PRACTICAL SYSTEM WALKTHROUGH

PK Document Control

USER GUIDE

Find controlled records. Prepare requests.
Review approvals. Complete physical handoffs.

Actual application screens with editable arrows.
Nine request scenarios using synthetic sample data.

26 OCTOBER 2026 · Desktop application reference · No real account credentials included

Your route through the workspace

01

GET ORIENTED

Sign in and account security
Overview and navigation
Find records and inspect details

02

REQUEST AND REVIEW

All nine request actions
Save Draft → Submit → decision
Return, reject, dispatch, and accept

03

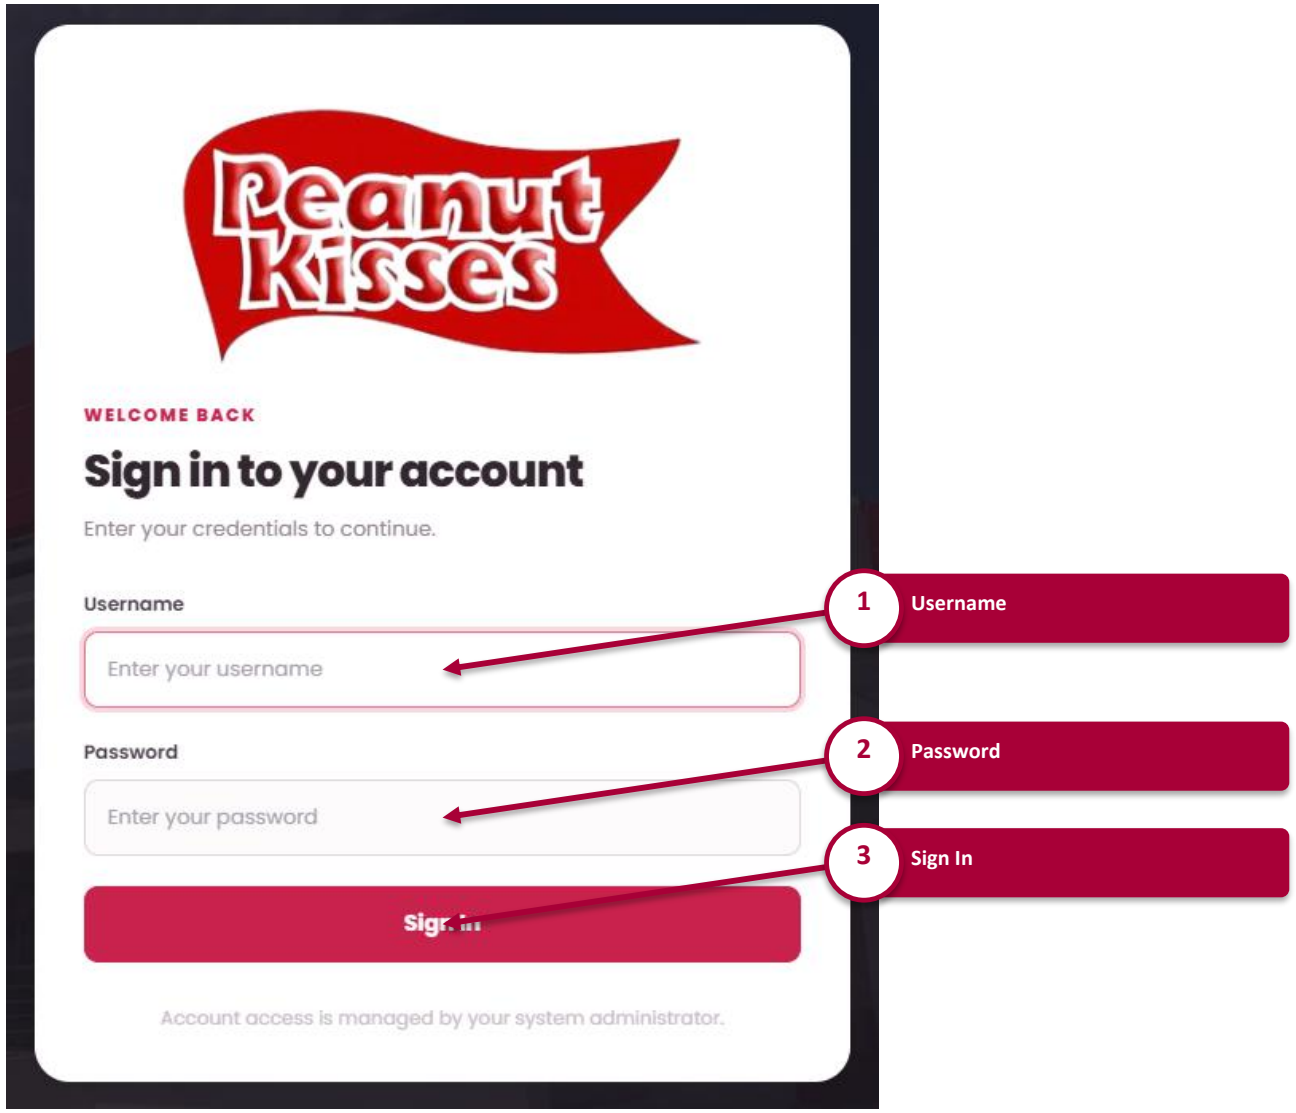

CONTROL AND ADMINISTER

Direct documents and assignments
Places, users, roles, and workflows
Audit events and recovery tools

Numbered arrows identify the controls to use. Access and actions depend on your role, assigned documents, and the current workflow step.

All people, records, dates, and transactions shown as examples are synthetic demonstration data.

System access and responsibilities

WHAT TO DO

01 Open the address supplied by your system administrator and use your own account.

02 Hardcopy Documents tracks physical records; Softcopy Documents provides controlled electronic records and files.

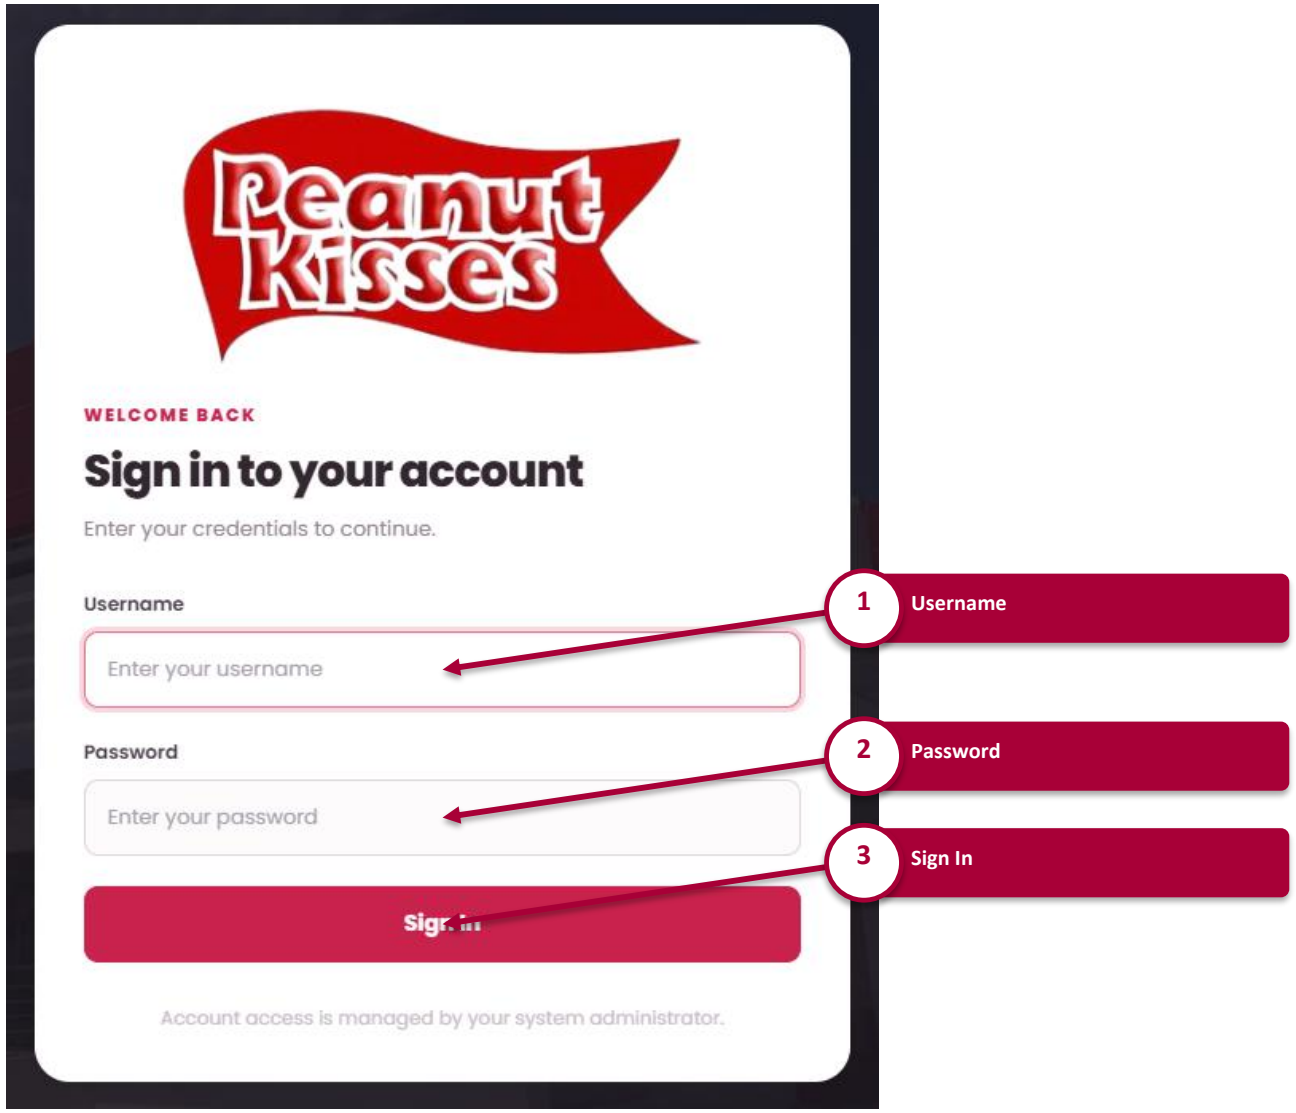

03 Use My Requests for approval proposals and My Tasks for assigned approvals or physical handoffs.

04 Document controllers and administrators receive extra management menus when permitted.

05 Ask the administrator when a needed menu, action, or record is unavailable.

Menus, records, request actions, and file buttons depend on your permissions and document access. A colleague may see different options.

Sign in and change your password

WHAT TO DO

01 Enter Username and Password, then select Sign In.

02 For a temporary password, complete Current or temporary password, New password, and Confirm new password.

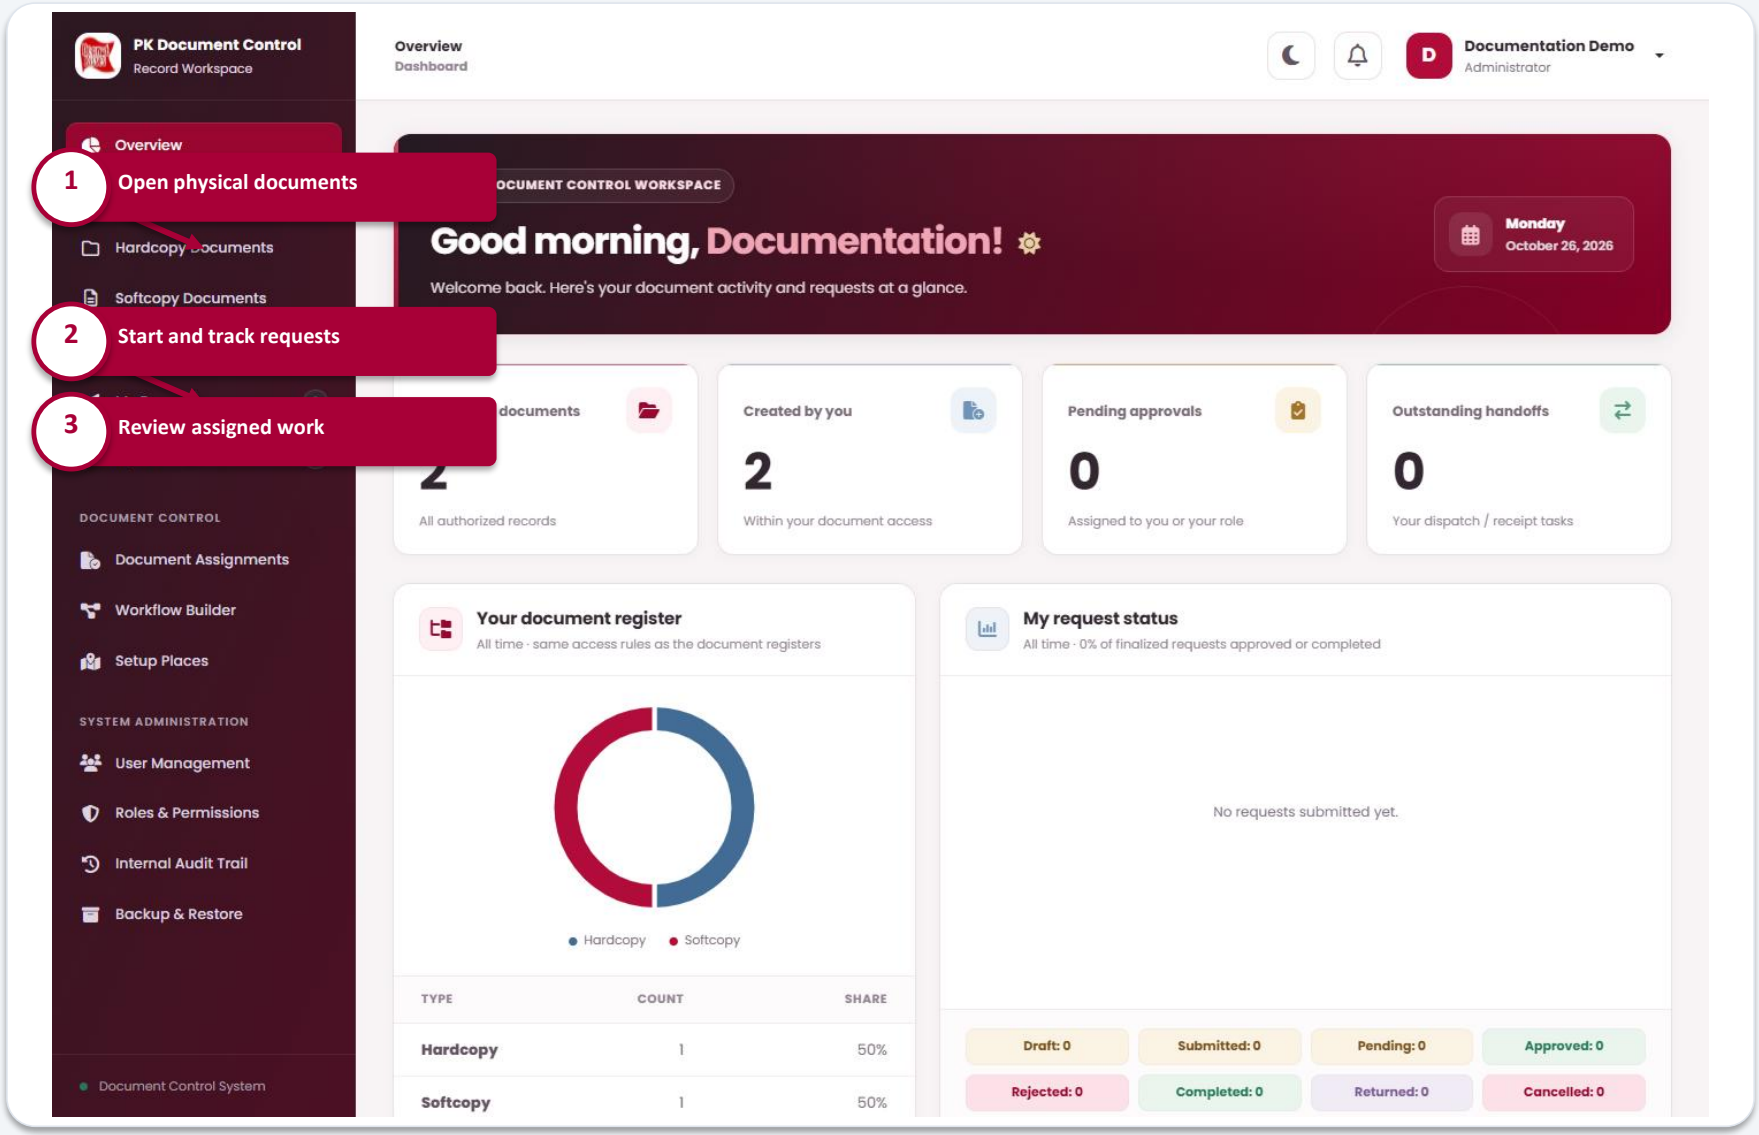

03 Choose more than 8 characters, up to 72 bytes; select Set permanent password.

04 Later, open your name → Change Password, complete the fields, then Update Password → Confirm.

05 Open your name → Sign Out → Confirm to finish your session.

If Invalid username or password appears, recheck the credentials. After too many failed attempts, wait before trying again or contact the administrator.

Overview and main navigation

WHAT TO DO

01 Select Overview for your dashboard. On narrow screens, use Toggle navigation to show the sidebar.

02 Check Accessible documents and Created by you for counts within your document access.

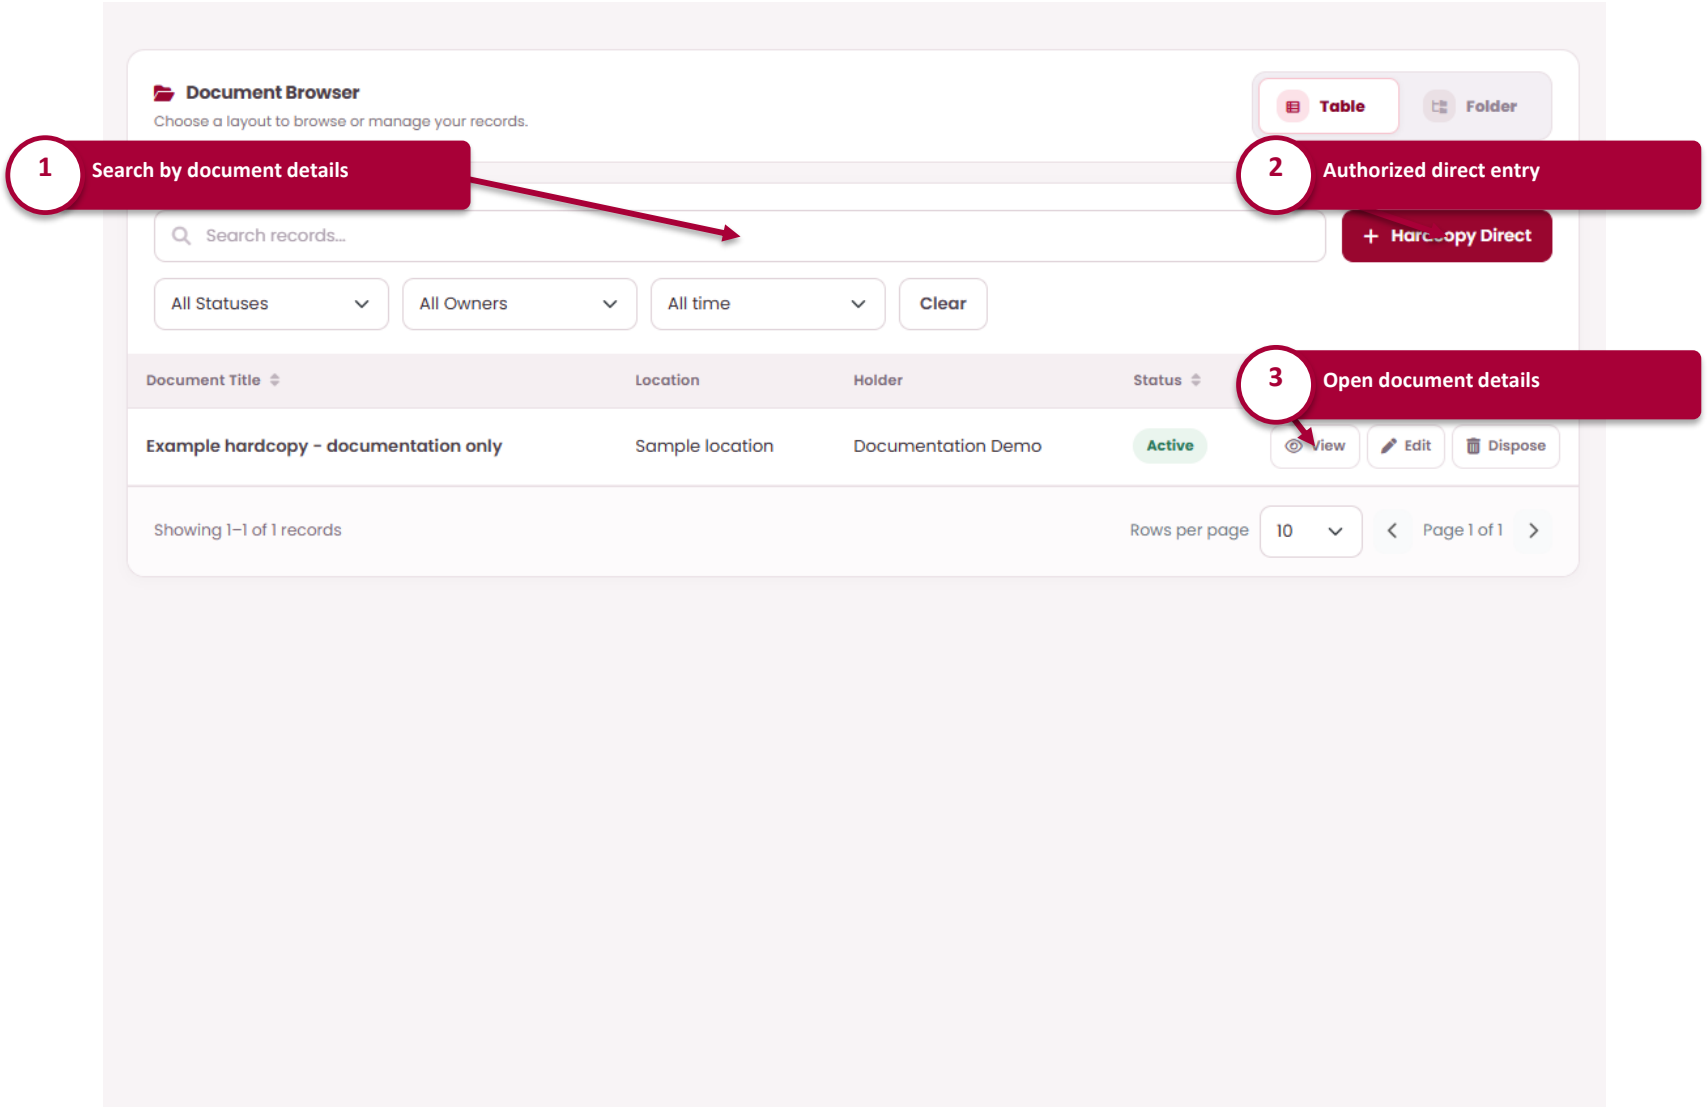

03 Check Pending approvals and Outstanding handoffs for work assigned to you or your roles.

04 Read Your document register and My request status to see document and request distributions.

05 Use the left navigation for documents, My Requests, My Tasks, and permitted management pages; use the bell for Notifications.

Dashboard numbers reflect your authorized records and work, rather than an unrestricted company-wide total.

Find and inspect document records

WHAT TO DO

01 Open Hardcopy Documents or Softcopy Documents and choose Table or Folder.

02 Use Search records, status, owner, and date filters. Select Clear to remove filters.

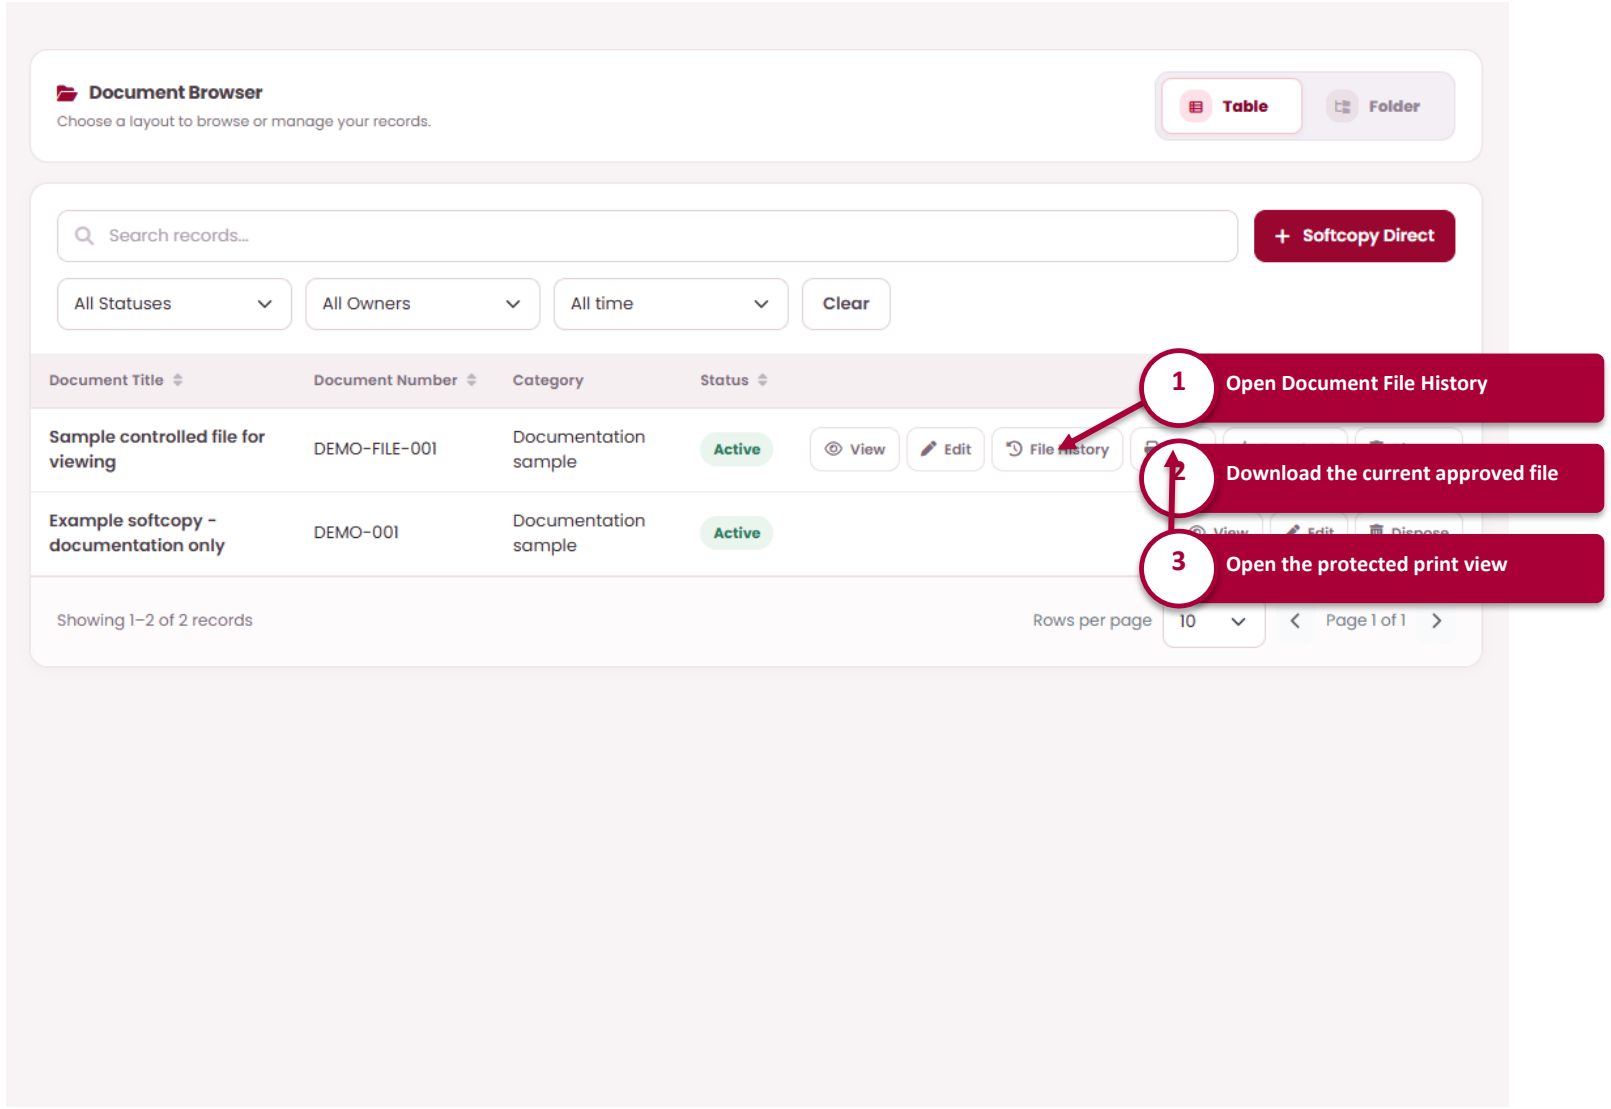

03 Expand hardcopy Area → Specific → optional Asset → Location, or softcopy category folders. Use breadcrumbs and All Documents to change scope.

04 Open a document title or View action for full details, related requests, approval history, and applicable file or transfer history.

05 Use Rows per page, page arrows, and Recent / A–Z / Z–A ordering to browse long lists.

Hardcopy table columns include Document Title, Location, Holder, and Status. Softcopy columns include Document Title, Document Number, Category, and Status.

Open, download and print controlled files

WHAT TO DO

01 Open Softcopy Documents and find the permitted active record.

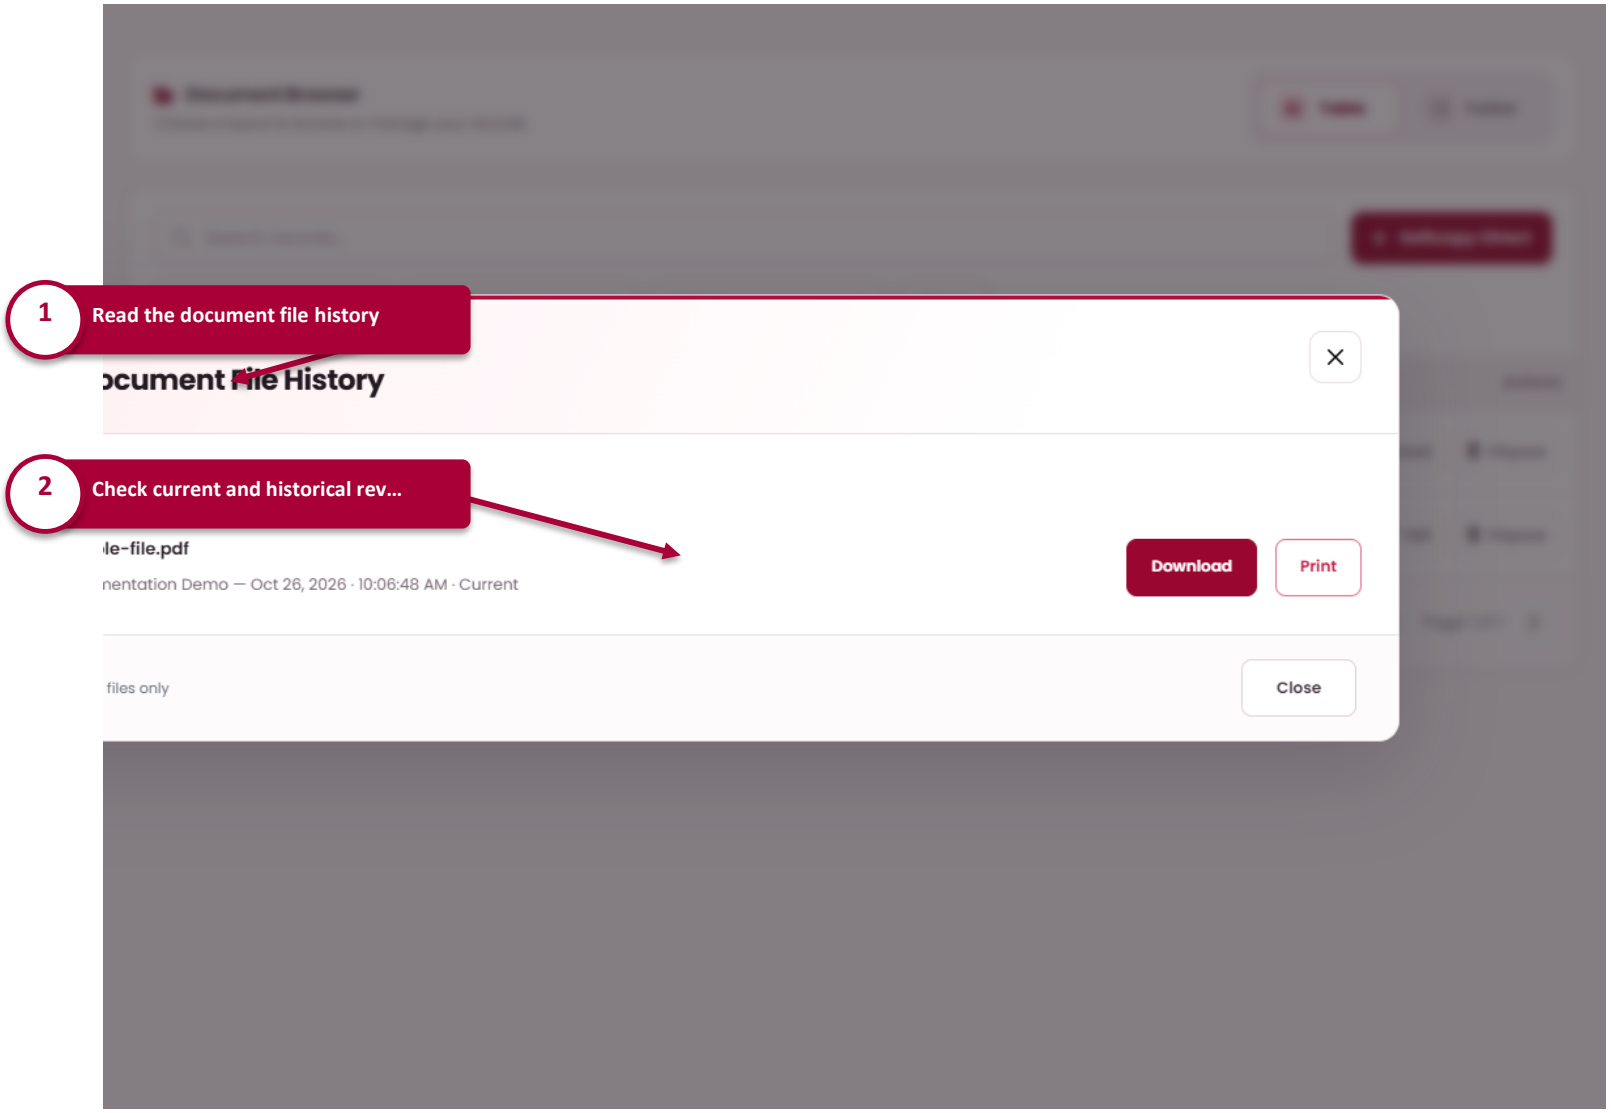

02 Select File History to inspect its available revision files.

03 Select Download for an authorized copy of the current approved file.

04 Select Print to open the controlled print preview.

Available file actions depend on your permissions and document access.

