does not record Dispatch or Accept.

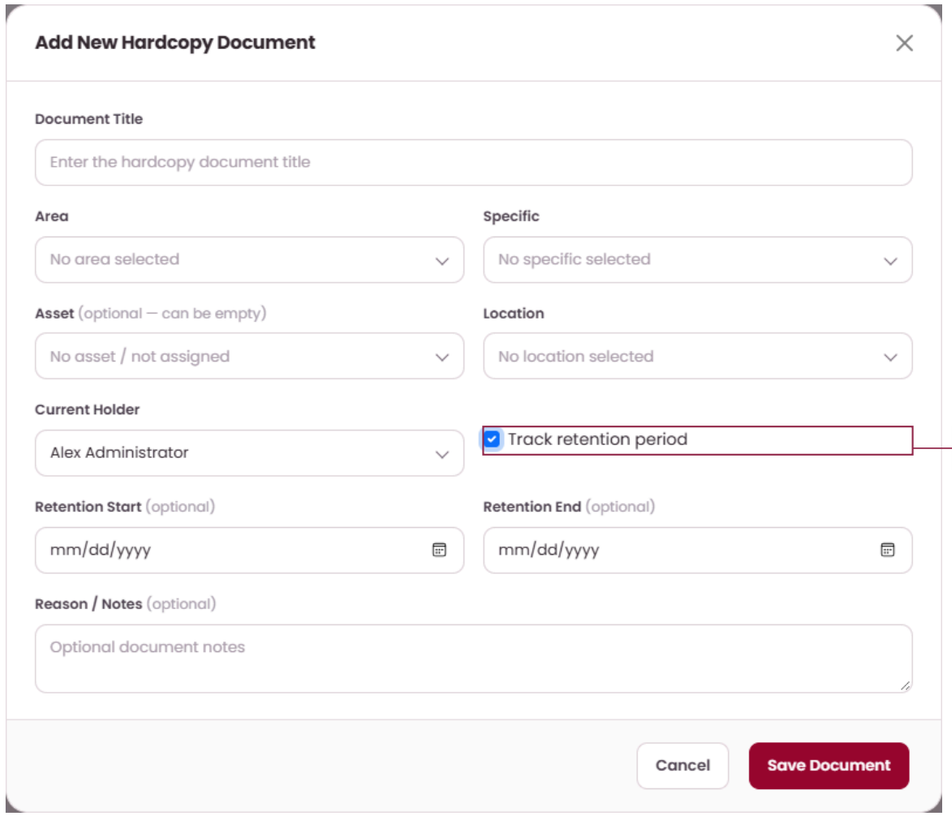

FOLLOW THESE STEPS

1. Open Document Assignments. Choose Hardcopy / Places or Softcopy / Categories.
2. Select Assign Document, choose the document and Assigned User, then select Save Assignment and Confirm.
3. For all hardcopies in a place, choose Location and Assigned User. Select Assign All and Confirm.
4. For softcopies in a category, choose Category / Subcategory and Assigned User. Select Assign All and Confirm.
5. Read the result message and check the assignments.

Check hardcopy retention dates

For: Hardcopy holders and document controllers

Enable retention tracking and specify the storage period.

A Track retention period

AFTER THIS

You can identify hardcopies whose retention dates need review.

KEEP IN MIND

Alerts cover Active hardcopies you can see with an end date of today or earlier.
Closing an alert does not change or dispose of a document.
External documents have no retention fields.