Inspect Document File History

WHAT TO DO

01 Open File History on the intended softcopy record.

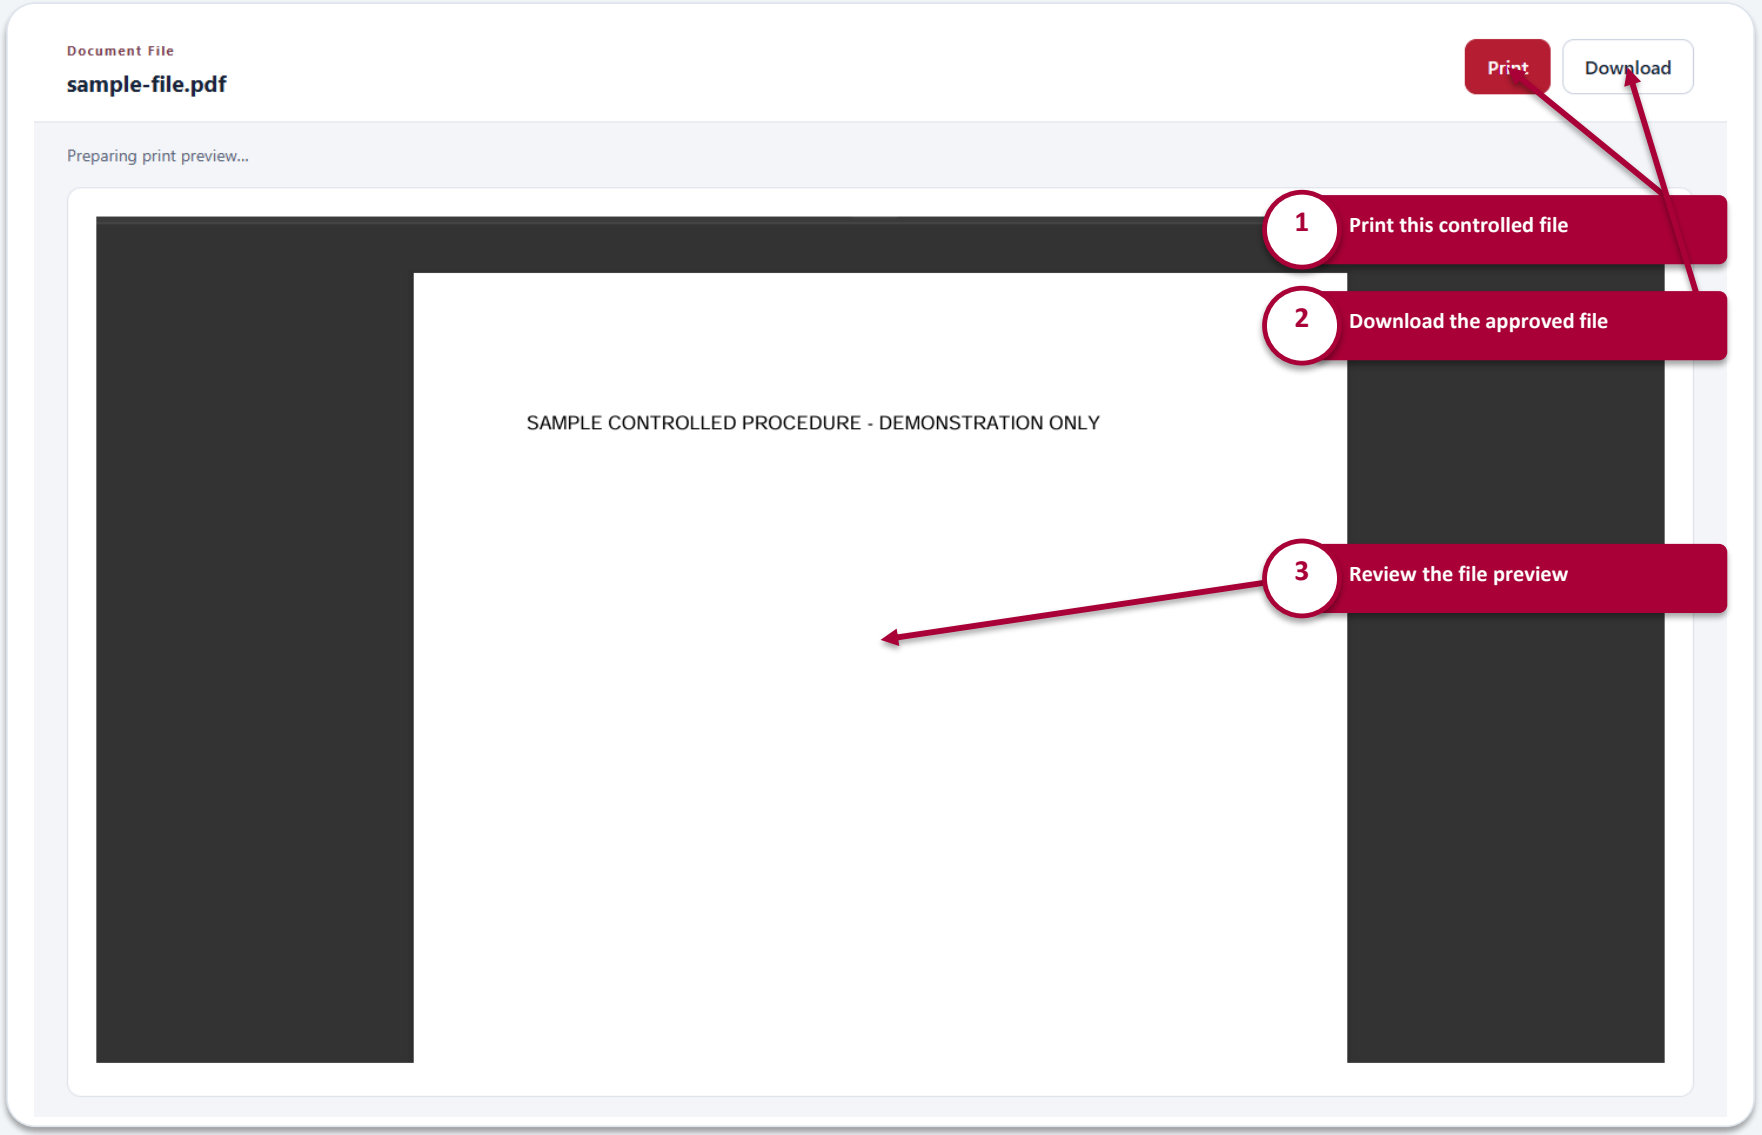

02 Read the revision details and identify the current file.

03 Use available Download or Print actions for files within your access.

04 Select Close to return to the document register.

Historical revision metadata can remain after retired file bytes are cleaned up.

Use the controlled print preview

WHAT TO DO

01 Open Print from the authorized document file action.

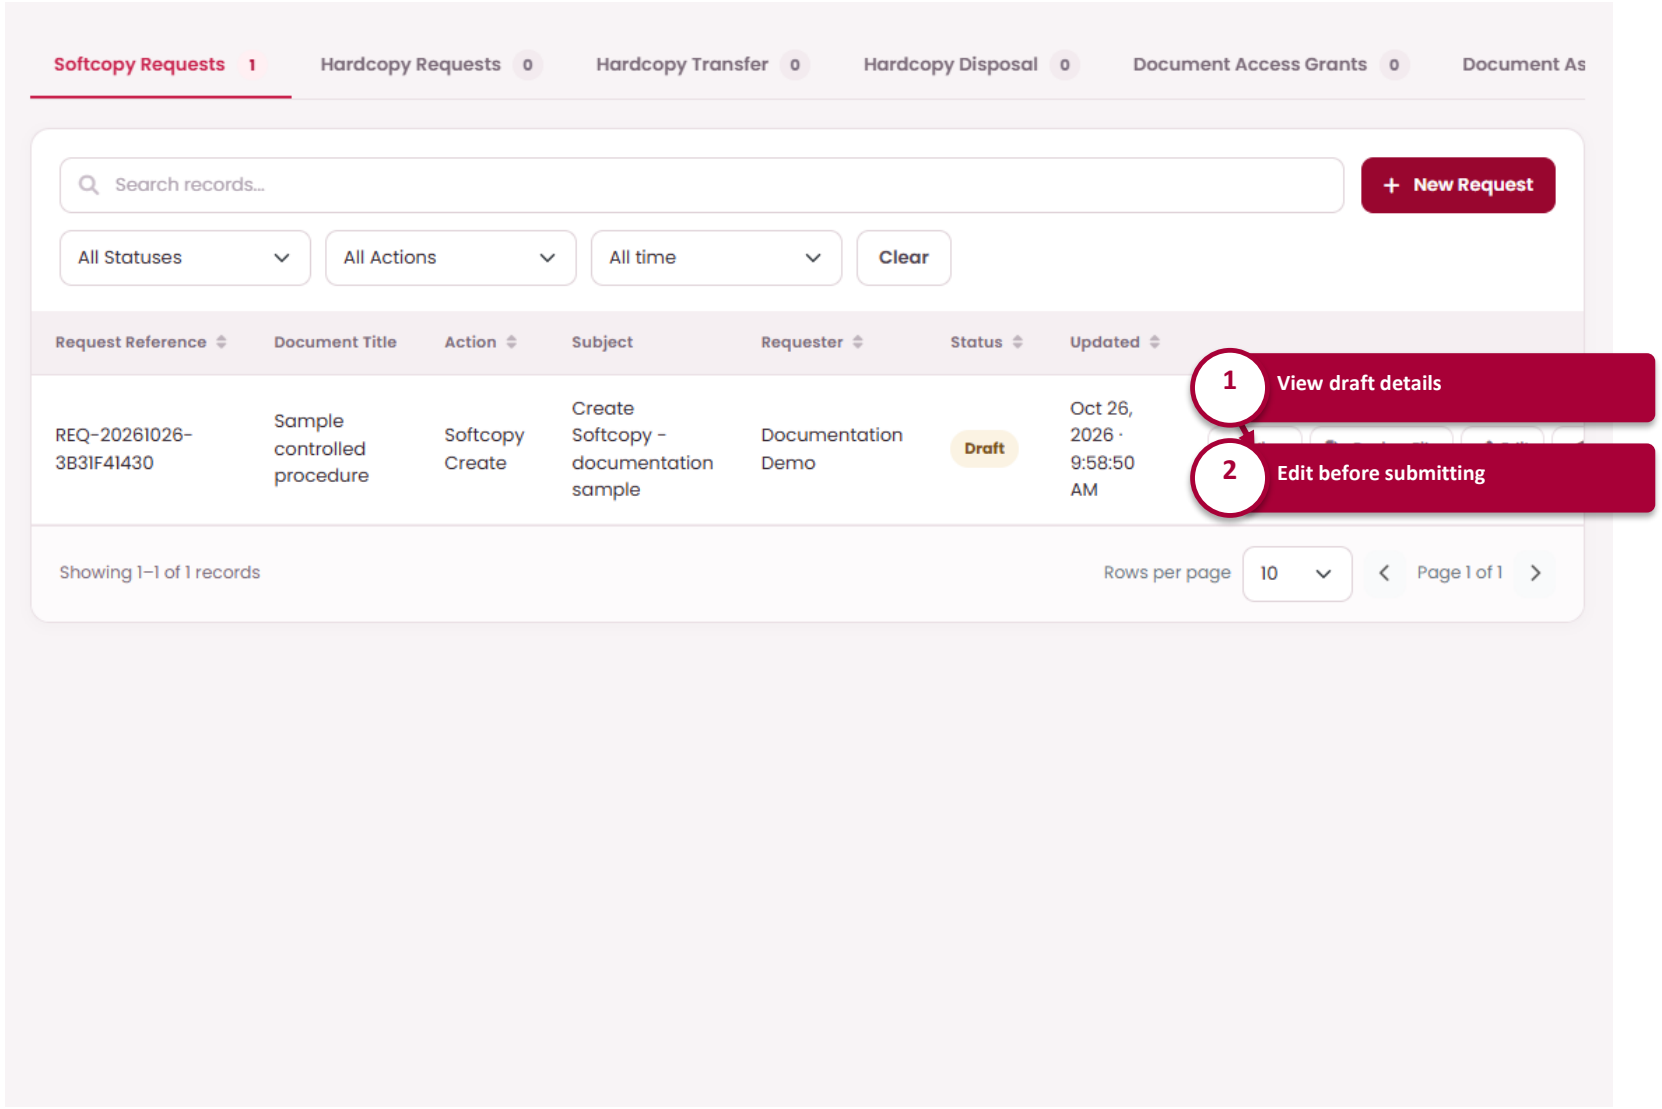

02 Wait for the PDF, image or text preview to prepare.

03 Select Print when ready, then complete your browser's print dialog.

04 Use Download when you need a permitted local copy.

Office files use the downloaded file and an installed Office application for printing.

Save, submit, and track requests

WHAT TO DO

01 Choose the appropriate My Requests tab and select New Request; complete the action-specific fields.

02 Save Draft → Confirm records the proposal. Open View to inspect metadata, any attachment, and its approval timeline.

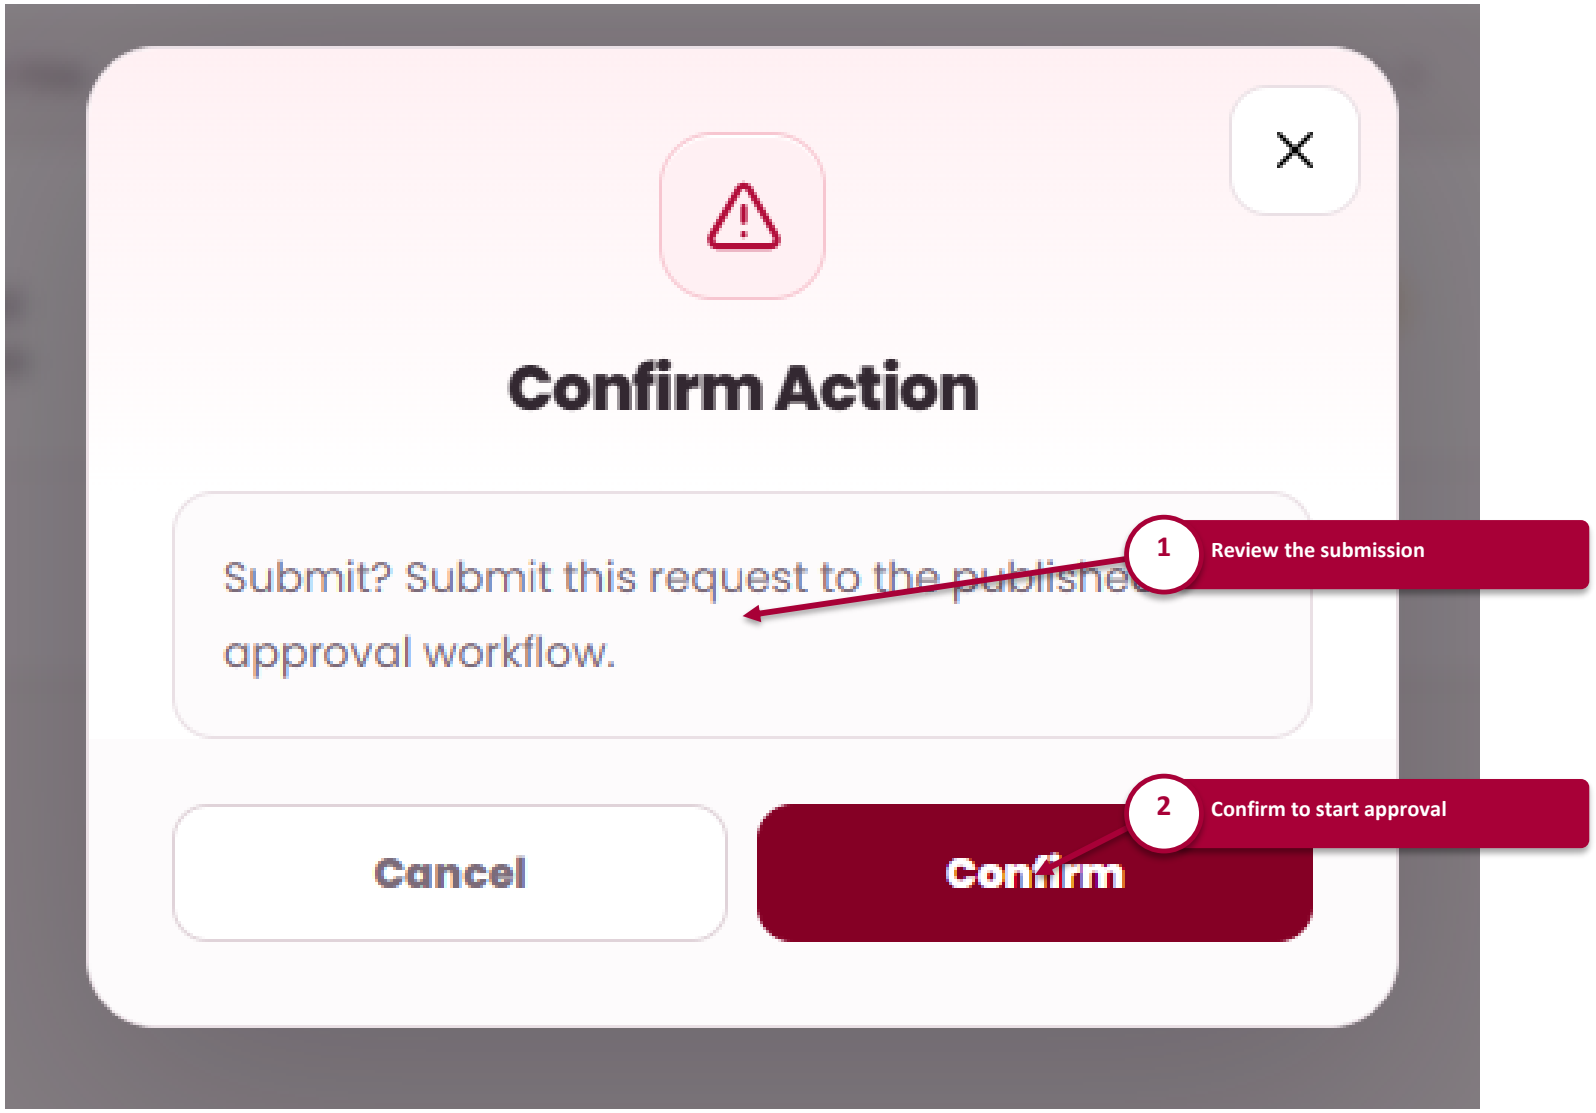

03 Select Submit → Confirm when ready. Submitted means the published approval workflow has started.

04 For a request Returned to you, read the remarks, Edit, save, and Submit again.

05 Cancel an unwanted Draft. Delete is permanent and is offered only for your cancelled, never-submitted draft.

Statuses shown by the request filter are Draft, Submitted, Completed, Approved, Rejected, Returned, and Cancelled. Approved transfers still need the physical handoff steps.

Submit a checked draft

WHAT TO DO

01 Save Draft records your proposal without starting approval.

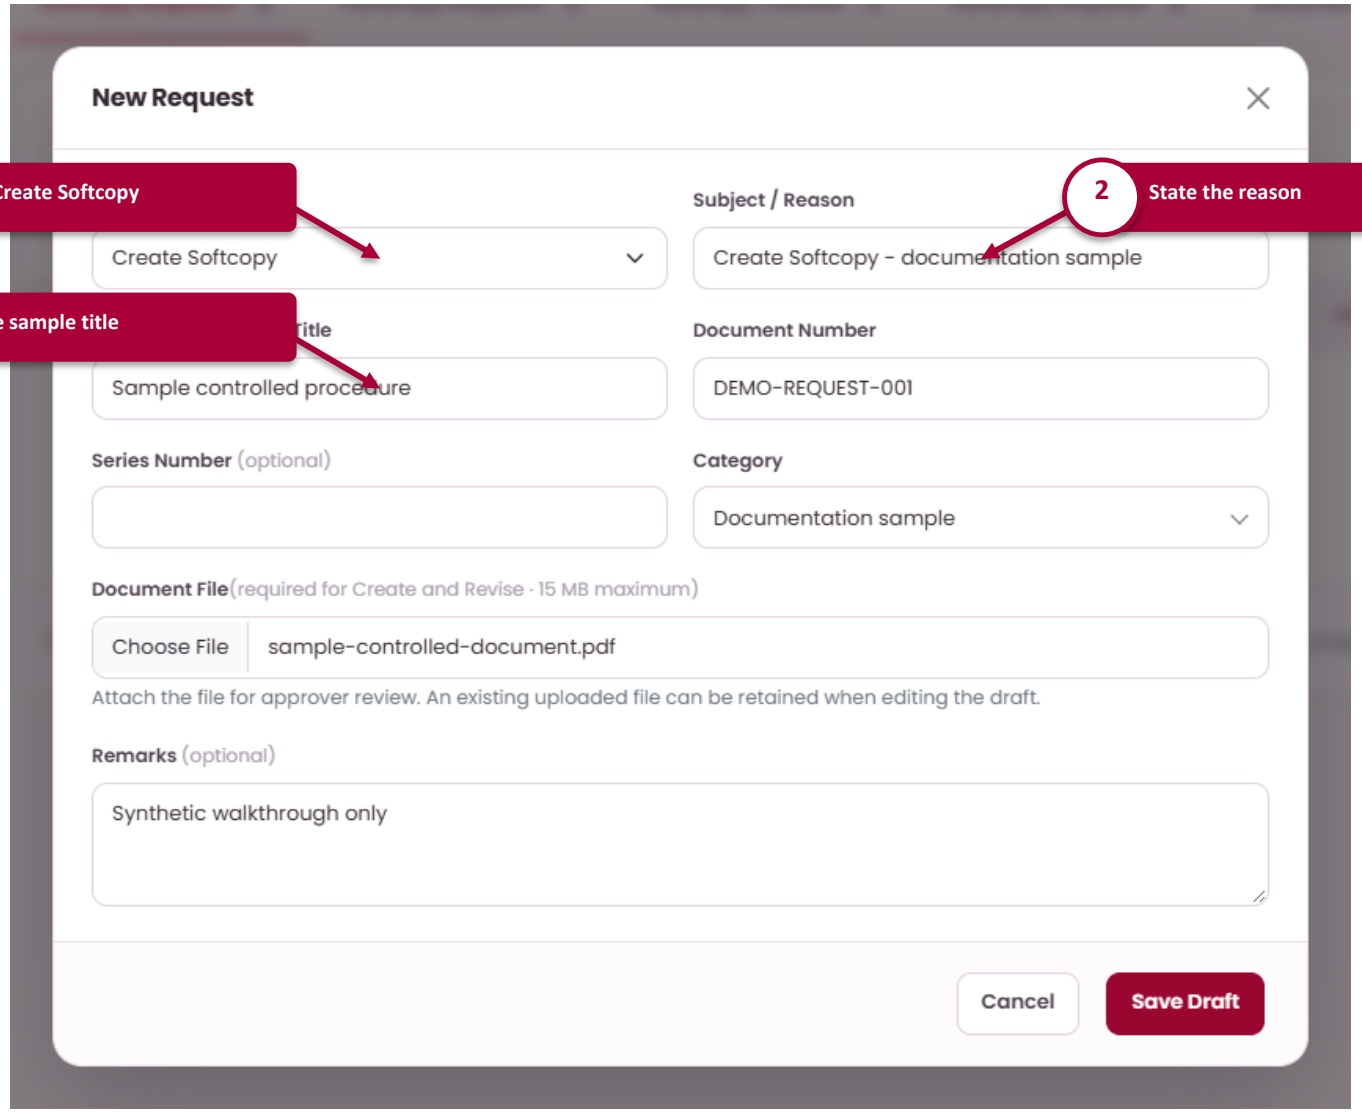

02 Back in the request list, select Submit for the intended draft.

03 Read the request confirmation and select Confirm to start the approval workflow.

04 Check the request becomes Submitted, then inspect its Approval Process Timeline.

Submit uses the shared Confirm dialog; it does not ask for an approval remark.

Sample 01 · Create Softcopy

WORKED EXAMPLE

DEMONSTRATION INPUTS

Subject / Reason: Create Softcopy - documentation sample

Proposed Document Title: Sample controlled procedure

Document Number: DEMO-REQUEST-001

WHAT TO DO

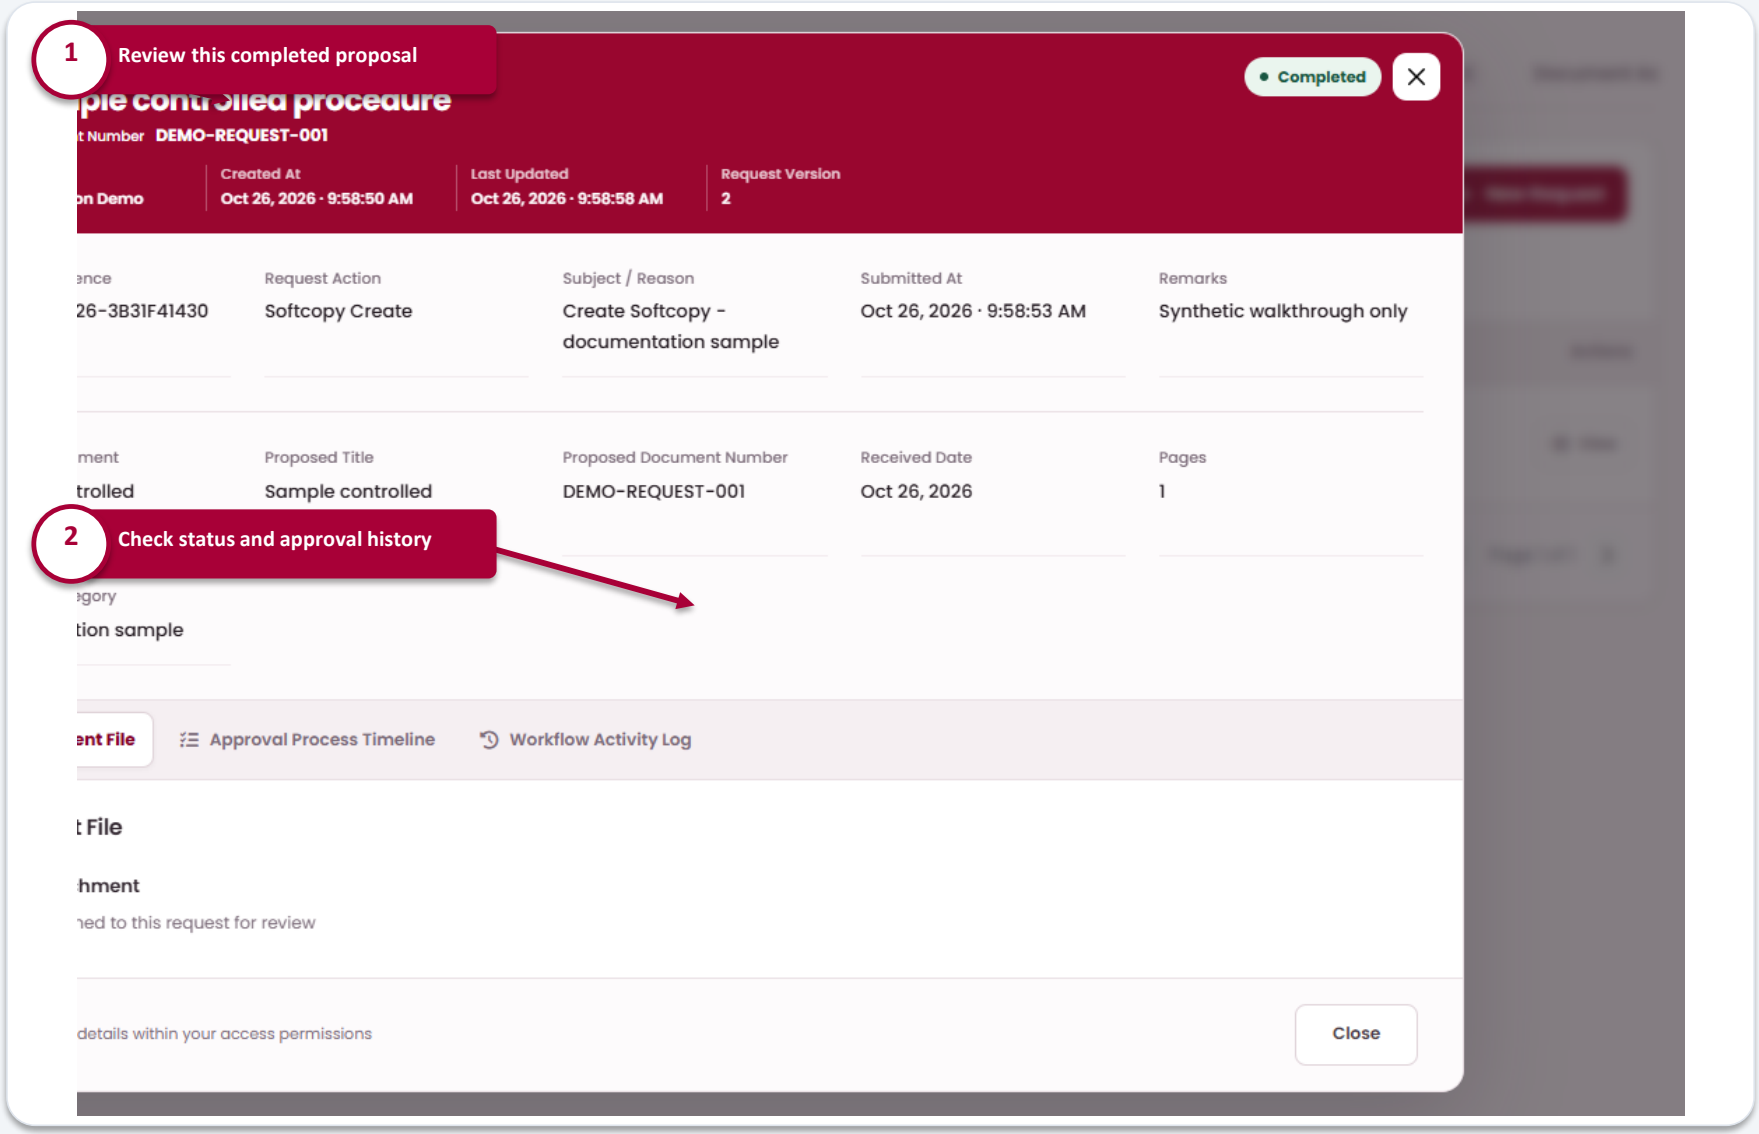

01 Choose Create Softcopy and enter Subject / Reason.

02 Enter the proposed title, Document Number, optional Series Number, and Category.

03 Attach the Document File, add Remarks if needed, and select Save Draft.

Synthetic example. Save Draft first, then Submit after checking the proposal.

Sample 01 · Create Softcopy — result

RECORDED RESULT: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

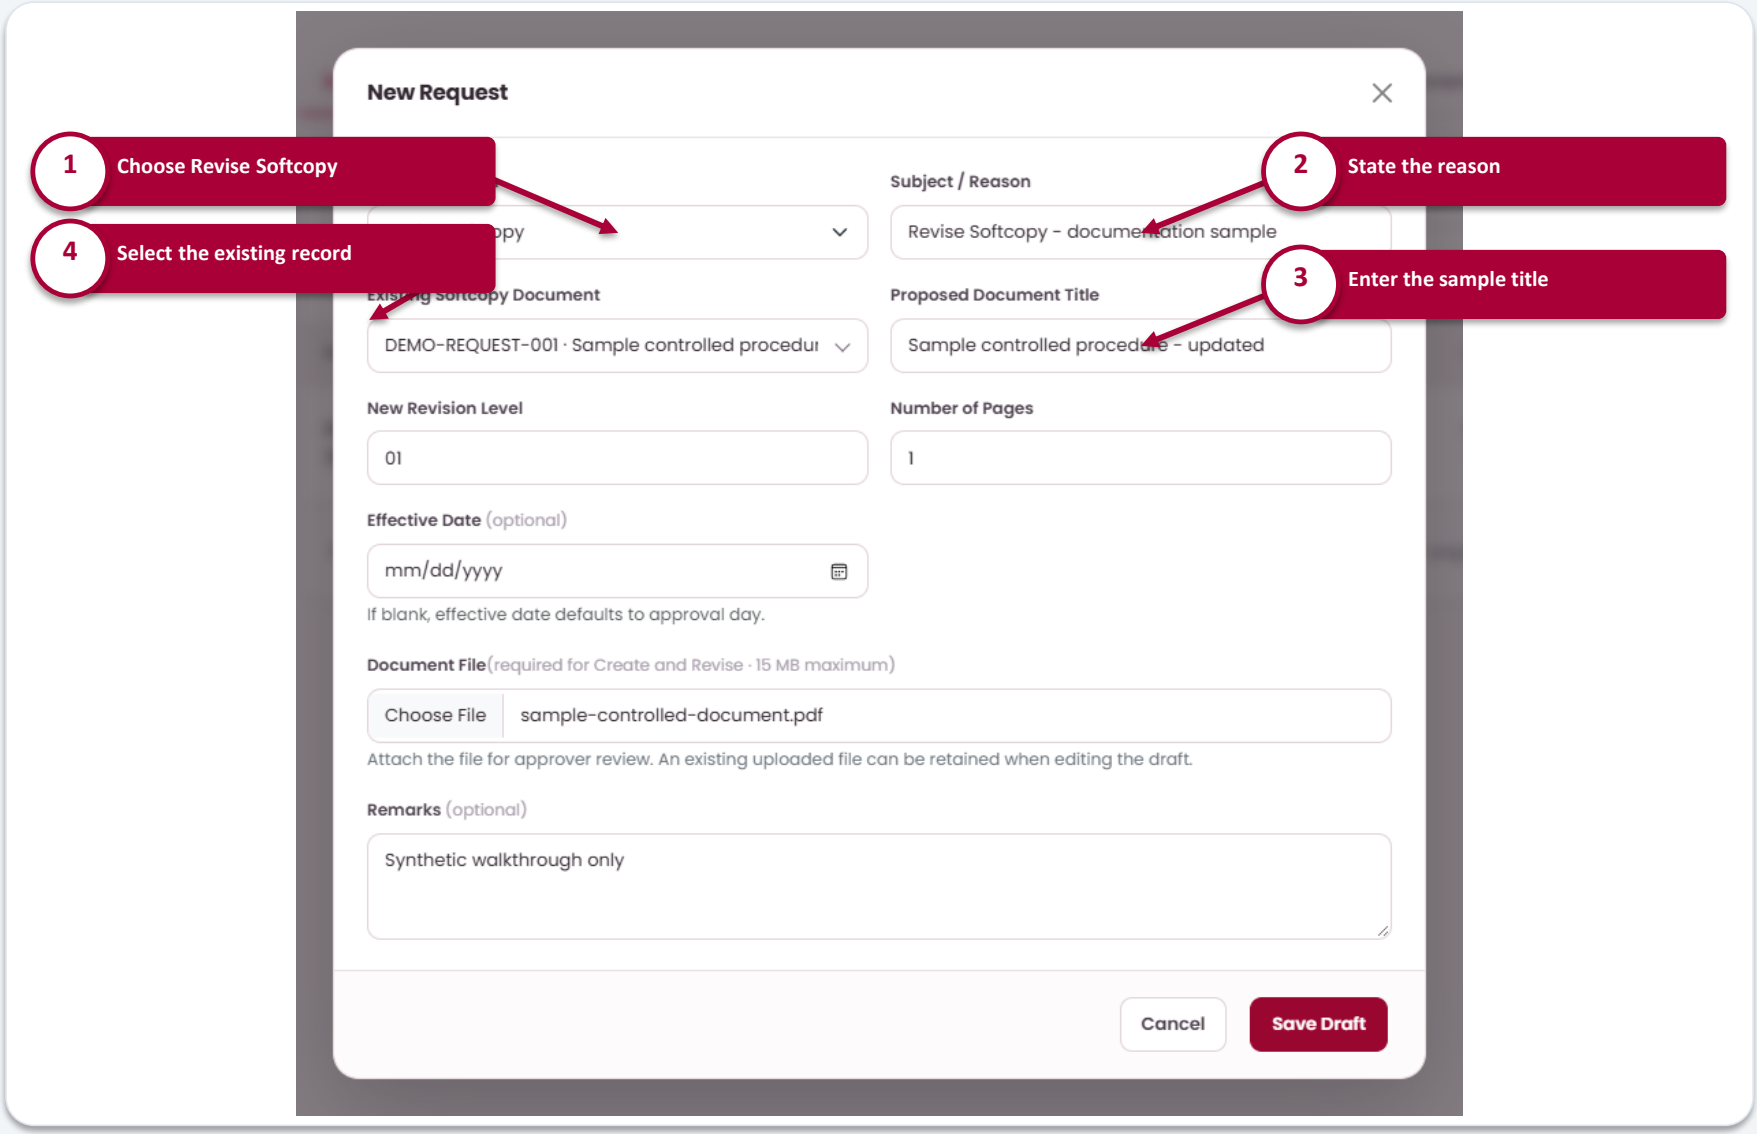

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The new controlled softcopy appears in Softcopy Documents after final approval. The captured request status is Completed.

The screenshot shows the demonstrated result in the isolated sample workspace.

Sample 02 · Revise Softcopy

WORKED EXAMPLE

DEMONSTRATION INPUTS

Subject / Reason: Revise Softcopy - documentation sample

Proposed Document Title: Sample controlled procedure - updated

New Revision Level: 01

WHAT TO DO

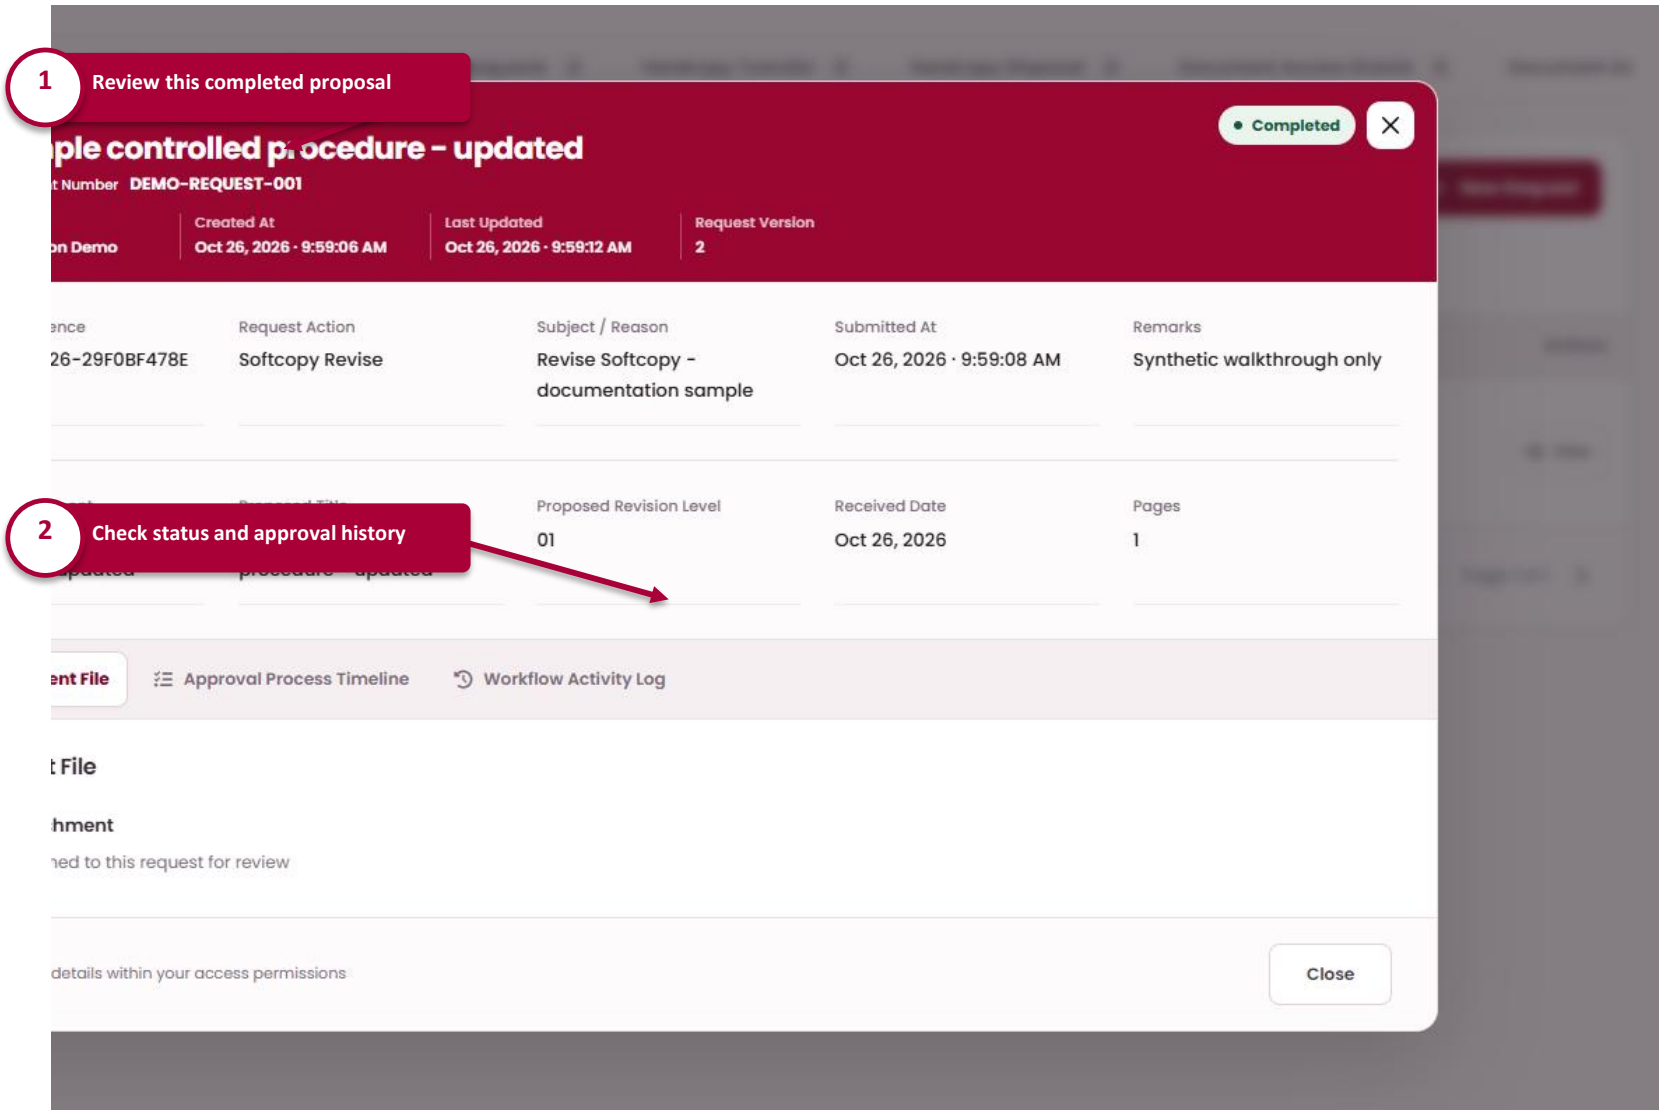

01 Choose Revise Softcopy and select the Existing Softcopy Document.

02 Check the proposed title; enter New Revision Level and Number of Pages.

03 Choose an optional Effective Date, attach the revised file, then Save Draft.

Synthetic example. Save Draft first, then Submit after checking the proposal.

Sample 02 · Revise Softcopy — result

RECORDED RESULT: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

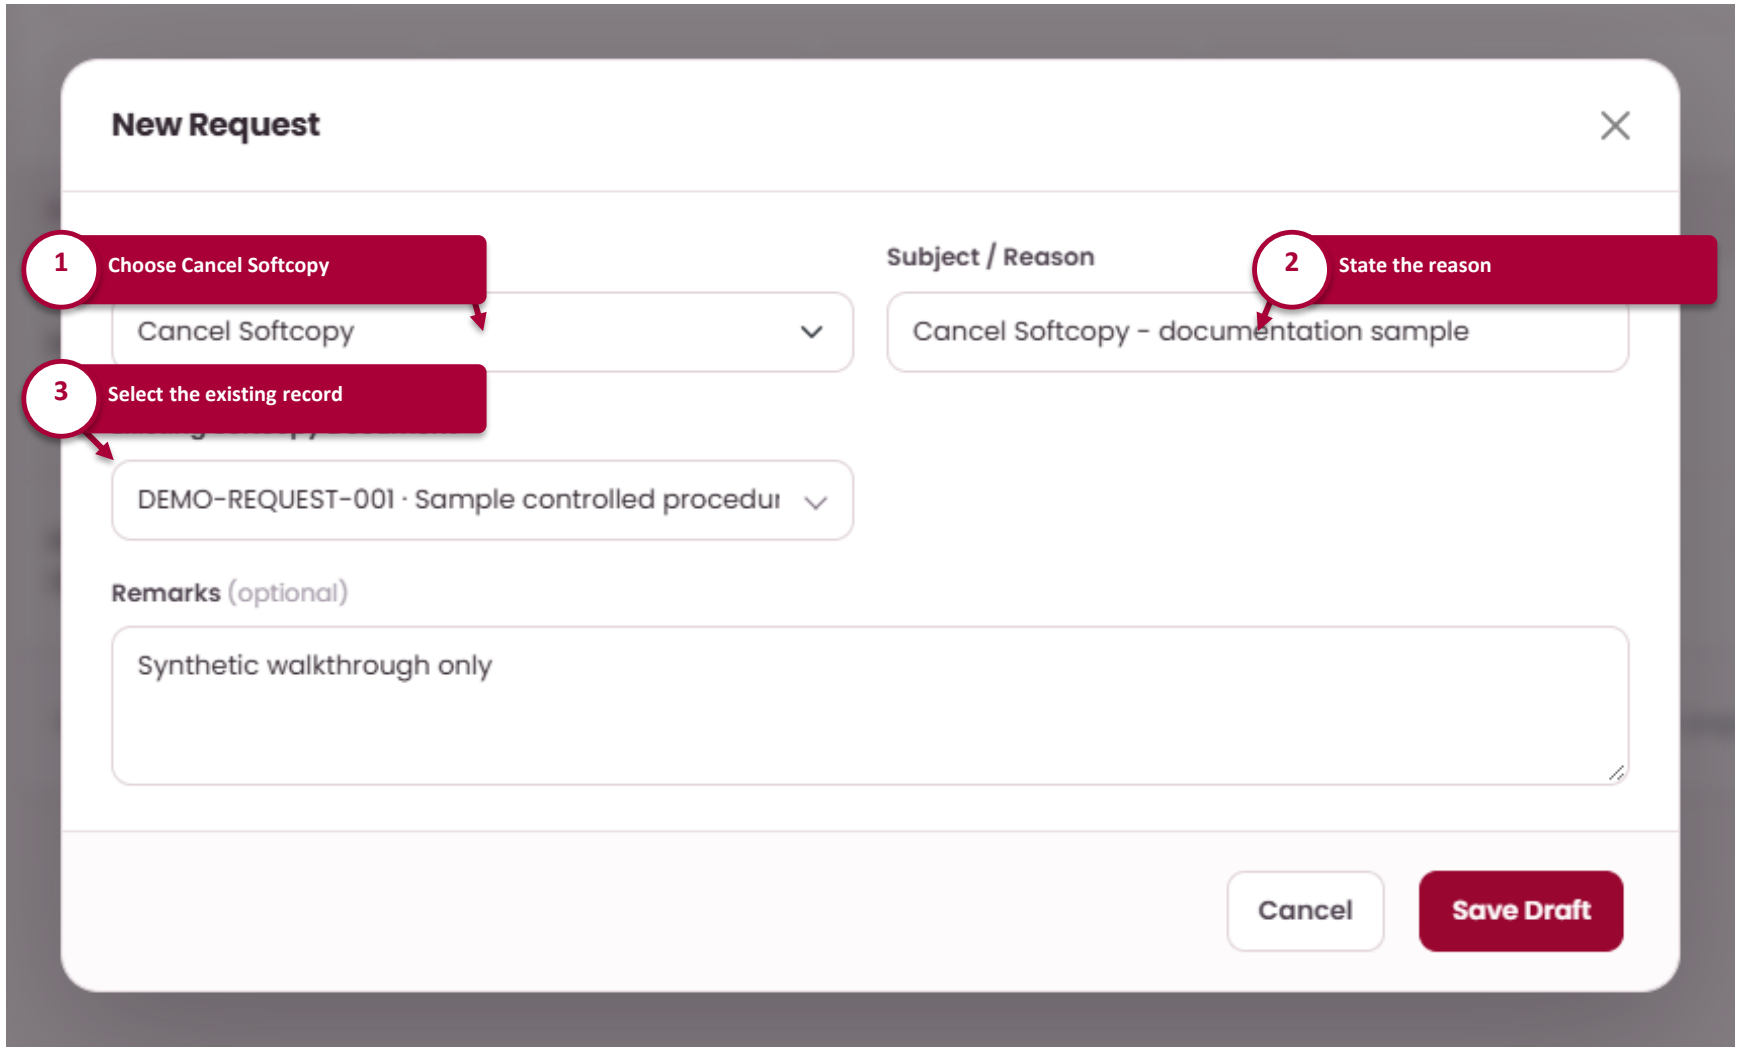

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The approved revision becomes the current controlled file; check the revision and file history. The captured request status is Completed.

The screenshot shows the demonstrated result in the isolated sample workspace.

Sample 03 · Cancel Softcopy

WORKED EXAMPLE

DEMONSTRATION INPUTS

Subject / Reason: Cancel Softcopy - documentation sample

Existing Softcopy Document: Sample controlled procedure - updated

WHAT TO DO

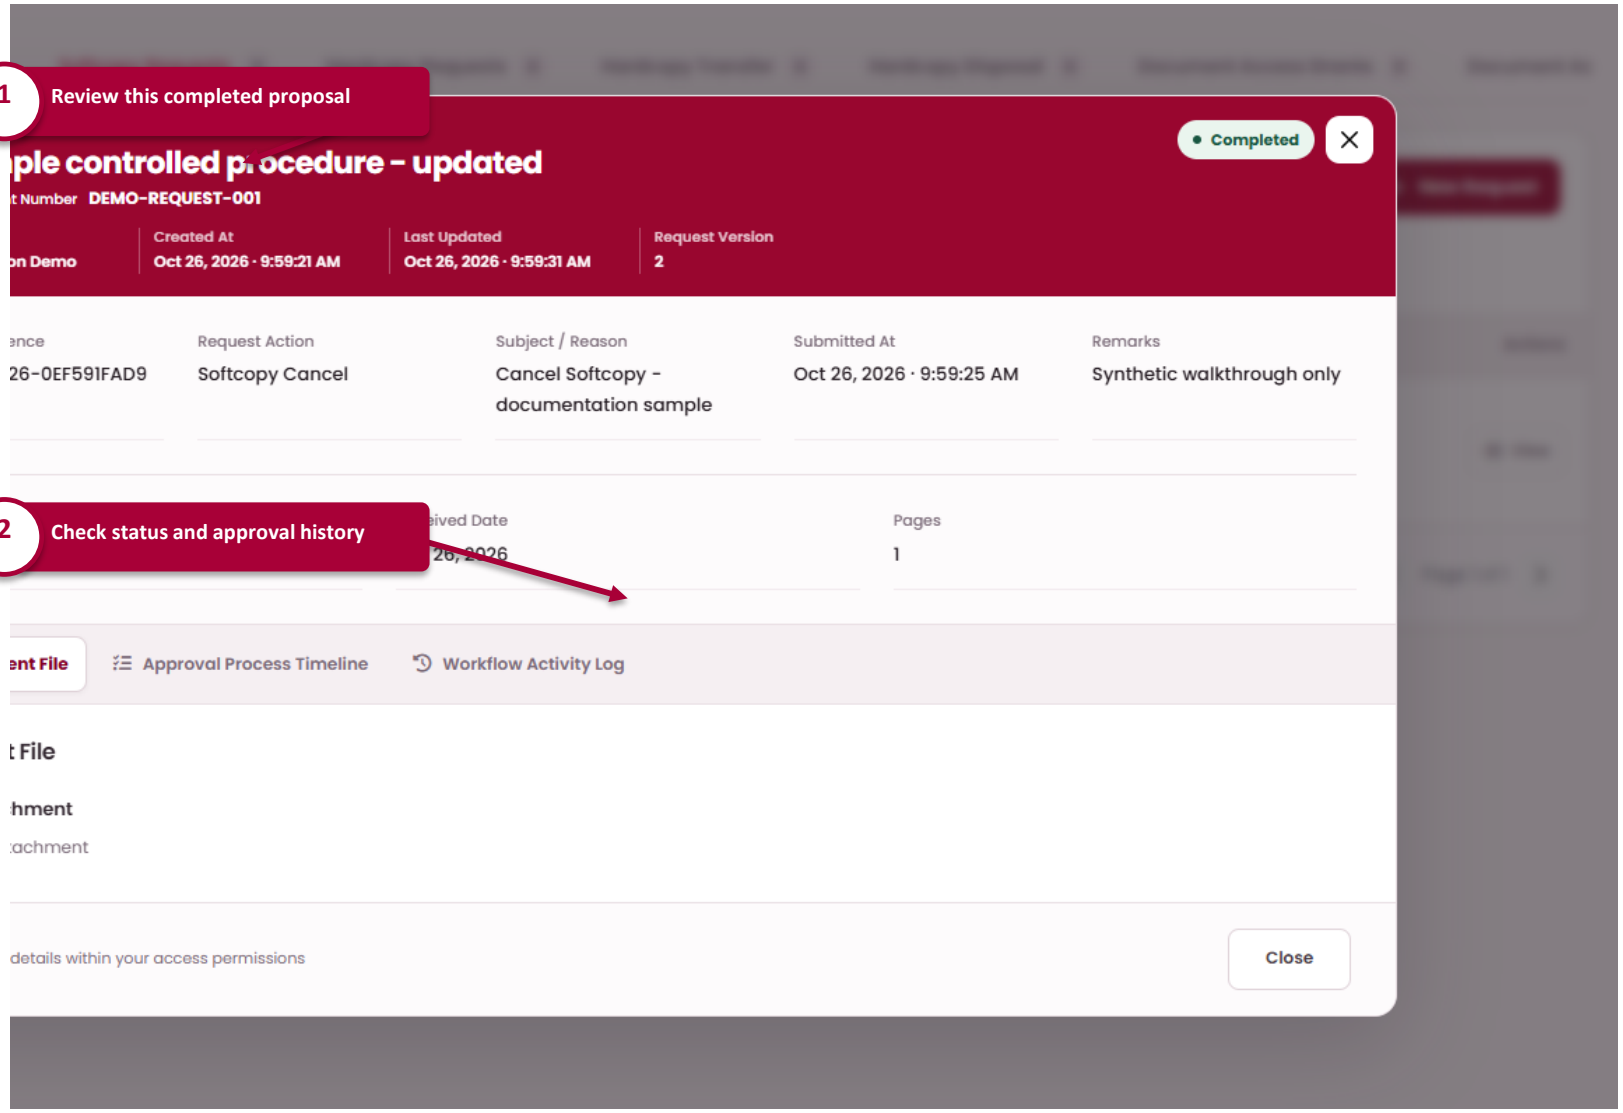

01 Choose Cancel Softcopy and select the Existing Softcopy Document.

02 Enter Subject / Reason and any Remarks explaining the cancellation.

03 Save Draft, check the selected record, and submit the proposal.

Synthetic example. Save Draft first, then Submit after checking the proposal.

Sample 03 · Cancel Softcopy — result

RECORDED RESULT: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

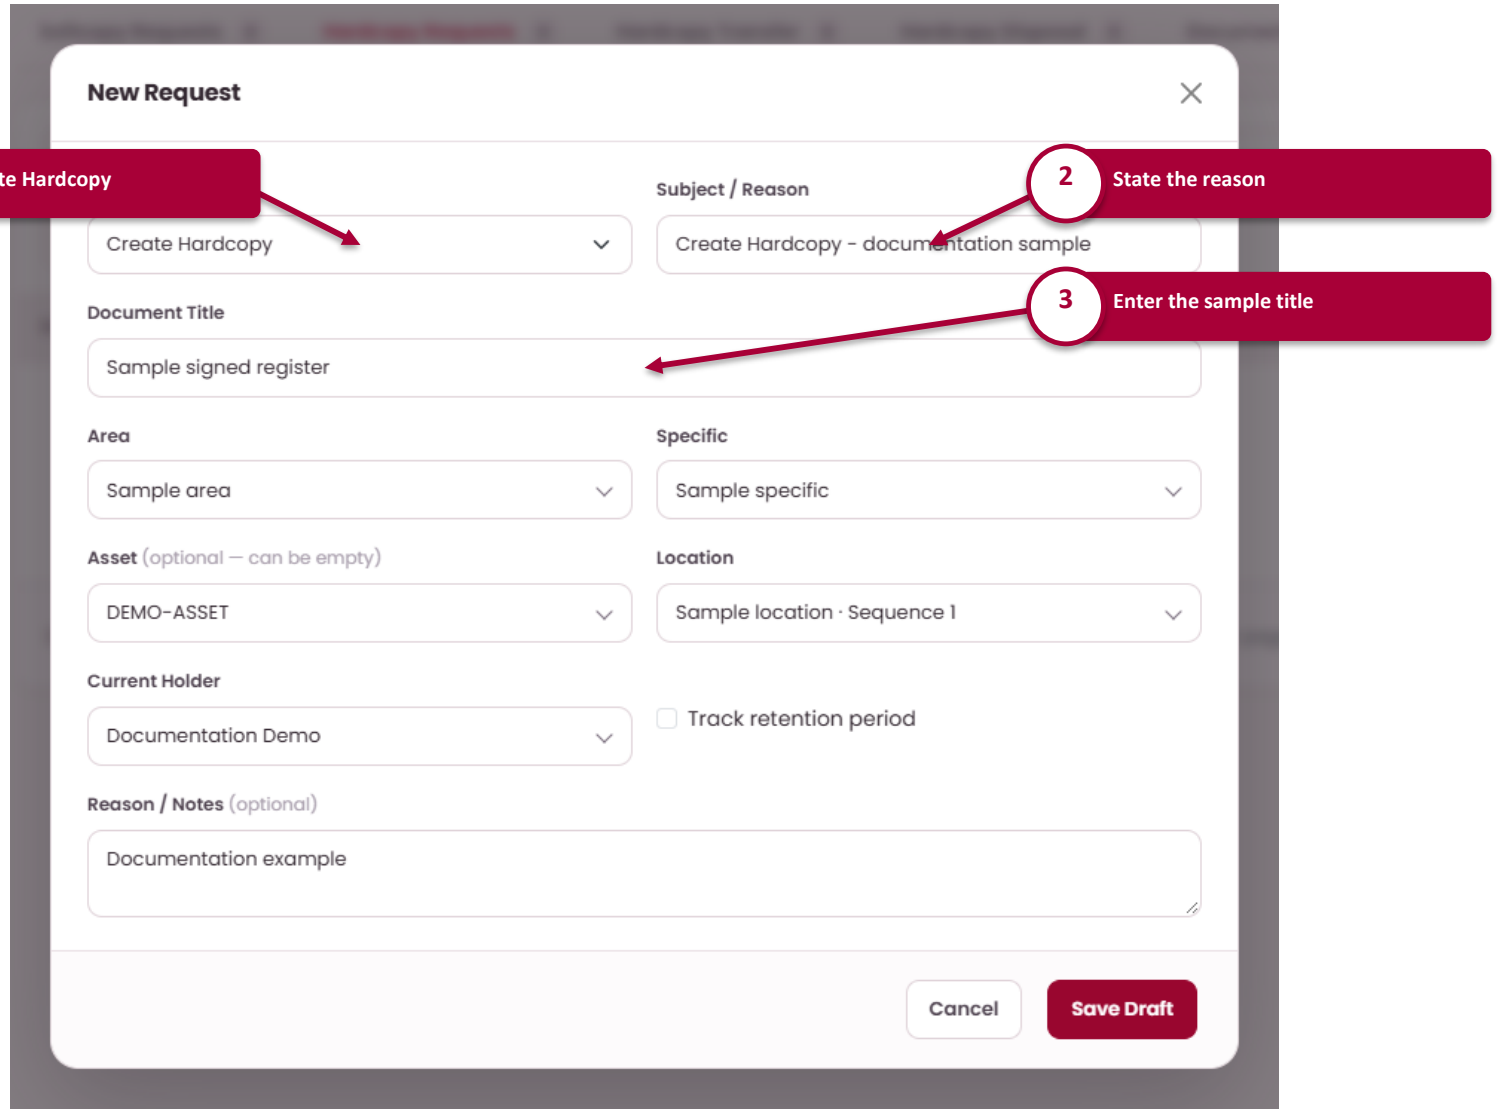

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The controlled softcopy is cancelled after final approval; use the Cancelled status filter to inspect it. The captured request status is Completed.

The screenshot shows the demonstrated result in the isolated sample workspace.

Sample 04 · Create Hardcopy

WORKED EXAMPLE

DEMONSTRATION INPUTS

Subject / Reason: Create Hardcopy - documentation sample

Document Title: Sample signed register

WHAT TO DO

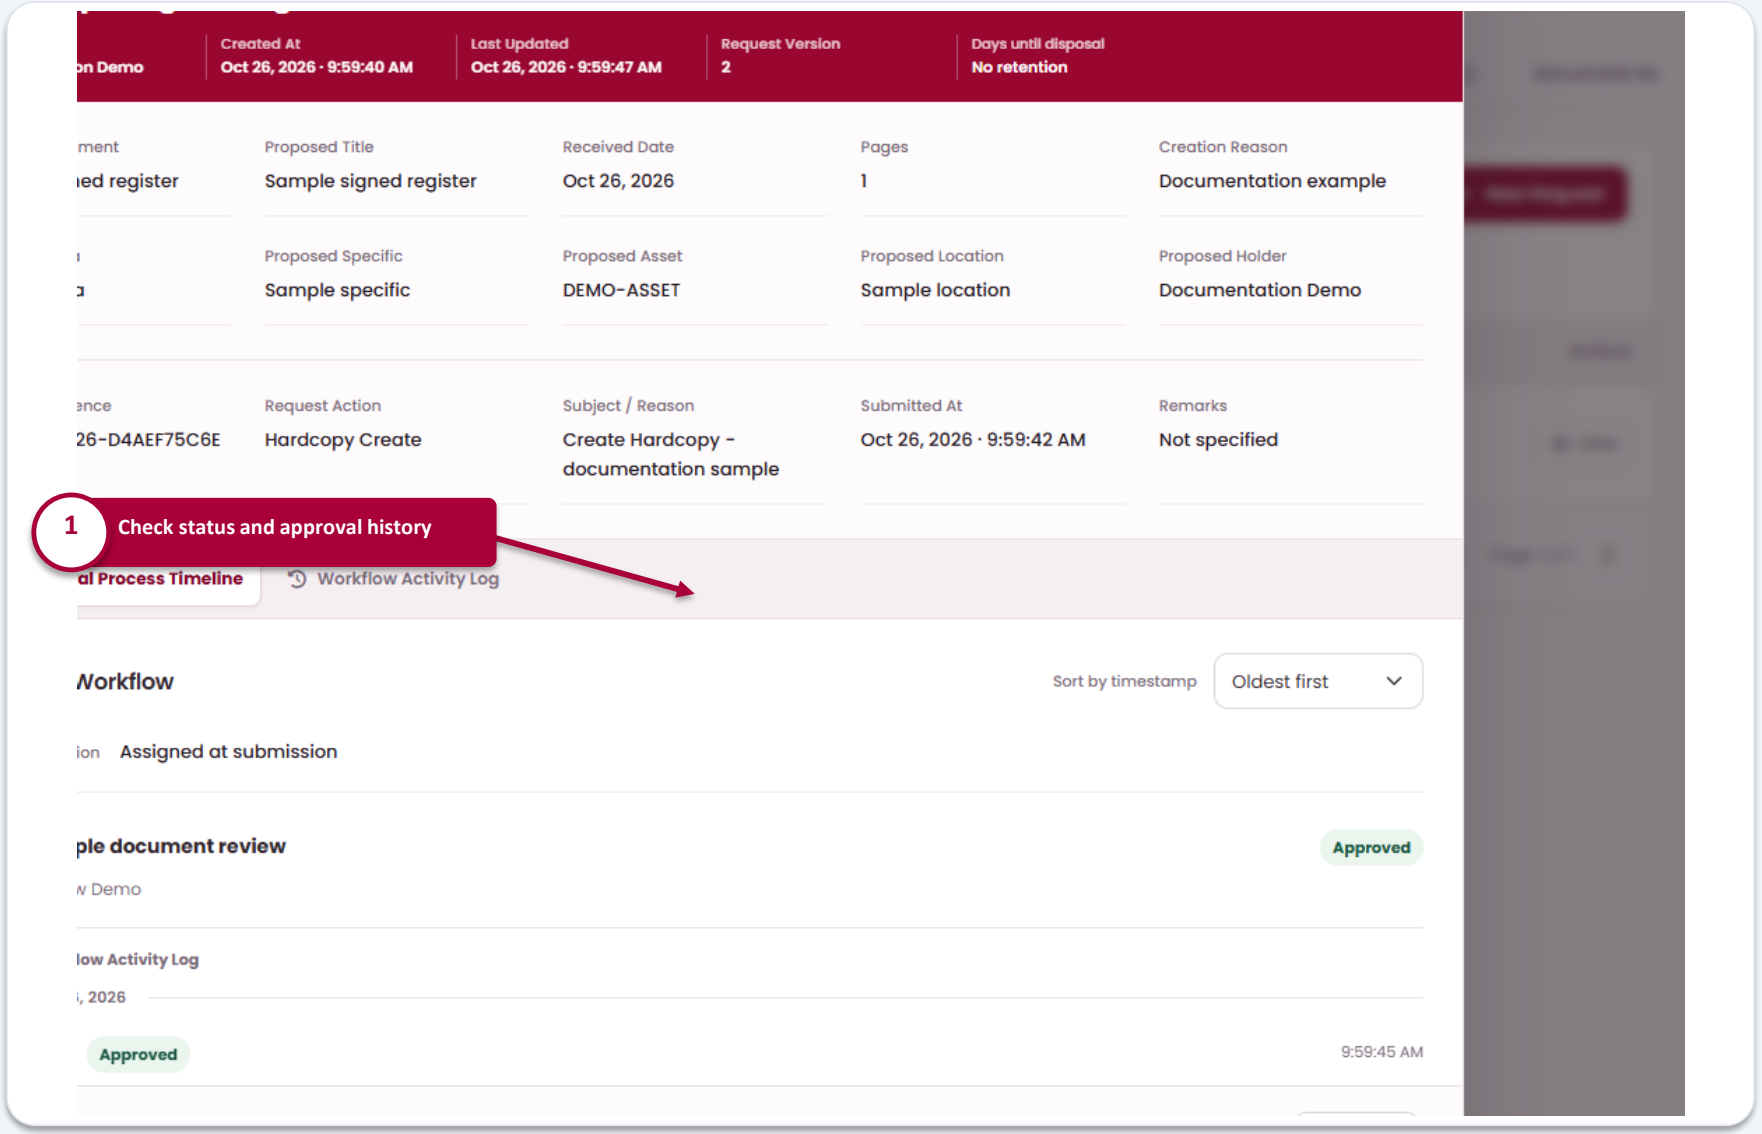

01 Choose Create and enter Subject / Reason and Document Title.

02 Select Area, Specific, optional Asset, Location, and check Current Holder.

03 Optionally enable retention monitoring, then enter both Start and End dates (End on/after Start). Add notes and Save Draft.

Synthetic example. Save Draft first, then Submit after checking the proposal.