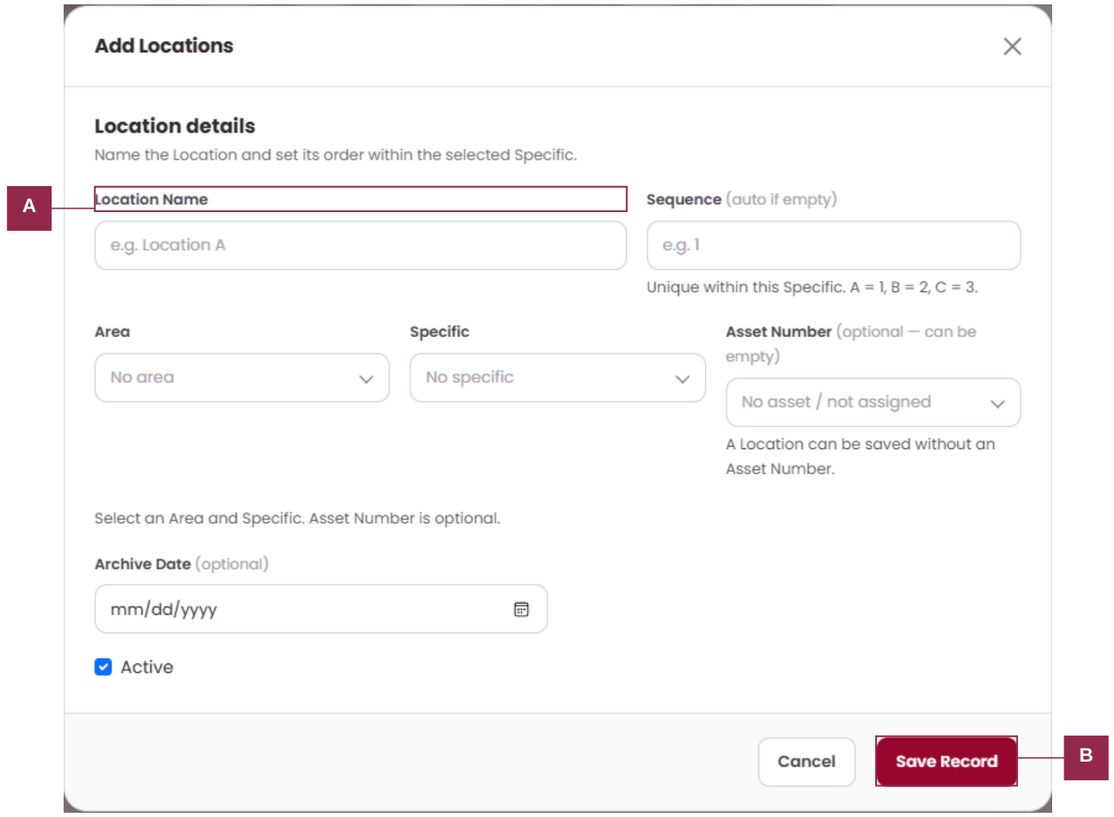

FOLLOW THESE STEPS

1. When adding or editing a hardcopy, turn on Track retention period if monitoring is needed.
2. Enter Retention Start and Retention End. The end date must be on or after the start date.
3. Use Due Today, Overdue, Due in the Next 7 Days or Due in 8-30 Days to find records needing review.
4. Open View Details to check Days until disposal. If permitted, use Edit to view Retention Start and Retention End.
5. When Retention period reached appears, review the records and select Got it. Follow the approved disposal process if needed.

Set up physical storage locations

For: Administrator or authorized storage controller

Maintain the places used by hardcopy storage.

A Location Name

B Save Record

AFTER THIS

Document forms offer the active storage places you have set up.

KEEP IN MIND

Sequence must be unique within a Specific. Leave it blank for an automatic number.
Keep each entry under the correct parent.
Deactivation keeps past links. Resolve any linked-record warning before trying again.

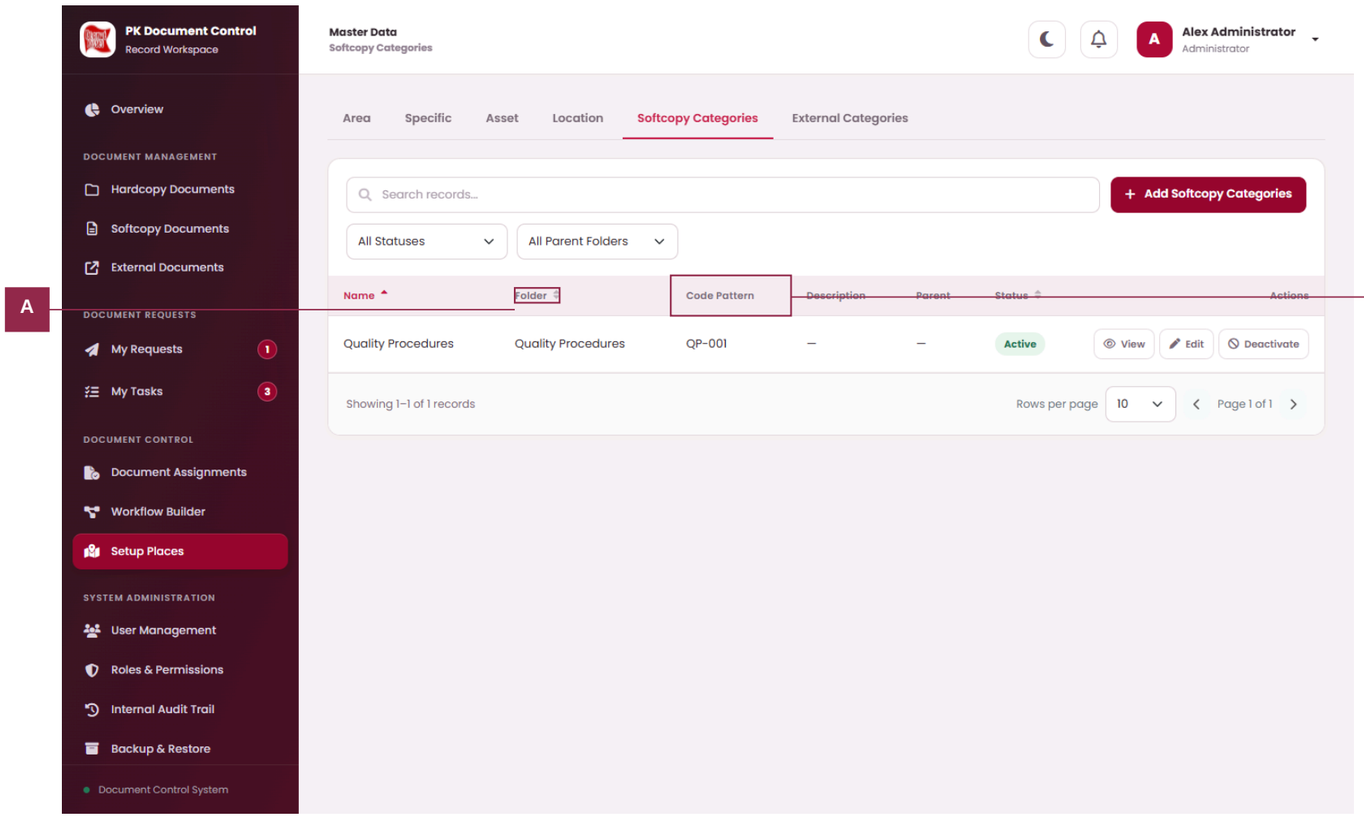

FOLLOW THESE STEPS

1. Open Master Data. Use the Area, Specific, Asset and Location tabs.
2. Add an Area, then a Specific within it. Add an Asset Number under that Specific if needed.
3. Add a Location. Enter Location Name, Sequence, Area and Specific. Add Asset Number and Archive Date if needed.
4. Select Save Record and Confirm. Use Edit to correct an entry.
5. Select Deactivate to stop offering an entry in new selections. Use Active or Inactive to check its status.

Set up softcopy and external categories

For: Administrator or authorized category controller

Maintain controlled softcopy categories and numbering patterns.