Sample 04 · Create Hardcopy — result

RECORDED RESULT: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

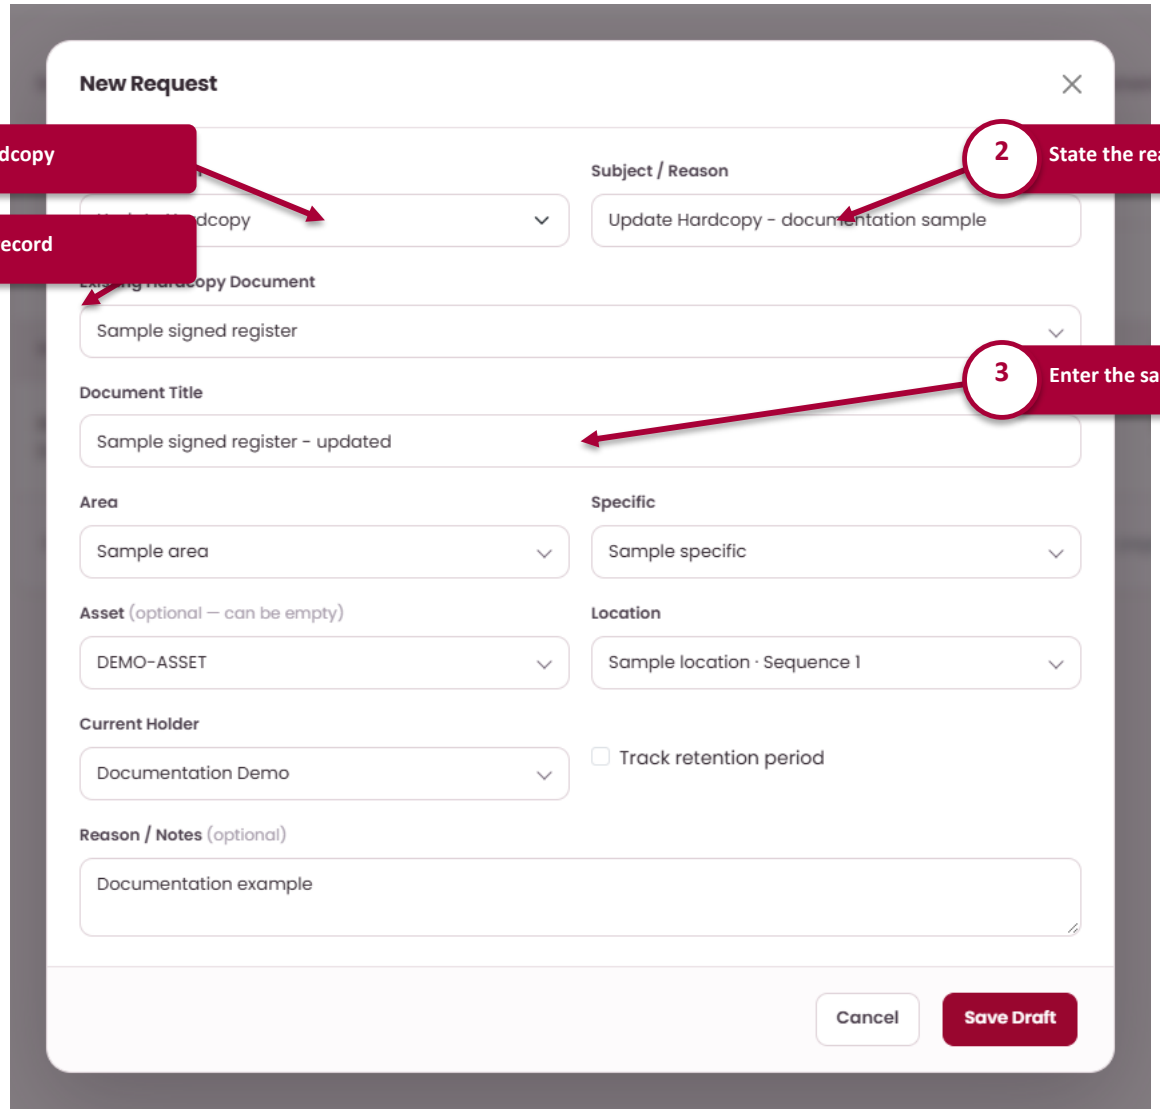

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The new hardcopy record appears with its approved storage hierarchy and holder. The captured request status is Completed.

The screenshot shows the demonstrated result in the isolated sample workspace.

Sample 05 · Update Hardcopy

WORKED EXAMPLE

DEMONSTRATION INPUTS

Subject / Reason: Update Hardcopy - documentation sample

Document Title: Sample signed register - updated

WHAT TO DO

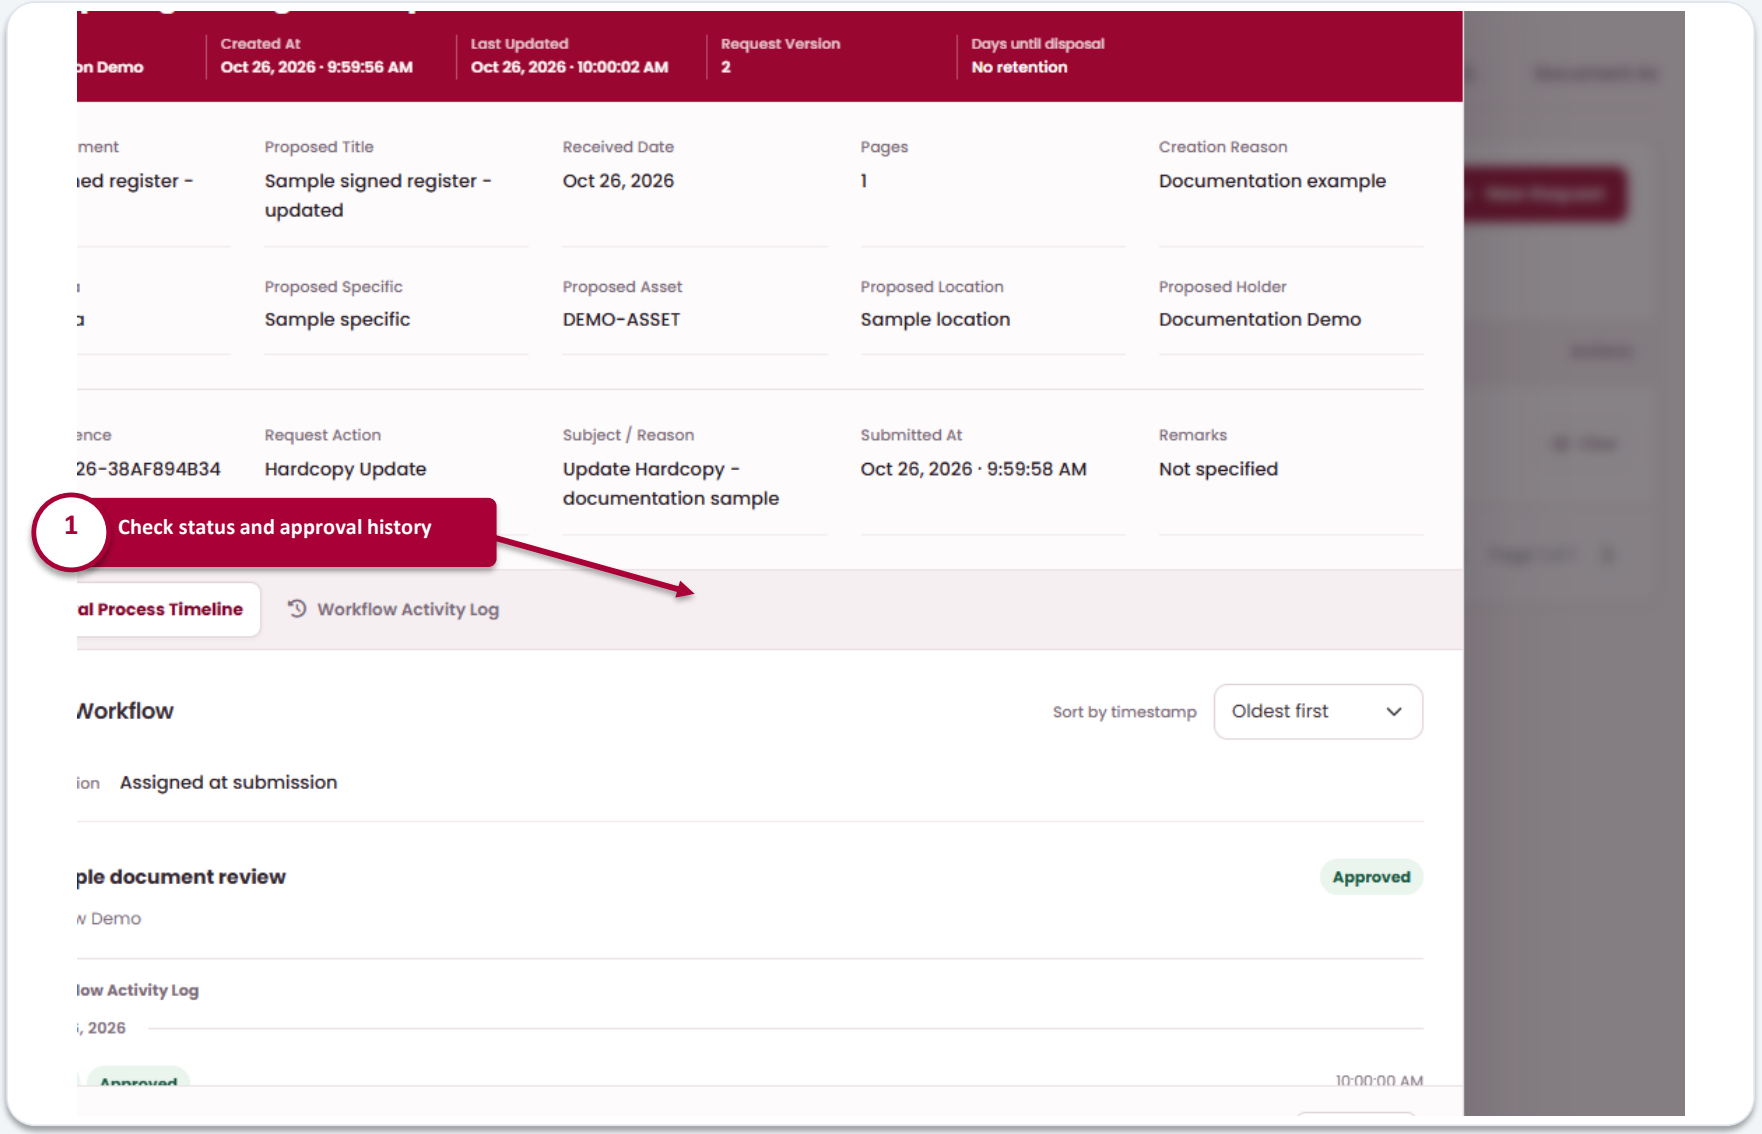

01 Choose Update and select the Existing Hardcopy Document.

02 Check Document Title, Area, Specific, optional Asset, Location, and Current Holder.

03 Update the intended metadata or retention information, then Save Draft.

Synthetic example. Save Draft first, then Submit after checking the proposal.

Sample 05 · Update Hardcopy — result

RECORDED RESULT: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

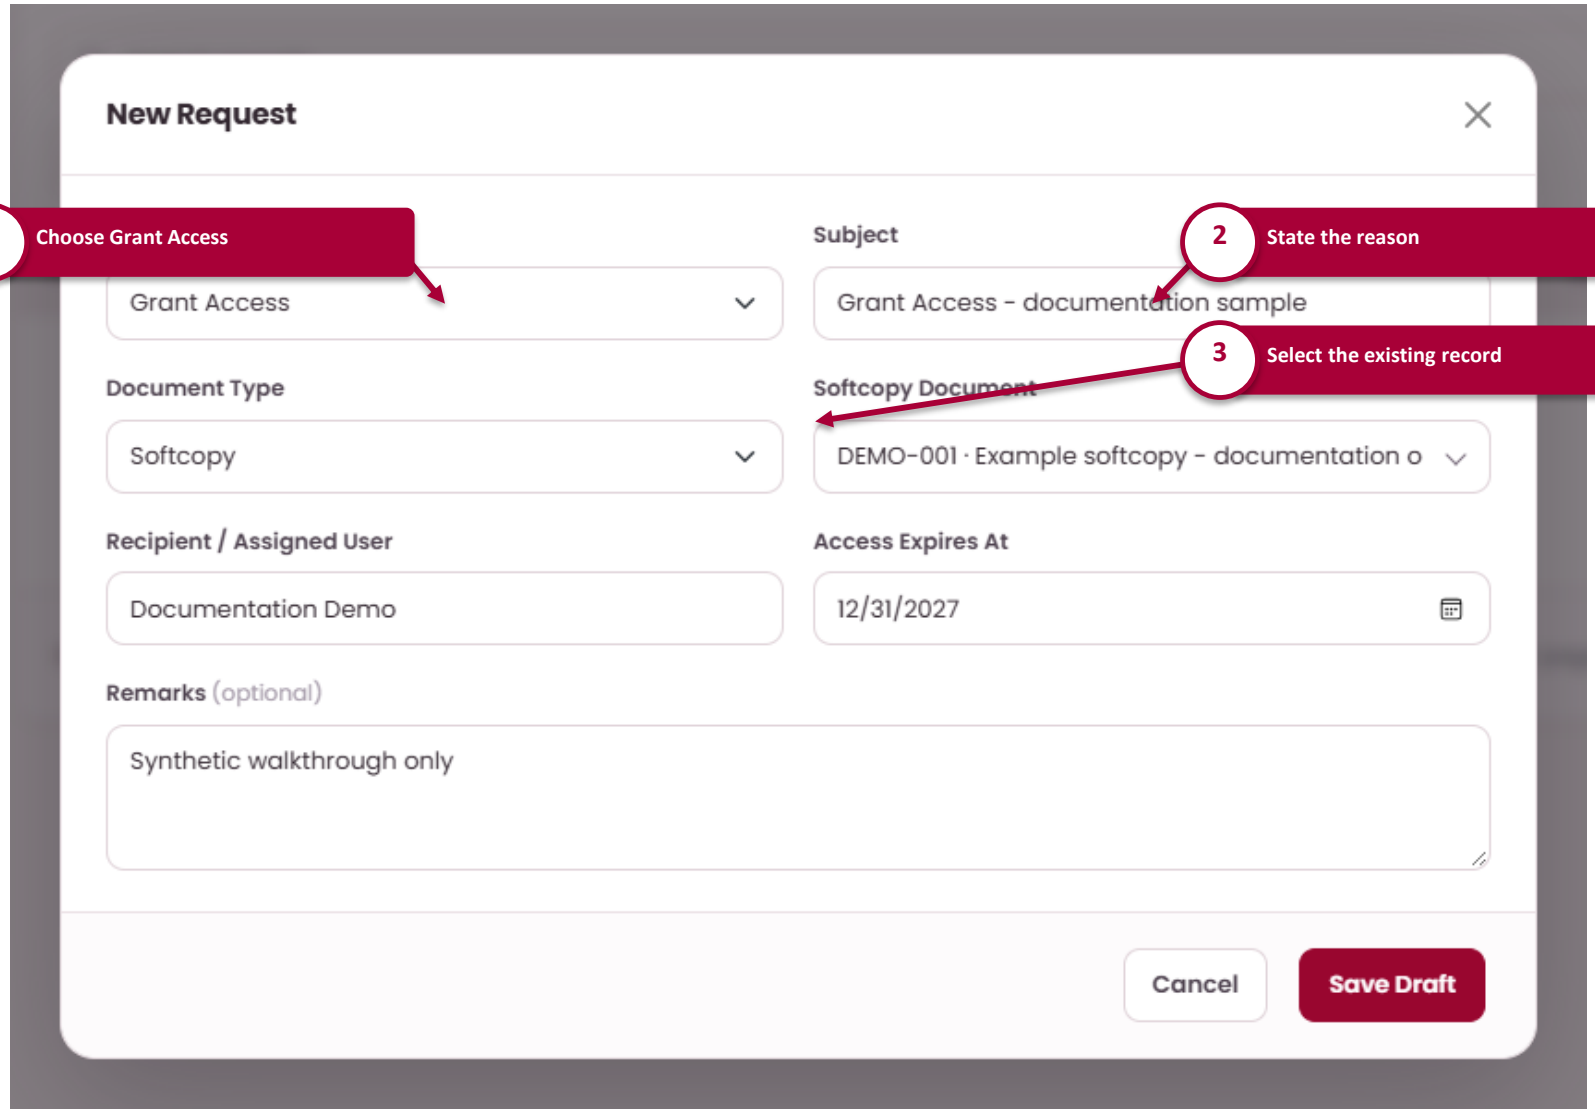

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The approved hardcopy metadata is applied; inspect the changed storage or retention fields. The captured request status is Completed.

The screenshot shows the demonstrated result in the isolated sample workspace.

Sample 06 · Grant Access

WORKED EXAMPLE

DEMONSTRATION INPUTS

Access Expires At: 2027-12-31

Selected document: Example softcopy - documentation only

Subject: Grant Access - documentation sample

WHAT TO DO

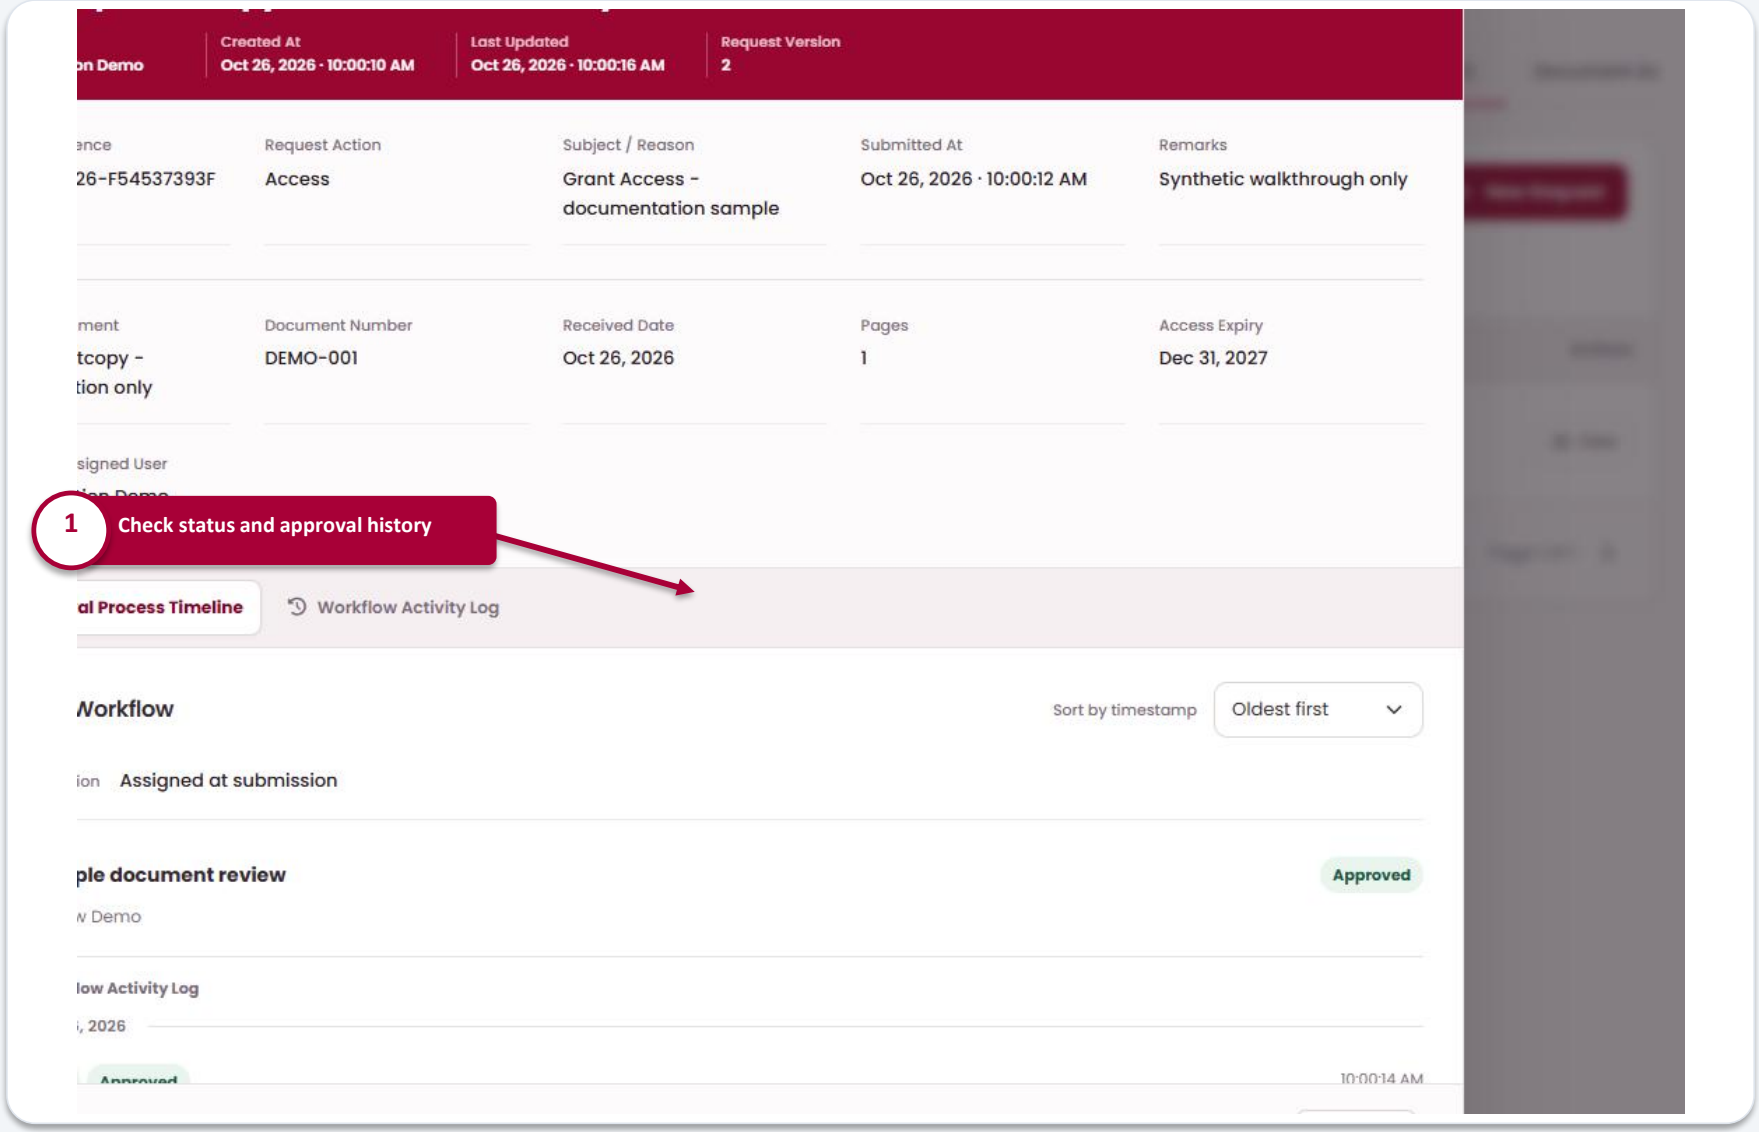

01 Choose Document Access Grants and enter Subject.

02 Choose Document Type, select the document, and check your read-only Recipient field.

03 Set Access Expires At, add optional Remarks, then Save Draft.

Synthetic example. Save Draft first, then Submit after checking the proposal.

Sample 06 · Grant Access — result

RECORDED RESULT: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

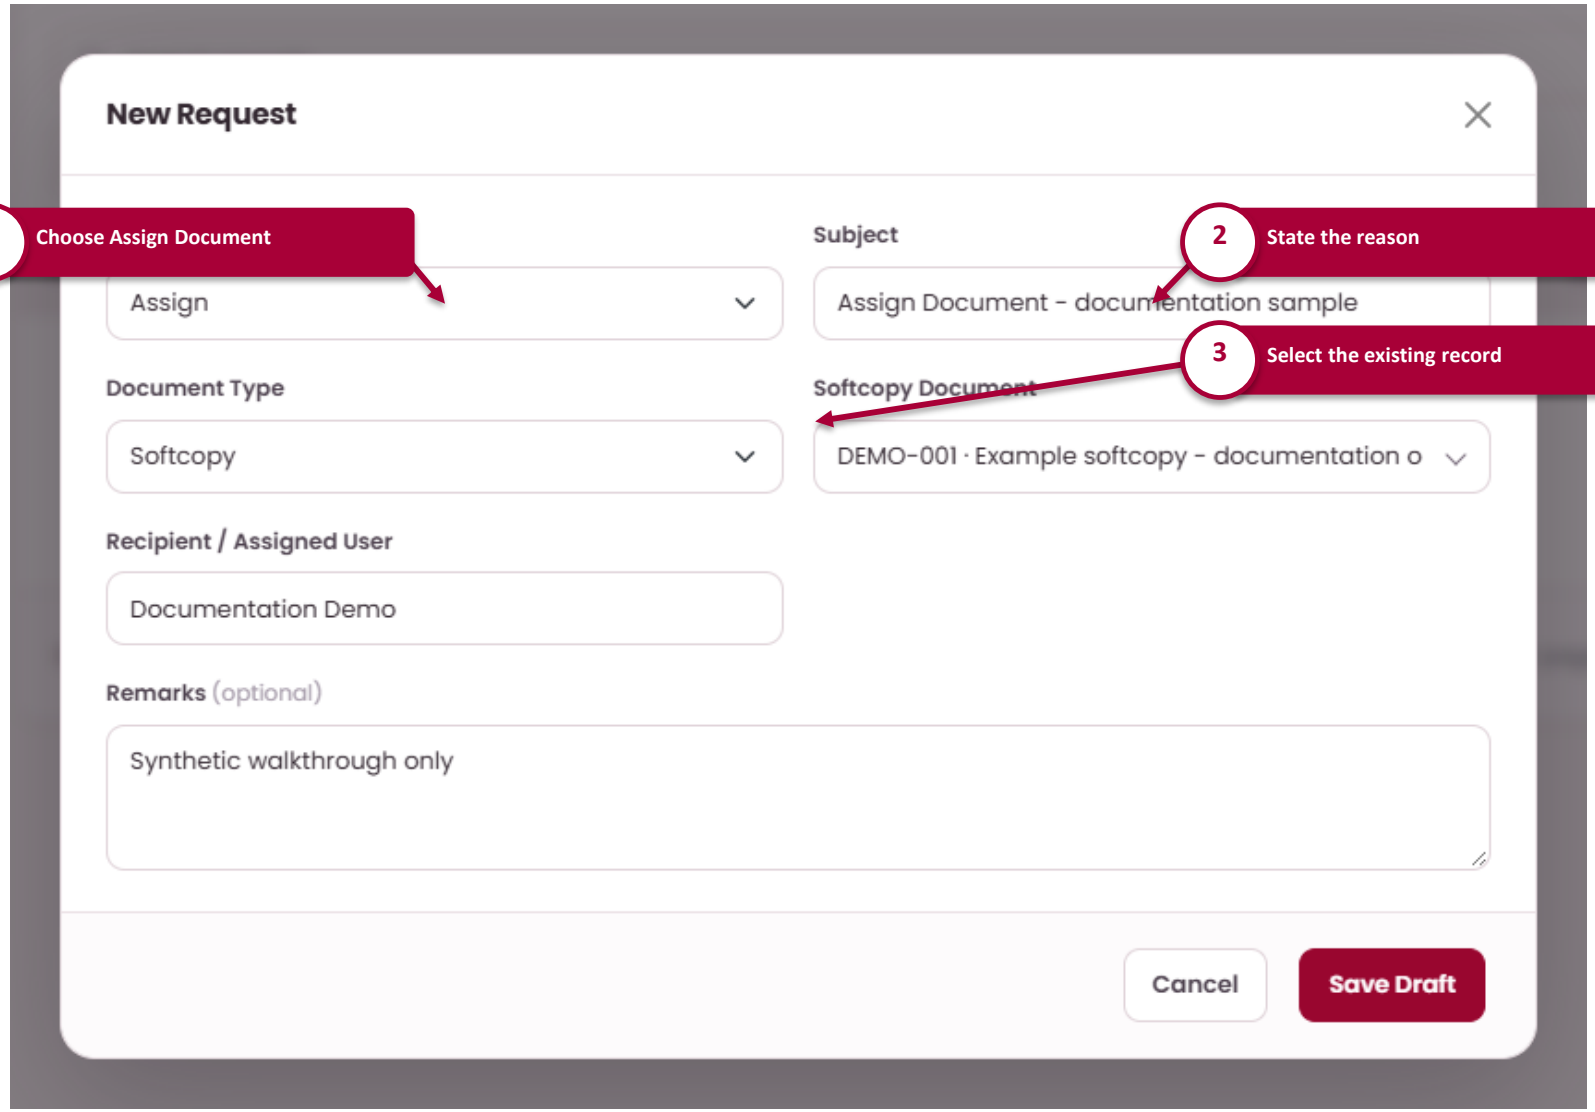

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The approved access grant applies to the selected document and the signed-in recipient until its expiry. The captured request status is Completed.

The screenshot shows the demonstrated result in the isolated sample workspace.

Sample 07 · Assign Document

WORKED EXAMPLE

DEMONSTRATION INPUTS

Selected document: Example softcopy - documentation only

Subject: Assign Document - documentation sample

WHAT TO DO

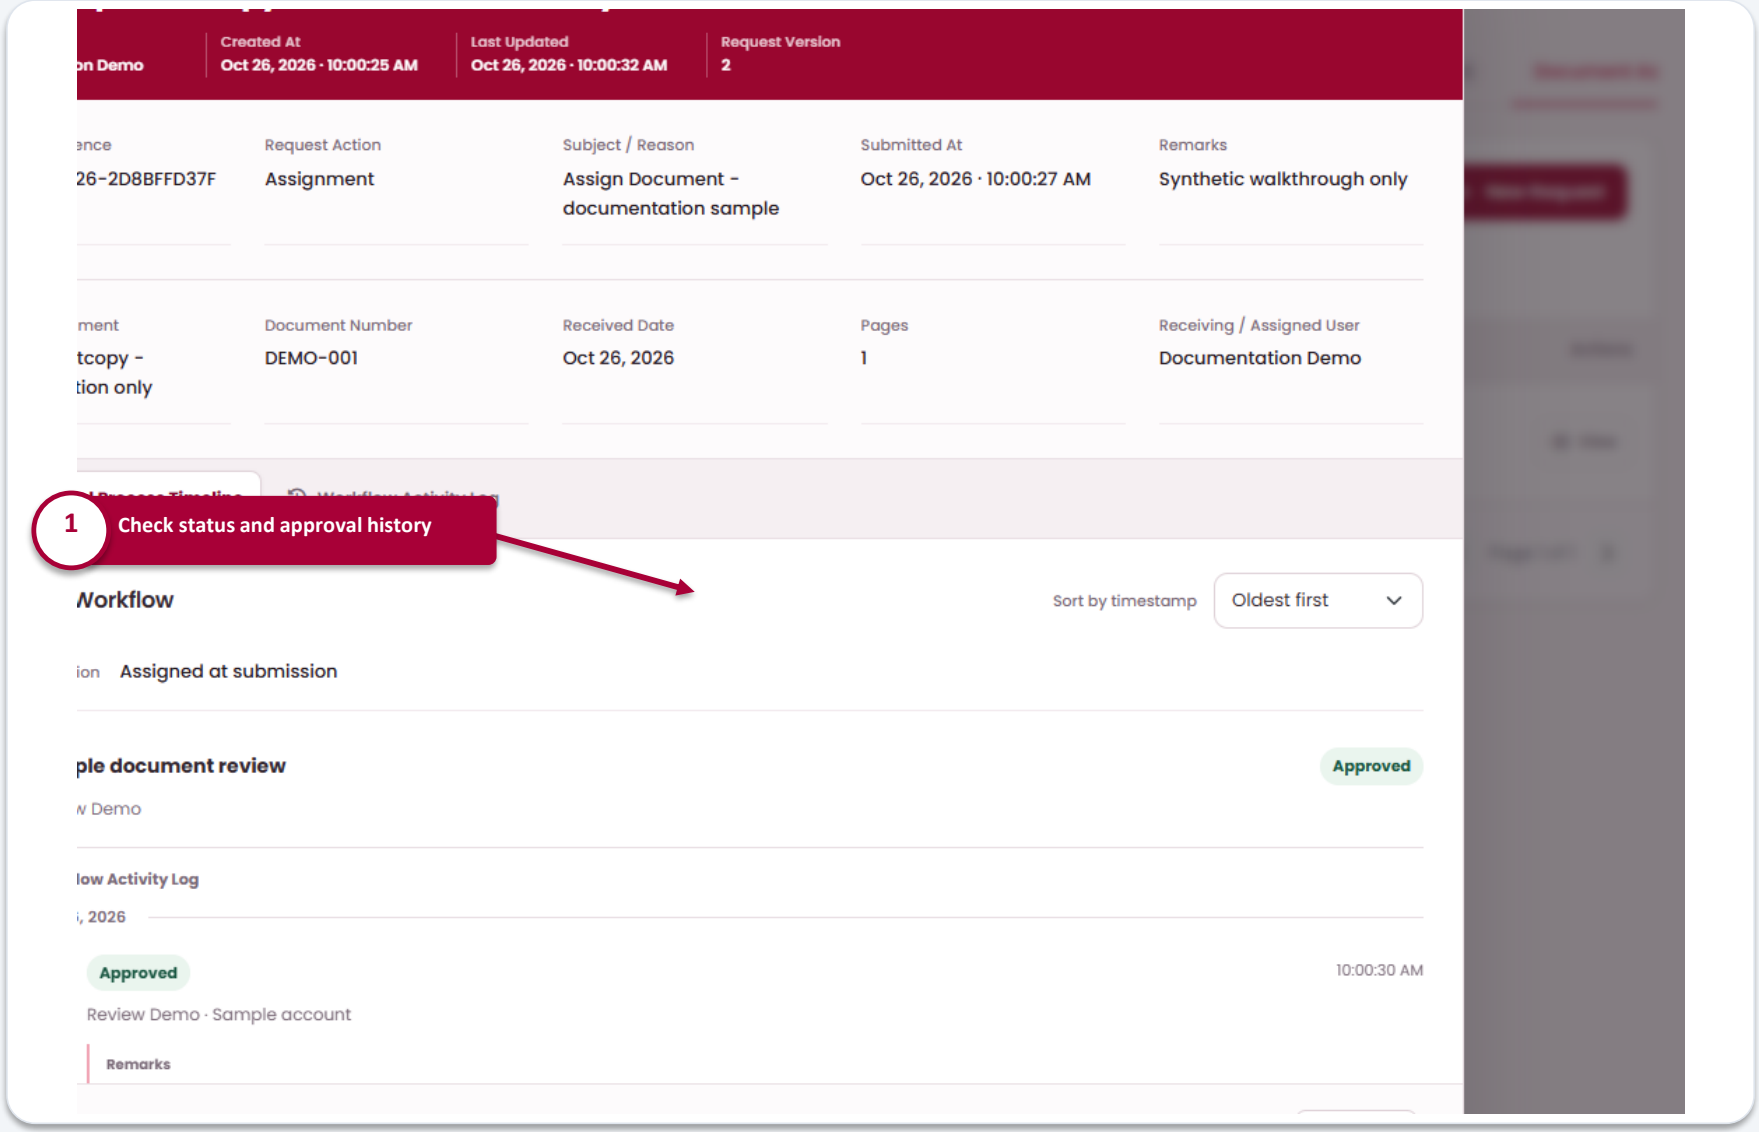

01 Choose Document Assignments and enter Subject.

02 Choose Document Type and select the document to be assigned to you.

03 Check your read-only Recipient / Assigned User, add optional Remarks, then Save Draft.

Synthetic example. Save Draft first, then Submit after checking the proposal.