A Folder

B Code Pattern

FOLLOW THESE STEPS

1. Open Master Data and choose Softcopy Categories or External Categories.
2. Select Add Softcopy Categories or Add External Categories. Enter Name and Folder. Add Description and Parent Id if needed.
3. For Softcopy Categories, choose Category Type: Folder to nest a parent folder (no code pattern), or Document Number Pattern to generate documents. Numbering patterns increment the numeric segment after the final dash, e.g. PPM-001 to PPM-002.
4. Keep Active checked. Select Save Record and Confirm.
5. Use Edit to update a category, or Deactivate to stop offering it in new selections.

AFTER THIS

Each document type has its own folders. Softcopy Code Pattern controls document numbering.

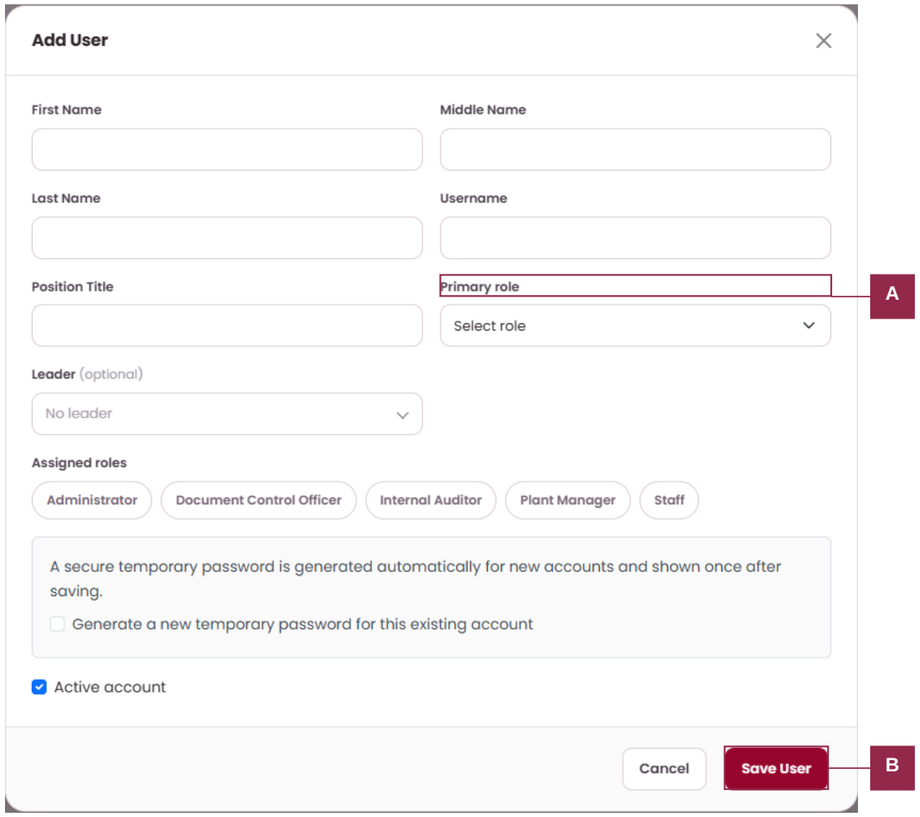

KEEP IN MIND

External Categories have no Code Pattern. Folder-only Softcopy Categories have no numbering pattern; nested Folder categories can parent Document Number Pattern categories.
A category cannot be its own parent or be placed inside one of its subcategories.

Manage user accounts

For: Administrator or authorized account administrator

Manage individual user accounts and assigned roles.

A Primary role

B Save User

AFTER THIS

The account has the selected access. The user must change a generated temporary password before continuing.

KEEP IN MIND

Temporary passwords appear once. Reset the password if the user loses it.
You cannot deactivate yourself or remove the last active Administrator.
Account protections may prevent changes to your own roles or protected Administrator accounts.