Sample 07 · Assign Document — result

RECORDED RESULT: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

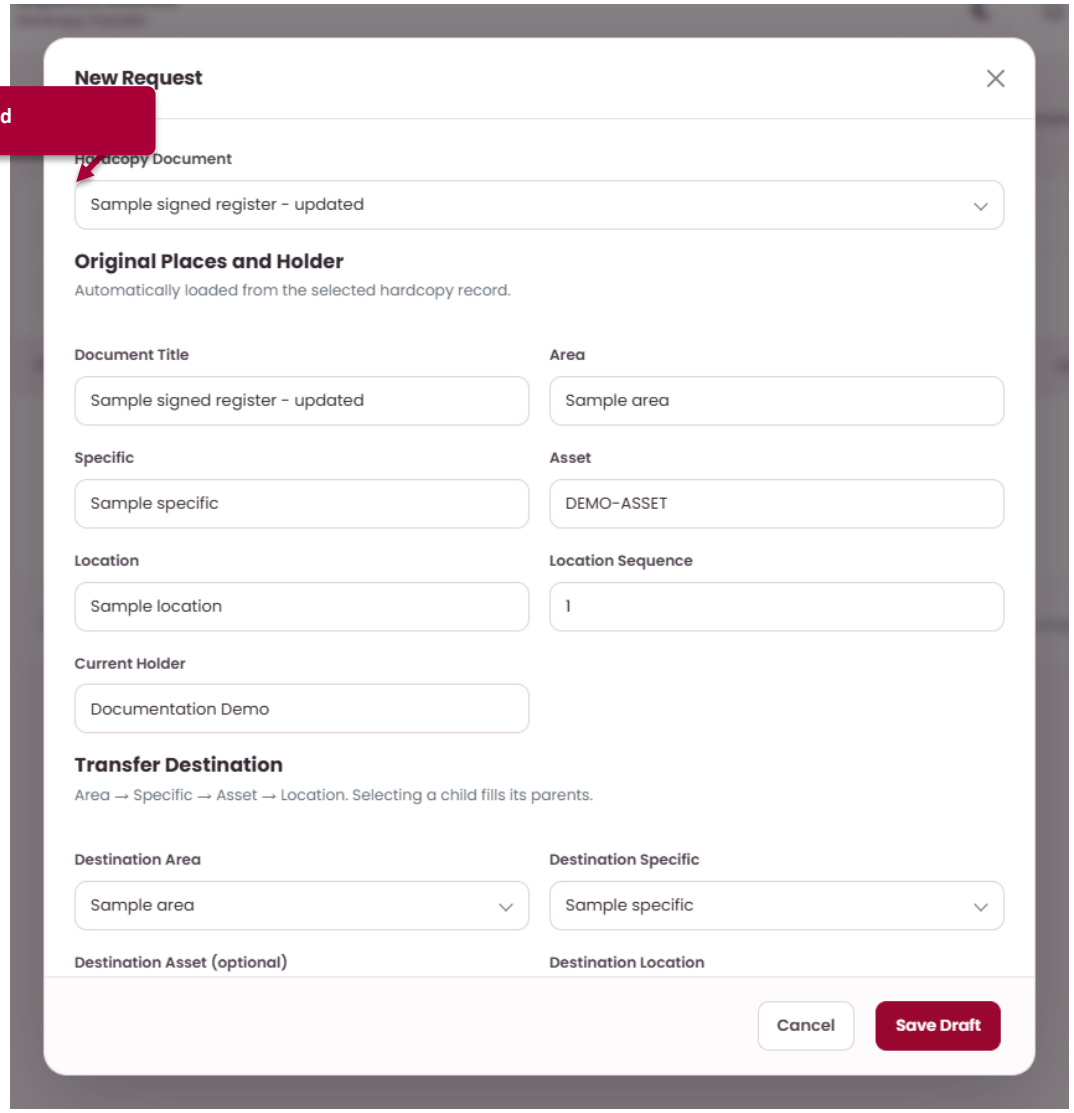

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The approved assignment applies to the selected document and signed-in recipient. The captured request status is Completed.

The screenshot shows the demonstrated result in the isolated sample workspace.

Sample 08 · Transfer Hardcopy

WORKED EXAMPLE

DEMONSTRATION INPUTS

Location: Sample receiving location

Hardcopy Document: Sample signed register - updated

Receiving User: Receiver Demo

Request Subject: Transfer Hardcopy - documentation sample

WHAT TO DO

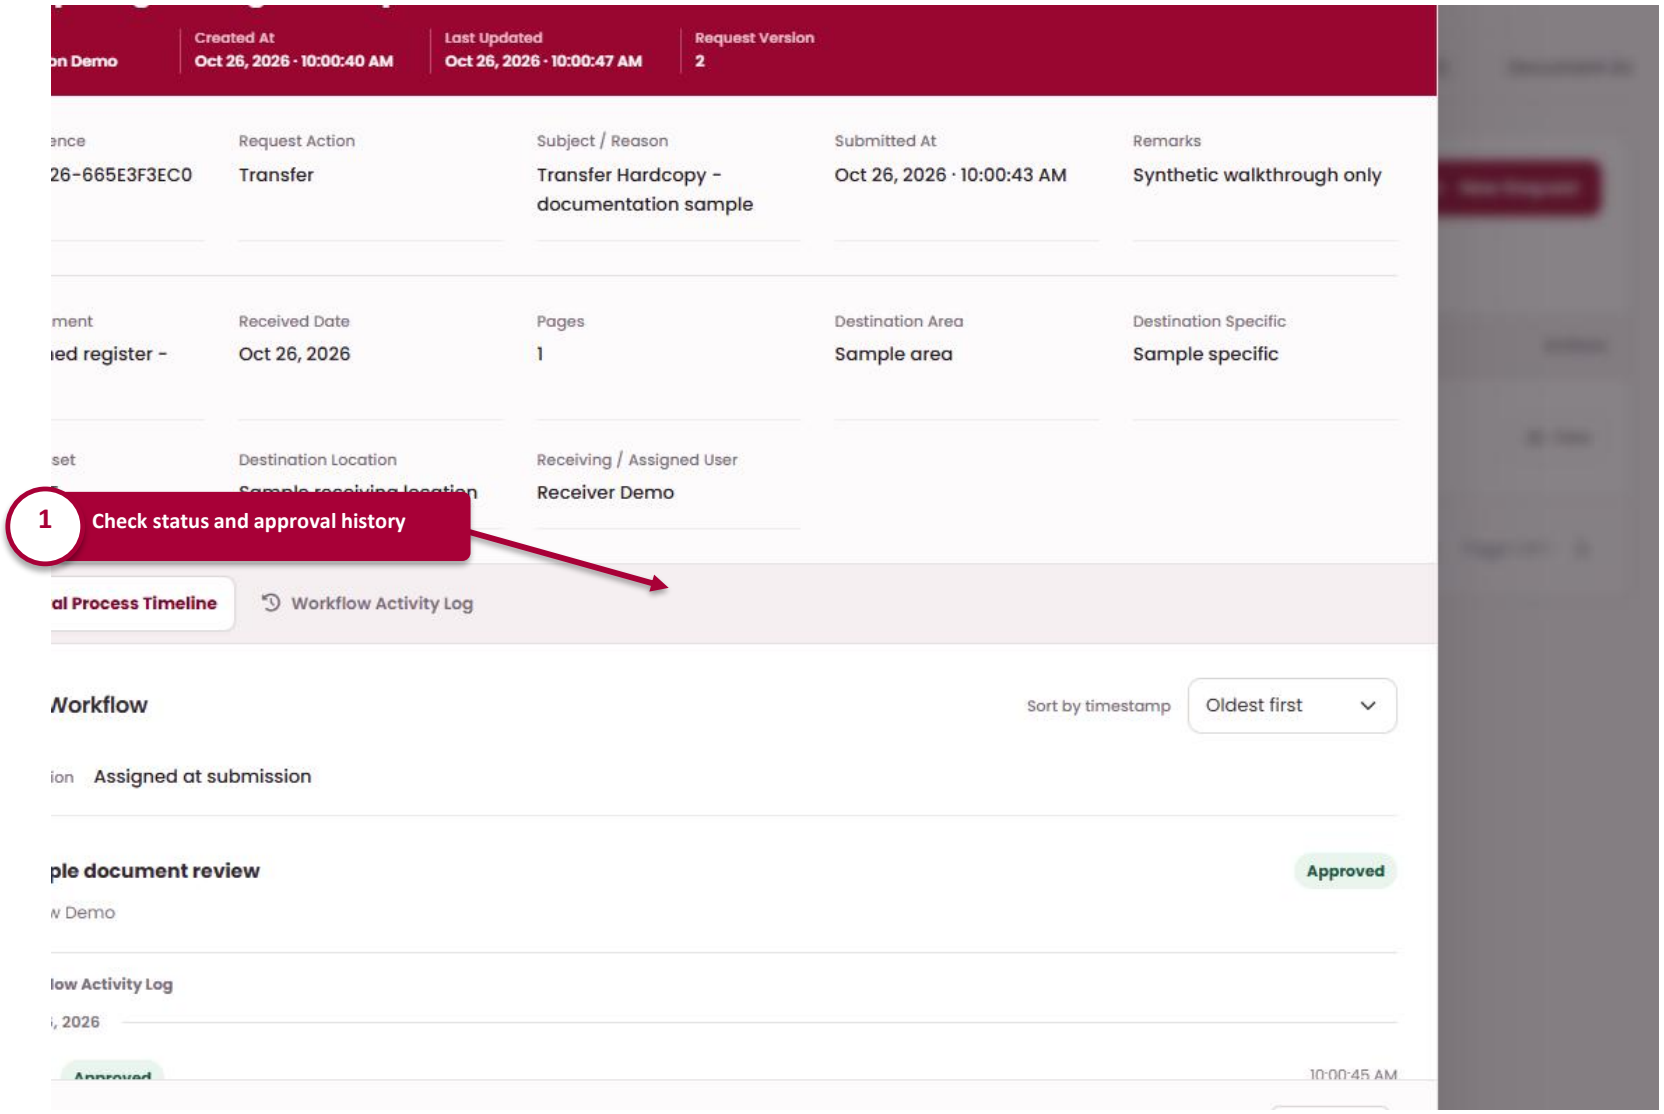

01 Select the Hardcopy Document and check Original Places and Holder.

02 Choose the destination hierarchy and Receiving User; destination must differ from the original.

03 Enter Request Subject and optional Remarks, then Save Draft.

Synthetic example. Save Draft first, then Submit after checking the proposal.

Sample 08 · Transfer Hardcopy — result

RECORDED RESULT: APPROVED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

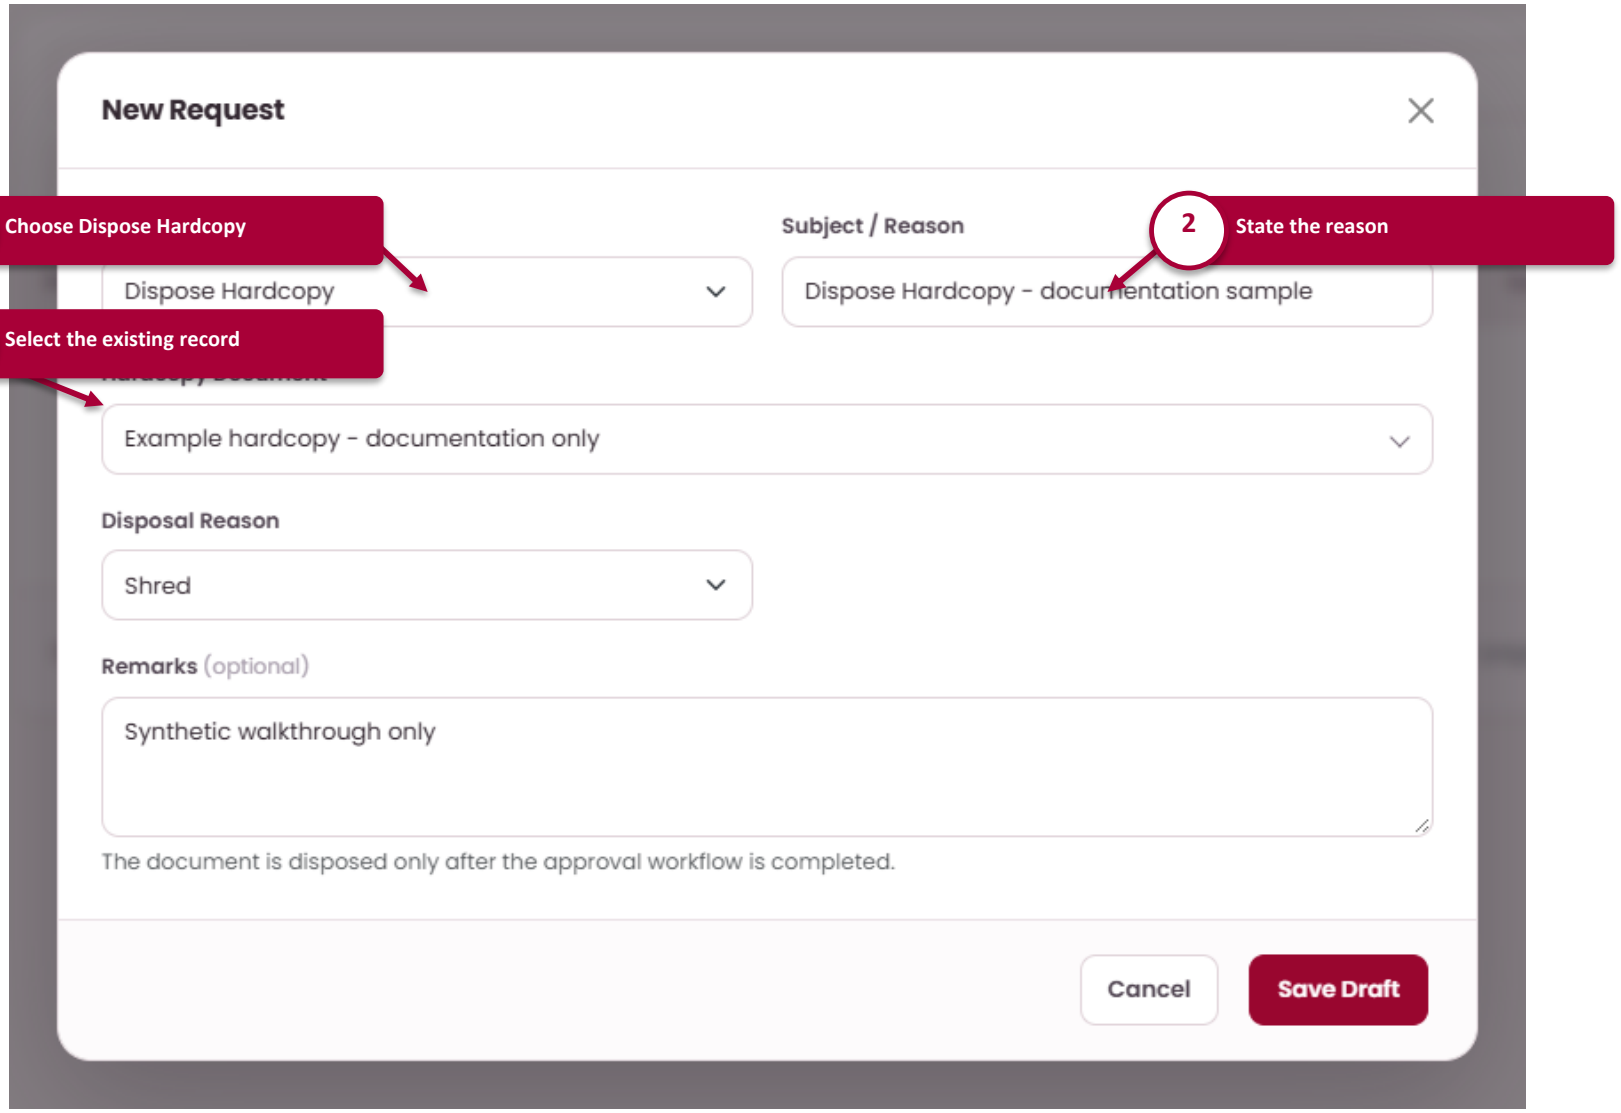

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 Approval creates the handoff work. Complete Dispatch and recipient Accept before treating the physical transfer as received. The captured request status is Approved.

The screenshot shows the demonstrated result in the isolated sample workspace.

Sample 09 · Dispose Hardcopy

WORKED EXAMPLE

DEMONSTRATION INPUTS

Subject / Reason: Dispose Hardcopy - documentation sample

Disposal Reason: Shred

Hardcopy Document: Example hardcopy - documentation only

WHAT TO DO

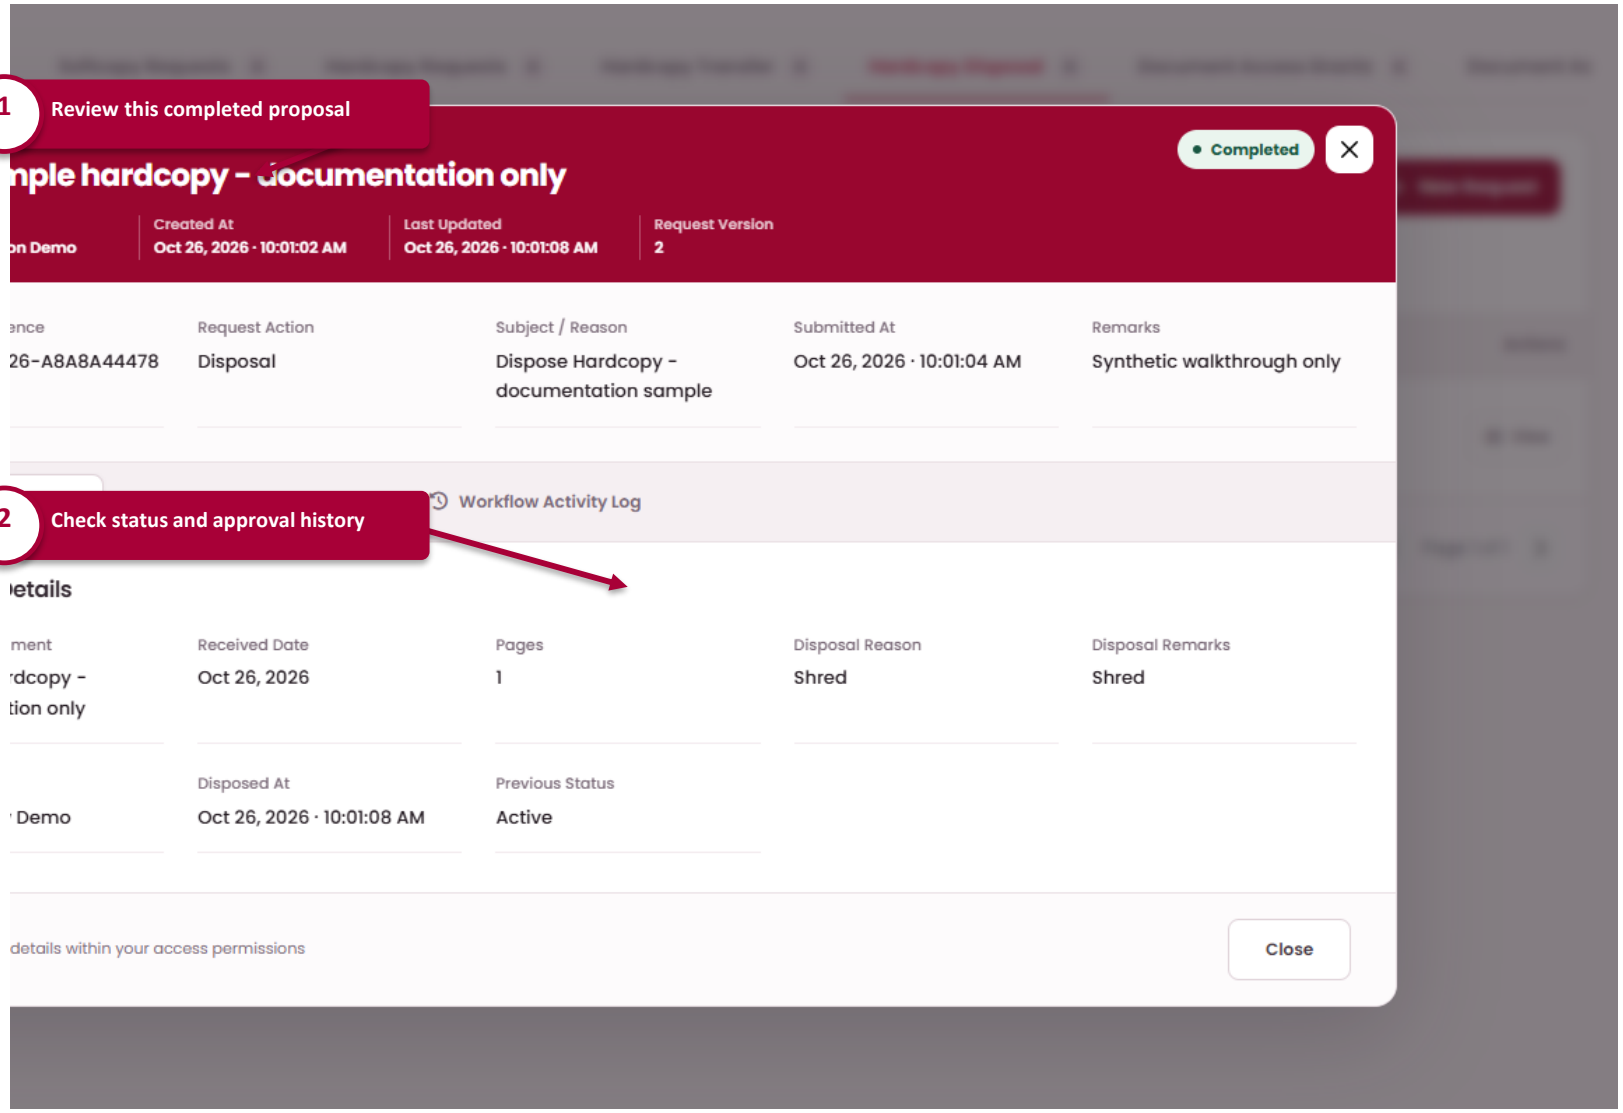

01 Choose Hardcopy Disposal, enter Subject / Reason, and select the document.

02 Choose Disposal Reason: Shred, Scratch, or Other. Complete Other Reason if selected.

03 Add optional Remarks, Save Draft, then review and submit the proposal.

Synthetic example. Save Draft first, then Submit after checking the proposal.

Sample 09 · Dispose Hardcopy — result

RECORDED RESULT: COMPLETED

WHAT TO DO

01 Open the saved draft and verify the selected document, fields, and attachment where required.

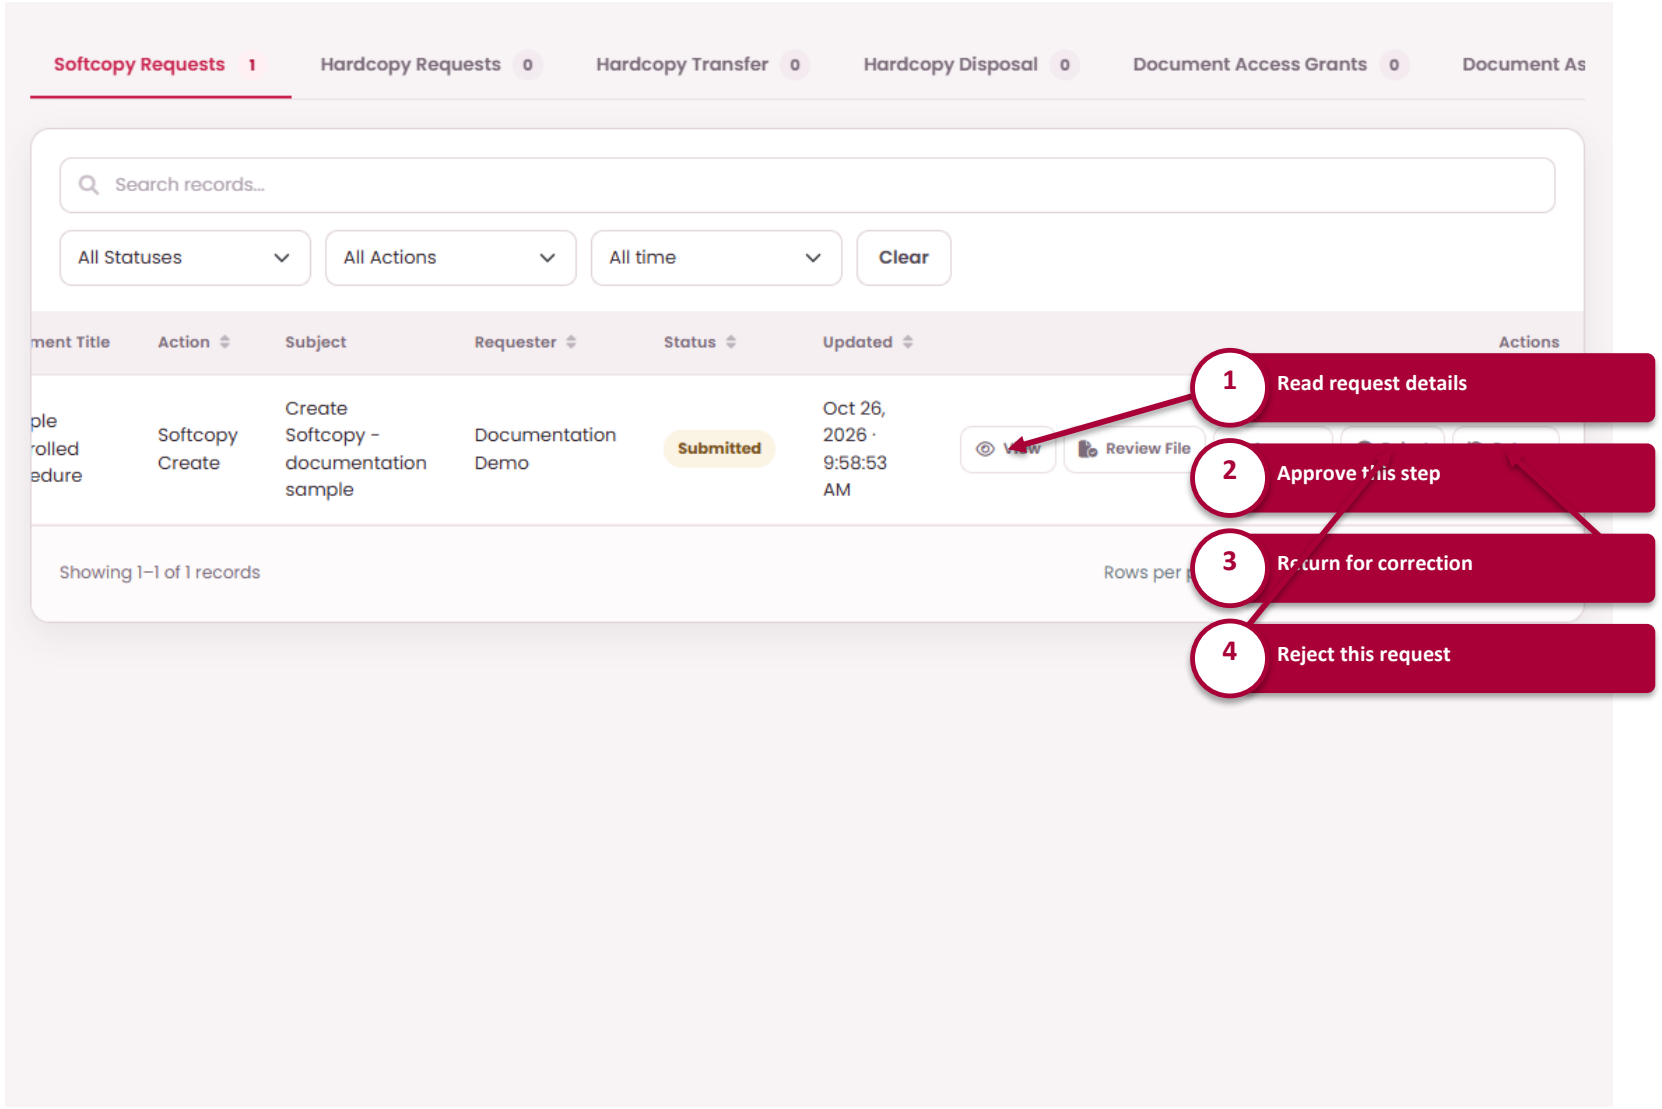

02 Select Submit, read the shared confirmation, and select Confirm. The request enters its published approval route.

03 The assigned approver opens My Tasks, reviews the proposal, and selects Approve → Confirm at each required step.

04 The record becomes Disposed; inspect Disposal Details and the selected reason in the document register. The captured request status is Completed.

The screenshot shows the demonstrated result in the isolated sample workspace.

Review and decide approval tasks

WHAT TO DO

01 Open My Tasks, choose a category, and open the assigned request's View details.

02 Read the proposal, Approval Process Timeline, and Workflow Activity Log; use Review File for an attached softcopy.

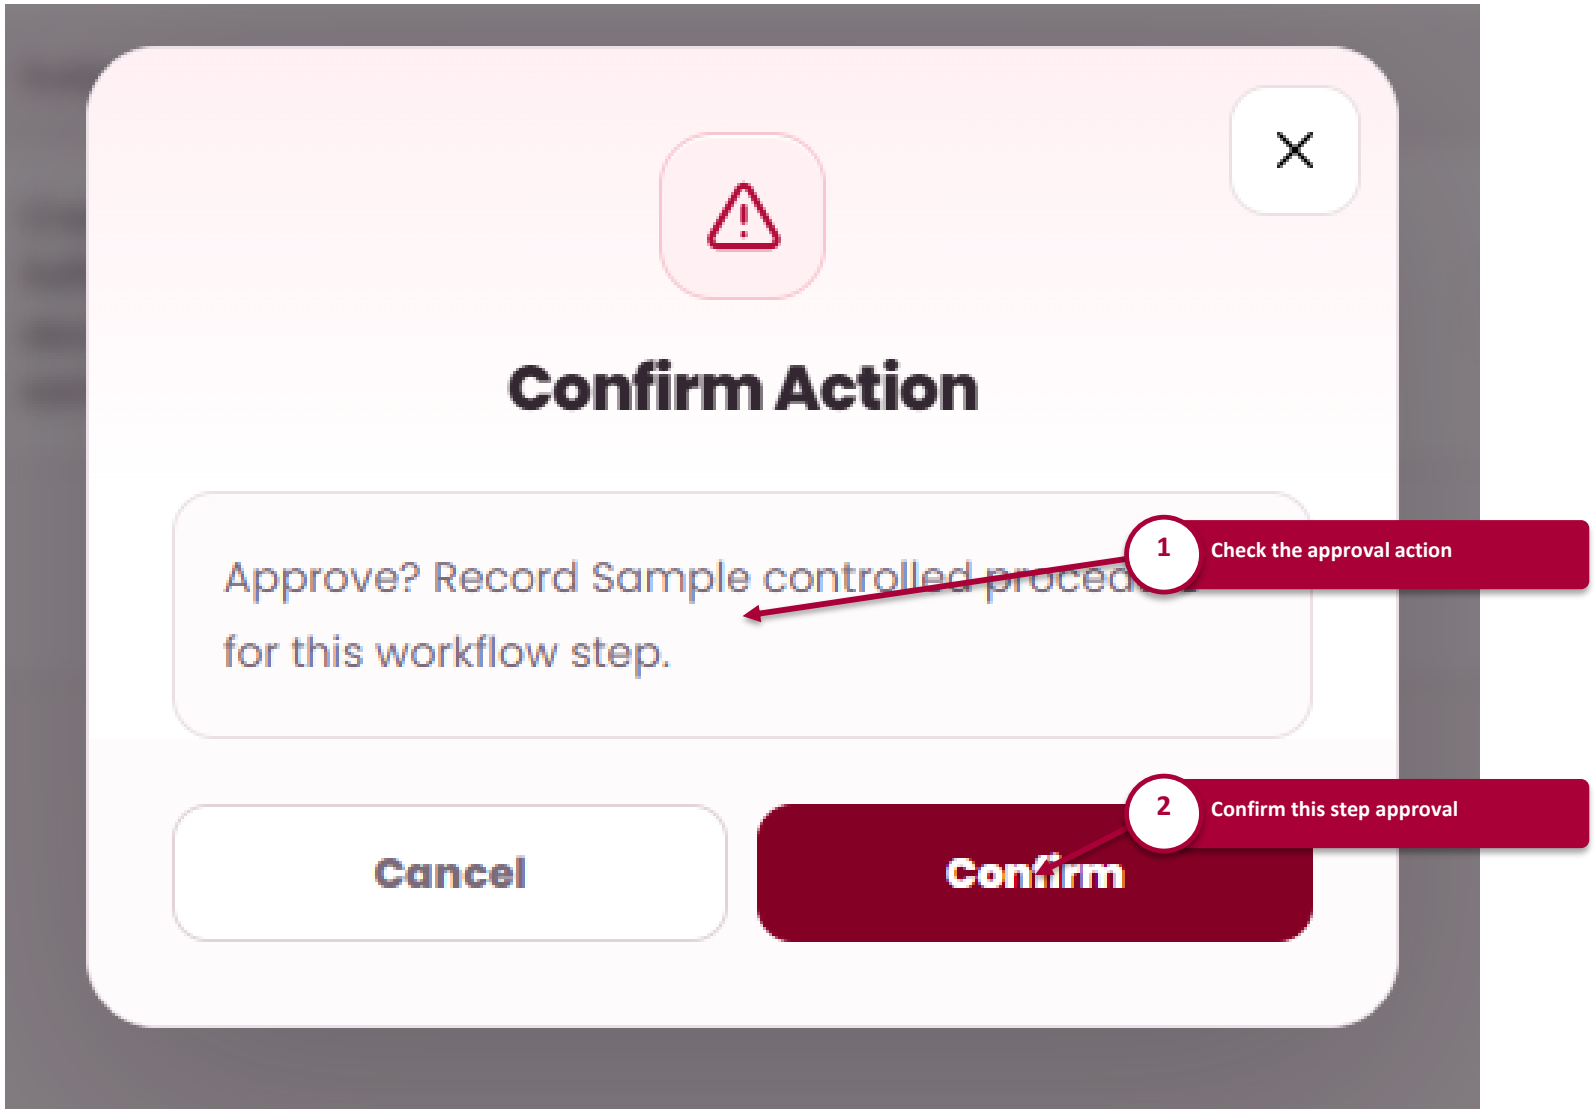

03 Choose Approve → Confirm to move the current step forward.

04 Choose Return or Reject, enter an optional Remark, then Continue to record the decision.

05 Inspect the updated timeline. Return at step one sends to the requester; later-step Return reactivates the previous approver.