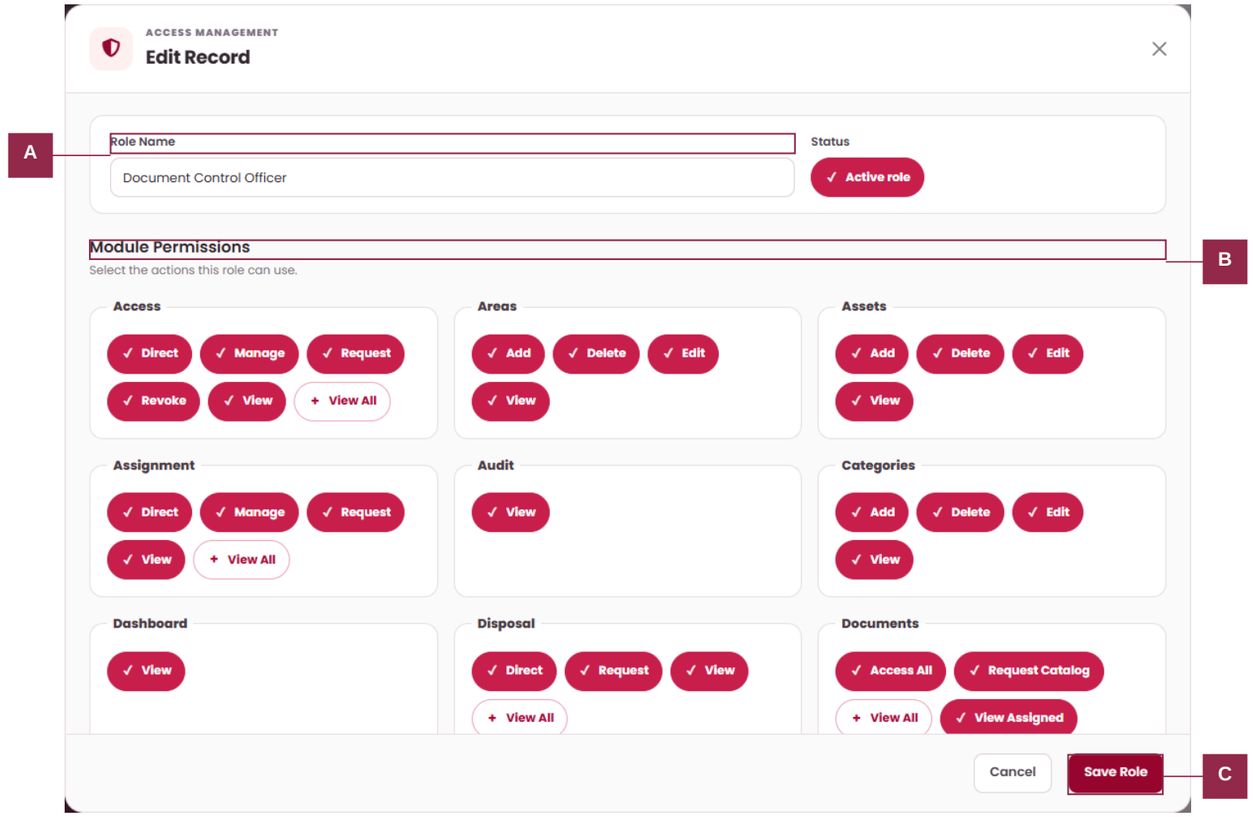

FOLLOW THESE STEPS

1. Open User Management. Select Add User or Edit an existing account.
2. Enter the person's name, Username, Position Title, Primary role, Assigned roles and Leader as needed. Check Active account.
3. Select Save User and Confirm. Share the generated temporary password with that person through your approved channel.
4. To reset a password, Edit the account. Select Generate a new temporary password for this existing account, then Save User and Confirm.
5. Use Assigned Documents to check assigned records when available. Select Deactivate when an eligible account should stop signing in.

Manage roles and permissions

For: Administrator or authorized role administrator

Review the permissions assigned to a role.

A Role Name **B** Module Permissions **C** Save Role

AFTER THIS

All active roles assigned to an account contribute to its menus and actions.

KEEP IN MIND

The Administrator role is protected.
Before removing a role, resolve its links to users, approval processes and unfinished requests.
A role name alone does not receive tasks. The approval process must assign a step to that role.

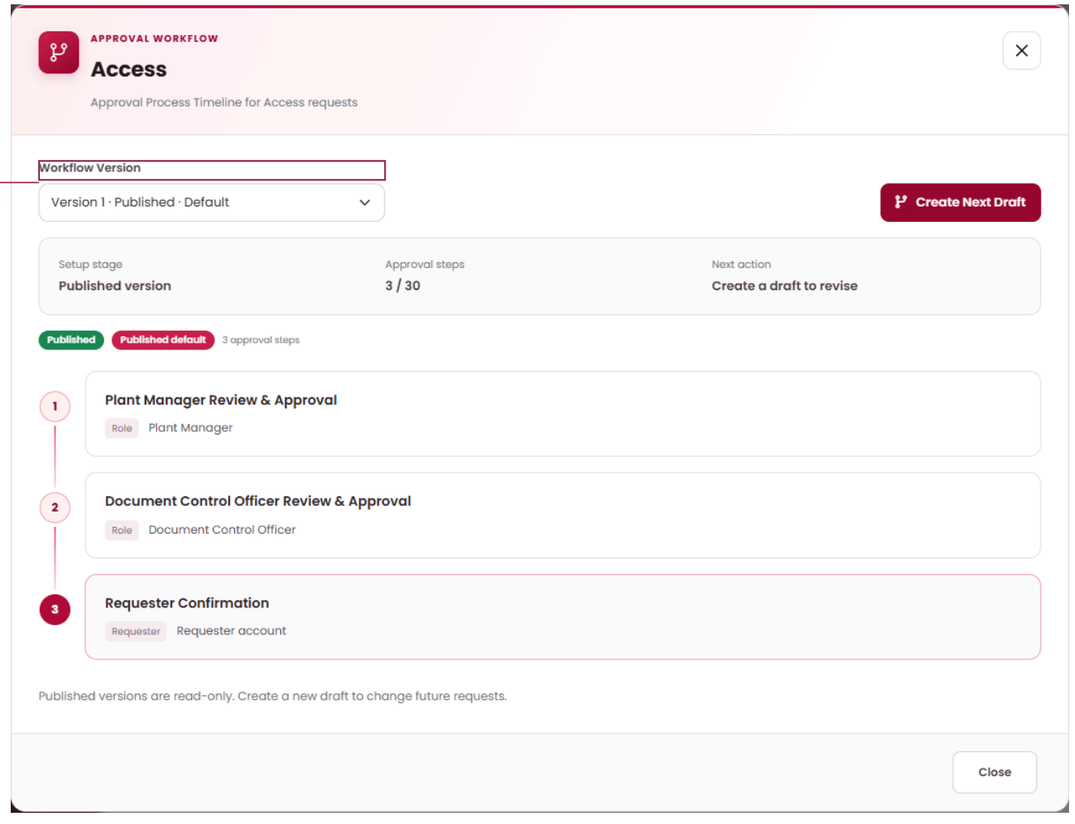

FOLLOW THESE STEPS

1. Open Roles & Permissions. Select Add Role or Edit an editable role.
2. Enter Role Name and choose Module Permissions.
3. Check document visibility, direct actions, requests, file actions and administration separately.
4. Select Save Role and Confirm. Check the user's Primary role and Assigned roles in User Management.
5. For an unused role, select Deactivate or Remove only when offered.

Set up an approval process

For: Administrator or authorized workflow administrator

Maintain published approval routes in Workflow Builder.

A Workflow Version

AFTER THIS

New submissions use the published default approval process.

KEEP IN MIND

Approver types: Any active member of role, Specific user, Requester's leader, or Requester account.
Publish 1 to 30 valid steps with active approvers. A Requester's leader step needs an active leader when the request is submitted.
Submitted and Returned requests keep their original approval process.

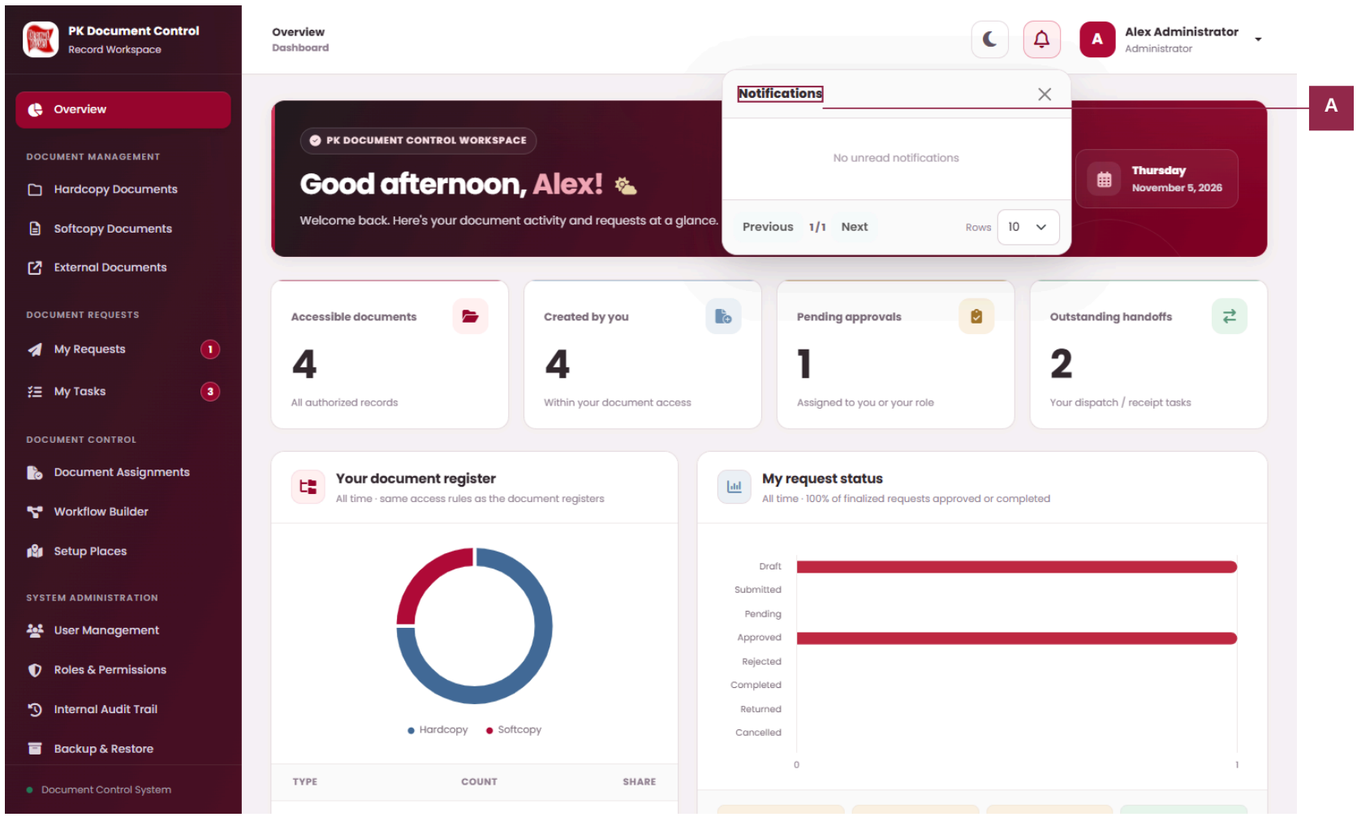

FOLLOW THESE STEPS

1. Open Workflow Builder. Find the request process and select Step Actions.
2. Select Create Next Draft, or Start First Draft if no version exists.
3. Select Add Approval Step or Edit. Enter Approval Step Name and Approver Type. Choose a role or person when needed, then Save Step.
4. Set the order with Move Up and Move Down. Remove any unwanted step.
5. Check the order and active approvers. Select Validate & Publish and confirm.

Find tasks from notifications

For: Assigned approvers and other task recipients

Open the bell to inspect your notification inbox.

A Notifications

AFTER THIS

You reach the task where you can record the required action.

KEEP IN MIND

Opening a bell item marks it read. It does not decide or finish the task.
Selecting Got it closes a notice without completing the work.
My Requests counts Draft and Returned items. My Tasks counts pending work.