Only the currently assigned approver, or an authorized member of the assigned role, may decide.

Approve the active workflow step

WHAT TO DO

01 Open the assigned request in My Tasks and inspect the proposal and file.

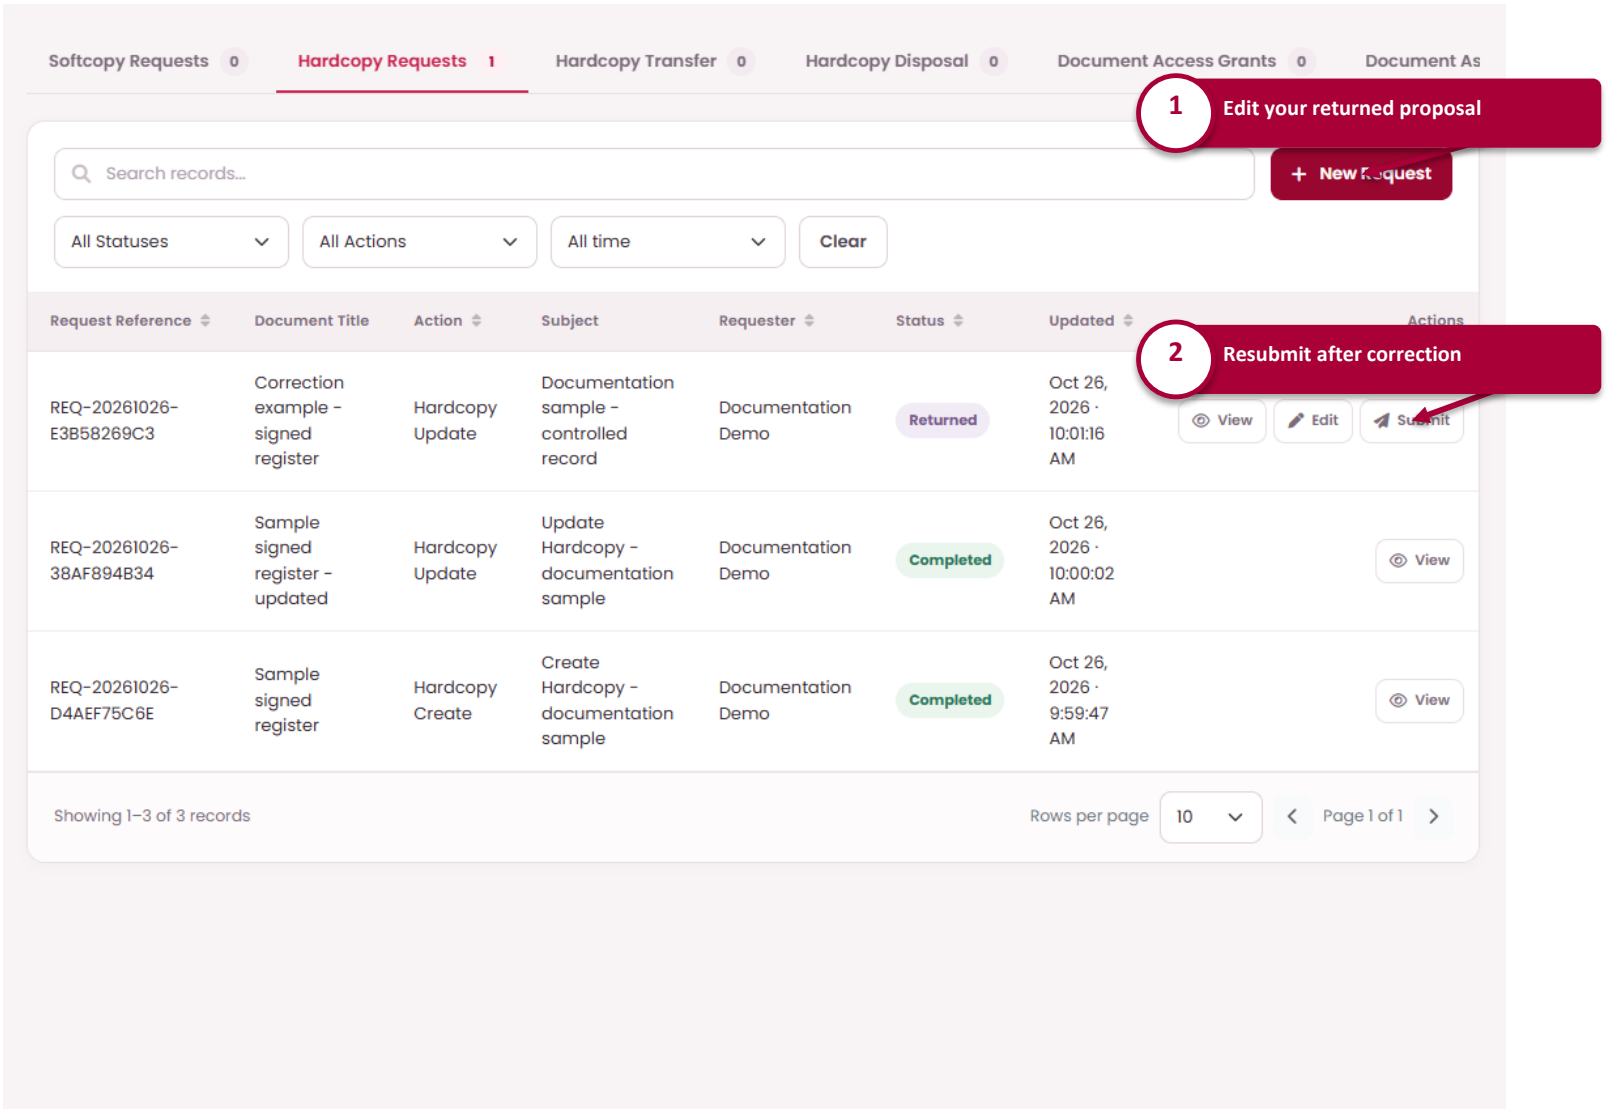

02 Select Approve for the active task.

03 Read the shared confirmation and select Confirm.

04 Check the next step or completed result in the Approval Process Timeline.

Approve uses Confirm directly. It does not open a remark form.

Return from the first approval step

WHAT TO DO

01 At the first active step, select Return.

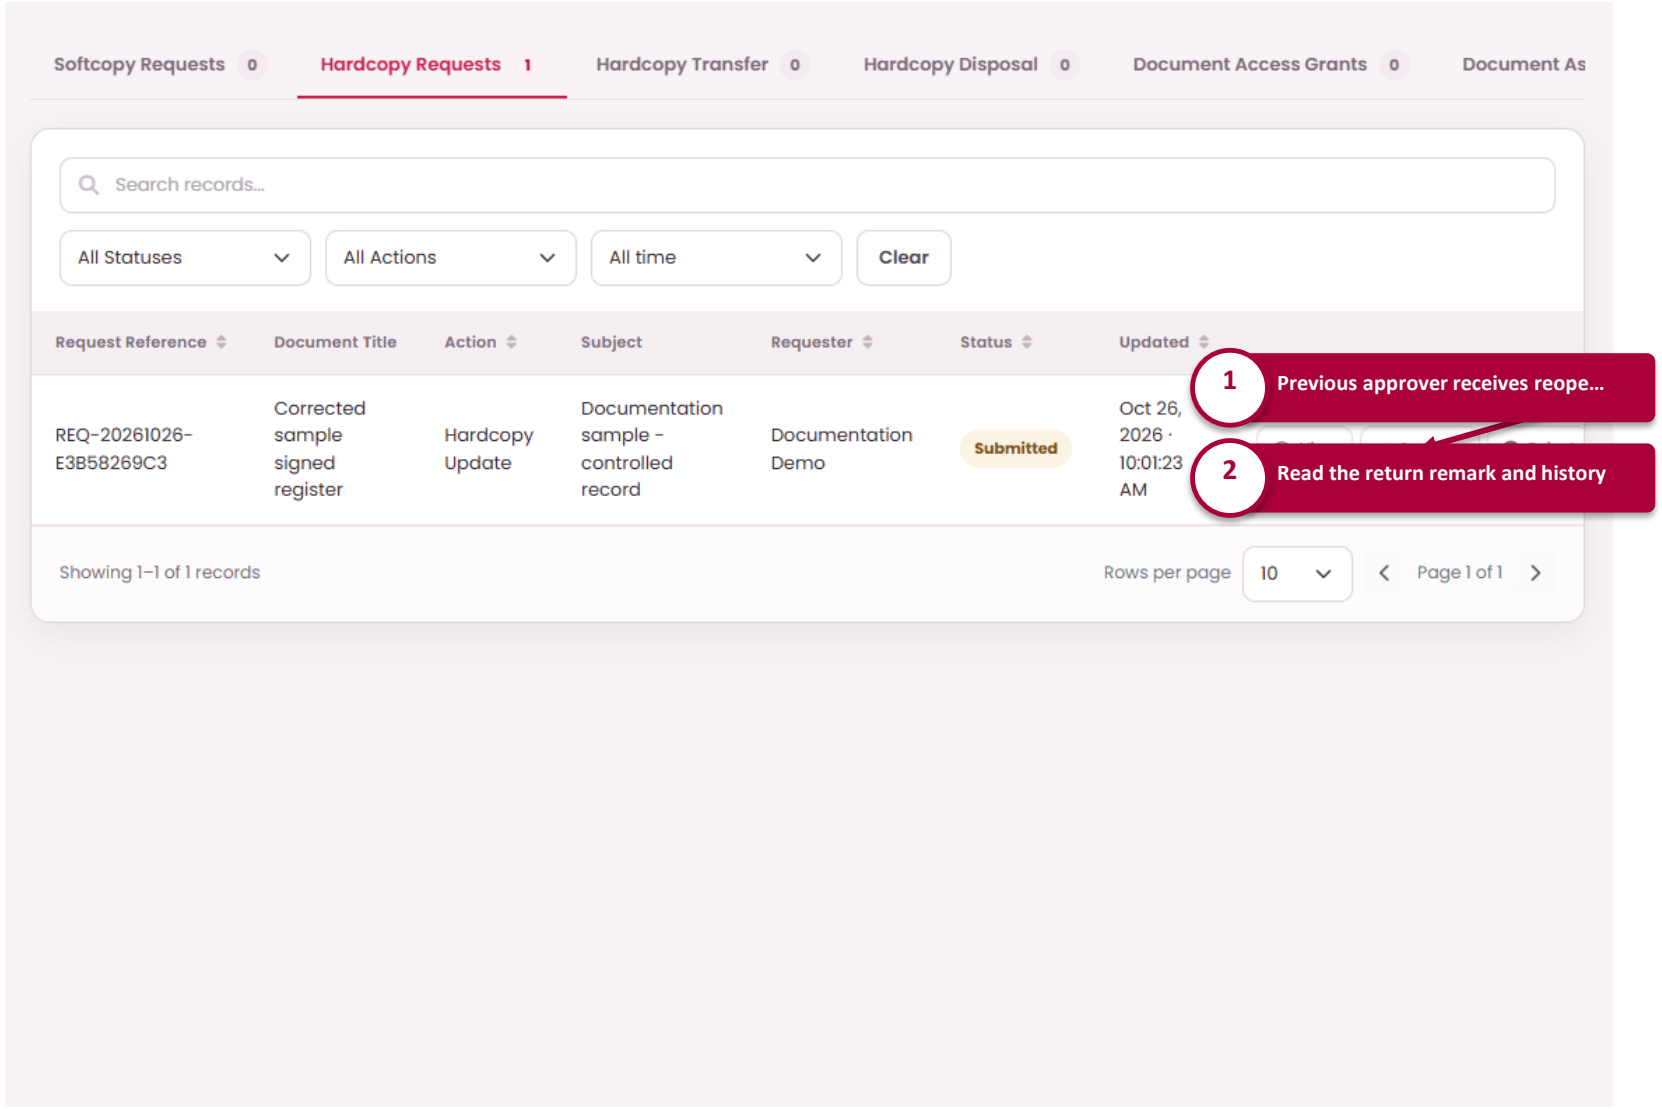

02 Enter an optional Remark explaining what needs attention.

03 Select Continue. This records the Return decision.

04 The request becomes Returned to its requester, who may edit, save, and resubmit it.

Continue in the Return dialog is the confirmation; no second Confirm dialog follows.

Return from a later approval step

WHAT TO DO

01 Select Return when an earlier review needs to be reconsidered.

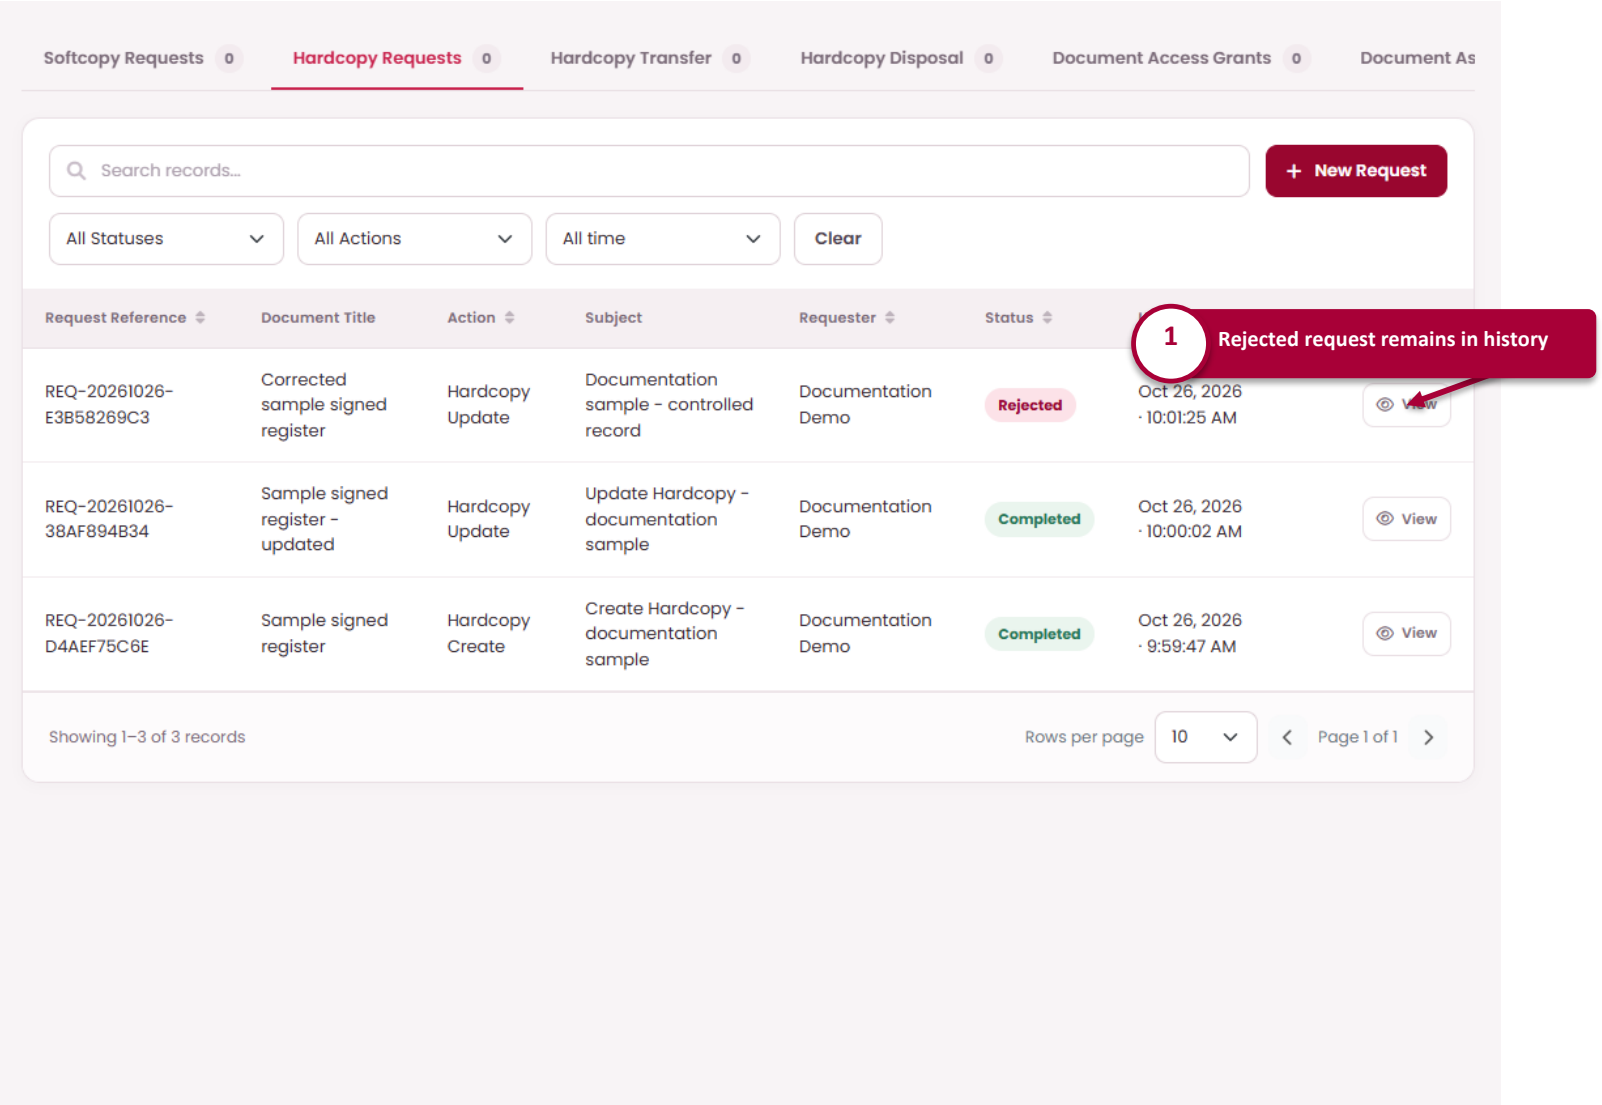

02 Add an optional Remark and select Continue.

03 The immediately previous approver becomes active again.

04 After that approver approves again, the request returns to the step that returned it.

A later-step Return keeps the request Submitted; it does not send an editable draft to the requester.

Reject a proposal

WHAT TO DO

01 Review the proposal and choose Reject when it should stop.

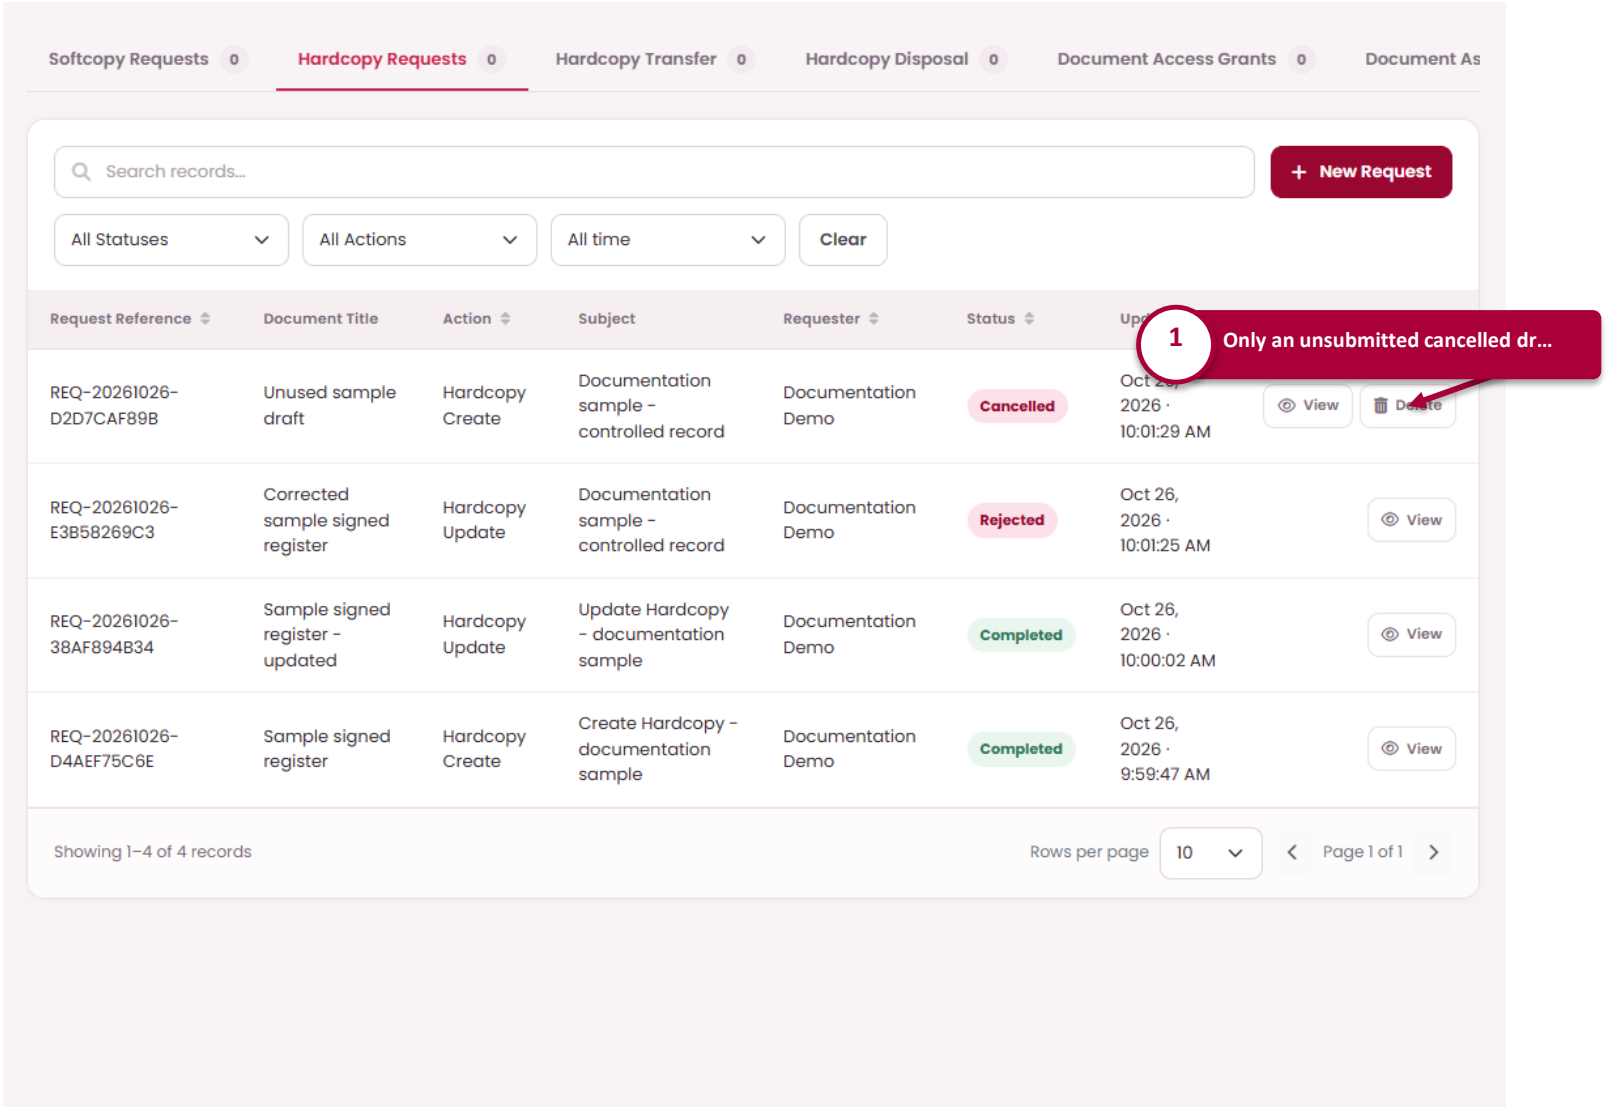

02 Enter an optional Remark that explains the decision.

03 Select Continue to record the rejection.

04 Check Rejected in the request status and read the decision in the activity log.

Rejected proposals are not completed document changes and are not editable returned drafts.

Cancel and, when eligible, remove a draft

WHAT TO DO

01 Open your own Draft in My Requests and select Cancel.

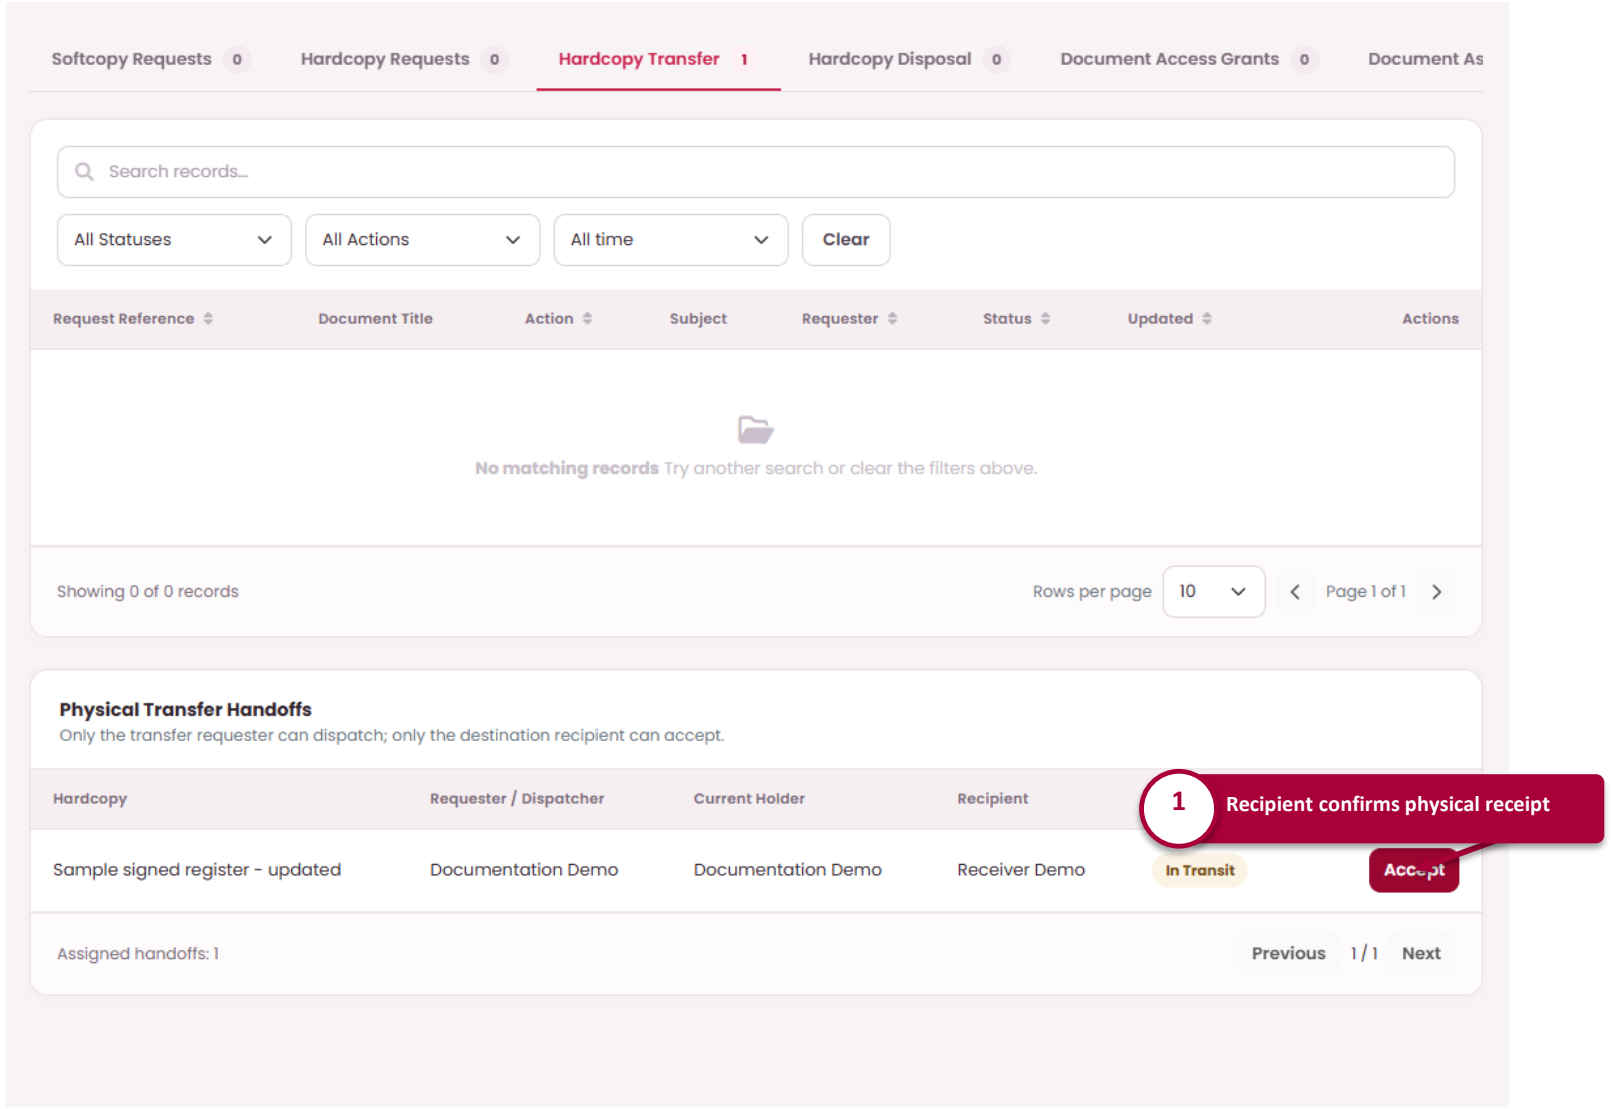

02 Confirm the cancellation and check the Cancelled status.

03 If Delete is offered, check that this is the draft you intend to remove permanently.

04 Select Delete and confirm. Only your cancelled, never-submitted draft is eligible.

Permanent draft deletion cannot be undone. It is not an operation on an approved document.

Dispatch and accept the physical hardcopy

WHAT TO DO

01 Open My Tasks → Hardcopy Transfer and find Physical Transfer Handoffs.

02 Check the document, requester, current holder, recipient, and stage.

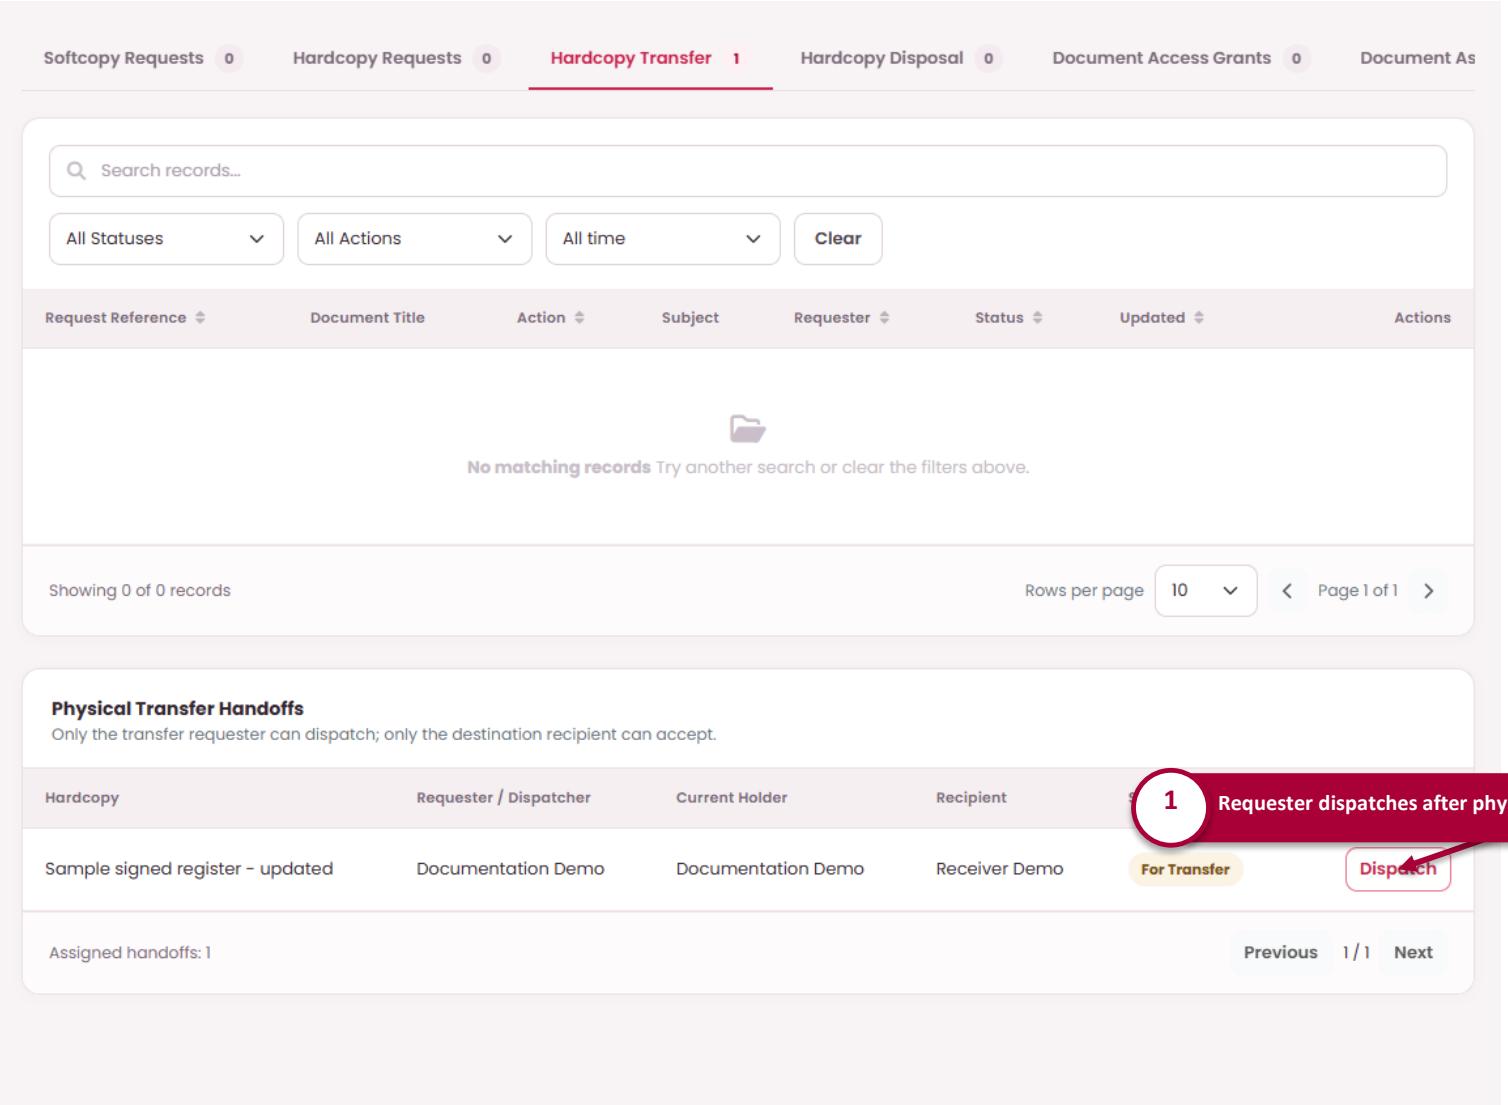

03 The requester selects Dispatch at physical release, then Confirm.

04 After physical receipt, the recipient selects Accept for the In Transit handoff, then Confirm.

05 Inspect the updated holder, location, and Transfer History in Hardcopy Documents.

Only the transfer requester can dispatch. Only the destination recipient can accept.