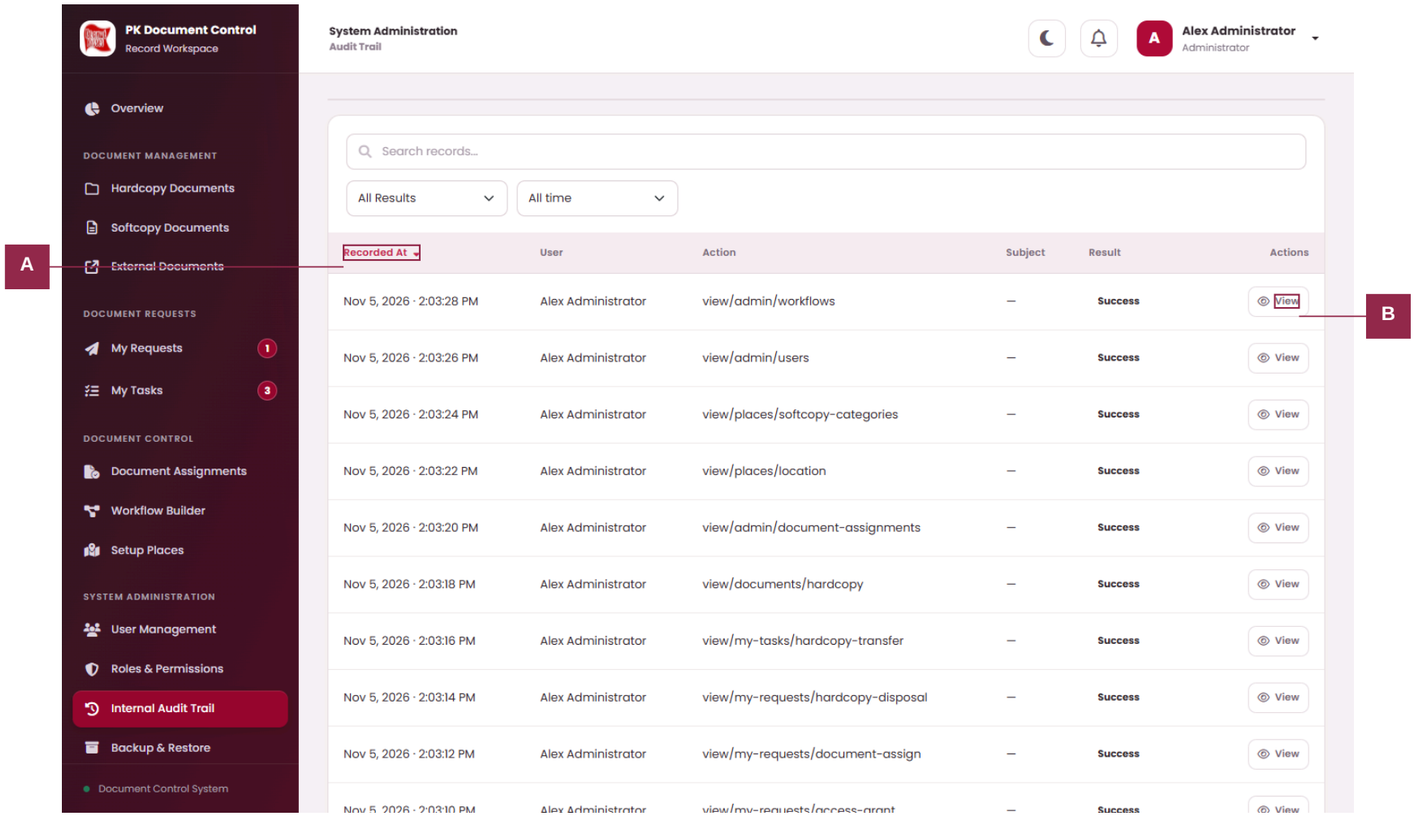

FOLLOW THESE STEPS

1. Check the My Tasks count and notification bell for work needing your attention.
2. Open Notifications. Choose an item to open its My Tasks page.
3. Use Previous, Next and Rows to browse unread notifications.
4. If Approval needed appears, check the listed tasks and open the request.
5. Complete the approval or handoff in My Tasks.

Review the audit trail

For: Administrator, Internal Auditor, or authorized reviewer

Review recorded system actions.

A Recorded At

B View

AFTER THIS

You can trace recorded actions within your audit access.

KEEP IN MIND

Success and Failed help you tell completed actions from unsuccessful attempts. The audit trail is for review. Correct records on their management pages.