Record physical dispatch

WHAT TO DO

01 After approval, open My Tasks → Hardcopy Transfer.

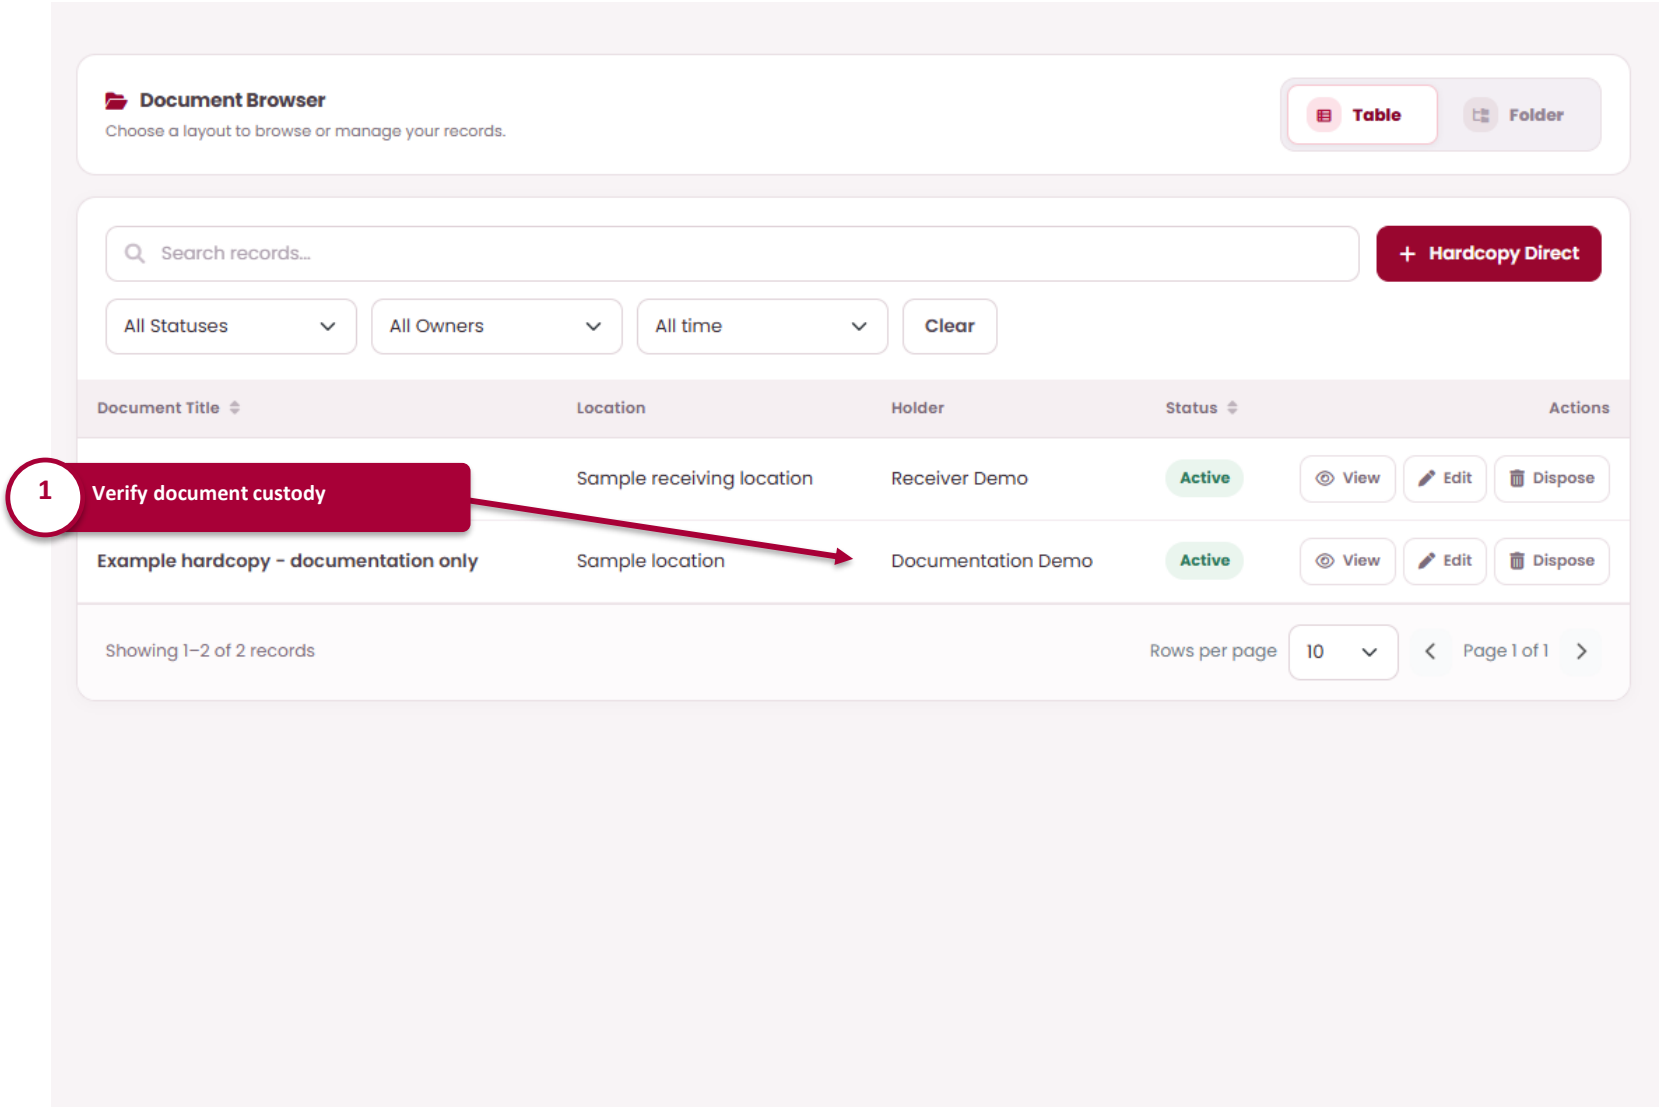

02 The requester locates the intended Physical Transfer Handoff.

03 Select Dispatch at physical release, then select Confirm.

04 Check that the handoff awaits the receiving user's acceptance.

Only the transfer requester can dispatch.

Verify the received hardcopy

WHAT TO DO

01 The receiving user opens the in-transit handoff.

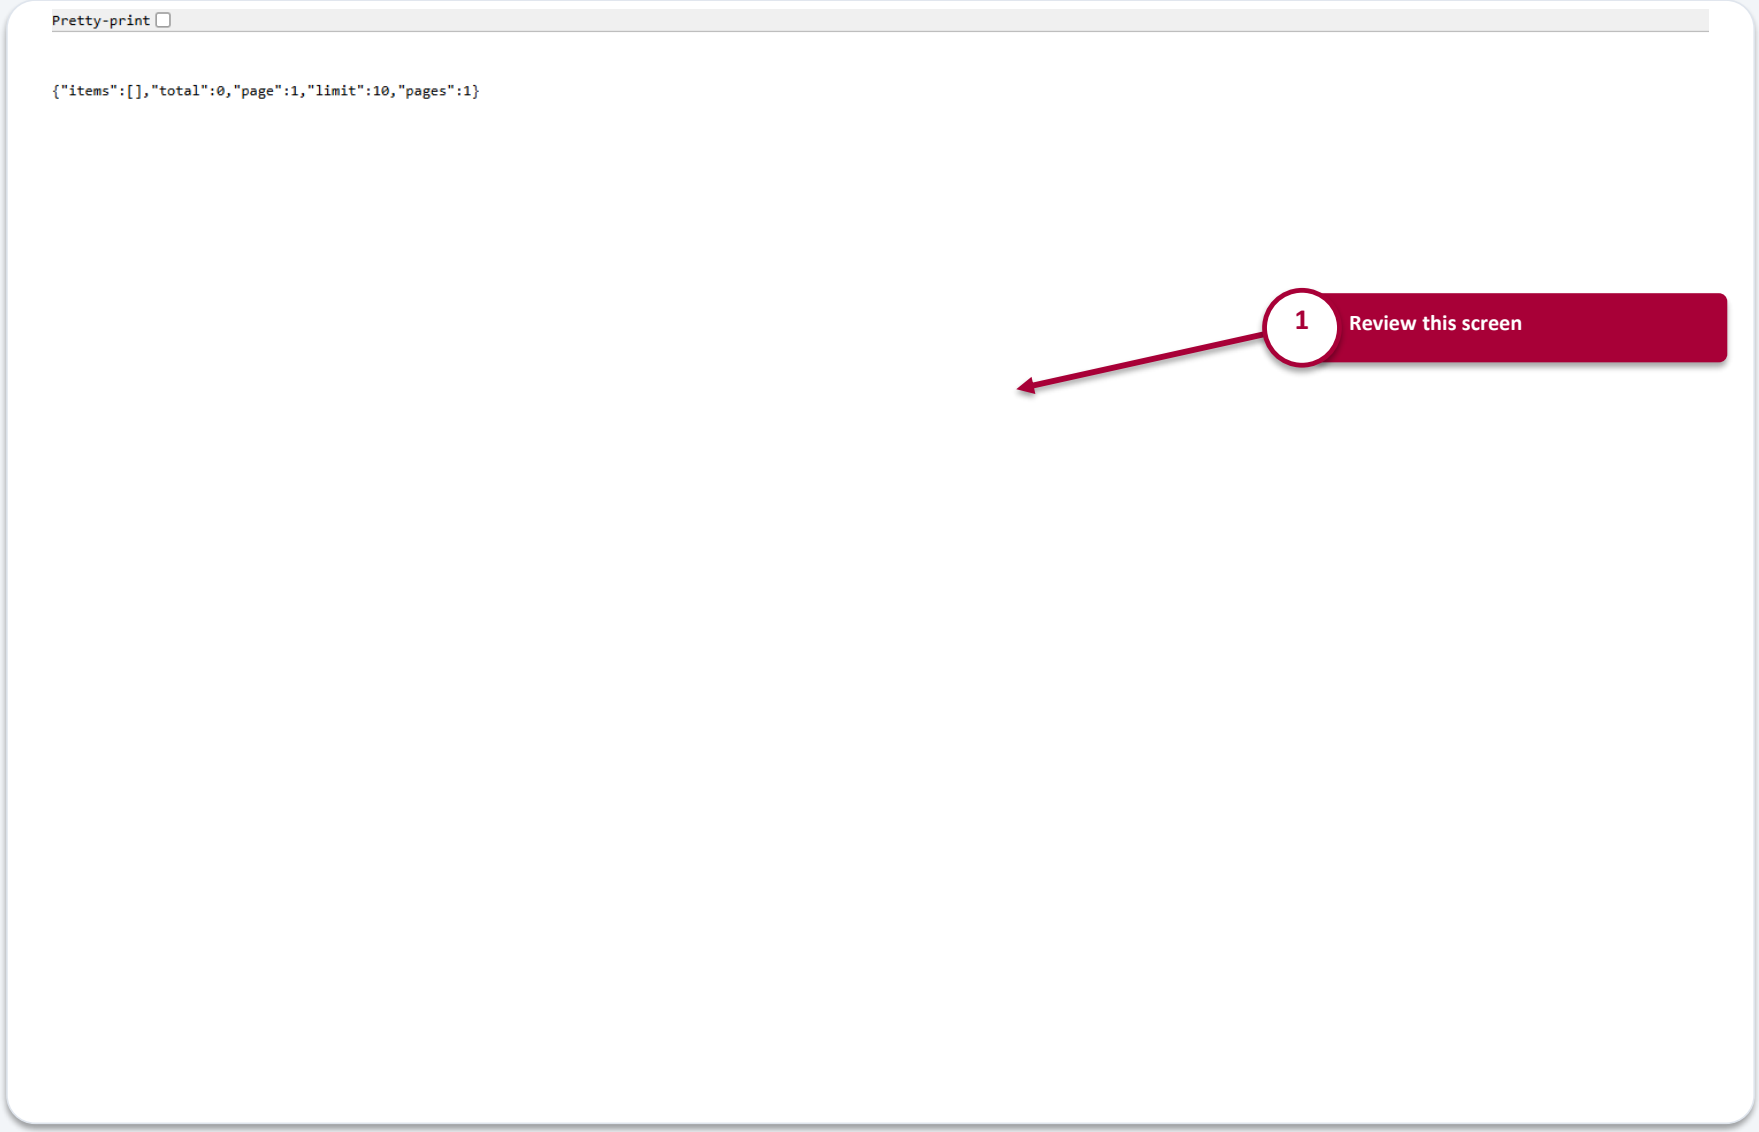

02 After checking the physical record, select Accept → Confirm.

03 Inspect the updated holder and location in Hardcopy Documents.

04 Use Transfer History when confirming the recorded handoff.

The receiving user's acceptance completes physical receipt and updates custody.

Read notifications and approval reminders

WHAT TO DO

01 Open the bell to read Notifications and their Request Reference, title, and approval label.

02 Select an entry to mark that notification read and open the matching My Tasks list.

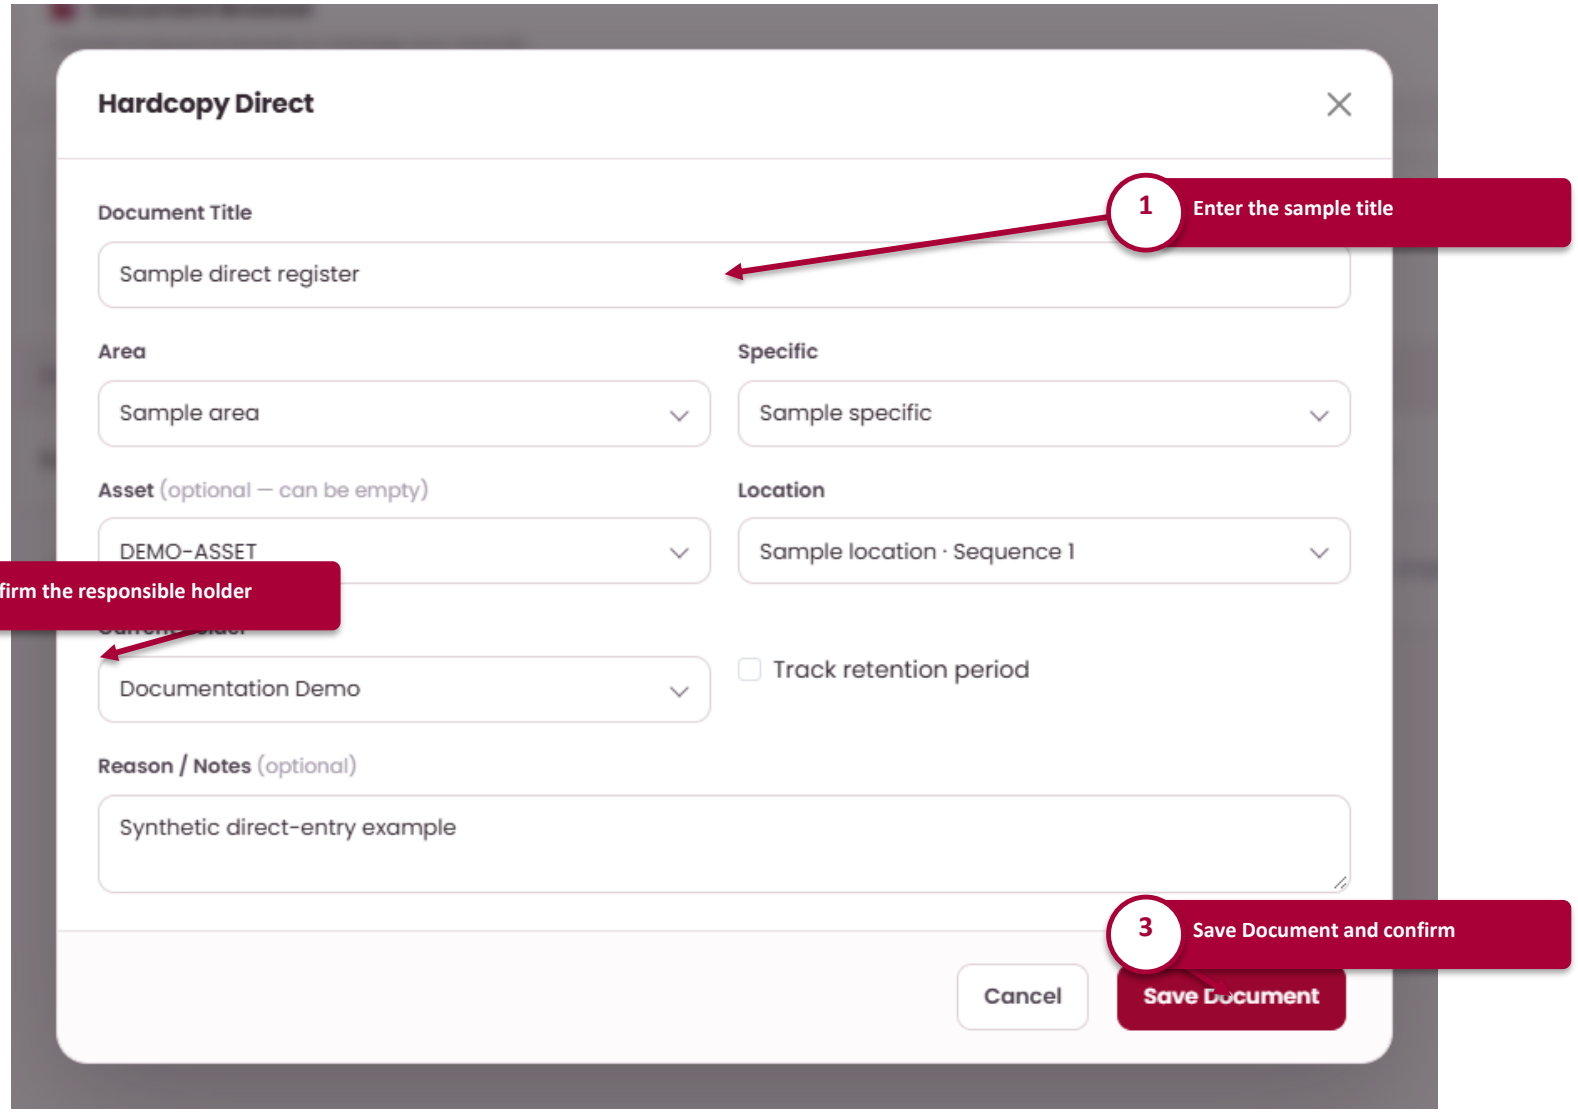

03 Use Previous, Next, and Rows for additional notification pages.

04 If Approval needed appears, inspect its new-task links or select Got it.

05 Use My Tasks to record the actual decision or handoff; reading a notice does not approve it.

Opening the notification panel alone does not mark every item read; selecting an entry acknowledges that notification.

Apply authorized direct document actions

WHAT TO DO

01 Open the permitted document register. Direct actions require the corresponding direct permission.

02 For a hardcopy, select Hardcopy Direct and complete title, storage hierarchy, holder, and optional retention or notes.

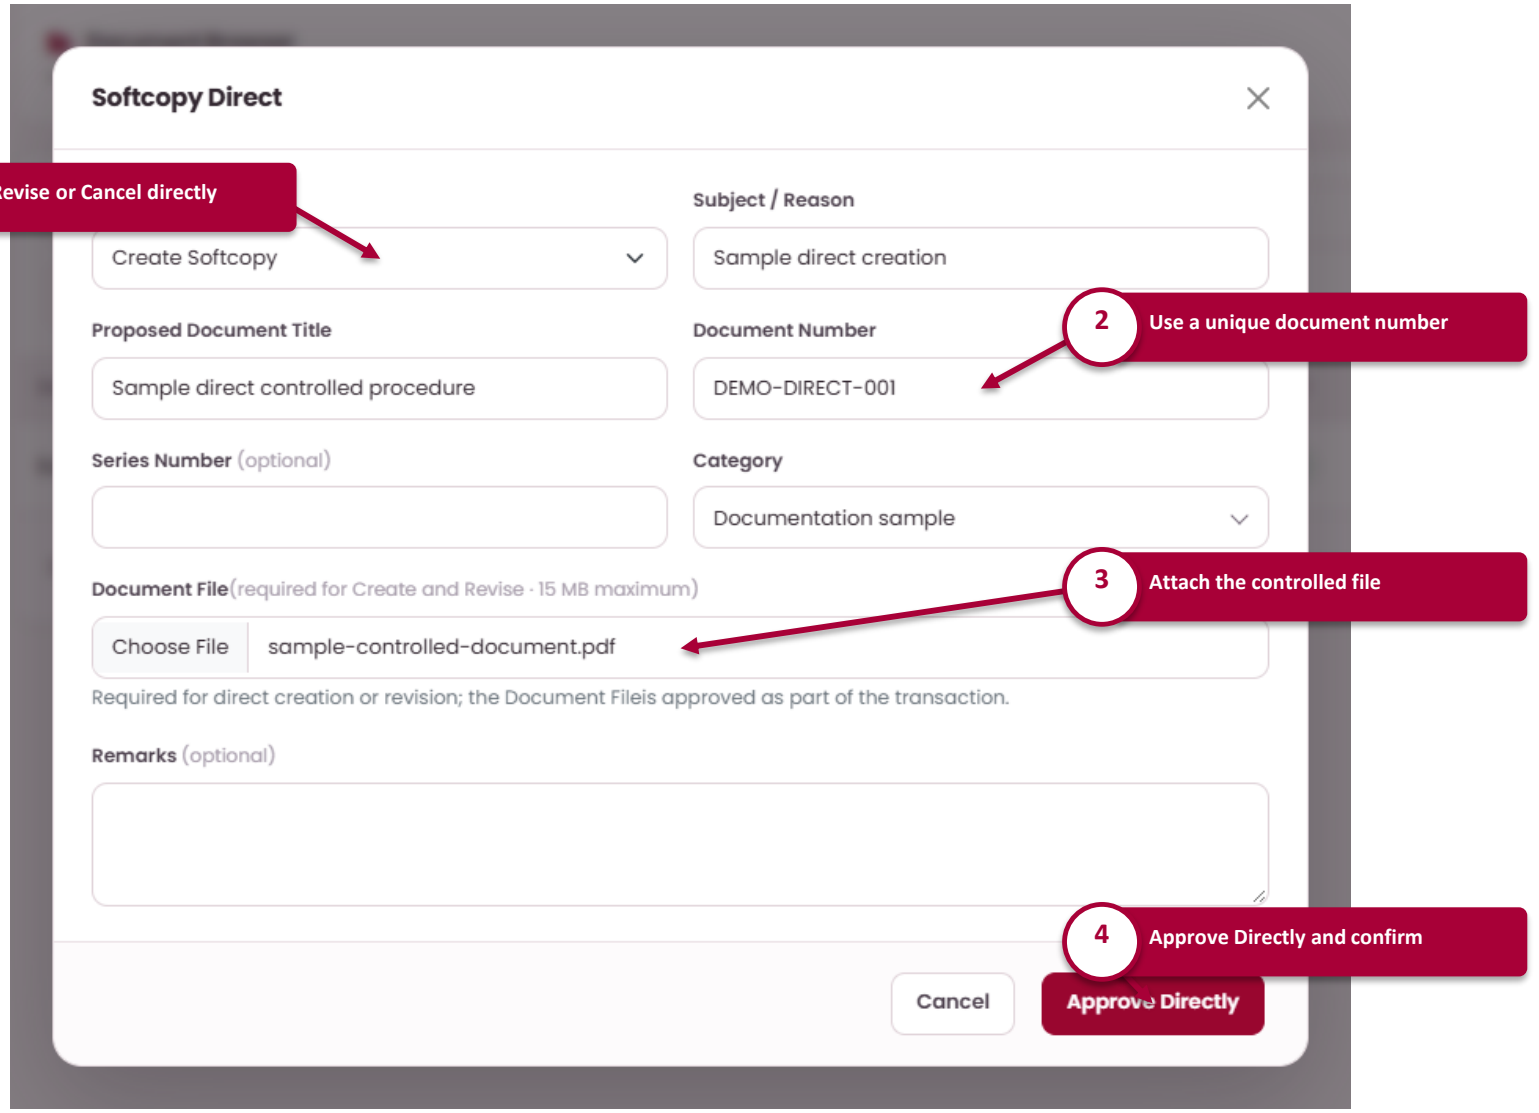

03 Select Save Document → Confirm, then inspect the saved record.

04 For a softcopy, choose Softcopy Direct, select the action, and complete the visible fields; Create and Revise require a file.

05 Select Approve Directly → Confirm. Edit an active record or use Dispose with a disposal reason only when those actions are permitted.

Direct softcopy actions are approved and applied immediately by the authorized operator. Use My Requests when approval through the workflow is required.

Apply a direct softcopy action

WHAT TO DO

01 Open Softcopy Documents and select Softcopy Direct.

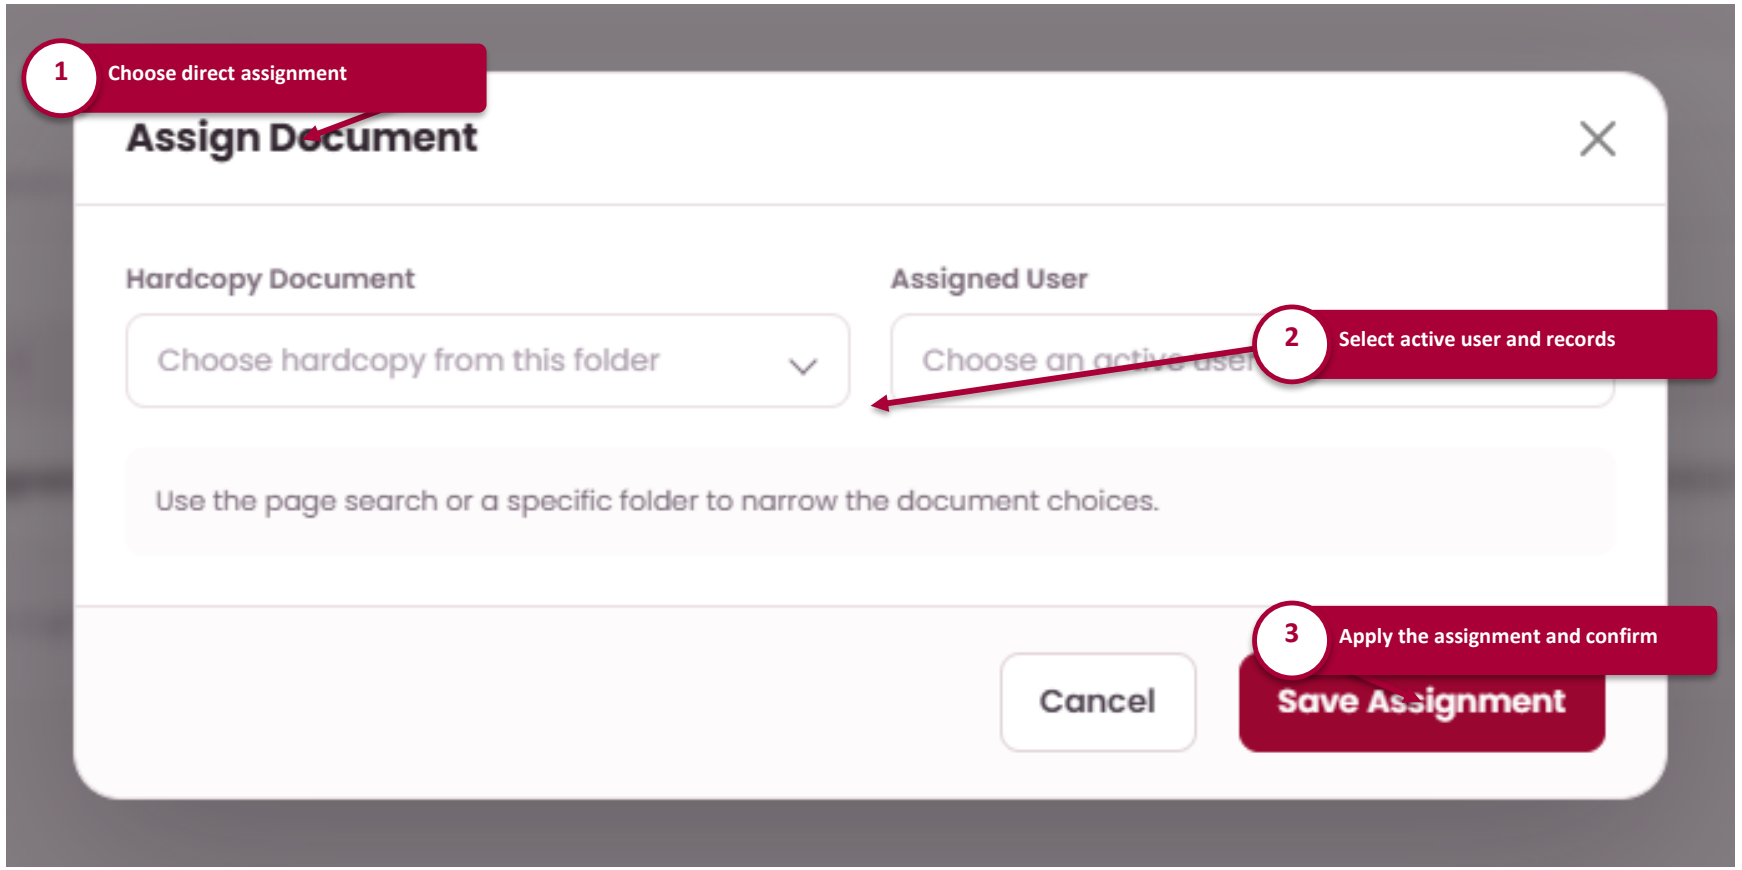

02 Choose Create Softcopy, Revise Softcopy, or Cancel Softcopy.

03 Complete the action-specific fields and attach a file for Create or Revise.

04 Select Approve Directly, then Confirm. Inspect the resulting record.

Direct actions require the appropriate permission and apply the change immediately.

Assign documents directly to users

WHAT TO DO

01 Open Document Assignments and choose Hardcopy / Places or Softcopy / Categories.

02 Select Assign Document, choose the document and Assigned User, then Save Assignment → Confirm.

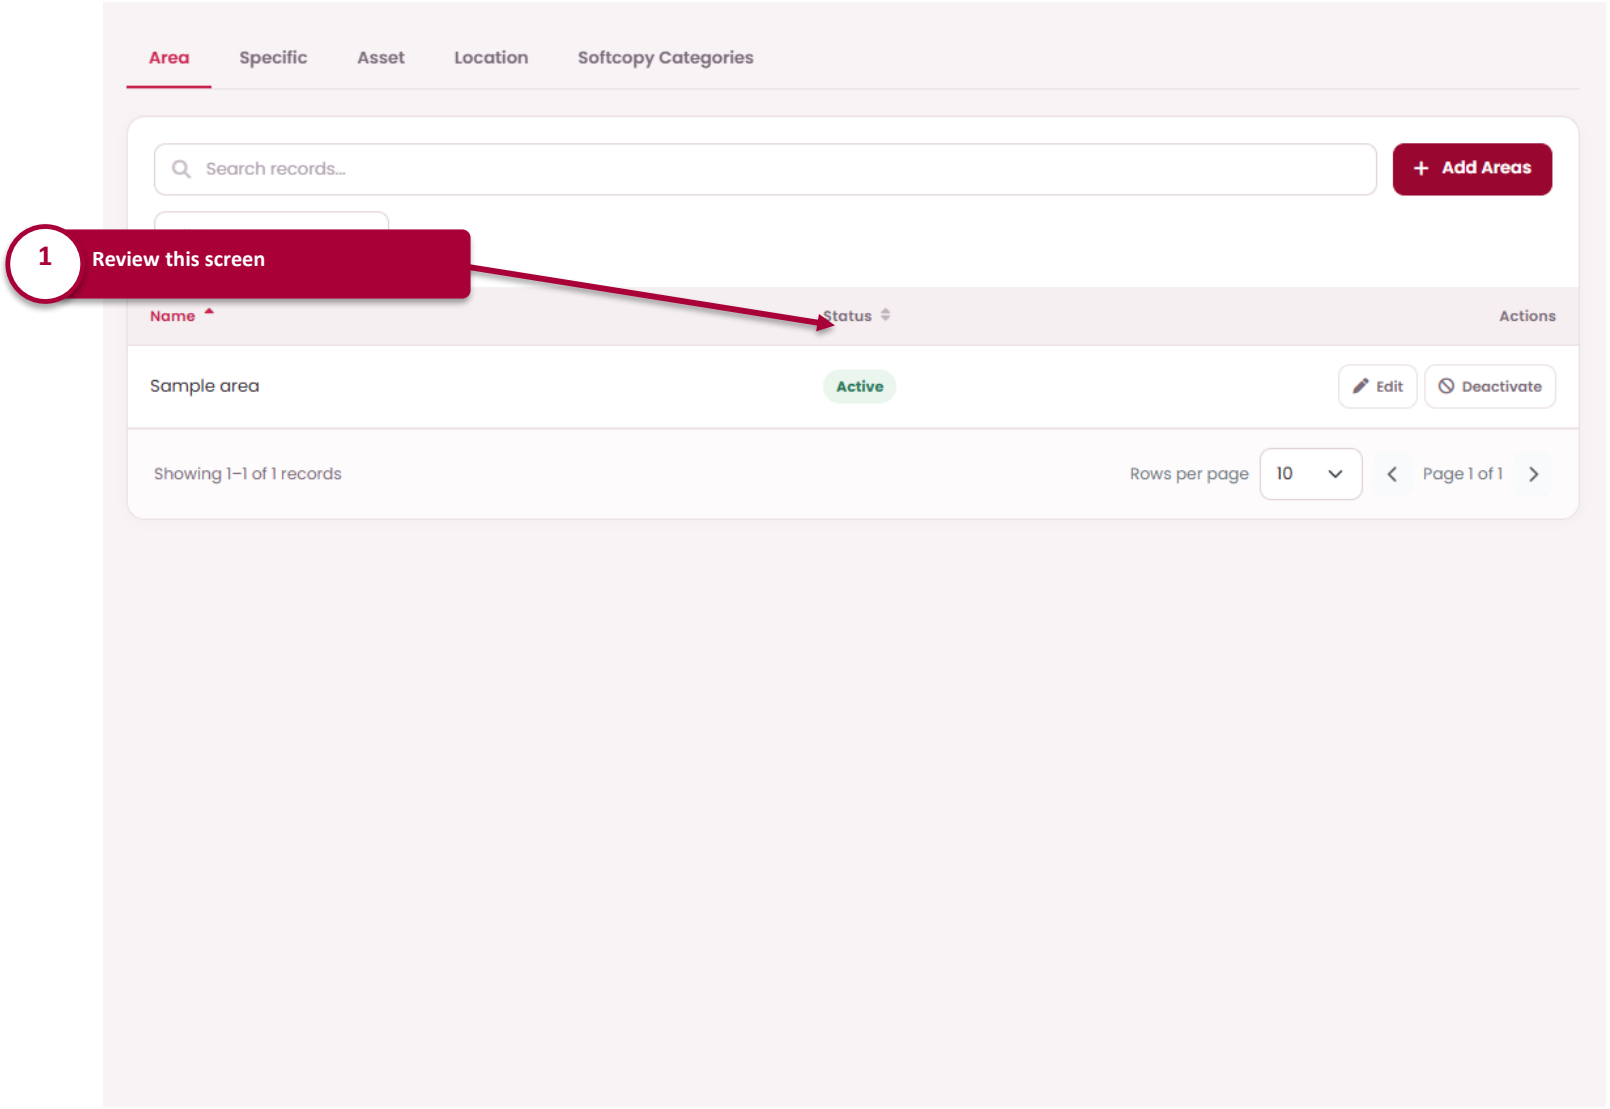

03 Use Edit on an assignment to change its Assigned User; check Document, Assigned To, and Updated.

04 For a bulk hardcopy assignment, select Location and Assigned User, then Assign All → Confirm.

05 For softcopies, select Category / Subcategory and Assigned User, then Assign All → Confirm; subcategories are included.

This page applies assignments directly and requires direct assignment permission. Approval-based assignment requests remain in My Requests → Document Assignments.

Maintain places and softcopy categories

WHAT TO DO

01 Open Setup Places and choose Area, Specific, Asset, Location, or Softcopy Categories.

02 Use Add or Edit. Maintain Area → Specific → optional Asset before selecting Location.

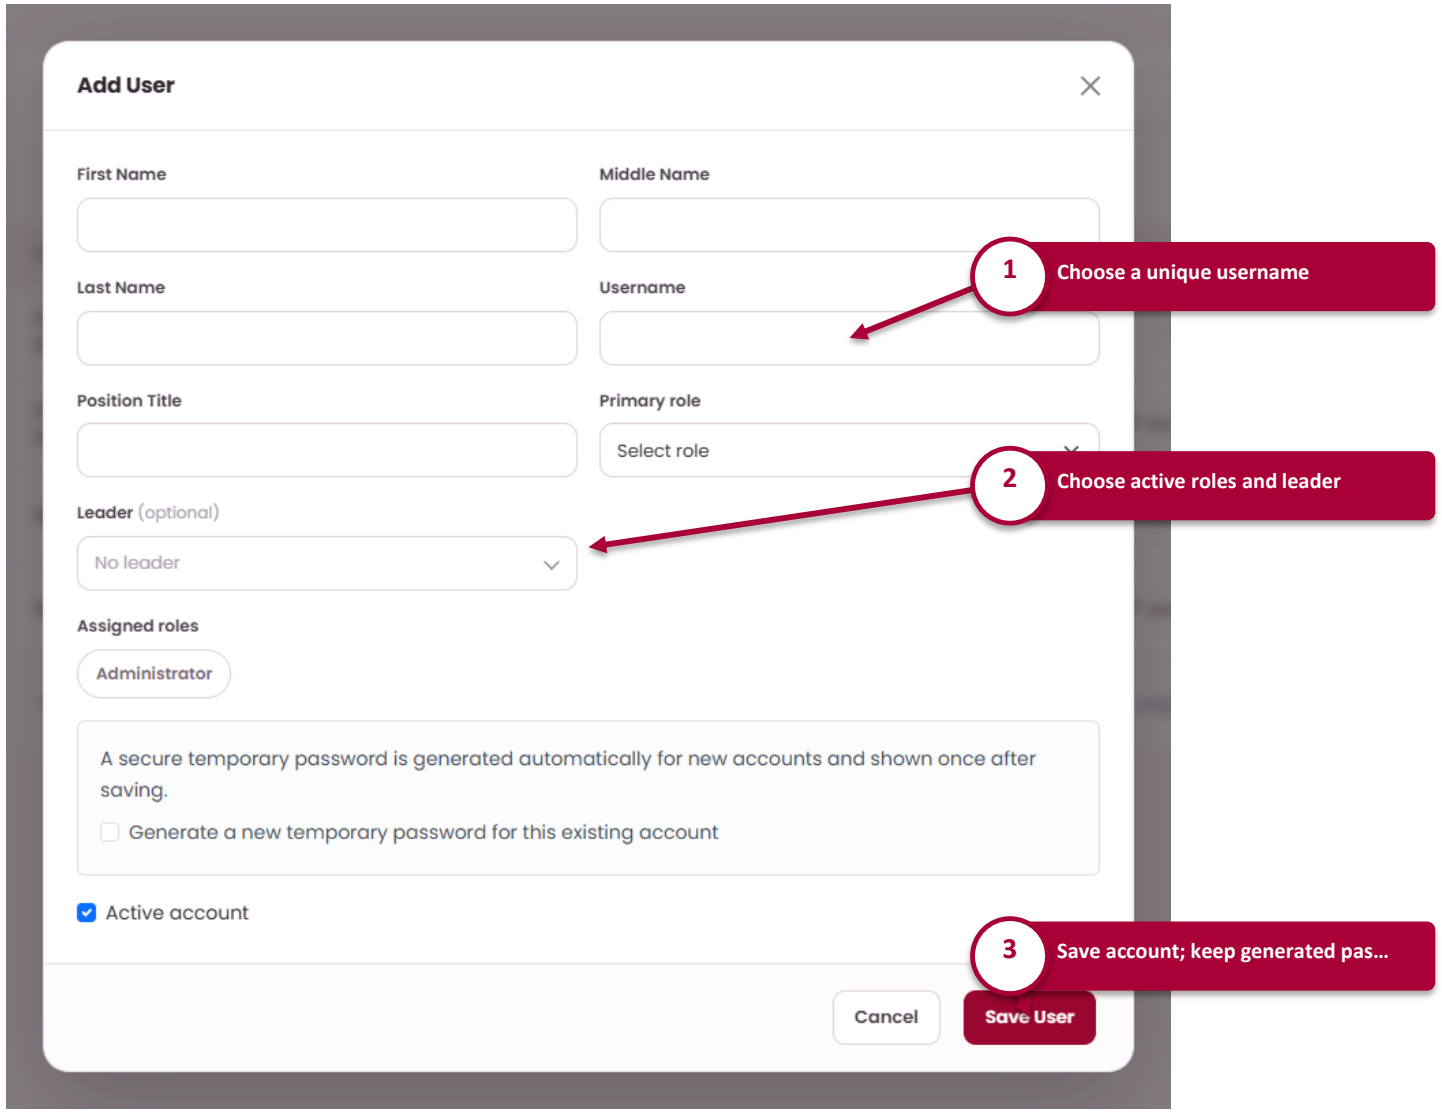

03 For Location, enter Location Name, Area, Specific, optional Asset Number, and optional Sequence or Archive Date.

04 For Softcopy Categories, enter Name, Folder, optional Description, and Parent for a subcategory.

05 Check Active, then Save Record → Confirm. Deactivate an unused reference item to preserve its historical links.

Only tabs and actions permitted for the current account are shown.

Create and maintain user accounts

WHAT TO DO

01 Open User Management and select Add User or Edit an existing eligible account.

02 Complete First Name, optional Middle Name, Last Name, Username, and Position Title.

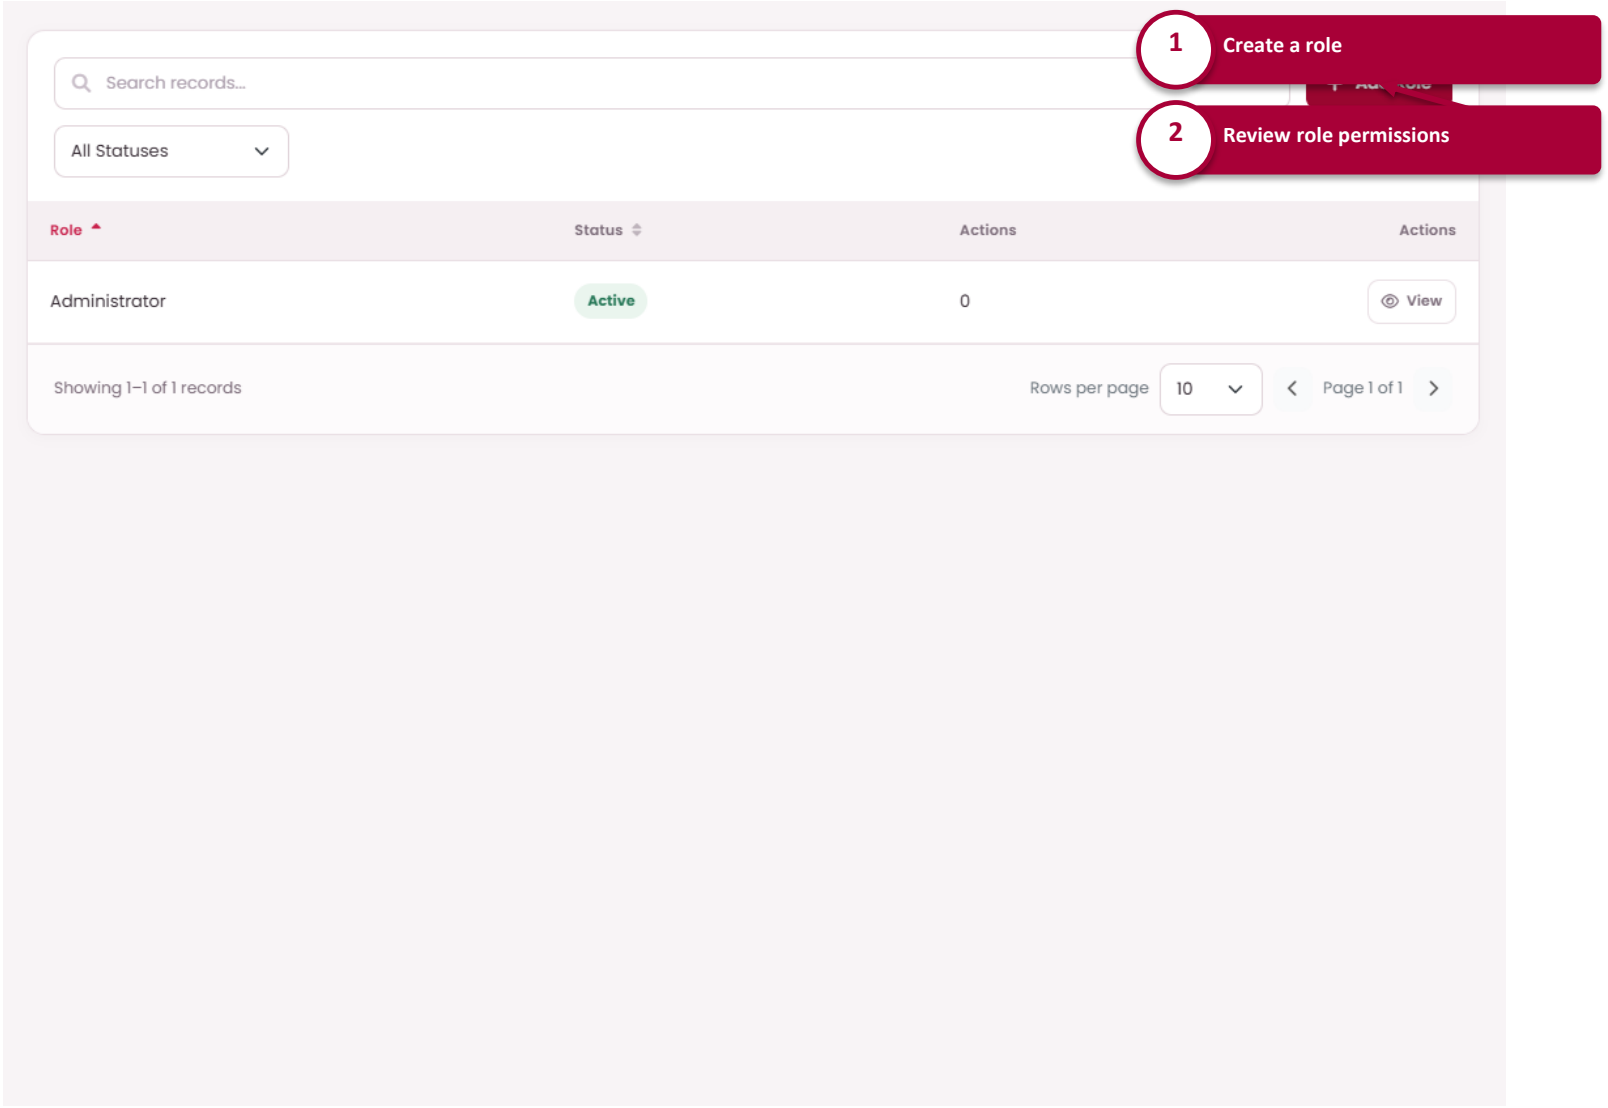

03 Choose Primary role and Assigned roles; select an optional Leader when the workflow needs one.

04 Check Active account, then Save User → Confirm. New-account credentials appear once; share privately with the owner.

05 Use Generate a new temporary password for a reset, Deactivate to disable an eligible account, or Assigned Documents to inspect assignments.

The generated temporary password is displayed once after saving. The user must replace it before accessing protected modules.

Maintain roles and permissions

WHAT TO DO

01 Open Roles & Permissions; search or filter to find the role.

02 Select Add Role or Edit and enter Role Name; check Active role as appropriate.

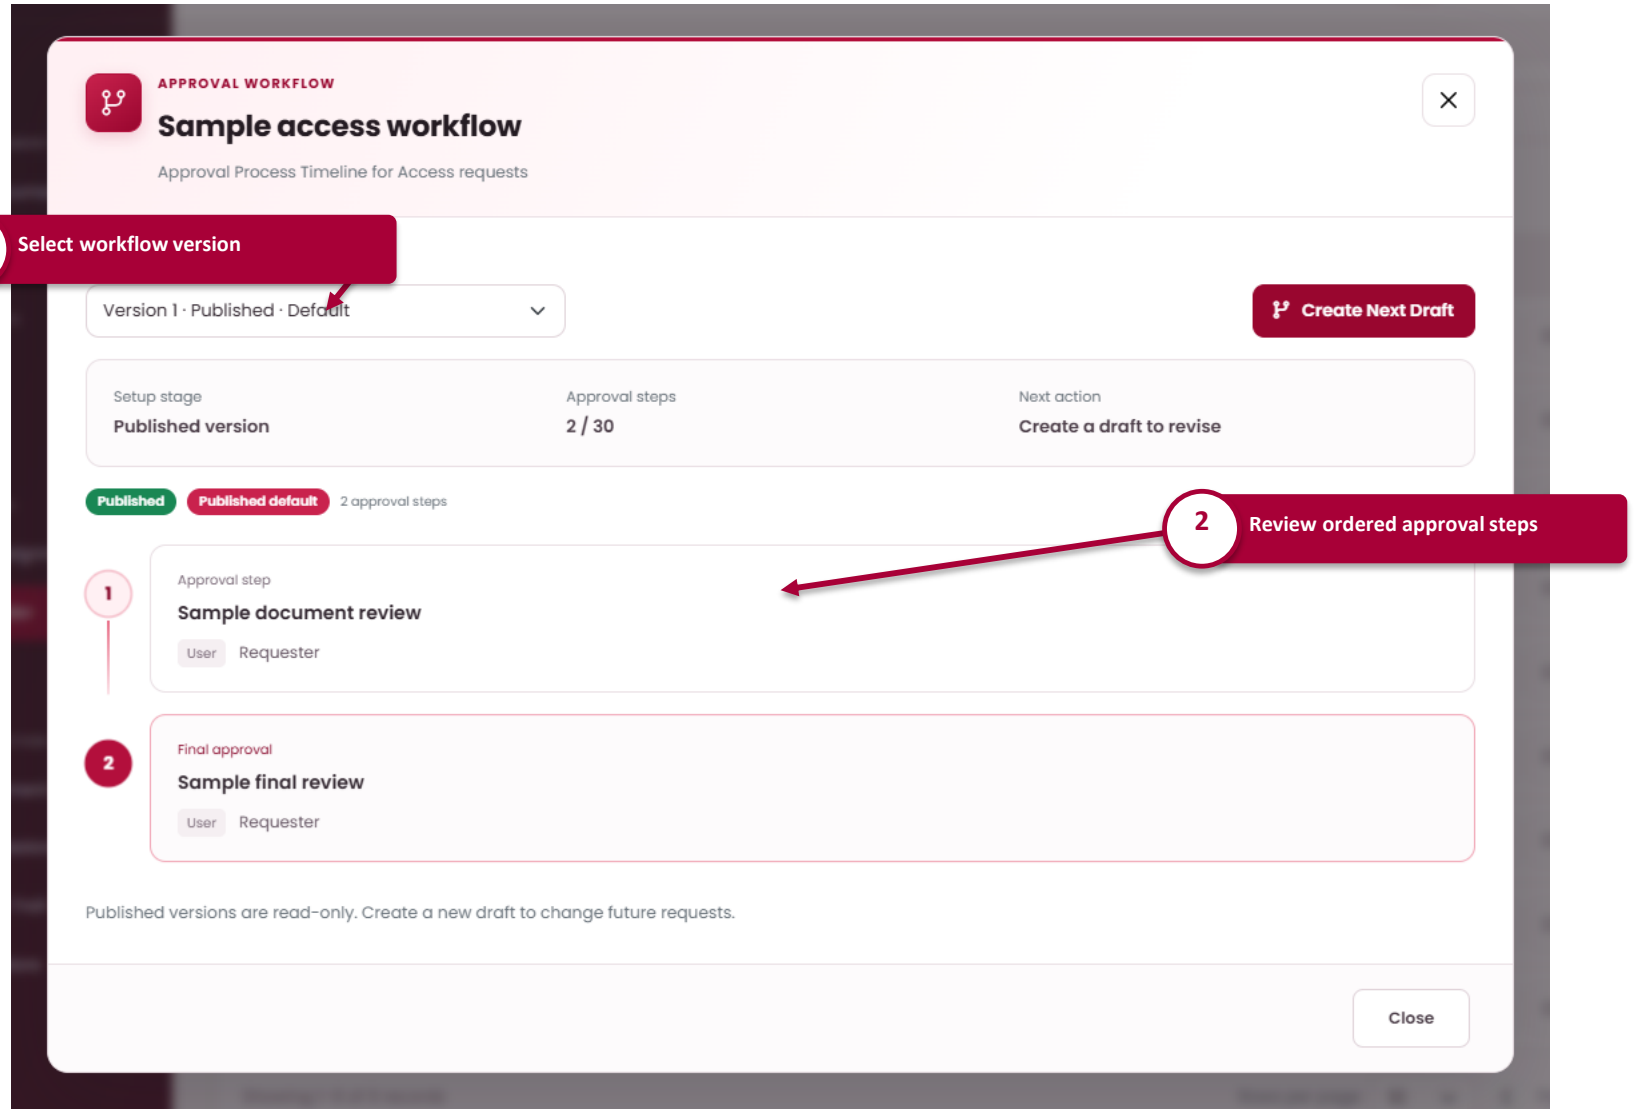

03 Under Module Permissions, select only the actions needed for this role.

04 Select Save Role → Confirm, then assign the role to users in User Management.

05 Use Deactivate or permanent Remove only when offered for an unused role, and read the confirmation carefully.

Permissions control both visible menus and individual actions such as direct changes, requests, downloads, and printing.

Configure and publish approval workflows

WHAT TO DO

01 Open Workflow Builder, find the Request Type, and open Steps. Use Workflow Version to inspect the route.

02 Select Start First Draft or Create Next Draft; published versions are read-only.

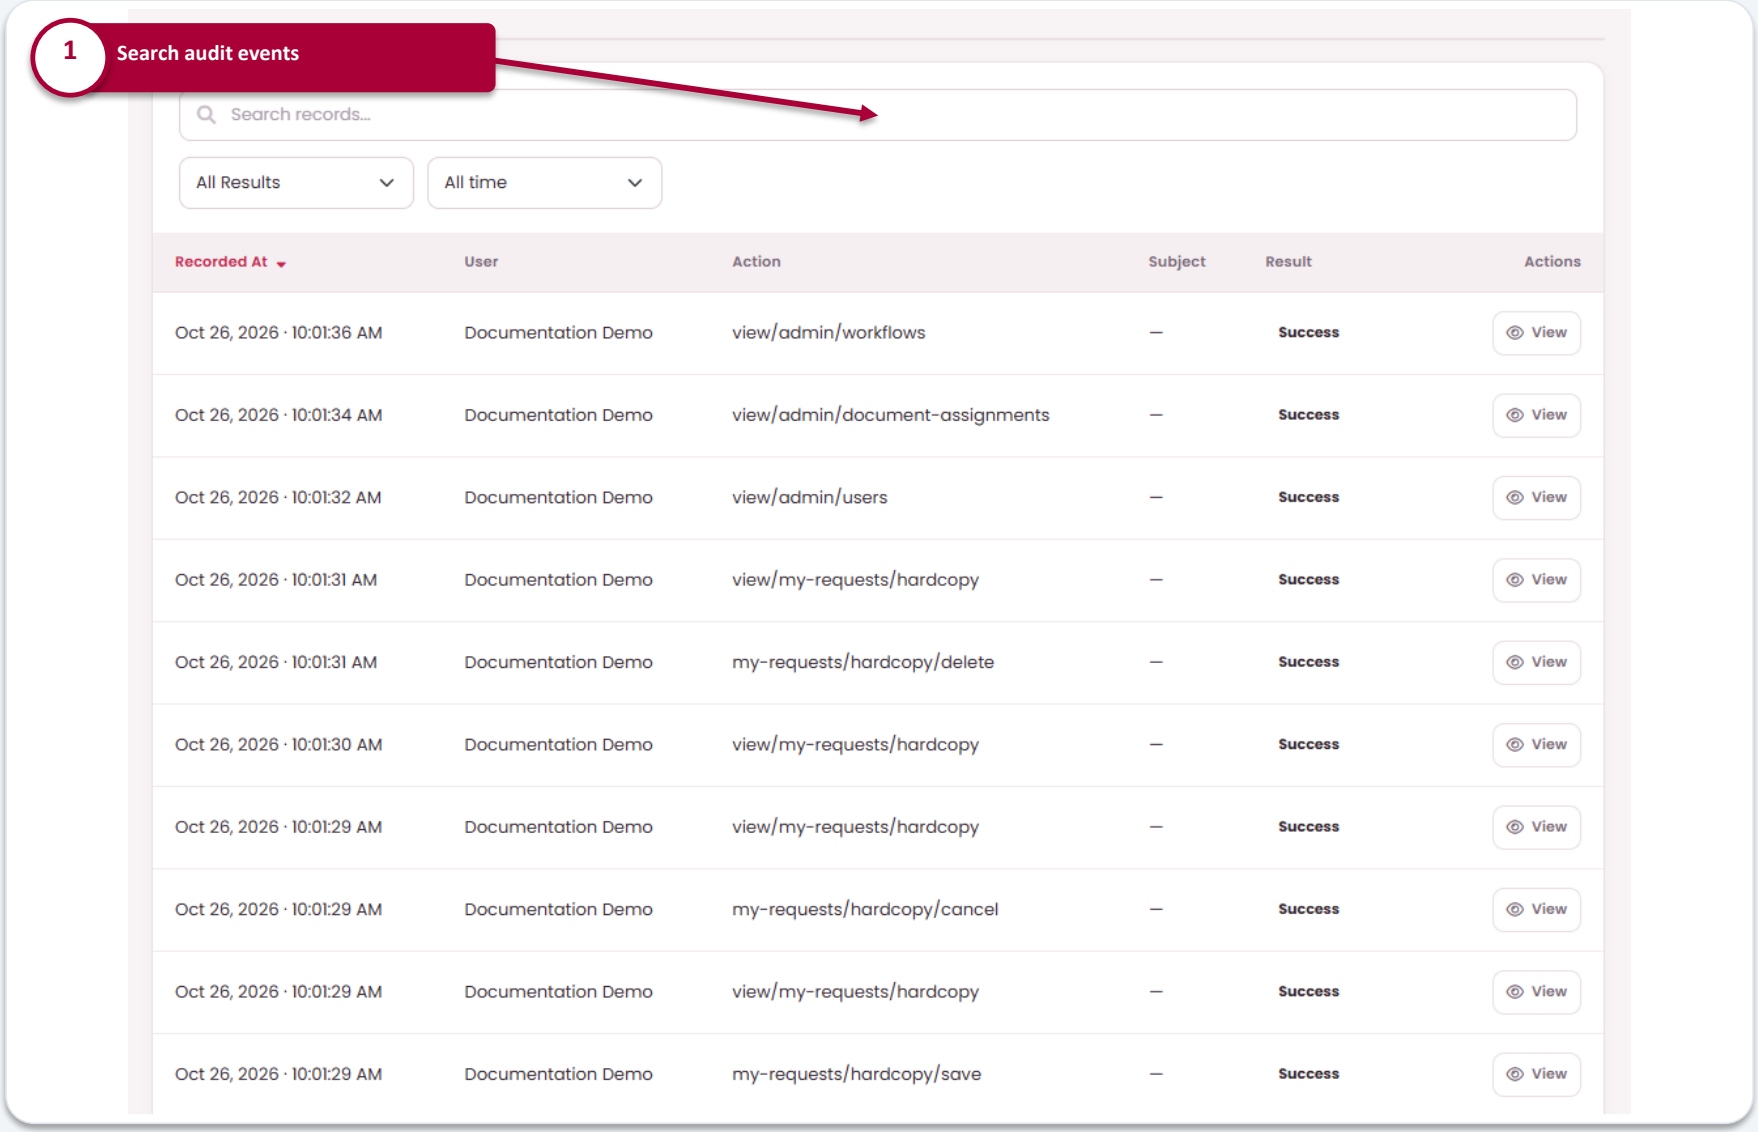

03 Add Approval Step, enter its name, and select a role, specific user, Requester's leader, or Requester account; Save Step → Confirm.

04 Edit, move, or remove draft steps until the order is correct, then Validate & Publish → Confirm.

05 Check the published default. Future requests use it; existing submitted requests keep their original approval timeline.

A workflow supports up to 30 approval steps and needs an approval route before publication.

Inspect the Internal Audit Trail

WHAT TO DO

01 Open Internal Audit Trail and search for the relevant user, action, or subject.

02 Filter All Results, Success, or Failed and choose the required date period.

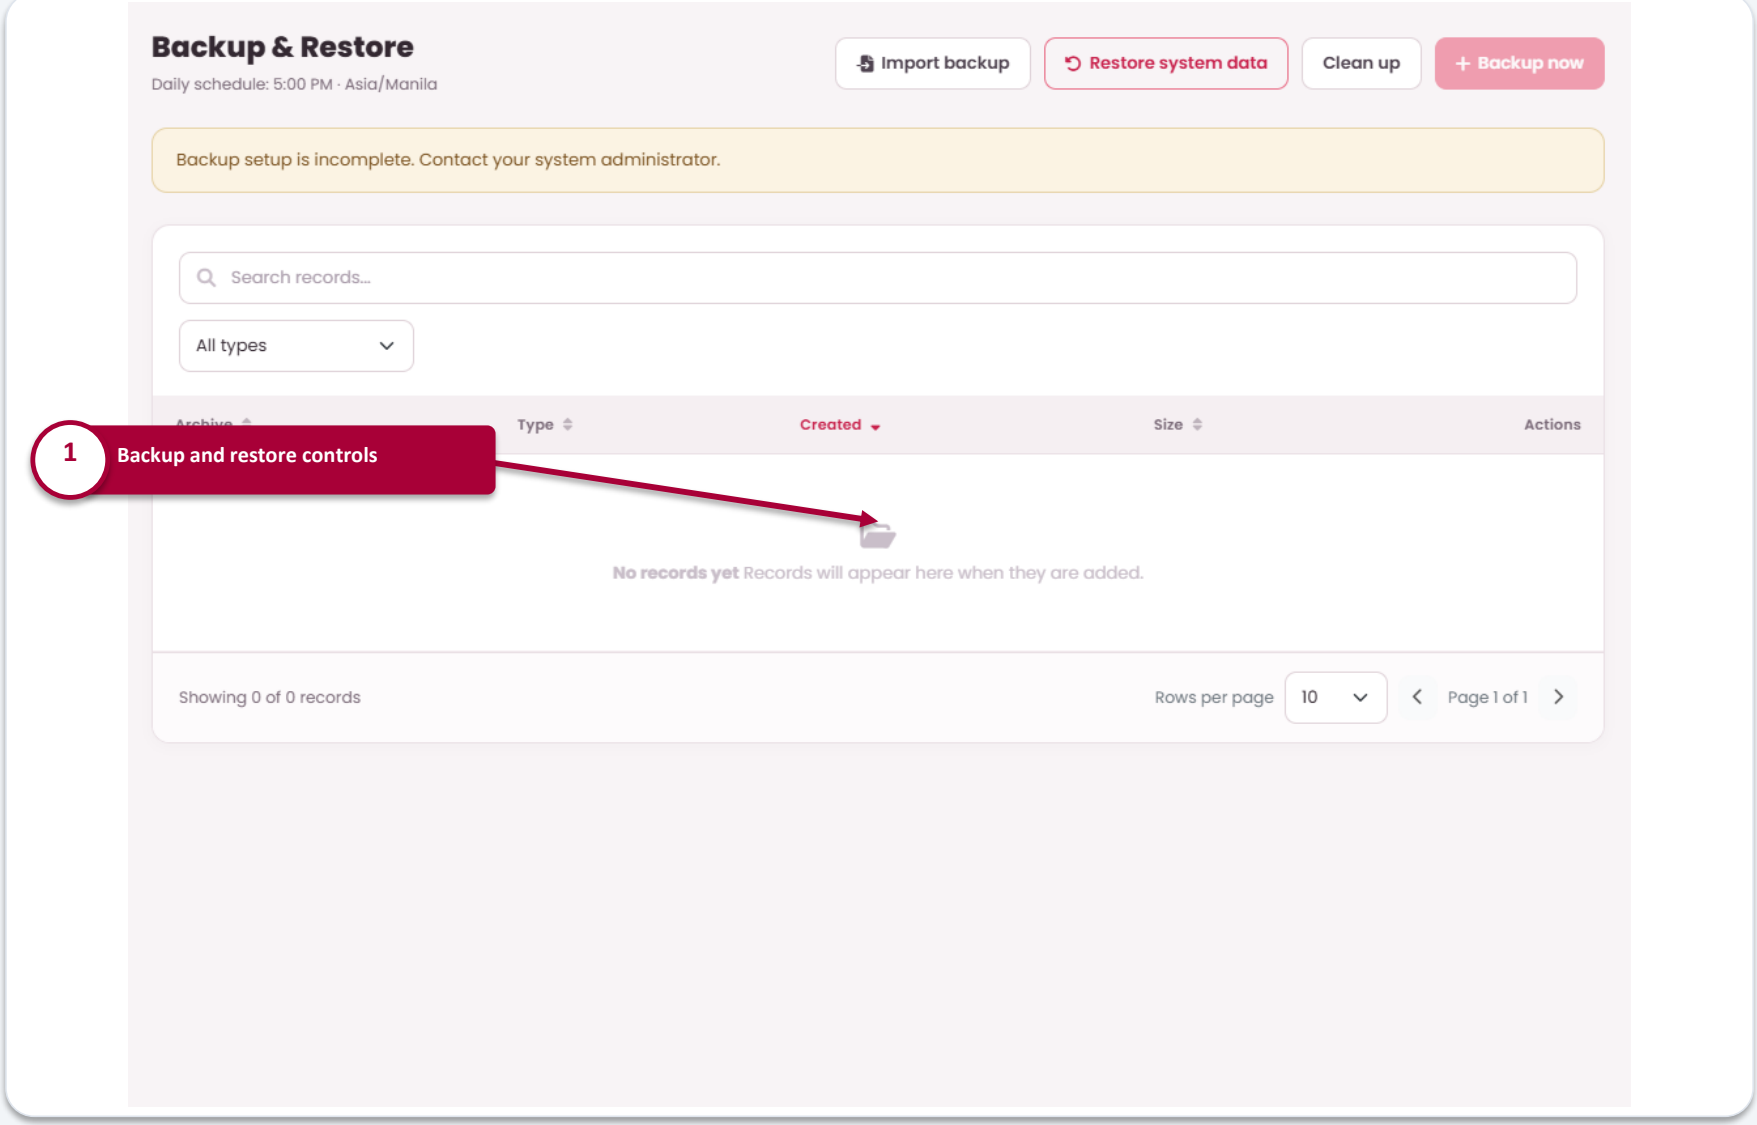

03 Read Recorded At, User, Action, Subject, and Result.

04 Open View for Audit Event details, including User ID and recorded Details; select Close when finished.

05 For document-specific evidence, also inspect its Approval History, Related Requests, or Transfer History.

The audit page is a read-only inspection screen; it does not provide an edit or delete operation for audit events.

Back up, import, and restore system data

WHAT TO DO

01 Open Backup & Restore; check readiness, the stated schedule, and Last automatic backup.

02 Select Backup now → Confirm to create an encrypted manual backup; inspect or download the resulting archive.

03 Use Import backup, choose Backup ZIP, then Import backup → Confirm to verify and store an existing archive.

04 To restore, select Restore system data, choose Backup to restore, enter Your password, and type RESTORE; then Restore selected backup → Confirm.

05 Use Clean up → Confirm to remove backup and log archives older than three months.

Restore replaces live records and private files; the interface states that a recovery backup is created first. Perform it only as an authorized administrator following the organization's recovery procedure.

Interface evidence and source references

Each module slide includes precise source paths and line references in its speaker notes. The guide follows the existing interface and verified demonstration flows.