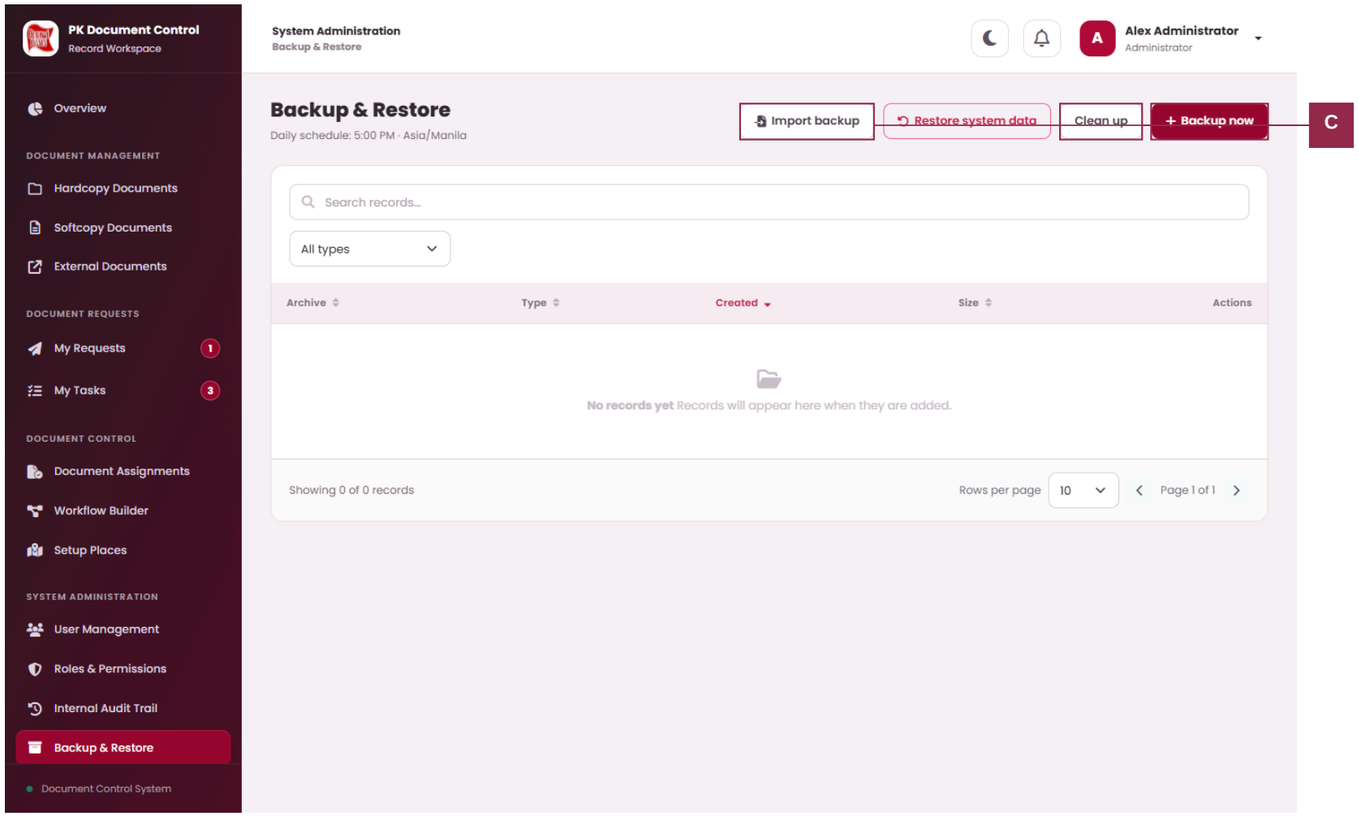

FOLLOW THESE STEPS

1. Open Internal Audit Trail.
2. Search by user ID, action, subject, recorded time or outcome. Search does not match displayed user names.
3. Choose All Results, Success or Failed. Set date filters and adjust the order or page controls.
4. Select View. Check Recorded At, User, Action, Subject, Result and Details.
5. Compare the event with the document details or the request Workflow Activity Log.

Create and manage backups

For: Administrator or authorized backup administrator

Manage encrypted backup archives.

A Backup now **B** Import backup **C** Clean up

FOLLOW THESE STEPS

1. Open Backup & Restore. Check for setup or backup errors.
2. Select Backup now and Confirm. Wait for the result.
3. Find an archive with Search or the Manual, Automatic or Recovery filter. Select Download to save a copy.
4. To add an archive, select Import backup and choose Backup ZIP. Select Import backup and Confirm.
5. Select Clean up and Confirm to remove eligible backup, audit and log archives older than three months.

AFTER THIS

Successful backups appear in the list. Imported archives are checked before being stored.

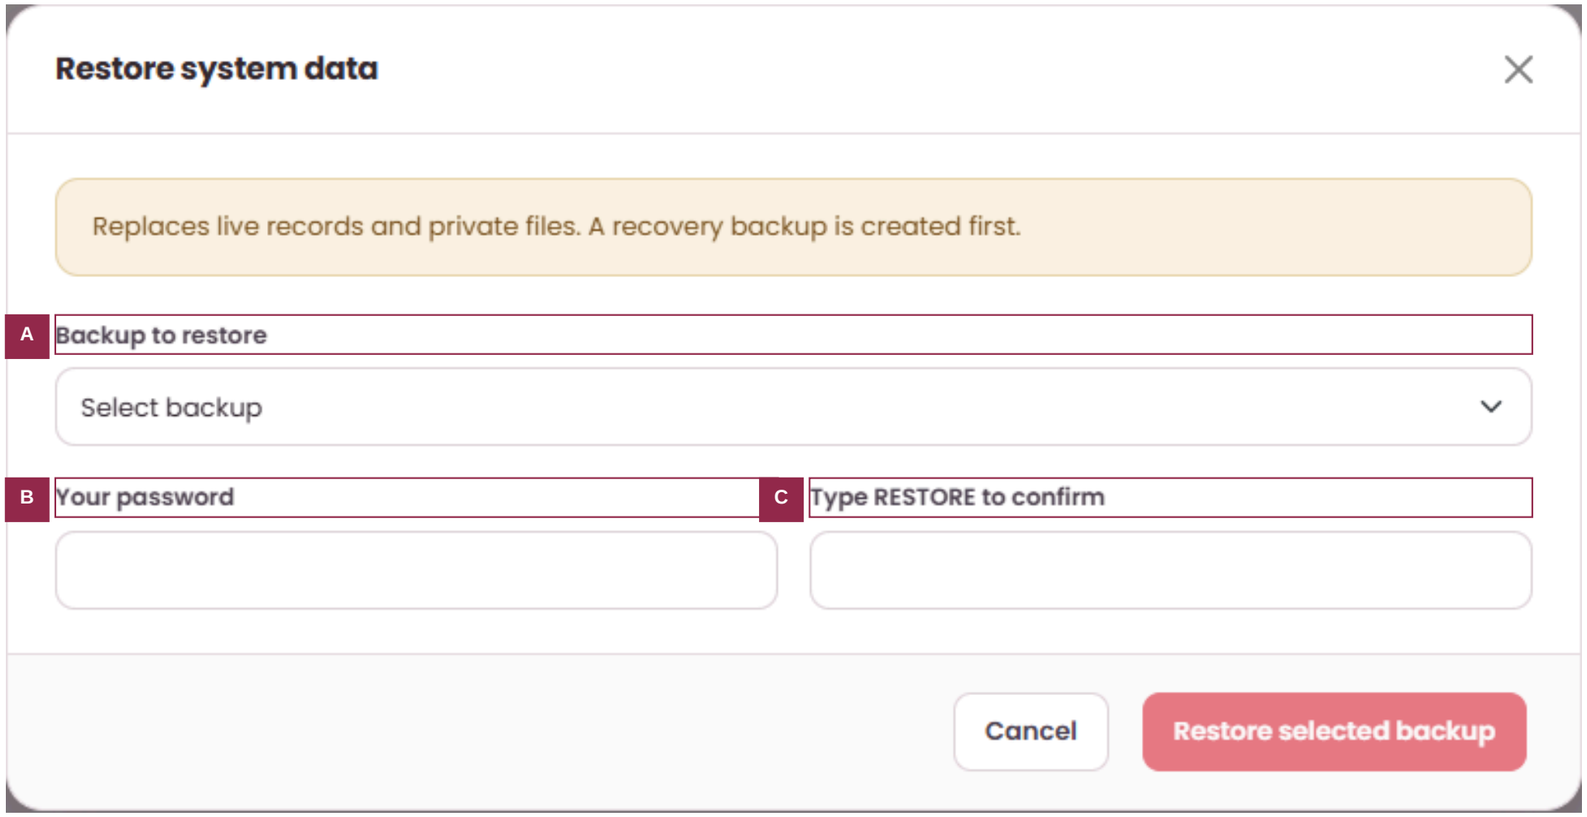

KEEP IN MIND

Backup actions need the appropriate view and edit permissions.
The page shows a daily 5:00 PM Asia/Manila schedule. Check Last automatic backup for a recent run.
If setup is incomplete, ask the Administrator for help before relying on automatic backups.

Restore a backup

For: Administrator or authorized backup administrator

Choose the archive and enter the required password and confirmation.

A Backup to restore **B** Your password **C** Type RESTORE to confirm

AFTER THIS

A recovery backup is created, then the selected backup replaces the current records and private files.

KEEP IN MIND

Restore affects all users. Follow your organization's recovery procedure and coordinate the timing.
Check the archive and date before confirming.
If an error appears, read the full result and investigate before trying again.

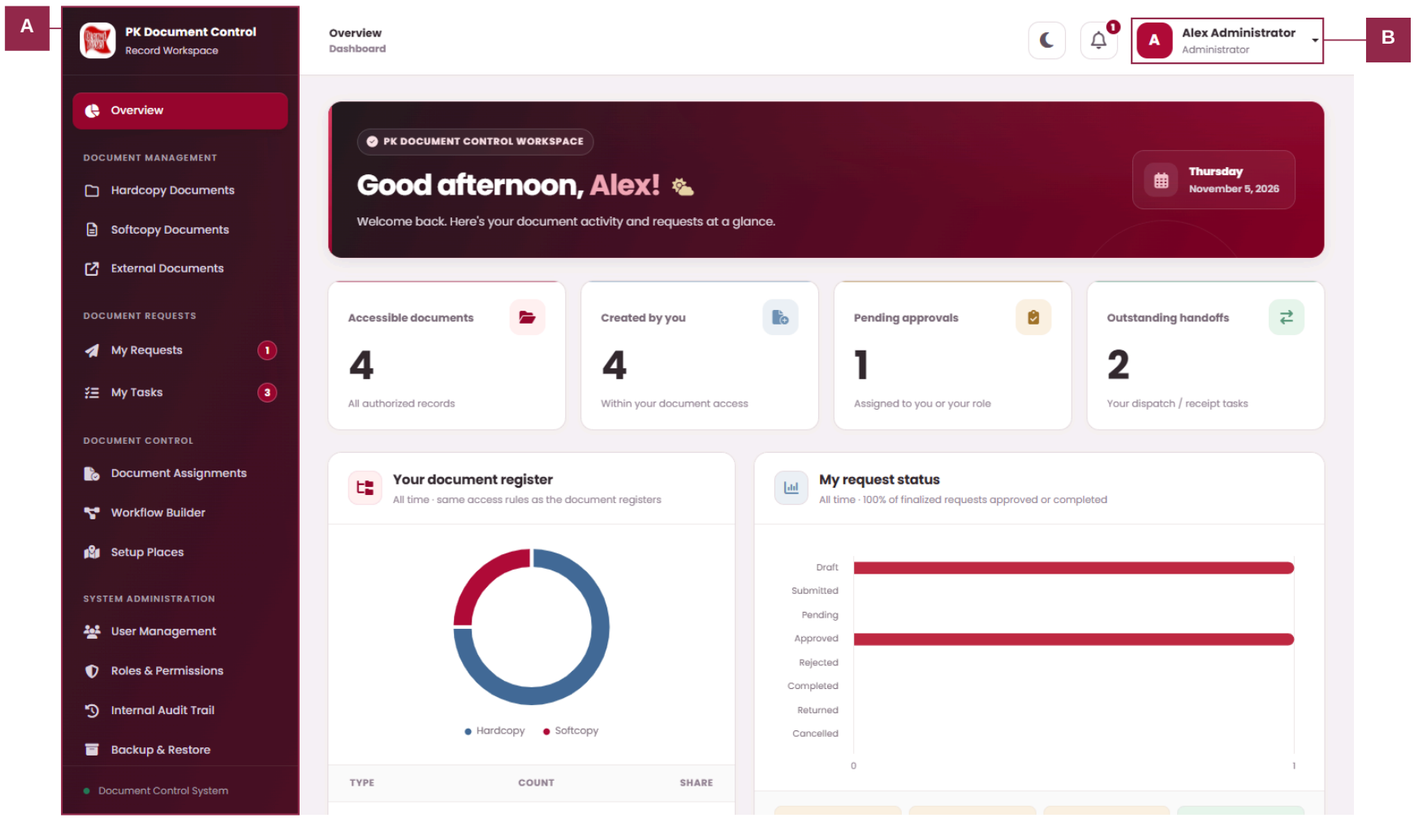

FOLLOW THESE STEPS

1. Open Backup & Restore. Identify the archive that should replace the current records and private files.
2. Select Restore system data and choose Backup to restore.
3. Enter Your password. Enter RESTORE in Type RESTORE to confirm.
4. Select Restore selected backup. Read the replacement message and select Confirm.
5. A successful restore signs you out. Sign in again and check the restored records and attachments.

Get help with common problems

For: All users

Overview and the role-based navigation menu.

A Document workspaces

B Account menu

AFTER THIS

You can fix common input problems or give the right information to the person helping you.

KEEP IN MIND

If numbering fails, check that the selected Document No. exists, its first-time pattern is valid, and the per-document series-pattern migration and unique index are installed.
If a file preview does not load, close View Details and open it again. Submit a new request if document access has expired.
Keep your password private and use your own account for every action.

FOLLOW THESE STEPS

1. Missing menu, record or action: clear filters and check the document status. Ask the Administrator to check your roles and access.
2. Upload failed: check the file type and 15 MB limit, then attach the correct file again.
3. Submit failed: check required fields and the attachment. Ask the Administrator to check the approval process and active approvers.
4. Record changed elsewhere: refresh, check the latest details and repeat only the changes still needed.
5. Action failed: read Action could not be completed. Give the controller the request reference, action, time and message.
